The "little bastards" comment is available on a LP of out takes and bloopers
that I have stashed somewhere. (gee how long has it been since I used a
TURNTABLE?) If I can find it, I will post the info here.

Mike Warf, who has a show broadcast here in cincinnati and carried on both
commercial and non commercial stations might laso be able to show some light on
this. WVXU 91.7 from Xavier University here in Cincinnati carries his show.

The actual broadcast itself appears on the Kermit Scaheffer (sp?) Best of Bloopers Album from the 60s. It sounds scratchy as if from a transcription disk and therefore sounds authentic.

I have the album at home and I'll check who it was who made the blooper.

3. Duopoly comes to Buffalo

Newsgroup: rec.radio.broadcasting
Date: 1994-01-02 06:37:26 UTC
From: spt@acsu.buffalo.edu
Message-ID: <2g5q36$gtc@vixen.cso.uiuc.edu>
Source record: 41608

Well, the duopoly bug has hit Buffalo radio in a big way. First, WBUF-FM owned by the Lincoln Group was purchased by Pyramid, owner of WHTT FM-AM (oldies 104). WBUF is a soft rock station that was once one of the top stations in Buffalo but fell on hard times in the last couple years. Numerous staff changes and adjustments to the music format have been little help.

This is the second deal involving Lincoln and Pyramid recently. Scott Fybush reported that Pyramid was selling WHTK-AM (formerly WPXY-AM) to Lincoln, owners of WHAM-AM, WVOR-FM and another FM (all stations mentioned are located in Rochester NY).

This was a small deal compared to the one announced yesterday in the Buffalo News. Keymarket Communications Corp of Georgia which recently purchased WBEN-AM (News/Talk) and WMJQ-FM (AC) from a local owner for some $10 million has agreed to purchase WWKB-AM (Talk/Sports) and WKSE-FM (Top 40) for $5 million from Price Communications. The deal will give Keymarket a 23% share of the Buffalo audience.

WBEN, a legacy station on the air since 1930 is a news powerhouse. It is also home to Rush Limbaugh, Gill Gross and Jim Bohanen. It is the number one station in the market with a 10 share of the 12+ audience.

WKSE-FM (Kiss 98.5) is 8th in the market. WMJQ-FM (Magic 102, formerly WBEN-FM) is 10th. WWKB-AM, a 50,000 watt station heard throughout the Northeast United States is 14th in the market. It is the home of Howard Stern, G. Gorden Liddy and sports programming. KB was a Top-40 powerhouse in days gone by and is considered one of rock radios pioneers. Under Price Comm. ownership, it saw its entire on-air staff fired and replaced by satellite music, then business news and now talk/sports.

Price paid $4.89 million for KB and Kiss in 1985. The low return on its investment was no doubt due to its bungling at KB.

No staff cuts or format changes are in the works according to the article even though sales depts. will probably be combined and downsized.

I forsee a return to local news on KB with WBEN supplying it. This also could mean some big changes in the home of local sports teams. Keymarket may want to bid for the Buffalo Bills and put them on KB's 50kw signal instead of WBEN's 5kw. Same for the other local teams currently all heard on WGR-AM.

4. commercial radio exams

Newsgroup: rec.radio.broadcasting
Date: 1994-01-02 06:37:27 UTC
From: rhalprin@nyx.cs.du.edu
Message-ID: <2g5q37$gtd@vixen.cso.uiuc.edu>
Source record: 41609

This will follow-up my posting of October 11, 1993, concerning
commercial radio exams. Please note that the Hartford Connecticut
affiliate of National Radio Examiners will administer a
commercial radio exam session (under the now privatized system)
on Saturday afternoon, January 15, 1994.
Testing for FCC elements 1 & 3 (General Radiotelephone Operator license)
will be given on that date.
Seating at this particular exam venue is limited, so any
potential examinee should contact me first for more information
if interested in taking the exam(s) on that specific date.
Future exam opportunities for FCC elements 1 & 3 (as well as
the other elements as they come on line) will be either on
a quarterly or monthly basis -- to be announced.

Happy new year!
Robert Halprin, NRE Test Center Manager, Hartford CT,
tel: 203-722-2358. E-mail: HALPRINR@CCSU.CTSTATEU.EDU or

Could someone here please e- e-mail me the address for the FCC? My e-mail address is: burtonb@ucsu.Colorado.edu. I need to ask them a question about TCI Cable's requirement to air somesort of public access channel. I think they are breaking these regulations in the Denver-Boulder Colorado area, and as the Music Director at a public access radio station I am VERY peeved at TCI to say the least! I would appreciate any info anyone could send. thanks!

6. Radio Garth - is this for real?

Newsgroup: rec.radio.broadcasting
Date: 1994-01-02 06:37:38 UTC
From: northcot@med.unc.edu
Message-ID: <2g5q3i$gth@vixen.cso.uiuc.edu>
Source record: 41611

A station in the RDU area, formerly lite rock and more recently a much-appreciated adult rock blend (REM, Costello, Bush, squarley between college and top 40) at midnight on New Year's, switch to what sounds like a satellite feed called "W-Garth, All Garth Brooks All the Time". I actually heard it happen but had no forewarning. Is this a growing format? It is a transition? What has been its shelf life in other markets? And most importantly IS THIS FOR REAL???

7. Can You help me?

Heips!

I'm a DJ from Estonia - as some of You may know by now.

Anyway, I am starting a all night show in our station (starts friday evening at 10PM and ends at saturday morning at 7AM).

I have some ideas what to do on the air - competitions, "ordering songs", greeting someone, ..., but what else.... Can You give me some good (unusual?) ideas and e-Mail addresses of various information. (I recieve for example Billboard Charts each week, but them I cant use - they are "only for private and educational use" (or something like that). It is distributed like any list - I subscribed and it keeps coming. So, where and witch kind information I could also recieve via e-Mail ????

If You know any such place, contact me: alar@el.ee .... Please!
(feel free to forward this message to any other music related list)

alar@el.ee - one of the shortest e-Mail addresses in the world! :-)

There are two interesting things to come out of the NBC series this week on the "Information Highway." I saw only a couple of them, but noted the address for the program is nightly@nbc.com

Also, in the Thursday report on voice recognition, the report filmed at a state of the art voice recognition firm. As the man dictated, on camera, to the computer about something being done " ... on voice mail ... " the crt printed out " ... envoy smell ... "

I, too, am an Osgoood fan sorry to see him selling products, BUT...
let's not forget that this is nothing new. Barbara Walters used to do
ads for the Cotton industry when she was with NBC's _Today_, as did
Dave Garaway (sp?). And who can forget John C. Swayze's Timex ads?
While the principle of journalists divorced from advertising exists,
multiple examples, local and national, have existed for years.

Going with your logic here, wouldn't they write letters to the FCC anyway
with the 'junk' format, since it's a 'format' change (5 songs) nonetheless?
Or maybe they wouldn't do that, since this 5-song format is still in the
variety sense.

>over and over and over...

Yeah..What happened to b104? Infact, what haspened to top 40? IT was a good mix of music...Even though there is a lot of wrap on the scene now, it's sad because I can't find a station that plays a 'true' mix of music...if they call the mix/variety stations by those names, t3ey should at least play a decent mix.

WSTW 93.7-FM says "Better music, and more variety." When I heard this, i thought, "Not another one!" But this station plays a very good mix.,.Stp followed by Proclaimers, followed by whitesnake, followed by pm dawn, etc, etc. Also, they throw in a 70's feel-good hit as well. Why isn't radio this way anymore?

<back to the subject:>

When (in a former life ;) I was a color TV tech in Chauncey, Ohio, the redneck bar next door used to play Tanya Tucker's, "When I Die," and Queen's, "Fat Bottom Girls," 8 hours a day, 5 days a week. At least one of those "classic" tunes would come up in rotation during my weekend shifts at WMNI, in Columbus, but I can't say they grew on me in any way, except like fungus. ;)

It's probably a lot simpler than that. Perhaps some nipplehead wannabe programmer who thinks that the key to success in radio is to annoy the hell out of EVERYONE to insure that they know you're there. Don't worry, whoever is behind it will probably get his creative staff fired, and the format (if it ever existed) will disappear.

There's a certain irony to all of this. In these days of tightly circumscribed formats, on how many radio stations would you hear, over the course of an hour, an up-tempo standard pop song, a heavy metal song, a country song, a rap song, and a slow standard pop song? What the "variety" or "mix" stations play is a lot of different records, but all of which fall in a relatively limited range of styles. So, the stunt on 104.3 has a greater variety of styles than the regular broadcast on 106.5. The top 40 stations, while they had smaller playlists, would be playing records of a variety of styles. Back in the 60s, you might very well hear the Doors, followed by Frank Sinatra, followed by Aretha Franklin. But on how many stations today would you have the equivalent, say a Def Leppard - Billy Joel - SWV sequence?

=> As E-brmbrg@uiuc.edu stated to All on 12-24-93 20:27: <=
(Re Charles Osgood)

E-> I find it surprising, therefore, that:
E-> a) he would do a commercial at all; b) that he would do a commercial
E-> in which he so clearly endorses a product; c) that CBS would permit
E-> him to do this; and d) that CBS would permit it to run within its own
E-> radio newscast. Has anybody else heard this, and shared my view that
E-> it's surprising, out-of- place, and out-of-character?

On his own show, "The Osgood File", Charles Osgood personally
does the commercials for several of his sponsors. Nordic Track
happens to be one of them. Hurd Windows and Delta Airlines are
others.

Paul Harvey, of course, has done the same for many years. And
Rush Limbaugh does some too (Snapple, The Club, Verbal Advantage,
etc). It should come as no surprise.

It doesn't mean that these commentators personally endorse the
products. It means that the sponsors are paying for the
personality. Rush Limbaugh has admitted as much on his show.

In the case of the Nordic Track ad running during a CBS newscast,
it would appear that as part of its sponsorship of T.O.F., Nordic
may have paid something extra to have the Osgood-voiced ads run
on other CBS programs.

So what? That's life in the wonderful world of free enterprise.
No big deal, IMHO.

... Is a paradigm worth twenty cents?

22. New rock station in NYC?

Newsgroup: rec.radio.broadcasting
Date: 1994-01-02 07:03:26 UTC
From: neil.parks@pcohio.com
Message-ID: <2g5rju$mfp@vixen.cso.uiuc.edu>
Source record: 41627

Jm> WNCN has flipped to rock, with the handle Q104.3. As i'm not in NY,
Jm> i have my spies listening :-)
Jm> WNCN was classical, but with a 'commercial' approach... playing
Jm> movements instead of complete pieces, an upbeat morning show, and the
Jm> like. WQXR, the New York Times owned station, is the sole 'concert'
Jm> classical left.

I'm glad that WNCN was finally able to do what it wanted to do
decades ago!

William F. Buckley Jr. owned WNCN back in the 60's. He changed
it from classical to a hard rock format with call letters WQIV.

Despite classical competition from commercial WQXR and
non-commercial WNYC-FM, WKCR, and WFUV, fans of WNCN raised such
a fuss that, under FCC pressure, Buckley sold the station to new
owners who restored the old format and callsign.

... A liberal's generosity is limited only by your income.

I listened to the first of these several times. My impression was that some of them might have been genuine bloopers, but that many of them were simply announcers' off-the-air jokes and puns that had probably never been aired. "I Love Loosely" is typical of the genre; announcers commonly created puns like this and used them off the air. It's possible I guess that occasionally one was used on the air by mistake.

The one about "Yom Kippur's Orchestra" supposedly happened at KNOW, Austin, TX, in the 1950s or so. My late uncle was chief engineer there at the time and told the story, along with the name of the announcer which I don't remember.

*(12/27/93) Pyramid Broadcsting,parent owner of a CHR/Top 40 powerhouse WXKS 107.9 FM (KISS 108) bought out long-time rival WJMN-94.5 FM for $22 million.

The deal should be finalized sometime in the late winter/early spring.

WJMN which changed to Churban/Dance format in May and switched calls from WZOU in June climbed to # 2 spot in 18-34 during the summer Arbitron period. It also showed strong gains in the overall ratings(#4 in 12+) which undoubtedly began to worry Pyramid management. Summer '93 was one the best ratings books in the history of that station.

WJMN has been owened by Ardman Broadcasting Corp since June of 1987.

It's expected that 'JMN's GM Alan Chartrand and PD Mike Colby, who both own a tiny chunk of the station, will be let go as soon as the papers change hands....

'XKS GM John Madison will run both properties. 'XKS's highly respected PD Steve Rivers and MD Cadilac Jack, ironically both 'JMN(then 'ZOU) alums who defected to rival WXKS about 2 years ago, will take over the programming chores...

One of the Boston dailies reported that $22 million was the highest price ever paid for a Boston station. I care to disagree. If you look at the Infinity's $100 million purchase of 3 stations from Cook Inlet earlier this year that included WZLX-100.7FM in Boston then yesterday's Pyramid's deal makes it only the second highest....

This will be the fourth FM duopoly in Boston. The other 3 :

1. Infinity owns WBCN-104.1 FM and WZLX 100.7FM

2. Granum Broadcasting owns WBOS-92.FM and WSSH-99.5FM

3. Greater Media owns WMJX-106.7 and WBCS 96.9.

A possible fifth FM duopoly could be in place in '94. American Radio Systems, parent company of WBMX-98.5(MIX 98.5) is reportedly looking to acquire either CBS' oldies WODS 103.3FM or Faibranks country WCLB 105.7FM. 'ODS would be more desirable since it gets higher ratings and a very well run station...

* A second AM duopoly will be in place on January 17,1994 as Group W, the parent firm of WBZ NewsRadio 1030, takes over 5,000W all-sports signal WEEI 590 AM from the Boston Celtics Broadcasting...The first AM duopoly is WRKO AM 680-WHDH AM 850. Both owned by American Radio Systems...

* WBCN-FM's PM-drive jock Mark Parenteau was voted the best afternoon personality in 1993 People's Choice Awards in FMQB Magazine...

28. Classical Music in DC/Baltimore

Newsgroup: rec.radio.broadcasting
Date: 1994-01-02 07:04:00 UTC
From: Robert Carpenter <rc@cmr.ncsl.nist.gov>
Message-ID: <2g5rl0$mjr@vixen.cso.uiuc.edu>
Source record: 41633

I've been noting the reports of the demise or dilution of classical music broadcasting which have appeared in recent issues of the Airwaves Journal.

This makes me wonder whether there are other areas of the country so amply served with classical music as the Washington/Baltimore area. We have:

```
MHz ERP kW HAAT Call City
-------------------------------------
103.5 44 DA 518ft WGMS Washington (Redskins football)
DA protects WARM York, PA, which limits coverage NNW of DC area
91.9 29.5 164ft WGTS-FM Takoma Park,MD (religious on Saturdays)
low antenna, good in DC area, prob not in Baltimore area
91.5 50 500ft WBJC Baltimore only 1 hr talk per day
covers Balto/DC areas, limited to W by 91.3 6kW 1438ft WTRM Winchester,VA
will be limited to S by satellite of WETA in southern MD
90.9 75 448ft WETA-FM Washington
covers Balto/DC areas, lots of NPR/APR talk
88.1 10 DA 426ft WJHU Baltimore not audible in DC area
DA protects 88.1 4kW DA 554ft WJTM Frederick,MD, which is about
35 miles from both DC and Balto.
-------------------------------------
Other classical music stations on the periphery are:
91.3 ~10 ? ? Lexington Park, MD (application)
to be satellite of WETA, will be audible in far SE DC suburbs, will cut
into WBJC coverage to south
89.5 27 594ft WSCL Salisbury, MD xmtr at Seaford, DE
audible on eastern edge of DC/Balto area, covers most of Delmarva
Peninsula and southernmost part of New Jersey
89.1 ~1.3 1338ft WETH Hagerstown,MD
satellite of WETA, not audible in DC/Balto, interferes w/ WVEP
88.9 3.6 1624ft WVEP Martinsburg, WV (about 45 miles from WETH)
audible in western DC suburbs, coverage to N interfered w/ by WETH
-------------------------------------
Comments, please....
```

30. Highwater returns.

Newsgroup: rec.radio.broadcasting
Date: 1994-01-02 07:04:05 UTC
From: andyrose@netcom.com
Message-ID: <2g5rl5$mk9@vixen.cso.uiuc.edu>
Source record: 41635

Anyway, my big deal with Highwater was the NPR reception.
I had the thing on the air for 6 weeks and not one single
NPR producer or programming manager or anybody gave me
a ring or indicated interest. Maybe I am expecting too much
from those people. I had great success with duplicating
the tapes myself, but the job got to big after about 20
tapes. I farmed the work out but that proved
unreliable. Some people who received the tapes had scheduled
slots and done a little promo only to find the tapes not
showing up on time.

So my vision for Highwater is
1) distribution via internet, no tapes, no NPR. Broadcasters
will need some kind of soundcard to play the files onto the
air. Since _all_ of the Highwater subscribers have internet
accounts, we are half way there. Soundcards are less than
200 bucks, and maybe we can help out some of the poor pirate stations.

2) a real cooperative effort on the part of MAP people to
consense on what news gets radio time. I am really sick
of deciding this myself, although many people have
expressed appreciation for the stories I've chosen.
As you know I have shied away from anything the mainstream
or the alternative mainstream covers.

3) a group of people who have the inclination to read stories.
I would be happy to continue using my voice, but not alone.
Daisy Freelander (Sharon Donovan) and I have parted ways and
I can't get her back for some time. I won't be the only voice.

4) An asynchonys process which basically devolves the 'radio
show' into a sort of upgraded news group where stories with
'a spoken version' are indicated. This may require modifying
tass or rn or whatever to support this. I believe this
is very important and should be elevated to the News GODS.

5) An automatic 'speaking' algorithm which generated some
kind of natural sounding voices to automaticcaly do
what all we're talking about.

Then the real work becomes _broadcasting_ and _marketing_.
I have little interest in money which is probably why
I am not successful at the business end of things. I don't
want a trademark or syndication or nothing. I want peace.

Message-ID: <2g5rlh$ml4@vixen.cso.uiuc.edu>
Source record: 41636

I am interested in finding out what all is involved in setting up a non-profit radio station for a small community. Does the FCC give breaks on some of the requirements to non-profit orgs? Also how hard is it to obtain a FCC license for a station? Could anyone also direct me to reliable fm-stereo equipment such as transmitter, amp, and antenna setups for a low-power station. My wish that I share with several of my friends is to put a station on the air that would feature local bands in the alternative/rock scene. The station would ideally promote concerts in which it would possible broadcast. The target audience is in the 14-18 age group in this area where there is no place for them to see such concerts without traveling about a half hour and paying outrages tickets. There would be a nice spill over from the local college to provide a little more cash flow for the station. My main worrys are how much money could a non-profit org. running a station expect from supporting concerts and such. Or should we opt for just going commercial and just useing our own judjment on limitation of commercials. From what my friends and I have aggreed upon, we would only like slight compensation for time spent on air since we all have other means of employment. In general I need someone to chat with and tell me the pitfalls I could be looking at so I can properly judge what I'm getting into.
Steven

Osgood, a genuinely nice guy, probably got ground down by the changes at
CBS like everybody else. He -does- identify himself as "on the CBS Radio
Network" instead of "CBS News," so he does disassociate himself from CND
(CBS News Division) to some extent. The problem is, some affiliates,
like KNX Los Angeles, still use his promos which go, "I'm Charles Osgood,
CBS News. Listen for me here on KNX." The quality of his commentary has
gotten a little treacly of late... I miss his hourly newscasts and his
anchoring of Weekend (11:30 Sunday night) News. What could they have been
thinking of to let him go (assuming that's what happened).

35. SONY ICF-SW7600 radio better than GE SuperRadio?

Newsgroup: rec.radio.broadcasting
Date: 1994-01-02 07:04:38 UTC
From: jaslow@bisco.kodak.COM
Message-ID: <2g5rm6$mld@vixen.cso.uiuc.edu>
Source record: 41640

For the holidays, I asked for the GE SuperRadio III. However, by the time the message got to Santa (in this case my brother-in-law and his wife), my request became a shortwave radio.

It turned out I got a SONY ICF-SW7600 radio which states it is a LW/MW/SW/FM Stereo PLL Synthesized Receiver.

My main need is to pick up far away AM radio stations, so I can keep up with my favorite sports teams in New York (as well as enjoy general DXing which I did a lot of as a kid). This is the reason I wanted the GE SuperRadio III, since I heard so many great things about its DXing capability.

Is anyone familiar with this SONY radio? Is it as good or better than the SuperRadio for what I want out of it? I certainly won't mind the shortwave capability; I'm sure I would enjoy that also. However, if it is not going to achieve what I really want, I'm going to exchange it.

If anyone has any comments on this radio, I would certainly appreciate it. Perhaps this is a great radio that I should keep despite of what I want out of it, and just get the SuperRadio in addition to this.

> } I'd heard. Any info would be appreciated. Also, if Steve has released any
> } other albums besides "Pet Fishsticks"

S&G had five very successful years on WLUP-AM before management changed the format to all-sports and was about to move the guys to the FM again when ...

Steve & Garry broke up. Garry had apparently built up quite a docket of resentments against Steve, which he had failed to communicate (natch), and this all came to a head when Garry got married. As soon as he came back from vacation, he quit the team. Three weeks later he had his own middays show on the FM. Steve is mornings on the AM sports station.

I am thinking of compiling a FAQ list with more details. Just not right now. Check out chi.media for updates.

Message-ID: <2g5rmb$mlf@vixen.cso.uiuc.edu>
Source record: 41642

Hi AIRWAVES/rrb-ers. I am trying to understand the different ways that radio stations get the signal to the transmitter. I volunteer at WORT in Madison, and I don't understand our engineers' technical explanations. Perhaps some kind person out there could help me educate myself about the basics of this part of broadcasting. Any books, publications that are accessable to an average educated person?

Specifically, we are switching from leased phone lines to a microwave STL. Why did the signal quality suffer on the phone lines? What are the pros/cons of microwave transmission? Are there any other options for studio to transmitter? With all this talk about fiber optics and info superhighway, why can't use a couple of computers and a phone line? (or can we?)

These are the things I'm trying to understand. Any pointers or info would be much appreciated.

Read rec.radio.info and rec.radio.broadcasting for further updates on this file. This file will automatically be updated as news warrants.

Greetings:

The AIRWAVES Radio Journal [(c) William Pfeiffer 1993] (Formerly Internet Radio Journal) is a periodic email digest dedicated to discussions about all facets of domestic broadcast radio.

Subscriptions to Airwaves are free, and available to anyone who wants one, and who is equipped with Internet (or Internet gatewayed) email service. While the subscription is free, some commercial systems may charge a small fee for reading Internet email. Currently all major email providers have Internet access to one degree or another. Check with your local provider for details.

To subscribe to AIRWAVES, send mail to the Internet mail address of - subscribe@airwaves.chi.il.us - .

In addition, all articles in AIRWAVES are ported to and from the Usenet newsgroup rec.radio.broadcasting (r.r.b) which was founded in April of 1992, as a means to further discussion of topics pertaining to 'domestic broadcast radio'.

-=*=- DOMESTIC BROADCAST RADIO -=*=-

By domestic, we mean broadcasts which are intended, primarily,for reception in the same country/nation in which they originate. AIRWAVES and rrb, are international in their scope, and the term 'domestic' should not be taken to imply 'USA' or even North American. Readers in other nations are encouraged to participate.

-=*=- SUBJECTS -=*=-

If it has to do with broadcast radio, and not _specifically_ international shortwave, it is welcome here. Occasionally an article which IS primarily about shortwave will be posted if the subject seems broad enough that the readership of AIRWAVES/rrb might be interested, or be able to assist the poster in some way.

Generally, if a subject 'seems' like it would be of interest to the broadcasting community (which includes those involved in creating, transmitting or listening to broadcast radio) will be published.

These subjects include (but are not limited to)..

1) Formats and programming.
2) Engineering & technical matters and interests.
3) DXing (long distance reception) on the standard broadcast bands.
4) Community broadcasting.
5) Pirate broadcasting (especially non-shortwave, domestic pirates).
6) Legislation affecting the industry, and its 'offspring' industries.
7) Technologies affecting the industry, and its 'offspring' industries.
8) General station information. Who is going on and off the air, and why.
9) Radio's historical and cultural significance.
10) Radio's current and future trends.
11) Political and news coverage and its impact.
12) Job openings and help to those seeking work in the industry.
13) Information on equipment and techniques involved in transmission and reception of broadcast radio signals.
14) The International Scene and how broadcast radio is shaping up in the various nations of the world.
15) Gabfesting and all matters of general interest to those involved in, or interested in, the general subject of domestic radio broadcasting.

-=*=- POSTING -=*=-

1) Post to rec.radio.broadcasting as you would any other Usenet group. The software does the rest.

2) Email your article directly to articles@airwaves.chi.il.us. Using other addresses to post will needlessly delay your article. You might consider installing an alias in your mailer for emailed articles, especially if you post a lot of stuff. See the end of this file for all applicable addresses.

-=*=- POSTING GUIDELINES -=*=-

* If you post a question that is of potential interest to others in the group, ask that replies be posted, instead of emailed to you. We all would like access to the answers. If you do receive email replies, post a summary to the group. This forum is only as good as it's posters and readers. Keep the info flowing.

* If you email an answer to a question, send a Cc: to the group's submission address, articles@airwaves.chi.il.us, so we can all learn from your knowledge. When id doubt... POST POST POST! :-).

* PLEASE edit quoted text to a minimum! Most users of this group are fairly regular readers and do not need, or want, to read the entire text of a recent article in every reply. Of course, if the thread is not current, more quoted text may be appropriate. Use your brain (and your editor :->).

* If your message is basically a one or two line "Me Too" or "I disagree" post, consider emailing it to the poster. However if you go into some details as to WHY you agree or disagree, then please post it.

* If you are replying to an article in the Airwaves Radio Journal,
simply use your mailer's reply feature, and again, edit the text to
ONLY the article you are replying to, and include the article's name
in the Subject field. Subjects of "Re: Airwaves Radio Journal" are
confusing and may result in needless delays.

* If you post about a local radio station or personality, realize that
most of the readers will know little or nothing about it.
Offer a little background, like location, station format, type of
music played etc.

* Last but not least, avoid flames and personal insults. AIRWAVES/rrb has
a high percentage of broadcast professionals among it's readers. We
try to maintain a reasonably high brain to B.S ratio here.
It is fine to disagree, but please stick to the issues and avoid
personal flames. If you *must* make personal attacks, do it in email.

-=*=- MODERATION -=*=-

AIRWAVES and rec.radio.broadcasting, are _very_ loosely moderated.
Normally, all legitimate articles will be posted to the group.
However, the moderator/editor reserves the right to edit or refuse
any copy for any reason. Please note that it is not routine
practice to edit or to otherwise modify articles. Usually such
editing is limited to excessive .signatures and in some cases
overly quoted text. On rare occasions, a brief (less than 6 lines)
"Moderator's Note" may be appended to an article for clarification or
other reasons. These appends are kept to an absolute minimum and are
always placed after the poster's signature or (*very* rarely) at the
beginning of a post. Spell checking is often done, when time permits.

Matters that may cause an article to be rejected, include...

* Articles which are not on (or reasonably near) the stated charter and scope
of the group (domestic radio broadcasting) or pertain to 'non-broadcast'
radio services, such as cellular, two-way, ham, citizens-band, and such.

* Articles that are too long for submission as-is. If your article is
longer than 10k (10,000 bytes), consider splitting it into two parts, or
better yet, edit it down to a more reasonable size. Check to see if you
can eliminate any quoted text. If you believe that your article is of an
especially urgent or informative nature, and you also feel that you cannot
reduce the size without damaging the content, let me know and I will try to
work with you.

* Articles which are merely multiple repetitions of an identical answer which
has already been offered several times. Often these will be bundled
together into a single article to conserve bandwidth and increase
readability.

* Articles which contain 'miles' of quoted and multiple quoted text followed
by a few lines or less of original text. Please edit quoted text to a
minimum and try to adhere to the *50% rule*, that is 51 (or more)
percent of original text to 49 (or less) of quoted text. If the

thread is not current, more quoted text is appropriate. Only the worst offenders are omitted, usually I will edit quoted text myself, when I have time.

* Articles that solicit for funds or contain blatant commercial content. (see next section on this)

* Articles which are unwarrantedly offensive, abusive or contentious for the sake of contention. Personal attacks and ridicule are considered such. Discussion, even argument, of issues and opinions are welcomed and encouraged. However, we have discussions here, not shouting matches.

Note: All articles are auto-replied to as they arrive, to indicate that we have received them. Each piece of mail to the submission address(es) will generate a separate auto-reply message. Most articles which appear reasonable and on topic are published in the Journal/newsgroup. However the Editor/Moderator reserves final judgment on matters of acceptance or rejection of submitted material. When possible, rejected submissions will be returned with a note explaining why the submission was rejected.

-=*=- NO SOLICITATION POLICY -=*=-

Rec.radio.broadcasting and the Airwaves Radio Journal maintain a non-solicitation policy. Articles which appear to contain substantial 'commercial content' or which appear to blatantly solicit funds from readers for a 'cause' or a 'project' are generally rejected.

I generally * DO * accept..

o Product reviews: ... provided they are objective and informative and contain little or no 'motivational' language. Prices should be reduced to a price 'range' and all inquiries must be directed to the poster -or- an address of the manufacturer/distributor.

o Personal items: Such as old time radio tapes, a specific piece or two of equipment etc. sold at a low, hobbiest price.

o Radio-related items for barter/trade: Self explanatory.

o Announcements for non-commercial workshops, conventions, radio related flea-markets, etc. Pricing <other than small admission charge> and other specifics (like 'we take your credit card') are considered commercial content. If you want to publicize here, then you must deal with the followup mail/calls yourself.

o Personal recommendations of a product/company that appear legitimate. Especially when it is in response to another poster's inquiry.

In general I will take an 'err on the side of permissiveness' approach to this. In other words, if your article is credible, informative, reasonably

intelligent, broadcast related, and has something to offer, I will do what I can to pass it along to the readers. I will only reject the worst of the lot. the rest I'll try to edit as necessary.

-=*=- ARCHIVES -=*=-
FTP OR Gopher

Archives of past Airwaves Radio Journals are kept for anonymous FTP at the Internet site radio.aiss.uiuc.edu . They can be found in the directory /misc/rec.radio.b-cast. In that directory you will find several sub-directories. They are plainly labeled INTERNET_RADIO_JOURNALS (which contains most issues through 399) and AIRWAVES_RADIO_JOURNAL which contains issues 400 to present. The Journals are arranged in sub-directories of about 100 issues each. In each main sub-directory is a file called 00-INDEX, which contains the issue numbers of all Journals, and the title of each article contained within. The archives are updated every week or so. To determine when the last update was, look at the date on the file called "<-Archive Last Updated At".

If you need help with FTP, write me.

Journals are in Unix compress (.Z) format. The Unix compress utilities are available free from many FTP sites for Unix, DOS and Macintosh platforms. Remember that compressed files should always be sent using the "binary" mode. If you have trouble accessing anything, or if you have any questions about the archives, send email to rrb@radio.aiss.uiuc.edu. If you appreciate the archives, send your notes of appreciation to the site admin, C. Lance Moxley <lance@radio.aiss.uiuc.edu>. He has been very gracious in his willingness to store our archives on his machine.

GOPHER

You may access the archives via gopher, if your site is so equipped. Gopher is a very fast, easy, menu-driven system requiring no remote logging in, and which will deliver the issues in uncompressed form, as well as permitting you to read or scan the files before downloading them to your host system

To use the gopher system, type the following at your shell prompt...

gopher radio.aiss.uiuc.edu 7070 <return>

... then follow the simple menus. It is really easy. If you can use a mailer or news reader, you can easily use gopher.

-=*=- EMAIL SERVER -=*=-

We are in the first stages of building an email archive server for AIRWAVES. Currently you may obtain this help file at the INDEX files for either the Internet Radio Journal, -or- the AIRWAVES RADIO JOURNAL. You can also send for the file -COMMANDS-, which is updated as new features are added. To access these servers, send email ti the

archive site address <rrb@deja-vu.aiss.uiuc.edu> with one of the
following commands as the SUBJECT of your message. The body of the
letter is ignored by the server.

** COMMANDS **

HELP - - - - - - - - Sends the latest version of the file you are reading now.
INDEX IRJ - - - - - Sends the 00-INDEX file for the Internet Radio Journal.
INDEX AIRWAVES - - - Sends the 00-INDEX file for the AIRWAVES Radio Journal.

Soon we will be expanding this service to permit email access to the
entire archive site. Stay tuned for further developments.
Remember that only mail addressed to the archive
address will be processed by the server.
- rrb@radio.aiss.uiuc.edu
-

-=*=- ENJOY THE GROUP! -=*=-

I hope you enjoy the group. Remember, it is only as good as it's
contributors. So don't be shy :-). If you have a question, or answer,
even if you are not sure, post - post - post.

I am open to suggestions on how to improve this group. Send them via e-mail
to wdp@airwaves.chi.il.us -or- rrb@radio.aiss.uiuc.edu.

Thanks to all who have, and continue to, participate.

We now return you to your regularly scheduled newsgroup :-).

Date: 27 December 1993

GUATEMALA: Broadcaster Victor Manuel Cruz of "Radio Sonora"
fatally shot

ORIGINATOR: International Federation of Journalists (FIP) -
Caracas

According to reports, 43-year-old broadcaster Victor Manuel Cruz
of the newservice of "Radio Sonora" was shot at on the morning of
23 December as he was leaving a Christmas reception hosted by the
judicial authorities in Guatemala City. The journalist was
rushed to hospital and operated on but died of complications on
25 December.

According to Eduardo Mendoza, the director of "Radio Sonora",
Cruz was attacked by three men who fired upon him at close
range with a 9 millimetre weapon on a road in the south of
Guatemala City. Cruz was not driving a car and was heading home
at around midnight through a desolate area.

There is much speculation regarding the reasons for the attack as
Cruz was not robbed and, according to Mendoza, "Radio Sonora" has
not experienced difficulties since the change in government in
June, thus the attack cannot be attributed with certainty to the
political situation. In an interview with FIP representatives,
Mendoza stressed that "no death threats against "Radio Sonora"
```

employees had been received nor had Victor Manuel Cruz mentioned that he had received death threats". It is speculated that the killing may be attributed to delinquency, family problems or mistaken identity.

RECOMMENDED ACTIONS:
Please send appeals to the Guatemalan authorities: urge a prompt and thorough investigation into the killing of journalist Victor Manuel Cruz in the early morning of 23 December in Guatemala City and request details of the results of their inquiries; stress the need to bring those responsible to justice and to end the cycle of violence and impunity in the country.

International Freedom of Expression eXchange Clearing House

Fecha: 27 diciembre 1993

GUATEMALA: Periodista Victor Manuel Cruz de "Radio Sonora" asesinado

ORIGEN: Federacion Internacional de Periodistas (FIP) - Caracas

Segun informes, el locutor de noticias de la "Radio Sonora", Victor Manuel Cruz, de 43 anos de edad, fue atacado a balazos en la madrugada del 23 de diciembre al salir de una recepcion que ofrecia las autoridades judiciales en la ciudad de Guatemala. El periodista fue operado de emergencia y se encontraba fuera de peligro cuando sufrio una recaida que le provoco la muerte el 25 de diciembre.

Segun Eduardo Mendoza, director de "Radio Sonora", Cruz fue atacado a tiros por tres deconocidos que le dispararon muy de cerca con un arma 9 milimetros en una calzada periferica, al sur de la ciudad de Guatemala. Cruz no tenia vehiculo y se dirigia a su casa por un sector desolado cerca de las 12 de la noche.

Existen varias hipotesis acerca de los motivos por el crimen pues Cruz no fue despojado de ninguna pertenencia, y segun Mendoza, "Radio Sonora" no ha tenido graves dificultades desde el cambio de gobierno en junio, por lo cual el asesinato no se puede atribuir con seguridad a la situacion politica. En una entrevista con el representante de la FIP, Mendoza aseguro que "nunca se ha recibido amenazas de muerte contra los trabajadores de Radio Sonora, y Victor Manuel Cruz tampoco menciono nunca que el estuviese amenazado". Se manejan tres hipotesis acerca de los motivos por el asesinato: delincuencia comun, problemas familiares o una equivocacion.

ACCIONES RECOMENDADAS:
Por favor escriban a las autoridades guatemaltecas: pidiendo una investigacion inmediata y completa de los hechos y detalles de los resultados; e insistiendo en la necesidad de llevar ante la justicia a los culpables y poner fin al ciclo de violencia e impunidad que sufre el pais.

GABON: Radio Frequence Libre destroyed; Radio Liberte signals
jammed

ORIGINATOR: Committee to Protect Journalists (CPJ) - New York

After only a month and a half on the air, the independent Radio
Frequence Libre in Libreville, was forced to close. On Thursday,
December 16 at 1 a.m., a group of about ten armed men, wearing
fatigues and face masks, stormed the radio and poured acid over
station's equipment. Four guards were in the building at the
time. The masked men temporarily disabled the guards using gas,
then tied them up.

According to the station's director, Paul Mbadinga-Matsiendi, he
had recently hired a private security agent to help guard the
station as a result of rumours that the radio would be attacked.

As a result of the attack, the station is unable to resume
broadcasting.

For the past 2 days, Libreville-based Radio Liberte's signals
have been jammed. They, too, have received warnings that the
station will be destroyed. The station's signals were
continuously jammed this summer.

BACKGROUND:
President Omar Bongo declared victory after the December 5th
election which took place amidst widespread accusations of fraud
by election observers. Opposition parties plan to challenge the
result and petition the court to annul the election. Meanwhile,
opposition leader Paul Mba Abbesole says he won an outright
majority and is said to have set up a rival government.
```

RECOMMENDED ACTIONS:
Please send urgent appeals to the Gabonese authorities requesting investigations into recent attacks on the independent media in the country; describing the threats of attacks to Radio Liberte and Radio Frequence Libre, the attack and destruction of the latter's equipment by heavily-armed unidentified men in fatigues on December 16 forcing the radio station to close, and the jamming of Radio Liberte's signals; urging that those responsible be brought to justice; and stating that these attacks are in violation of the rights to freedom of expression as described in Article 19 of the International Covenant on Civil and Political Rights to which Gabon is a signatory.

APPEALS:
M. Omar Bongo
President de la Republique Gabonaise
Libreville, GABON

In article <2g5q36$gtb@vixen.cso.uiuc.edu> chellis@nyx.cs.du.edu (charles ellis) writes:
>The actual broadcast itself appears on the Kermit Scaheffer (sp?) Best of
>Bloopers Album from the 60s. It sounds scratchy as if from a
>transcription disk and therefore sounds authentic.
>
>I have the album at home and I'll check who it was who made the blooper.

The story as I heard it was that the blooper was made by a CBC
(Canada) announcer, Allan McFee (known for his humour and unorthodox
charming ways) at the end of a children's program he was doing. When
the program was "over", and he thought the mike was off (but it
wasn't), he said "that ought to hold the little bastards"
(affectionately).

Two comments. First, the Kermit Schaefer (sp?) blooper record version was an obvious fake, and that's noted in the recent long posting that analyzes the "Uncle Don" legend.

Second, I remember Long John Nebel's opinion of the story. He said emphatically on his all-night show some time in the late fifties that it never happened.

Long John Nebel: there's a name that should warm the hearts of a lot of radio fans out there. Remember Natil Opomsoc, and the Amazing Randi's first few nights with Long John in Jean Shephard's former time slot? That was, I believe, Labor Day weekend, 1956.

Interesting happenings at WGMS these days. About a year and a half ago, "Washington's Good Music Station" went to six-hour shifts for their on-air personnel. Amid grousing, Dennis Owens, Nicole LaCroix, and the station's PM drive time super star, Renee Cheyney, spent 6 hours a day playing classical music (or at least the type of classical music supported by the little old blue haired ladies of Chevy Chase!) along with BMW commercials. Low and behold, Renee decides that she's had enough of this and she "retires" on November 30. Suddenly, after a frantic scramble for an afternoon-drive host/hostess, station management opts for the late, lamented 4-hour shift. Could there be a connection?

Yes. The last time I was in St. Louis (around Thanksgiving, 1993), they were using the call letters KSD-AM, and were broadcasting (mostly) CNN Headline News audio, and a late-night syndicated (I believe) call-in program.

There wasn't much local programming, if any, but because it was a holiday weekend, what I heard may not have been typical of their schedule.

Besides, most of the time we spent listening to the radio in St. Louis was spent listening to WFUN-FM, the new kids station at 95.5 FM, with our 7-year-old and our toddler. Now, why can't we have a station like that in Atlanta, so my kids can listen to it without having to visit their grandparents?

/* Written 2:32 pm Dec 21, 1993 by MAILER-DAEMON in web:amarc.radio */
/* ---------- "2 new electronic lists re radio" ---------- */
Subject: 2 new electronic lists re radio

Two New Lists:
1) Devmedia: Media for Development and Democracy
2) RADIO-L: Discussion of Digital Audio Broadcasting (DAB)
==========================================================

1) Devmedia: Media for Development and Democracy
***********************************************

AMARC and Videazimut, in cooperation with the Don Snowdon
Centre for Development Support Communication have started a
new list. Known as Devmedia: Media for Development and
Democracy, the list is intended to promote discussion about
the use of radio, video and television for promoting and
supporting development and democracy in both the economic
South and North.

AMARC will be regularly posting information from the
amarc.radio conference on the APC system, articles from
AMARC's publication InteRadio, RadioAction Alerts from
AMARC's Solidarity Network, and other information related to
community radio broadcasting.

While much of AMARC's material is available in English,
French and Spanish, we will normally post only the English
version. If the article is available in other languages we
will make it available via email to anyone requesting it.

We welcome postings in all interested parties in any
language.

The following information tells you how to receive the list
via email.

---------- Forwarded message ----------
Date: Tue, 30 Nov 1993 14:26:12 PST
From: Don Richardson <drichard@uoguelph.ca>
Subject: New List: Devmedia

Devmedia: Media for Development and Democracy

List Members: Participatory radio, video and TV practitioners working
for the democratisation of communication. Organizations posting to
the list include:
```

Videazimut - An international coalition, founded in 1990, that brings together people from the world of independent and alternative video and television from every continent. Together its members act to promote the democratic practice of communication. They aim to broaden the participation by communities and movements from the South and North in sound and image production.

AMARC - The World Association of Community Radio Broadcasters. Supports community and alternative radio stations that involve people in participatory communication processes.

Don Snowdon Centre for Development Support Communication - Supports the practice of using communication tools (especially small format video) in participatory action research and participatory development. Located at Memorial University, St. John's, Newfoundland, Canada.

Listowner: Don Richardson, Assistant Professor, Department or Rural Extension Studies, University of Guelph, Guelph, Ontario, Canada. Email: drichard@res.uoguelph.ca Fax: 519-767-1510.

To subscribe to Devmedia send an email message to:

listserv@uoguelph.ca

2) RADIO-L: Discussion of Digital Audio Broadcasting (DAB)
****

---------- Forwarded message ----------

RADIO-L mailing list,

RADIO-L@UMINN1 (BITNET)
RADIO-L@vm1.spcs.umn.edu (Internet),

Discussion of Digital Audio Broadcasting (DAB)

++Statement of Purpose++:

The RADIO discussion list is established to provide an electronic forum for the discussion of matters pertaining to the selection and implementation of a digital audio broadcasting (DAB) standard in the

United States and other countries. Discussion regarding the relative technological merits of various DA B proposals, as well as the social and economic implications of a transition to DAB is welcome and encouraged on this list. Please observe courtesy when participating.

++How to Participate in this List++:

Anyone can join. To join, quit, or change address; send a message to

LISTSERV@UMINN1 (BITNET)
LISTSERV@vm1.spcs.umn.edu (Internet),

The list is not moderated but is monitored by the listowner, Ron Stone, ston0030@gold.tc.umn.edu, a graduate student in scientific and technical communication at the University of Minnesota. The list is maintained at St. Pau l Computing Services, University of Minnesota. A message sent to this list at RADIO-L@vm1.spcs.umn.edu will be duplicated and sent to each member of the list .

Any views expressed on this list do not necessarily represent the views of the University of Minnesota or any of its divisions. You may cross-post any message on RADIO-L provided that you clearly attribute the message to RADIO-L. You may only publish a RADIO-L posting with the permission of both the listowner and th e author(s) of the message(s).

/* ---------- "Waldberg released from turkish pris" ---------- */

open letter
from Stephan Waldberg, the Friends of Stephan Waldberg
and Radio Dreyeckland after the release of the german
community radio journalist from prison in Turkey
_____________________________________________________________

Stephan Waldberg Adlerstr. 12
Freundeskreis S. Waldberg 79098 Freiburg
Radio Dreyeckland Germany
Fax: +49 761 31868

Freiburg/Waldkirch, 28 Dec. 1993

Dear Sirs,
dear friends,

on december 23, 1993, Stephan Waldberg was released from prison in
Turkey after being pardoned by the turkish president Demirel.
Finally, 14 months after his arrest on october 23, 1992, and the
sentence on january 22, 1993, the time of imprisonment is over. All
of us are very happy about this.

The support of many individuals, groups, media representatives,
political parties and international organizations has finally lead
to some - delayed - effect on the turkish officials; even though
the circumstances of his release may be criticized.

All of us want to use this opportunity to express our sincere
gratitude for the supporting work that has been done. We know for
example that community radio stations from Mexico, Nicaragua,
Finnland, Norway, Denmark, Ireland and many other countries
protested in Ankara against the arrest. The International
Federation of Journalists, the PEN-Club, "reporters sans
frontieres" and many, many others helped.

The german media workers' union (IG Medien) and the german
association of journalists (DJV) supported activities in Germany.
In Bonn, persistent awareness was caused by demanding official
inquiries in the german parliament by representatives of the SPD
(social democratic party) and the PDS (party of democratic
socialism). The minister for the interior of the Land Baden-
Wuerttemberg (province that Freiburg belongs to), the mayor of
Waldkirch (Stephan's home town), fractions in the Freiburg city
```

parliament, directly addressed the turkish government. And numerous other initiatives remain unmentioned here.

Many individuals (also from Turkey) have expressed their personal protest, mailed post-cards to Stephan's prison and reminded Germany's minister for external affairs, Kinkel, of Stephan Waldberg.

On January 7, 1994, there will be a press conference in Waldkirch, where Stephan Waldberg will once more touch several aspects of his time in Turkey.

We want to thank for all the support that contributed to the release of Stephan Waldberg.

Stephan Waldberg
Freundeskreis S. Waldberg
Radio Dreyeckland

51. 104.3 WVRT, Baltimore Update: 1/3/94

Newsgroup: rec.radio.broadcasting
Date: 1994-01-03 10:30:29 UTC
From: Jeff Koerber <S72UKOE@TOE.TOWSON.EDU>
Message-ID: <2g8s45$1q2@vixen.cso.uiuc.edu>
Source record: 41656

Oooooooo ... just 7 more days until WVRT changes to it's new format!

At 12:00 AM, Mon. Morning, WVRT gave it's ID, and played "I've Got Friends ..." one more time. Then at 12:04, they changed to this week's line-up.

They have a NEW message that they play in between each song ... here it is:

2 SEC SILENCE

SFX: DIFFERENT CONSTRUCTION GRINDING SOUNDS UNDER FOLLOWING

ANNCR: Format STILL under construction at 104.3 FM ... but we're getting close!

2 SEC SILENCE

And now .... WVRT's "Songs of the week"

1. Beethoven's 5th (Synthesized)
2. American Honky Talk Bar Association (Country)
3. Bad Medicine (Hard Rock)
4. That Wouldn't be Half Enough (Country)
5. Give me All Your Love Tonight (Rock)
6. Give me One More Last Chance (Country)

That's right! Six songs this week instead of five. Three of them are Country (gee ... wonder if that means anything ;-)

Does anyone know positively what the new format is going to be?

Another thing ... notice that they dropped the "Listen to 106.5 FM .. Now!" message. Maybe because they aren't playing any songs that 106 would play.

Last week, I didn't listen to the Construction format much because I only stand the Beethoven song and "YMCA." I still miss "Copa Cabana."

This week, I predict that I won't listen too much. Out of these songs, I can only stand "Beethoven's 5th" and "Bad Medicine."

C'ya
Jeff

52. Re: taping with VCRs

Newsgroup: rec.radio.broadcasting
Date: 1994-01-03 10:30:30 UTC
From: clowndes@cix.compulink.co.uk
Message-ID: <2g8s46$1q3@vixen.cso.uiuc.edu>
Source record: 41657

Does anyone know of a VCR with built-in FM tuner for the radio band ? Ie specifically designed for recording radio programmes ?

Charly

[Moderator's Note: All you need to do, Charly, is to plug the audio output of your stereo (tape out is common) into the audio input jack(s) of the VCR and set the VCR's timer (leave the radio turned on). It is simple and works well. I have never heard of a VCR with FM, has anyone else? Bill]

53. What's the deal with 820 AM airing stuff at night?

Newsgroup: rec.radio.broadcasting
Date: 1994-01-03 10:30:31 UTC
From: barnhart@MCS.COM
Message-ID: <2g8s47$1q4@vixen.cso.uiuc.edu>
Source record: 41658

I'm driving in my Toyota tonight. I'm blindly tapping AM presets on the car radio, which is built by Tandy and has 6 FM station presets, 24 AM, 8 ham, 12 scanner, the BBC and that sonorous atomic clock from wherever it is, Greenwich Village I think. And I hear a basketball game. It's between the Dallas Mavericks and the Sacramento Menthols -- I mean, Kings. So I look down thinking, hm, what station have I preset here? And the display says, 820 AM.

The time is approximately 8:20 *PM* and now I'm thinking, "So did the Score finally get its evening permit from the FCC?"

Or is this the station from a far-flung locale that is keeping the FCC from approving the Score's permit? (Perhaps it's the "home of the Dallas Mavericks," which given the way they're playing, just goes to show the truth of that old saying that home is that place where they *have* to take you in.)

Anyway, I had to go before I got my answer. Any ideas from anyone?
A.

--
Dear Mr. Denninger,
As the legal counsel for News Corporation, I am writing in regard to one of your subscribers, a Mr. Aaron Barnhart, and his repeated misrepresen-tations of Delphi Internet as "a joint venture of IBM and Sears." We will be

[Moderator's Note: I have already sent this to Aaron in email. The station you heard was not WSCR, but WBAP in Fort Worth Tx, a 50,000 watt clear channel (or what passes for clear). My understanding is that WSCR could have reasonable night signal (as did the previous incarnation of AM-820) if they would spring for the engineering, construction and land costs to build a directional array S.W of the city. This would require at least four towers (of about 800' each) maybe more. Then they could probably get the 1000 - 1500 watts they want, and still cover the market. Problem is, they are unwilling to invest the money, so the FCC says no dice. Sorry you cannot have 1000 omni-directional watts on 820 at night in Chicago. PS, I assume the above is your .sig, Aaron. :-) Bill]

54. *TODAY* 1/5/94 WLS Aftnoon Hosts on CSPAN

Newsgroup: rec.radio.broadcasting

Rc> This makes me wonder whether there are other areas of the country so
Rc> amply served with classical music as the Washington/Baltimore area. We
Rc> have:
Rc> Comments, please....
Rc> Bob Carpenter w3otc@amsat.org

Here in Cleveland, we don't have such a variety. I don't know of
any in the non-commercial band. In the commercial area, we have
WCLV. Its music is very nice, but its air personalities leave
something to be desired.

The morning DJ is a broad who sounds like she hasn't had her
first cup of coffee yet. And the news anchor must have been the
real-life role model for the TV character "Ted Baxter"!

When I visited Seattle a few years ago I enjoyed the classical
music played by KING-FM.

... To err is human; to forgive is NOT company policy.

> Cheyney, spent 6 hours a day playing classical music

isn't it interesting that most of the people in the working world
put in at least an 8 hour day, yet people lucky enough to have
the radio jobs gripe when they have a shift longer than five hours -
playing music! And playing classical pieces for six hours, where's
the problem?

Note on original posting: I enjoyed the notes on how the directional
stations are directional.

58. Radio Garth - is this for

I don't know what the trend is like or what lasting power stations like this have, but I do know that a once dance music/rap station in Pittsburgh switched it's format to all Garth all the time. I believ it switched about a year or so ago, but I don't know if it still is broadcasting with this format.

For the Imus deprived out there with C-Span on your cable now is your chance. Imus in the morning will be simulcast on C-Span this Friday Jan. 7 1994. The show runs 5:30 AM to 10:00 AM EST on WFAN. I think C-Span will carry 6-10. Obviously you can't judge the I-Man by one show but you will find out he is nothing like Stern and may see how ridiculous are Sterns claims of Imus stealing his show. Tune in (or set the VCR) and enjoy.

Source record: 41668

Hello.

I want to install an outdoor antenna for long range reception.
I live about two miles from many class B and C stations here in
Cleveland.
I want to know which polarization would give me better rejection
of the local signals.My Sony receiver is not very useful, and the
SR III I had for a while had a problem with the area, too.
I want reliable reception of WHOT 101.1 in Youngstown. I get it a
cceptably now with the small wire included with the Sony receiver,
but I want Hot 101 in stereo.
I have an antenna rotator and all the other neat stuff.

Also, I want something with a narrower beamwidth than the Radio
Shack triple drive-any suggestions on better FM-only antennas?

Thanks.

|>
|>Specifically, we are switching from leased phone lines to a microwave STL.
STL=studio-transmitter link.

|>Why did the signal quality suffer on the phone lines? What are the pros/cons

Pick up your telephone. Call someone. Let me know if you never have a problem. The problem with the use of RL service from the telcos is that there is a whole *bunch* of active equipment between you and the transmitter. Setting aside the problem of signal transmission over 24-gauge copper lines, there are amps, equalizers (to fix the frequency response degradation problems that copper characteristically imparts to the signal), cross-connection punch-downs (or, in some cases, *screw* terminals) that corrode or get wet, as well as the MAIN fact that the stations doesn't have control over the signal at a major portion of its travel from one place to another. You are just another customer to the telco. And problems, as important as they may be to you, are just another distraction for the telco repair division, which is working on a FIFO queue. In other words, the quality of the service is not directly controllable by you.

|>of microwave transmission? Are there any other options for studio to
|>transmitter? With all this talk about fiber optics and info superhighway,

Even with the info highway (are they going to have traffic reports??? "There's a 15-minute delay at the ANS bridge outbound to the CIX expressway..." ;)), I am leery about depending on ANYTHING the government provides to support my business. Since the combined IQ of all the bureaucrats in gov't service isn't equal to that of an altered tomcat, I wouldn't want to depend on them to provide a key link in anything greater than storm sewers.

However, there are some great technologies available that provide full-bandwidth audio and control signaling over microwave, laser, or other proven technological links. The options fall into mainly the electrical (telco), m microwave (stl) or laser (fiberoptic/free air) media.

|>why can't use a couple of computers and a phone line? (or can we?)
|>

Some good sources would be probably back issues of Broadcast Engineering magazine (Intertec Publishing Co., Overland Park, KS) or any good basic text on broadcast engineering.

My grandfather used to tell stories about life on the farm
in Van Buren county. He recently told me that many of these stories
came from a radio program he listened to while living in Southern Illinois.
We believe the program aired in the 1930s from St. Louis, MO. It
was called the Bob Burns show. Does anyone know where I could find
more information about this and if possible, recordings? He would
sure appreciate being able to hear this program again (So would I!)

From: bfowoz@ubvms.cc.buffalo.edu
Message-ID: <2gfo8e$ri8@vixen.cso.uiuc.edu>
Source record: 41672

spt@acsu.buffalo.edu (Scott P. Toenniessen) notes the recent sales of WBUF, and of WBEN and now WWKB (and their associated FMs WMJQ and WKSE). As to whether they would put Buffalo Bills football on the 50kW WWKB signal remains to be seen. While the new owners may have the $$ to bid for the broadcast rights, Rich Communications, owners of WGR, should have rights of first refusal, i.e. they can match any bid to keep Bills and Buffalo Sabres hockey broadcasts. WGR is the flagship station for both franchises, but both teams have radio networks, where individual station can sell their own spots. If the broadcasts end up on WWKB, there is the problem of keeping affiliates happy...more people will be able to receive KB than WGR, although it may be a moot point during daytime games. Also, WGR may fight to keep the sports teams, since they generate the few ratings they can get. Rich Communications also has a lot of money (Rich Products is a Fortune 500 company) behind it, and since the Rich family owns the Buffalo Bisons American Association baseball team (and the naming rights to Rich Stadium where the Bills play), they will probably want to keep their ID with sports. (Now if they only would start showing some intelligence on their talk shows...). Personally, I hope that the new WBEN/WWKB owners can get the sports rights, and use WBEN's classy approach on WWKB's signal...now you've got something!

Just my $0.02, FWIW!

That explains it! They are playing 3 country hits out of the 5 song format
right now.

WPOC doesn't have any competetion right now, ao hasn't for a long time.
It'll be interesting to se what happens.

Chris

I am looking for some advice on putting together an aircheck. I've been out of radio for about 5 years, and have tapes of my old shows,but am not sure exactly what to put on my demo reel. I've been told the aircheck should be "telescoped"....what does that mean? Any advice would be appreciated including length,where to edit,what would get a PD's attention etc..Any job hunting advice is welcomed.

[...snip...]
>

The overnight guy on WBAP has a toll-free number and a program which is
apparently geared toward truckers (no pun intended). Semi-interesting,
actually.

Off and on, over the past few months, I've spent my last few minutes of
consciousness laying in bed and slowly dialing across the AM band, just trying
to see what far-flung stations I can capture from the Chicago area (this is
known as poor-man's DX-ing, I guess). I found what I think was "KOA", 850-AM
in Denver just last night.

My question for either Bill or the group: is there an on-line guide of AM
stations for the North-American continent (or at least the USA)?

AMARC Solidarity Network
==========

UPDATE ON THE PROSECUTION OF BUSH RADIO

On Friday April 30, 1993 the transmitter of Bush Radio, a community radio station in Cape Town, South Africa, was confiscated by government officials, one day before the station was to go on the air as part of a national campaign to free the airwaves and thus end the monopoly of the state-owned South African Broadcasting Corporation.

Four months later the government of South Africa charged Bush Radio's two staff members with three counts carrying stiff penalties, including fines of up to 10,000 Rand and/or 3 years imprisonment for each of the first two counts.

Bush Radio's decision to go on the air without a licence was not taken lightly. The station's members, including community and youth organizations and the University of Western Cape, took the decision only after being blocked in their efforts to obtain a licence for over two years.

AMARC's Solidarity Action Network issued two RadioAction Alerts in support of Bush Radio, one in May '93 and the other in October.

On December 10th the government of South Africa withdrew all charges against Bush Radio and its personnel.

This is clearly a victory for community radio and for the right to communicate in South Africa.

AMARC joins Bush Radio in thanking the many community broadcasters and supporters who intervened on the station's behalf.

In solidarity,

Bruce Girard
AMARC Solidarity Network

----------==========/////////=======--------

The following is from a Public Statement
issued by Bush Radio

STATE WITHDRAWS ALL CHARGES

CAPE TOWN, DECEMBER 10, 1993 - Today the State withdrew all charges against Bush Radio.

Following out\r first four hour broadcast on Sunday 25th April, 1993, State officials seized our transmission equipment and instituted charges of "illegal broadcasting; illegal possession of broadcast apparatus, and obstructing the course of justice" against two of our members, Mervyn Swartz and Edric Gorfinkel. They first appeared in court on 13th October, getting a postponement to allow us time to make representation on why the charges should be dropped. In the Cape Regional Magistrate's Court this morning, we were informed that the Senior Public Prosecutor had decided to withdraw all charges. We hope to retrieve our equipment soon.

We welcome the decision of the Senior Public Prosecutor. It is a recognition of the constructive role we, and the community radio sector as a whole, can play in the process of reconstruction and development in our communities. It acknowledges the inevitability of change in our broadcasting environment. And it anticipates the imminent introduction of an Independent Broadcasting Authority (IBA) which will mark a new era for South Africa's airwaves.

The IBA will issue licenses to three distinct kinds of broadcaster, defined in terms of who owns and controls the facilities: Public, Private (or Commercial) and Community. The establishment of an IBA will therefore make it possible for community radio stations to broadcast legally for the first time. This is a dispensation for which Bush Radio has motivated long and hard.

In the interim, however, we insist that the existing state apparatus still has a responsibility to protect the development of the community radio sector. Recently, under the auspices of the Ministry of Home Affairs, several temporary licenses have been issued. Some of these (all broadcasters with commercial interests) have referred to their ventures as "community radio". We challenge this claim. Community radio is, by definition, owned and controlled by the community. The value of community radio could be compromised if commercial ventures persist in claiming "community" status. We trust that an IBA will help them to find their proper place on the air.

The members of Bush radio extend their heartfelt thanks to the many supporters, friends and comrades - here at home and all over the world - who stood by us through this difficult period. They are too many to mention here, but they know who they are and the importance of what they have done will become clearer with time. To date this has been predominantly moral support, and we look forward to being on the air again soon so that this energy can be translated into practical participation in Bush Radio, putting flesh on the bones of our slogan: "it's yours, it's mine, it's ours; yeyakho, yeyam, yeyethu; dis joune, did myne, did ons s'n".

have you ever worked in radio? on-air? unless you are a big shot, air talent do more than "play music." Those who do their job well prepare in advance. There's production work (commercials, PSAs). And the infamous 'whatever' - clean the station, work the phones, etc.

>the problem?

Whoa...as a DJ for the past three years, doing mostly "independent rock" but jazz and classical on occasion, I've just gotta say that doing a creative, interesting show 5 days a week for even 3 hours a day is pretty hard. (Then again, I work at a station where DJs choose everything they play - in all genres...maybe this makes a difference.) The times when I've had to do marathon shifts (12 hours is the longest single show I've done, but I've done plenty of 6-8 hour shows), you really burn out in the last 1/3 of the show, no matter how much caffeine you drink. Even a five-hour classical shift an be a drag, especially day after day. If you're being "forced" to play particular stuff that you don't particularly enjoy, that's even worse.

I realize this all sounds crazy, but it really is the case in my experience.

[Moderator's Note: These replies are included here about the Howard Stern New Years Special on PPV cable TV. Although the show was TV, it was by one of the more well known radio personalities. I would like to leave it at these three posts, and not deal with a continuing thread. Thanks Bill]

Can't say that I saw the entire special. I gagged after five minutes of watching a review tape we got from the distributor. Raunchy isn't quite the word. New low doesn't quite do it either. The opening featured a procession of "beauty contest" participants all with some nickname like "Lesbian from Cleveland" marching down to a microphone one-by-one. Instead of saying pagent-like things about saving starving children they would say "I love to masturbate in public" or "love to have a man come on my face" or how piercing a certain part of the anatomy made her "come like a machine gun". That was about it for me. I pity our reporter who actually has to watch the whole thing and write about it.

Sedge Thomson's WestCoast Live
San Francisco's Live Radio Show to the World

January 1, 1994

Dear West Coast Radio Listener, Visitor, Bagel Catcher:

On January 8, 1994, a historic event will occur: the entire on-air production team of West Coast Weekend premieres their new radio show: WestCoast Live. We would like you to be there in person or listening to our new Bay Area NPR Host Station, Information Radio KALW 91.7 FM. The other exciting news is that WestCoast Live - San Francisco's Live Radio Show to the World - will broadcast throughout the West via the NPR satellite. Come celebrate at our broadcast site, the beautiful Cowell Theater at Fort Mason, 10 am to Noon on Saturday, January 8.

We have a new time on KALW 91.7 FM Information Radio, 10 am - Noon, one hour earlier than our previous show. Car Talk with Click n Clack, another Bay Area favorite, precedes us on 91.7, 9 am- 10 am, and before that, Weekend Edition, so set your radio button to 91.7 FM and you'll hear all your favorite radio voices. Guests in January include Josh Kornbluth, Anne Lamott, Ian Shoales, The Persuasions, Dick Dale (King of Surf Guitar), Claire Peaslee, and many other fantastic guests. As always, your pre-show lobby warm-up will be sweetened by a piece of Stan's San Francisco Cheesecake, and the spectacular view oin January include Josh Kornbluth, Anne Lamott, Ian
Shoales, The Persuasions, Dick Dale (King of Surf Guitar), Claire Peaslee, and many other fantastic guests. As always, your pre-show lobby warm-up will be sweetened by a piece of Stan's San Francisco Cheesecake, and the spectacular view of the Golden Gate Bridge.

It is because of you that West Coast Weekend stayed on the air for over 8 years. Your support, including attending the show, made the difference, On January 8th, 1994, at the Cowell Theater in Fort Mason, a new era starts. Please be there. Tickets are still only ten dollars and reservations can be made by calling 415-664-9500.

This is the long anticipated big step for us. We promise to continue to deliver the quality of shows you have come to expect from us and provide a platform for emerging performers to be heard. We all appreciate the support you gave West Coast Weekend. You've helped us reach this point. Come help us

celebrate the new West Coast Live!

Happy new year!
Sincerely

Sedge Thomson, Diane Hidy, Meredith Tromble, and all of us at the Coast

PS. WestCoast Live airs live 10 am - Noon, following KALW 91.7's 9 am-10 am broadcast of Car Talk. You get your car out of the shop an hour early. If you drive, parking will be much easier at Fort Mason, and you're out for lunch sooner! And, of course, great coffee abounds at Fort Mason.

Welcome to the first of many(hopefully :-))updates on what
is happening in radio in western New York and southern Ontario..

First,the Buffalo Bills radio rights battle has begun.
So far,WGR-AM(which has held the rights since 1990),WBEN-AM and
WHTT-FM have all placed bids;more stations are expected to put
in bids as well,according to Jerry Foran,who is handling the
radio negoiations for the Bills. According to the Jan.5 Buffalo
News,WKBW-TV sports director John Murphy(who has handled Bills
color duties when WBEN held the rights in the mid-to-late 80s)
may do the color if WBEN gets the rights to the Bills games;this
was said to be one of 'BEN's requests. Murphy has the OK from
Channel 7 management to do the games.(BTW,a recent posting from
Mark Wozniak at WBFO is correct:WGR does have the right of
first refusal in regards to retaining the Bills,Bisons and
Sabres;however,what isn't as well known is that-for WGR-being
the home of the Bills is a bit of a drain on the station
financially-it does lose money on the broadcasts.)

Second,PSAs talking about AIDS and condom use have been
airing on Buffalo's airwaves.(No,they're NOT from the U.S.Dept.
of Health and Human Services. These were done by the Gay Men's
Health Crisis,a N.Y.C.-based health group and sponsored by a
San Francisco media group.)The ads are on WBEN-AM(news/talk)and
its sister station,WMJQ-FM(Q102,hot A/C)and have been for about
2 weeks.

Ratings should be out soon. As soon as I know 'em,I'll post
'em.

87. Radio stations with alternative rock music

Newsgroup: rec.radio.broadcasting
Date: 1994-01-08 00:53:42 UTC
From: ewmc@momth2.maths.monash.edu.au
Message-ID: <2gl06m$6vl@vixen.cso.uiuc.edu>

I'm looking to compile a list of radio stations around the world
with programs that play independent/alternative rock music. Does anyone have or
know of such a list already, on the net or otherwise?

Thanks,

Ernie Chow
ewmc@cosmo.maths.monash.edu.au

88. Radio Hosts on TV <stern, Imus and Wansley-Vrdoliak>

RE: miscellaneous responses to RRB Digest #477 (5-Jan-1994)

>Subject: Howard Stern New Year's
>Anyone catch that 40 dollar pay-per-view Howard Stern New Year's show?
>Anything interesting/tolerable?

I didn't catch the pay-per-view special because it was $42 bucks on my cable system, _and_ you need a decoder box. I get my cable through my cable ready TV.

A radio friend of mine said that Rick Dees, the morning drive ya-hoo for KISS-FM here in Los Angeles, claimed that the show had no entertainment value and then proceeded to give refunds to anyone calling in and saying they didn't like the show, or complained about it. From what I heard he gave out about 200 refunds in that morning show alone. I also heard a rumor that he was going to do the same on his weekly Top-40 countdown show. So if you get his Top-40 countdown, and need an extra $40 bucks, it might be incentive to listen. In my opinion, even $40 isn't enough to get me to listen to Dees.

>RE: Radio hosts on C-Span

I caught Ed and Ty on C-SPAN late last night. Didn't really listen too long, since their comments seemed to be Chicago-centric, but the one thing that _did_ catch my attention was the cheesy studio space they were working in. Is that the space they normally work in, or was that just a make-shift studio for C-Span purposes? I've seen better facilities in college stations. I did notice they had a VT320 in the studio, which means that probably have a VAX, which is a plus for me, since I'm a big time VAX/VMS bigot.

I hope they play the Imus stuff at the same time so I can catch it. That's one jock that I've heard about but never heard. I suffer through Stern's rantings on occasion, and find his claims of 'originality' and 'other jocks are copying my bits' completely preposterous. Fartman, for instance, was a National Lampoon comic in the magazine, then on the albums. This A.M. he was doing Sternak the Improbable (did Carson steal the idea from him?).

Anyway, that's my two cents worth.
Marty

[Editor's Note: WLS's studios are terrible, as is their programming. But they win by default as the only issues-oriented talker in the Windy City. Vrdoliak is a failed political wannabe turned talk-show right-winger (he hates Democrats AND Republicans, but mostly

Deomocrats. Basically he is a lame host on a lame station. Bill]

89. CSPAN Airs WLS's PM Drive

Newsgroup: rec.radio.broadcasting

>switched it's format to all Garth all the time. I believ it switched about
>a year or so ago, but I don't know if it still is broadcasting with this
>format.
>

I have un update on this situation in the Durham Chapel Hill area. The al
Garth station switched to a "Hot country" format on Wednesday January 4.
That means they went from midnight between Fri and Sat to early Wed. as
all Garth. It must be some kind of a transition format. If I am not
mistaken he has 5 stock (I can name 4) and one Xmas disc. Average 10
songs per at 3:30 each is a repetition of 6.75 times per 24 hours.
Probably a lot better than some top 40 stations. Anyway its all over now.
Thank goodness.

92. Re: Classical Music in DC/Bal

93. NY Radio Ratings, short list

Newsgroup: rec.radio.broadcasting
Date: 1994-01-08 00:54:09 UTC
From: testnet!pr@pegasus.att.com
Message-ID: <2gl07h$738@vixen.cso.uiuc.edu>
Source record: 41698

Fall 1993 ratings (short list meaning only the top 15)

1. WRKS-98.7 urban contemporary 5.8
2. WLTW-106.7 lite rock 4.8
3. WABC-770 talk, mostly local 4.6
4. WHTZ-100.3 top 40 leaning modern 4.5
4. WCBS-101.1 oldies 4.5
6. WBLS-107.7 urban contemporary 4.0
7. WPLJ-95.5 Hot AC/rock oldies 3.9
7. WINS-1010 all news 3.9
9. WQHT-97.1 urban contemporary * 3.8
10.WXRK-92.3 classic rock plus
Howard Stern and Greaseman 3.6
10. WQCD-101.9 contemporary jazz 3.6
and best ratings ever?
10. WOR-710 talk + NY Giants FB 3.6
13. WPAT-93.1 mix of beautiful 3.5
music and soft adult contemp
14. WFAN-660 all sports + Imus 3.1
15. WNEW-102.7 mix of current
and classic rock 3.0
15. WSKQ-97.9 spanish contemporary 3.0
and possibly their best ratings ever.

Additonal format description for hot 97 due to "forced" listening:
* a mix of pop hits by mostly black artists, rap including politically
incorrect songs such as U.N.I.T.Y, some dance tunes, hip hop, and "slow jams"
Their latest slogan is "the new flavor for ninety-fo" That is not a typo,
that is Ninety-Fo'!

I will add to this list if I see the ratings down to 1.0.
Missed out on the ratings down to 0.3, perhaps it was on the AP
in Boston like 6 months ago?

94. WMUC's Ant Problems. Need Tech assistance

Newsgroup: rec.radio.broadcasting
Date: 1994-01-08 00:54:10 UTC
From: hazmat@w3eax.umd.edu
Message-ID: <2gl07i$73c@vixen.cso.uiuc.edu>
Source record: 41550

In the last ice storm here in Washington DC area, something
screwed up our antenna feed-line here at WMUC 88.1, college
Park, MD. The main part of the cable is 7/8" foam core hard-line.
It looks like some Andrew cable that I have used before, LDF-X-50
or something like that. Solid rippled jacket with a hollow
inner conductor that looks a little bigger than about 1/4".

I have a TDR hooked up to the cable and to find the fault,
I need to know the relative propagation velocity of this cable.
The guide on the TDR says that foam core is generally Vp=.78
is this really the case for this particular cable? I don't have
a spare connector, so I cannot hook up a piece of the cable
(I have about 10 spare feet of it) to find out for myself.
Using Vp=.78, the problem appears to be a dead short 49.6 feet down
the cable.

I have a feeling that this may be too much of a problem for
my limited skills and I will want to call in the experts. The
CE at WWDC suggested US Tower in Frederick, MD, or a less expensive
and not quite as good alternative would be Teltronic in Landover, MD.
Anybody got a favorite tower/RF company in the DC area?

Any help/suggestions/words of encouragement would be appreciated. Until
this is fixed WMUC-FM is off the air. But this exercise does prove
out the robustness of the BE-FX30 exciter (our transmitter). Due to a
Brain-dead DJ who ignored the meter readings, the exciter was running
for probably 3 hours into a dead short. 5W forward, 4W reverse, and when
I plugged it into the dummy load, it works fine. It seems that the VSWR
protection circuit works just fine!

Subject: Re: Horizontal vs Vertical
X-Mailer: Pegasus Mail v2.3 (R2).
Status: RO

Well, a horizontal polarized antenna will allow you to point towards the station you want. It will "reject" signals to the sides and to the rear of the antenna.

If the station you want to reject is between you and the station you want then it won't work.

Also, the station you want to pick up needs to be transmitting in the horizontal plane. Cross polarization results in a 20db loss of signal.

You might try building or buying a trap to notch out the local frequency.

96. Re: taping with VCRs

If you don't want to tie up the "whole" amp just to record radio,
consider getting just a tuner - Crutchfield has the Yamaha T-60 for
160$US, and [shudder] Radio Shack has a Realistic TM-150 for 60$US.
J&R Music World offers AudioSource TNR One for 200$US, and Technics
STG-460 for 180$US.

Of course, you can get a low-end receiver/amp for about 130$US, so why
bother with most of these.

The Radio Shack unit is rather quaint [manual tuning] but has the
advantage of being small [2.5x9x6 inches] and cheap.

There may be other options available from "professional" audio
sources, but I wouldn't know about that. :)

numbers: Radio Shack is everywhere, price for TM-150 is from '93
catalogue [stock #31-1956, page 43 of '93 cat.].
J&R Music World: 1-800-221-8180
Crutchfield: 1-800-955-3000

No connection with any of these companies, other than being a mostly
satisfied customer.

101. KMPC to be sold to Cap Cities

Newsgroup: rec.radio.broadcasting
Date: 1994-01-08 12:58:09 UTC
From: jmora@netcom.com
Message-ID: <2gmal1$n7p@vixen.cso.uiuc.edu>
Source record: 41556

KMPC/Los Angeles, the venerable AM which was known for its adult standards format until 1992, will be sold by Golden West (the Autrys) to Cap Cities. This deal has been in negotiation for the past year or so...

Cap Cities already owns talker KABC/Los Angeles and rocker KLOS. KMPC's 50,000 watt signal is stronger than KABC's... however there is no plan to flip frequencies. Rumor is that KMPC will flip from it current all-sports format to talk also, aimed at 18-34 year olds.

Ironically, the latest Arbitrons show an upward trend. KMPC has generally had ratings of less than 1.0... however latest 12+ trend was 0.4-0.6-1.2, with men 18+ 0.6-1.2-2.4 [these trends Oct-Nov-Dec].
Best showing ever as sports talker, i believe.

The sale awaits FCC approval.

From: garyb@ins.infonet.net
Message-ID: <2gmal2$n7r@vixen.cso.uiuc.edu>
Source record: 41557

After reading the post about the station that played 5 songs in rotation as the lead-in to its new format change, here's a better one:

In Des Moines, 97.3mhz KDMI-FM was purchased by Stoner Broadcasting (now American Radio) last year. Stoner also owns KGGO-FM and 1460khz KGGO-AM,a 5 kw directional AM station.

Last weekend, the religious programming that KDMI-FM had carried as a format for nearly 20 years was moved to the 1460-AM station, which began calling itself KDMI. The FM station began using a computerized "countdown", using what sounds like either the Amiga's voice software or the Sound Blaster talker program to say "T-minus"...then the number of hours minutes and seconds before the station changes formats. Every fifth announcement has a saying that follows, which is driving the PD's in the market crazy trying to figure it out...since they'll say a line from a country song, next time a line from an oldie, next time refer to something Rush Limbaugh has said... Finally, this afternoon at 5:30pm we'll know what they're up to...but it's not nearly as fun as watching everyone try to figure it out like they have.

I'm sure you'll get dozens of replies on this, but here goes:

In putting together an aircheck you want to give the program director or
which means that you edit out the music, commercials, etc. that you are not a
part of. This means if you are jocking a music shift, you would record the
"intro" of the song done by you, but stop at the vocals. You would also
cut out the commercials, except those you have voiced.

Try to make the tape five minutes or less. Make sure it's you...not something
you've spend hours editing out your mistakes or flubs. Programmers understand
mistakes, but they don't like doctored tapes.

What gets a PD's attention? You do. If you call the PD of the station a few
days after the tape's sent out and follow up that phone call at least once or
twice with an enthusiastic attitude, you'll get in the "listen to" pile.

Make sure your cover letter catches the PD's attention. Keep the resume you
include brief, easy-to-read (avoid the form resumes you are taught in class)
and send it in a nice, new envelope...not wrapped in a brown paper bag.

Gary Barrett,
WHO Radio News
(former AM/FM program director)

news director a clear example of your work. We ask for it to be "telescoped",

105. Making a good 'demo' tape for radio

Newsgroup: rec.radio.broadcasting
Date: 1994-01-08 12:58:23 UTC
From: directory.js@genie.geis.com
Message-ID: <2gmalf$n80@vixen.cso.uiuc.edu>
Source record: 41560

Beachboy25@aol.com asks for suggestions about putting together an aircheck.

> "... "telescoped"....what does that mean? ..."

That means that you have taken out all of each song except for the very beginning and very end of each one where you are talking or doing something. The PD doesn't need to hear the songs on your tape -- just you and what you can do. Taking out the middles of the songs (and =all= of any song that is in the middle of a music sweep) saves the PD from having to fast-forward through your cassette.

(Quick parenthetical thought: If you've been out of radio for five years, your tape will only have songs from five years ago, right? I worry that this will only reinforce the fact that you've been out of the biz -- not that you can hide this fact ... but why draw attention to it? Is there any way you can get some studio time to work up new tape? Just a thought.)

> "... my demo reel ..."

I assume you realize that virtually no airchecks are reel-to-reel these days. Almost all -- at least all which will ever get listened to -- are on cassette.

> "... length ..."

With most PDs, you don't get extra points for length. Many will listen to less than the first minute. Some will listen to the whole thing no matter how long it is.

Just as a resume only summarizes your experience, an audition tape merely gives an introduction to your on-air talents. A good resume and a good tape may get you to the next step, but neither is intended to tell a prospective employer =everything= about you. You will dazzle him or her with quality, not quantity.

A couple of minutes "scoped" (telescoped) is usually plenty to put on an unsolicited tape. (A solicited tape, on the other hand, should be tailored to whatever is requested.) One additional option, if you have any good production bits, for instance, is to put some of your very best work on the same cassette -- either later on the same side ... or else on the reverse.

Whichever you do, a good tip is to label your tape as to contents, your name and phone number. (Don't assume that the PD is so well organized that your tape won't get separated from the resume, the cover letter, and the outside envelope. You don't want to put him in the situation of loving your tape but not knowing how to get in touch with you!) For example,
John Doe (311) 555 1212 << your name and phone number

AOR* aircheck (2:10) * or whatever format(s) you were in
production (:60, :60, :30) << to show spots of that length

> "... what would get a PD's attention ..."

Think in terms of someone who has dozens of these things to go through. You don't want to fade into the wallpaper. And you don't dare assume that the PD is going to listen to your entire tape. This is one time when the cliche "Save the best for last" is bad advice.

Put your best break first! The tape itself should be nothing but your best, actually, but the very first one should be the best of your best.

Beyond the tape itself, be sure that your resume and cover letter convey the professional attitude you want to show. If you can address each to the PD by name, this is better than merely addressing him or her by title. Also, if you have anything additional which may make a good impression -- maybe newspaper clippings from some successful stunt you've done, or thank-you letters from a charity which you helped while at a previous station -- you may want to include a copy of those.

Again, your package is likely going to be your "first impression" on the PDs who receive it. You want that first impression to be a good one (without being overwhelming in size or scope) and to give one or more PDs a reason to want more ... and eventually to want to hire you.

> "Any job hunting advice is welcomed."

Be "willing to relocate" ... and say so. If you really want to get back into radio, don't assume you're going to find work wherever you now live.

I'm not suggesting that you "aim low", but do realize that you've been away from it for five years and will be competing against applicants with current experience. Be emotionally prepared to re-start lower than where you ended. That may mean a smaller market ... a lesser airshift ... or both.

The weekly publication Radio & Records is far and away the best source for listings of advertised on-air positions. The subscription price is fairly steep for an individual, so you may want to check for it in a public library.

But you may need to go further than open positions. While you're at the library, look for the directories and publications which list stations (and addresses, phone numbers, and in some cases personnel) where you may want to apply. The annual Broadcasting & Cablecasting Yearbook is probably the most common. In the opinion of many in radio, better options include the annual Duncan's Radio Yearbook and the M street Journal.

There's plenty more, but this is already getting to be too too long. <g>
Beyond that, good luck!

Jim

I'd like to post a response to:
prmount@attmail.att.com who wrote:

>isn't it interesting that most of the people in the working world
>put in at least an 8 hour day, yet people lucky enough to have
>the radio jobs gripe when they have a shift longer than five hours -
>playing music! And playing classical pieces for six hours, where's
>the problem?

Someone not in radio, might very well think this way. Of course, every field has it's pros and cons, ups and downs. Having been in commercial radio for about 16 years, I'd like to put my two cents in. Yes, a shift of 3, 4, 5 or even six hours seems paultry compared to a typical 8-hour day. But, there are other things to consider, ESPECIALLY if you're doing a morning show. Prep for morning shows never stops. Before the show, you're in the production studio producing bits and elements. After theshow, possible the same. For me, I spend a couple of hours each afternoon writing and scanning information for bits. Then there are the appearances, the majority of them unpaid...appearance that come in the evening, on the weekends, sometimes continuously. Put that together with a work schedule that requires you to be up at 3:30 or 4 in the morning. Pretty soon you're living a weekly schedule that has to conform not only to early morning hours on the air, but the hours of folks who are running on regular schedules who expect to see you at a club night, a weekend remote, etc. In addition, don't forget the meetings with management, the meetings with program directors, the meetings with consultants, the meetings with clients. Hey, guess what? Today's hard working air-talent who's pulling down a 4 hour shift....is probably working a 10 or 12 hour day! So, don't be misled: Being on the radio....isn't as easy as it appears.

Previously,bobw@panix.com(Bob Weinstein)asked:

> Does anyone have any idea how they managed to do this
>without any advance warning?

Well,your questions shall be answered. In his December 22
AM/FM column,N.Y.Newsday's Paul Colford reports that
WAXQ GM Randy Bongarten "was able to keep the planned fornat
switch secret...by buying all of the rock music(rather than tip
off record companies by asking for freebies). He also dealt
with a logo designer and printers he knew would remain mum,and
he insisted that people sign confidentiality aggreements before
receiving work on the new venture."

This may not clear up how Q104.3 could hire a new PD and
air staff,sell commercial time,or apply for a call letter
change-but at least it's a start.

109. Ratings for Seattle

Welcome to the Howard Stern Radio Network list - long form! These are radio
stations currently carrying the show. Also included are some cities which
may pick up Howard in the future. All times are local times. Thanks to
everyone who has sent e-mail making corrections and/or additions. Please
continue to do so, all info is greatly appreciated! - Chuck

Special thanks:
* King of All Media Newsletter for the phone numbers for San Jose, New
Orleans, Boston (actually, no number), and Rochester
* Paul Richards (...!pegasus.att.com!testnet!pr) for info on:
Myrtle Beach and El Paso.

Most of the end times have been left open because we don't know when Howard will shut up :-)

To write Howard:
923 K-Rock
600 Madison Avenue
New York, NY 10022

FAX: 212-759-KFAX (5329)
Prodigy: KROK92A (general Prodigy ID for K-Rock, I believe)
Internet: krok92a@prodigy.com (we think...)

Cities that don't have the show, but hopefully a station will pick him up:

Phoeniz, AZ - very likely
Fresno, CA - not anytime soon
Denver, CO - how much longer?
Hartford, CT - been promising this one for months
Miami, FL - this should have happened months ago
Minnapolis, MN - this one is a maybe
Atlanta, GA - still waiting... bring Howard to the South!
Detroit, MI - been promising this one for months, too
Pittsburgh, PA - how much longer?
Providence, RI - very likely
Houston, TX - very likely
Seattle, WA - how much longer?

111. Imus on CSPAN - Wow!

Newsgroup: rec.radio.broadcasting
Date: 1994-01-08 12:58:46 UTC
From: rrb@deja-vu.aiss.uiuc.edu
Message-ID: <2gmam6$n88@vixen.cso.uiuc.edu>
Source record: 41565

I was fortunate enough to see the last half hour of the Imus in the Morning broadcast on CSPAN tv.

I was very impressed. It was very funny and I would love to see it here in Chicago.

A couple of questions...

1) For those who can hear Imus every morning, how did the televised show compare to the radio show each day. I mean did he do it differently? Was the TV show indicitive of the average radio show?

Also can anyone get me a copy of the Rush Limbaugh Parody "I like friends with white faces"? That killed. I myust have it. It aired in the last 40 minutes or so, which was all I was able to watch.

A VHS copy of the whole show would be great too <hint hint>.

Please???

Anyway, I really liked the Imus show. Maybe I better thinkl of changing my .sig, below :-)... NAW!

Bill

Don Imus
IMUS IN THE MORNING
WFAN, New York

[Tune "I've Got Friends In Low Placed by Garth Brooks]

Well I don't care what you think
But Liberals stink
And Democrats almost as lame.
All thoses Negros and Jews
They give me the blues.
Our country's dying
And Clinton's to blame.

Feminazis are wrong
And they don't belong
In my conversative minded domain.
But lets call a truce,
Stick your head in this noose,
And don't let me hear you complain, 'cause,

CHORUS:
I like friends with white faces
And a burning cross that you know chases
Those Jews away,
Then we call it a day.
Oh we're mighty big on the master races
We wear slip on sheets and pillow cases
Oh I like friends with white faces

Well I and my peers
We don't tolerate queers:
Show them what an axe handle's for.
You wouldn't believe
What we did to this Hebe,
Painted Swastikas(sp?) on his front door

I'm proud as can be,
'Cause the whole E-I-B
Think I could be President some day.
But I'm just a man of letters you see
And they all spell K-K-K, 'cause

CHORUS, repeat CHORUS ... suddenly ending in explosion amid the 2nd chorus

Okay, so I've been meaning for months to put together a newsletter about NE Ohio radio, and I haven't finished yet... well, it's coming. Meanwhile, to whet your interest, let me refresh your memory about one of the most controversial sales in Cleveland radio history. Classic soul/gospel station WJMO-AM and sister station, Churban/dance WJMO-FM HAVE BEEN SOLD to Zapis Communications, owner of WZAK-FM, Northern Ohio's premier urban contemporary radio station. The owner of Zapis Communications is white, and a separate division of Zapis called Zebra Communications bought WJMO AM/FM. Zebra's two primary owners, WZAK PD Lynn Tolliver and music director Bobby Rush, are both black and there was a big fight over whether Zapis was using Tolliver and Rush as frontmen so the company could get tax breaks on the purchase of the stations. This situation did happen when Nationwide Communications sold WGAR-AM (now WKNR-AM) a year or so ago, so there was a legitimate reason for the FCC to be concerned... and there was a hearing to decide whether the sale would be in the public interest.

As a condition of the sale, the Southern Christian Leadership Conference is overseeing programming of WJMO-AM. Cleveland _Plain Dealer_ radio columnist Roberto Santiago speculates that this was agreed to so that Zebra Communications could hold on to the FM, which is highly profitable.

Interestingly enough, while it has been promised that WJMO-AM/FM will strengthen their commitment to Cleveland's African-American community, Jammin' 92 continues with their mix of R&B, hip hop and alternative rock from 7-11pm. (Sorry. I just don't know of that many black people who are big fans of Stone Temple Pilots and Nirvana. :)

This is one of two duopolies that now exist in Clevelnad, the other one being WHK-AM and WMMS/WMJI-FM.

More info soon...

THE FUTURE: More of the same or less of the different...
By Frank Haulgren

Non-commercial broadcasting sits on the edge of a new age. At first glance this new age may seem to be defined by rapid change in available technologies. Just steps away from us are interactive television, 500 cable channels, Digital Audio Broadcasting (DAB), perhaps even micro-radio or micro-TV, and even the "information superhighway". But to see only the technology and the possibilities it dangles before us is to be duped. The real engine that can drive and define this looming new age is people -- people who grow increasingly wary of and hostile towards media that seems to be serving the needs of the state and corporate economies. These two monsters must cringe recognizing the irony that these new technologies present. Product! More product! But at the same time providing access to the tools and knowledge that enable real democratization of society.

Writing for the ZEBRA News out of Denmark, Steffen Knudsen and Lisa Klocker call the appropriate use of new communication technologies an enabling force for democratic development. They write, "If progressive movements and organisations are to influence the political development seriously, they need more powerful media. . ..It should be just as natural to make communication projects as to dig wells and support poor farmers. ...(Amazon) rubberworkers need their own radio (stations) in order to take active part in drawing up their own future. Cattle kings and oil companies will, like any other authority, consider

the radio a dangerous weapon in the hands of rubberworkers. This because the radio has a much more immediate effect than for instance a health project. ...Within hours after the inauguration of a new radio or TV-station, local (or) even national power structures can be challenged."

This call for a participatory people's media is growing everywhere. Radio B-92 in Belgrade has captured the support of its community and has become a trusted information channel by the people. Black Liberation Radio in Springfield, Illinois has likewise siezed the hearts of that city's African American community. Last issue we reprinted an editorial by Lisa Vinebohm, editor or AMARC's newsletter InteRadio, in which she spoke (as Knudsen and Klocker above) for the empowerment of aboriginal peoples through the community radio movement. All this is happening at a grassroots level. It is happening because the people who stand outside of the mainstream media (and this, unfortunately, has come to include the bulk of non-commercial radio) have a very different vision of the possibilities presented by this evolving technology and because the communities they are speaking to and of also embrace this vision, rejecting the one tied to consumption and the bottom line.

Some herald DAB as providing a place on the radio dial for everyone. The evolving technical specifics of this system, however, seem to dictate that radio broadcasting will become increasingly centralized, controlled by fewer people and that the future of localized small audience radio will be threatened by this new technology. DAB could, in some schemes, supplant conventional FM broadcasting entirely.

Neil Postman has said that the question we should ask when examining any new technology is not "if" we need it but "why" do we need it. Harold Hallikainen maintains in his Radio World articles (see p.4) that given current micro technologies there is space on the exisiting FM band for low power stations if the FCC chose to allow them. So why do we need DAB and more stations with far reaching signals? Why replace an exisiting technology that has served quite well with another? Why 500 TV channels when most people can't find a thing worth watching on those we have?

What increasingly disturbs me a year after the first issue of RRB is the pace at which access and local concern for minority audiences (once the stock-and -trade of non-comms) is giving way to concerns about "success", "credibility", and professionalism. Concepts that once were the far off concerns of commercial broadcasters. Lydia Sargent, writing in an issue of Z Papers devoted to the state of progressive media, says, "To reach more people, by way of being taken seriously in the larger media world, you are supposed to make your message more palatable, but this usually becomes toning down the message and eventually selling out.

You can never break into mainstream visibility unless you function the way the mainstream functions..."

This is a time of "demassification", says Alvin Toffler. Our society is abandoning the cultural baggage that has been carried since the industrial revolution. The time of mass production and mass consumption and perhaps even mass communication has passed. We see educational institutions once modeled after factories strive to redefine success among students. Environmentalists are successfully changing the definition of economic impact by including consideration of environmental factors and the cost of their mitigation in the cost analysis of major construction projects. Broadcasters seem to be swimming upstream, however, looking large, measuring with obsolete tools and seeking to limit access to a preferred few (be they listener or volunteer) rather than embrace the concept of inclusion.

In David Kirsch's letter on page 2 he correctly states that the people must fight for access to all media in order to insure democracy. And he's right. There is a lot more at stake than what kind of music gets played on your community radio station.

###

p.2

Micro Radio: Not For Everyone & Not The Best Answer

Dear RRB,
I appreciate your refreshing newsletter and the spirit it upholds. I'd also like to enter the discussion on "Sandbox Radio."

Even though this is the land of Jesse Helms, Balance & Accuracy in Journalism (BAJ) got its start because there are so many people in this area of North Carolina who are fed up with the lack of diverse and non-mainstream public affairs programming on the radio.

BAJ is now campaigning to strongly encourage WUNC-FM (a powerful and wealthy NPR station) to include some diverse and controversial programming as well as the shrink-wrapped and dumbed-down fare it currently has on.

I strenuously disagree with the suggestion in the front page piece (RRB #4, Who Knows What Evil Lurks in Sandbox Radio) that, "the time may have arrived to give up seeking a return to 'community radio' and start anew. Recreate - with the scale small and the possibilities undefined."

I believe it is important to use all possible media to maintain access to information for those without much power and wealth. That includes micro radio. But please don't concede any territory. People should organize and struggle for greater con-

trol of public and community radio. Some points to consider: The airwaves are ours not theirs (the corporate and governmental hacks). The original mandate for public broadcasting was for controversy, unheard voices and diversity. It was established for the express reason that it could be protected from the corporate and government pressures to which networks are subjected.

People expect more from public and community radio. Even though NPR and its local stations are very far from the original mandate, it tends to reach those with the most education and influence within communities, such as teachers, doctors and other professionals. NPR got a progressive reputation over the years even while it shifted more and more to the right. Media critic Norman Solomon likens the situation to this: throw a frog into boiling water and it will jump out, but put a frog into lukewarm water and slowly raise the heat and it will boil to death. Many folks will respond if they become aware of the problem.

Micro radio may be terrific for an urban concentration of population. But consider the geography of an area such as the Triangle (Raleigh, Durham and Chapel Hill), which covers a wide and decentralized region of city, suburbs & country. A micro station would cover a micro stationary audience and an even smaller mobile radio audience. (People commute long distances by car and are captive audiences of the rush hour radio programs, hence the big influence of NPR News). A strong signal like that of WUNC-FM easily covers the Triangle and many miles beyond.

Even if a prolonged effort to demand the reinstatement of public input into public radio is unsuccessful, the effort itself is worthwhile because it is consciousness-raising. People getting sufficiently disgusted by NPR News items on bubble-gum blowing contests can feel good about supporting stations that broadcast stimulating and provocative shows.

BAJ is not only involved in pressing for an improvement in mainstream sources like WUNC, it is also involved in supporting and producing alternative media such as The Unofficial Story on WSHA-FM from Raleigh's Shaw University, The Prism (a free all-volunteer monthly newspaper) and local broadcasts of Pacifica Evening News on WSHA and WXYC-FM (Chapel Hill).

BAJ is distributing a bumpersticker: "PUT THE PUBLIC BACK IN PUBLIC RADIO", for $2 each. BAJ, PO Box 824, Carrboro, NC 27510.

Thanks again for your great work,
David Kirsh

FCC Uses 20 Cops to Obtain Pirate's ID

Excerpted from RECLAIMING THE AIRWAVES,Oct.1993 the newsletter of Free Radio Berkeley and the Free Communications Coalition (the People's FCC)

In a scene resembling a French noir film, one person associated with San Francisco Liberation Radio was detained by 20 San Francisco police officers until his ID could be presented to FCC agent David Doon.

At approximately 9:30PM on Wednesday, September 22, Richard Edmondson was approached by David Doon who asked for identification. After refusing to produce identification or answer any questions, Richard drove away and was stopped on Webster St. by SF police officers who blocked off the entire northbound lane of the street with 8 vehicles. A confused scene ensued wherein the police officers had virtually no idea of what was going on or why such massive backup had been called. Edmondson was ordered to get out of his vehicle with his hands up and in clear sight by clearly agitated SF police who subsequently handcuffed him. Police officers were heard to say "Who is this guy" and "What do we have him for". For several minutes these questions went unanswered. By the time the FCC agent arrived to examine Edmondson's ID there were at least 20 SF police officers on the scene.

After learning of what was going on, some of the officers were clearly exasperated at having their time wasted by this FCC agent. A few were amused and asked for information regarding San Francisco Liberation Radio's frequency and broadcast schedule. After his ID was verified, Edmondson was released without any further consequences by the SF police.

San Francisco Liberation Radio's Richard Edmondson described it this way: "Before it was all over there were at least 20 police officers on the scene. They were all so pumped up with adrenaline you would have thought I had committed the crime of the century. It was clearly irresponsible for this FCC agent to call for such a massive response without giving clear reason or instruction to the SF police. When police officers go into a situation not knowing the details they naturally assume the worst. For one dark moment I feared my life was in danger."

This was an obvious case of over-reaction by FCC agent David Doon who clearly endangered the life of Richard Edmondson by calling in such a massive police response. The FCC must be held accountable for the actions of their agents who use such extremely excessive and reactionary methods to suppress a growing micro power broadcasting movement. It would have sufficed for David Doon to have written down the license plate number of Edmondson's vehicle and run a DMV check.

As more micro power broadcasters go on the air in the Bay area and Northern California, we can anticipate further actions by the FCC to harass and intimidate those involved. However, we shall not be moved by their threats and police state tactics.

Publication Notes & REVIEWS:

RADIO IS MY BOMB, anonymous, Free Radio Campaign - Finland In 1988 the Free Radio Campaign in Finland published an anonymously authored booklet called RADIO IS MY BOMB. The text of this book and its electronic's diagrams are now available electronically via anonymous ftp. (See InfoBox on page 3 for details.)

This essential book is divided into two sections. The first contains some fairly detailed technical information about transmitter and antenna construction as well as explanations of and notes about using signal compressors, limiters, osillators, harmonic filters and a good deal more very valuable information.

While part one provides essential practical information that someone on your micro broadcasting team had better be knowledgeable about, the second part provides a wealth of information that gives a solid grounding for working through questions and issues that have much grayer answers.

Consider your medium: AM, FM, SW, television? Will you broadcast live or via tape? How do you plan an escape in the event the authorities come knock, knock, knocking at your door or pounding up the pathway to your hilltop broadcast site? What kind of internal structure should your "station" have? What does one say in the event of a bust?

RADIO IS MY BOMB is a necessary textbook (well, as much as there can be one) for anyone considering wading into micro broadcasting. Though the shopping lists may be a bit dated given the pace at which micro technology races, the theory remains sound even if the specifics seem a bit too European: "On a tower block in London the DTI squads can tell where you are, within 20 meters, less than 10 minutes after you switch on... The detection squads...are officially responsible for stamping out 'radio in-

terference'... They use mobile detection vans and lots of unmarked cars... The DTI squads are not supposed to arrest you, so they bring along the local filth on busts..."
Ditto the FCC. (See story on page 3)

If you are interested in more than playing your favorite music for a select small audience and feel the need to challenge a system that unfairly and perhaps illegally keeps the disempowered off the public airwaves, RADIO IS MY BOMB poses some serious questions that will need to be worked through: "The word 'community" has lost any real meaning through misuse and overuse... The old style communities are a thing of the past... as the system breaks us all down into consumers. So if you're talking about 'community radio' you should be quite clear what you mean by it... What class, ethnic, interest, political or gender sections of the people are you aiming (at)? Or better, creating your pirate radio with? Or are your really working on your own career? Or trying to create 'community' in your own head?"

And finally, RADIO IS MY BOMB provides just good stuff that gets lost in the shuffle of excitement. How to set-up. How to knock-down. How to set up a studio. And this bit, perhaps the most valuable and often overlooked consideration for anyone pursuing a vision: "It's hard to give advice about long term development, but there's a few things worth saying. First of all it's important to pace yourselves. It's easy to start off with a lot of enthusiasm, then get busted off the air, or just burnt out with too much work or too few people. However good or different you are you will be very lucky to build up a regular audience or mass support overnight... Breaking down passive consumption of the media is not easy... Your long term aim, as a pirate, should be to reach a situation where you have so much support...that the state just cannot wipe you out at will."

The title, RADIO IS MY BOMB, comes from a remark Chantal Paternostre, a Belgian anarchist and broadcaster for Radio Air Libre (a Brussels Pirate station in 1985), made while being interrogated on charges of arson and bombing. After more than a year in prison authorities apparently believed her claim and let her go.

3 ARTICLES BY HAROLD HALLIKAINEN. Radio World,
November 10, December 8, 1993 January _, 1994
(See InfoBox P.6 for subscription details.)

Harold Hallikainen has written a series of three articles for the monthly Radio World. The articles discuss the impact that the FCC's interpretation of spectrum scarcity and its licensing practices have had on the existing micro broadcasting movement and how a reinterpretation of the commission's rules could open up various opportunities for micro radio.

Article #1 "The Fairness of Spectrum Leases?" (RW 11/10/93) broaches the touchy issue of First Amendment rights and how the FCC uses the concept of spectrum scarcity to control the electronic media in a way that would horrify if applied to print. Hallikainen proposes a system of spectrum leasing rather than spectrum "selling" as we now see. While he concedes that such a scheme would likely do little to open the airwaves up to those without hundreds of thousands of dollars to spend, he suggests that spectrum leasing (as he details it) might put the incredible amount of money that is now paid to broadcast attorneys more appropriately into the public coffers.

Article #2 "Ideas on MicroBroadcasting", (RW 12/8/93) explores the FCC's rules governing low power FM broadcasting and secondary services such as FM translators and repeaters and how these rules might be altered to accommodate legalized micro radio. Hallikainen's arguments are well documented and compelling. For example, in discussing the FCC's rationale that translators have the potential to provide larger numbers of options to the "consumer", he cites a study by the National Association of Broadcasters. This survey of small counties and large population areas showed that, overwhelmingly, translator applications tend to propose additional service to areas where there is already significant choice and, consequently, extreme spectrum scarcity.

"The fact that translators are authorized at all seems to indicate that it is possible for low power stations to operate in the gaps between highpower stations and still meet interference requirements," he notes.

Article #3, "License Free Low Power FM?" (RW 1/94). In this piece Hallikainen briefly mentions the cases that KAPW (a half watt station in Phoenix, Arizona) and Free Radio Berkeley have pending with the FCC. While both have been cited with Notice of Apparent Liability fines far in excess of what their actions warrant ($17,500 and $20,000 respectively) both continue to operate. Suggested is a practical strategy whereby the FCC could identify "holes in the spectrum" and define specific transmitter settings that would be significantly greater than current rules allow, protect existing licensed stations and allow low power FM stations, such as KAPW and FRB, to operate unharrassed.

Referring back to his original article, Hallikainen asks the question that both of these micro operations and the information he has provided seem to pose. "If freedom of speech is applied to broadcasting, does the FCC have a 'compelling governmental interest" to prohibit low power stations that can (as KAPW and FRB have) operate without interference with existing stations?"

###

MONDO 2000, #11 $5.95 Mondo 2000, #11, contains an extensive feature by Wes Thomas on pirate media. There is extensive cover-

age of Free Radio Berkeley & Stephen Dunifer, an article about setting up a national micro broadcasting network, a step by step on Do It Yourself FM with great pictures of some homebrewed equipment, an interview with Veran Matic, Director of Belgrade's Radio B-92 movement (mentioned in the last RRB), an article about Internet radio (which provides access to digitized audio files which subscribers can download to a PC and play back), and a comprehensive guide to guerrilla media resources. All this and more, well worth $5.95 and a trip to your local book seller.

CURSEword!, #7. November 1993 Free The voice of KCMU-FM's strident opposition presents its anniversary issue with a pretty good recap of last year's battle over control of the one-time flag ship station of Seattle's (and the world's) alternative music scene. Ring up the Hotline 206-298-CURS or write to CURSEword, PO Box 85839, Seattle, WA 98145-1839

p. 5

STATION UPDATES: Community Radio On The Rocks!

Station Updates: Information comes in from around the country regularly about college and community stations that are falling to "professionalization". This time around Station Updates looks farther afield than it has in the past and posts the first installments of some new struggles as well as bringing news about some "old favorites". RRB

KOPN-FM Columbia, Missouri
Community Radio
By Jay Teutenberg There has always been a lot of passionate volunteer disapproval with the direction KOPN's staff/board has been taking us. But, it's only recently that we are learning exactly what that direction really means. Basically, the yuppies have stolen our community station.

Our board/staff has teamed up with the National Federation of Community Broadcaster's (NFCB) David LePage and under a plan named "The Healthy Station Project" (HSP), they are hammering the final nails into the coffin of free radio in Columbia, Missouri.

KOPN's board/staff has agreed on a 3 year plan to become the number one station in Columbia, securing 30% of the affluent 25-45 year old crowd of listeners by the end of that period. The vehicle for this is going to be the Triple A format (Adult Album Alternative) . Even though we already have a new commercial station (KBXR) doing Triple A, KOPN is going to compete using a different variation. We have been told that this will involve "hotboxes" and "rotation clocks", possibly with the djs eventually being told what cuts to play and when. They are looking for

a "more homogeneous, predictable, consistent" airsound, (which will probably sound a lot like World Cafe, is my guess).

The board/staff maintains that we must go in this direction because we are in such dire financial straits - caused by a bad decision to relocate KOPN's (fund raising) bingo game, and the other usual causes such as government money drying up, etc. However, last year the staff's salaries amounted to $145,000, approximately half our budget. This year the station will carry forward a debt note of $20,000, in addition to the other accounts payable. What I am getting at is that while the board/staff points at how they have taken a 10% pay cut for the 4th quarter it has been their salaries and their decisions that have created this dire situation. They now use it as an excuse to take control away from the volunteers and community.

David LePage has laid it out in black and white terms, either we can lift the budget to $400,000, or we can run at $100,000 with no paid staff or CPB (Corporation for Public Broadcasting) funding. No one has talked much about what it would be like to run without paid staff, just left it as sort of an 'unspeakable horror'. (Editor's note: Jon Bekken's paper, "Community Radio at the Crossroads:...", mentioned in RRB #4 clearly outlines this particular cycle of addiction.)

Our board has a long history of being very difficult to deal with. Their meetings are run by people who are very skilled at controling direction and frustrating the com-munity's input. Over the years they have assumed near total control of the board with the exception of one seat - 1 out of 12.

Although the station's volunteers are preparing to make a more organized argument when the big format change comes, I doubt the situation will be changed by other than forceful means, such as interfering with their fund raising, underwriters, etc. I don't know if there is going to be enough community support to save KOPN. If we cannot restrict the flow money before their commercialized programming begins to pay off, we are sunk.

The volunteers at KOPN-FM left themselves open for this, in a way. We didn't work hard enough at getting out into the community and encouraging new listeners. We didn't see the problem with accepting money from the government, from bingo, from other non-listener sources. Our biggest problem has been lack of organization among the djs and other volunteers. The staff/board has been able to divide and conquer, and make us feel like we're powerless to do anything about it.

The information from the Net has been extremely valuable to us. Not only for resistance ideas, but also from knowing that we are not alone, that there are others fighting, and a few winning. We needed to realize that this is a nationwide trend, and to look at

the big picture. I have been in touch with just under 10 contacts who have an interest in KOPN's battle, and there are 5-10 people in town who have e-mail and are involved also. The trouble is, whenever a meeting takes place off-line, there is no way for anyone else to learn from it. To update a new member of our 'resistance' is too inefficient, we wind up saying the same things over and over. I would really like to see the topic of resistance to professionalization on a listserver, linked to the Usenet, and the ftp archives consolidated or at least a directory of pertinent sites maintained. It would also be cool if one of the resistance newsletters could be a snail-mail interface to those who are off the Net.

Communication will mean organization and education, and that's what we need if we hope to outwit such an entrenched adversary.

NOTE: Jay Teutenberg is a volunteer at KOPN-FM a community radio station in Columbia Missouri. He speaks only for himself and does not represent the station or any specific organization attempting to beat back the changes at KOPN. Jay can be reached by e-mail at jteutenb@bigcat.missouri.edu

########

KRCL 91 FM Salt Lake City, Utah.
By Robert Nelson. There hasn't been any huge crisis and showdowns between KRCL's staff and volunteers like the one raging at KCMU in Seattle. It's been a gradual, subtle change in direction: let's target the upscale listeners at radiothon, let's use commercial radio strategy, like arbitrons, and shoehorn them to fit demographics. Longtime programmers have been told to "dumb down" their shows; don't play so much esoteric stuff, play more recognizable tunes/artists. Some of staff's "pet shows" get advertised in mass media where they've never (run) such ads before.

Last summer there was an abrupt change in programming. The World Beat people affected were given two week notice that they were losing a half hour from their shows. No advance warning, no appeals, no input; accept it. A meeting was called and volunteers were extremely offended that such a large change was quickly rammed in. Staff said they did it because they wanted to make the change as painless as possible. However, the volunteers felt like they were being taken for granted and patronized. Now they have changed the policies on programming changes. Volunteers can participate in a comment period regarding the shows and times involved. The staff will weigh into account the volunteer's suggestions before they implement the decision. Although volunteers still have no "vote" in the final decision making process. I guess there are pros and cons to this.

The station manager has a formal review this year. I think the staff is more aware that volunteers do care more about the station than just programming a show. I don't think they'll be so cavlier in decisions in the future.

I support staff and generally think the station manager is doing a good job. (Many others at KRCL think he is too dictatorial). However, I am perceiving a greediness oozing into certain decisions regarding fund raising. Our contributor categories used to go from $35, $50/60, $75. Now they were raised to $40, $75. There isn't much of a middle category anymore. Where does that leave students, artists, working people who love the station but can't absorb a $75 pledge? They feel like their lousy $20 bucks goes unwanted.

Staff is now very concerned not just with money pledged but collection rates. After our last radiothon, we were supposed to air these admonishing PSA's the tenor of which was basically, "OK you listeners, remember, you pledged; now DON'T FORGET TO PAY!!!." Even though we say to them throughout 'thon, "Take 6 months to a year to pay, pledging's a voluntary act, we won't send a bill collector after you..." And we send people bill reminders every month. That ought to be enough reminding.

Think of it - we've been bombarding them for 2-4 weeks before hand that 'thon is coming. Then 10 days of beg, beg, beg. Then, after it's over (staff) wants us to keep hounding them...??? 'Thon's been over for a month and every week it's still these damn PSA's. I think that's an insult to our listeners...

#########

p. 6

Puget Sound Stations:

KUGS-FM, Bellingham: New GM, Dan Tritle, took over the first of November. One of his first official acts was to accompany the outgoing interim GM before the AS (Associated Students Board - caretakers of the station's license) and stand by a recommendation that the KUGS Advisory Committee (KAC) be disbanded. The university's newspaper, The Western Front, reported on 11/2 that the KAC could be reinstated after the charter and mission statement were re-written. The problem, the paper stated, was that the current charter allowed non-students to be seated on the advisory committee. The AS passed the recommendation unanimously.

And, the November 27th, Bellingham Herald ran a story announcing KUGS' strategic success in capturing a larger share of its targeted listener group. The Herald states that in the 15 months since the bitter battle which resulted in a purge of many non-student programmers and a dramatic shift in programming to a rotation format featuring "alternative rock" almost exclusively the number of coveted 18-24 year olds listening to the station has

doubled while the 35-54 year old listener group has been halved. Not much of a net gain to speak of but the age group is the one the the station's management and AS wanted. Whillhight Radio Research out of Seattle reports that the number of Western Washington University students listening has risen from 7.3% to 18.4%.

Though Tritle said in the Herald article, "We're well aware that our signal goes out into the community. We haven't forgotten them..." Anyone tuning in Thanksgiving Day though would have immediately realized that the station is now primarily for and about students. Dead air was the main fare proving the GM's follow on statement to the above, R...but, it's the students who we're mainly serving."

KCMU / CURSE, Seattle: The stand off between the University of Washington's KCMU-FM and CURSE (Censorship Underminds Radio Station Ethics) continues. While CURSE has won over many of the volunteers who were hired to replace striking CURSE members and their supporters, pushed World Cafe to the weekends and accumulated a significant escrow of pledge monies that could have gone to the station, KCMU may finally be finding new support. Its fall on-air fundraiser was the most successful since the battle began more than a year ago.

GM Chris Knab has been replaced by an interim GM, sister station KUOW's development director Tom Mara.

Depositions by the 14 former volunteers and listeners who have filed a First Amendment suit against the UW, the university's director of broadcasting Wayne Roth and Knab have been filed in Federal Court and a June 1994 court date is set. For a comprehensive year end review of the KCMU/CURSE situation, get yourself a copy of CURSEword #7. (See InfoBox, p. 6)

URGENT 12/6/93 BREAKING INFORMATION

As Radio Resistor's Bulletin #5 went to the printer the follow-
ing information was received.

San Francisco Liberation Radio and Richard Edmondson have been
served a $10,000.00 Notice of Apparent Liability by the FCC for
alleged illegal broadcasting. They have retained Louis Hiken of
the National Lawyers Guild Committee for Democratic Communication
to represent them.

Free Radio Berkeley has received a reply to its 13 page legal
response to the $20,000 Notice of Apparent Liability levied
against Stephen Dunifer last spring. Dunifer paraphrased the
FCC's response this way: "Your legal arguments do not mean a
thing to us, send us a check for $20,000.S

Both San Francisco Liberation Radio and Free Radio Berkeley will
continue to broadcast despite action taken by the FCC. FRB is
intent on getting a network of micro stations on the air and

notes that many stations are now coming up all over the Bay area,

In a related case the 9th Circuit Court of Appeals surprised U.S. micro broadcasters and ordered the FCC to respond to briefs filed in support of KAPW's Bill Dougan and Tom Reveille. The case is slated to come before the court in San Francisco on December 14, 1993. The court's order states in part: "The court is interested in the way (the FCC's) regulations serve public convenience, interest and necessity and the government's interest involved in precluding micro power broadcasts."

Louis Hiken released a statement saying that, "The Committee for Democratic Communication, FRB and SFLR are pleased that the court has seen fit to question the FCC's total prohibition of micro broadcasting. The court order reflects an awareness that the FCC appears to have totally exceeded its authority as a regulatory agency and, instead, has come perilously close to being an arm for government censorship - an institution which serves to stifle democratic communication."

In a statement released by the National Lawyers Guild attorney Peter Franck, former president of the Pacifica Foundation and Guild member, called micro radio the "pamphlet of the 90Us and beyond."

Further information regarding all of these cases is available from:

NATIONAL LAWYERS GUILD COMMITTEE ON DEMOCRATIC COMMUNICATION One Sansome Street, Suite 900 San Francisco, CA Phone 415-705-6464

Free Radio Berkeley and The Free Communication Coalition Phone 510-464-3041 1442 A Walnut, #406, Berkeley, CA 94709 e-mail frbspd@crl.com

San Francisco Liberation Radio Phone 415-487-6308

KAPW, Bill Dougan PO Box 47473, Phoenix, AZ 85068-7473 602-548-1054 R R B

12/23 The court will not issue its ruling for several weeks. Information received indicates however that of the 3 judges hearing Dougan's case one was sympathetic to the idea of Micro broadcasting, one was on the fence and the third was hostile to the whole idea. While the 9th Circuit Court has a reputation for its liberalism its rulings have not always stood up well in higher courts.

Watch for additional information on this.

115. Radiowatcher Des Moines Report

Newsgroup: rec.radio.broadcasting
Date: 1994-01-12 00:15:57 UTC
From: garyb@ins.infonet.net
Message-ID: <2gvfft$5nm@vixen.cso.uiuc.edu>
Source record: 41570

Well, the "computerized countdown" is over. I've never seen a format change at a station in Des Moines get more media attention...two newspaper stories and two TV stations also did a story showing the computer used to create the countdown (for those of you who missed my earlier posting, a former religious radio station switched to the owner's AM frequency, then on the FM a computerized voice simply counted down the time til the new format would show up on the FM..."T-minus three days,two hours, thirty-two" etc along with some funny sayings. This was constant for a week).

The new station is KHKI, or "Hawkeye Country". They now are playing ten thousand country songs in a row, using a CD jukebox and the computer for id's and an occasional jingle or two. Playing 10,000 songs will take about a month, time enough for the owner to get facilities in place for the new station.

The new country station should raise some programming eyebrows. KJJY, the Fuller-Jeffrey station had been an unchallenged station (and tops in ratings) for year, but recently another duopoly change brought a station from 30 miles away into Des Moines, and cutting into the ratings (it is a "hot country" format-more like top 40 radio in the 70s). Adding another station's bound to hurt KJJY, and the new station's owners couldn't be happier, since their KGGO-FM, the album rock station, has been languishing for years behind KJJY and WHO. Gives them another shot at number one.

Reply-To: can-freenet@cunews.carleton.ca
>From: andrew@calvin.dgbt.doc.ca (Andrew Patrick)
Subject: CBC Radio on the Internet

The Canadian Broadcasting Corporation (CBC) is exploring additional
means of distributing its programming. Working with the New Broadcast
Services Laboratory of the Communications Research Centre and the
Communications Development and Planning Branch of Industry Canada, CBC
is starting a trial where some radio programs will be available over
the Internet. These programs are available "on-demand" from a server
located at CRC, and can be accessed via WWW, Gopher, and FTP:

WWW: http://debra.dgbt.doc.ca/cbc/cbc.html

Gopher: debra.dgbt.doc.ca (select "CBC Radio Trial")

FTP (anonymous): debra.dgbt.doc.ca:/pub/cbc

NOTE: the preferred method of access is via WWW using the NCSA Mosaic
client.

The Radio programs are stored as 8-bit, 8 KHz "au" files as recorded on
a Sun SPARCstation. A tools area currently contains the DOS "sox"
program to convert these files into WAV or VOC files for PC sound
cards.

The special radio programs that are currently available include:

Stories for Christmas with Fireside Al
The Idea of Canada

and samples of the following popular weekly programs:

Quirks & Quarks
Sunday Morning
Basic Black

More programs will be added in the future.

The programs have been broken into segments so only small portions have
to be downloaded at a time.
```

In addition to the audio files, a list of CBC Radio products is available, and the complete catalog of "Ideas" transcripts.

The CBC is interested in receiving feedback about this trial. If you find this information interesting or valuable, or wish to provide any comments, please send your messages to:

cbc@debra.dgbt.doc.ca

118. More DX FM stations today

Newsgroup: rec.radio.broadcasting
Date: 1994-01-12 00:16:00 UTC
From: liron@zikzak.apana.org.au
Message-ID: <2gvfg0$5nq@vixen.cso.uiuc.edu>
Source record: 41573

>From 1:30 to 3:00 pm today (Sunday) the atmospheric conditions were just right
to receive more long range FM stations. However, this time, things were
a little different than last time (on December 10 last year). Needless
to say, the FM dial was abuzz with stations from far off locations.
Most stations faded in and out every so often except for one on 103.1.

Stations received include:

KNOWN STATIONS OR KNOWN LOCATIONS

The ABC station from Lismore on 94.5 that I received last time,
(around 1300 Km (750 miles)
a station on 89.3 playing country music, probably from the Gold Coast near
Brisbane (around 1400 km) (820-850 miles)
ABC Radio National on 103.1 and 103.9 unknown locations, but 103.1 was
strong and consistent
a station on 106.3 playing classical music. Might have been ABC Fine
Music except that it was playing different music to what Melbourne's
ABC Fine music was playing. Maybe this is because this station was
in a different timezone, and broadcast was delayed.
a commercial FM station on 93.9 from Bundaberg in Queensland, over
1600 Km, or 1000 miles away! This was often drowning out another
station, 93.9 BAY FM Geelong, which is about 50 miles (80 Km) away
from me. The Bundeberg station was playing 'Take 40 Australia', a
top 40 countdown, but the commercials gave away the location.

UNIDENTIFIED STATIONS

a station on 106.3 playing classical music. Might have been ABC Fine
Music except that it was playing different music to what Melbourne's
ABC Fine music was playing. Maybe this is because this station was
in a different timezone, and broadcast was delayed.
a station on 94.3 that played some British documentary program. From
2:00-2:30 or 2:45 it had a program about music, and from 2:30 or 2:45
to 3:00 there was some program about some spies and secret agents.
an unknown station between 89.9 and 90.7 that was emitting a 1 Khz test
tone. Maybe it is a new station yet to start.

Does anyone know anything about the unidentified stations?

TME CONVERSION

Australian Eastern Summer Time (pm) 1:30 2:00 2:30 3:00
Australian Eastern Standard Time (pm) 12:30 1:00 1:30 2:00
New Zealand Summer Time (pm) 3:30 4:00 4:30 5:00
UTC (GMT), UK standard time (am) 2:30 3:00 3:30 4:00
USA EST (Saturday pm) 9:30 10:00 10:30 11:00

USA PST (Saturday pm) 6:30 7:00 7:30 8:00

OBSERVATIONS/QUESTIONS

1 I notice that this is 30 days (close to one month) since I last received long range FM stations. The last Summer in which this happenned, the days on which I picked up long range FM stations from Melbourne were 28 days apart. I also picked up long range stations one day after the 28th day.
Do these atmospheric conditions have anything to do with the moon?

2 Right now, there are a series of bushfires raging through New South Wales, especially near Sydney. Could these fires have contributed at all to the reception of these FM stations. Please note that the fires are between where I am and where the stations are, but not in a straight line, and the fires are on the other side of a mountain range.

I cant stand WJMO or WZAK.
It has been two years now since there has been a Top 40 station
in the Cleveland market, and I wish we could have one(any one wh
o can help reading this?).I have to listen to WHOT Hot 101 in You
ngstown to here the latest music.WKDD is playing A/C crap, just
like WQAL.
The only station worth listening to in Cleveland is WENZ 107.9.
I wish we could get 92Q and G98 back.

Any plans under way to get a new Top 40 here in Cleveland?

Cleveland:The only major city in the United States without a Top
40 radio station.

Where are the courts supposed to hear motions on making the FCC loosen it licensing restrictions and allowing low power radio. I would LOVE to be able to start my own CHR station and low-power licensing would allow me to do so. I havve liked CHR ever since I was 9 (I am 26 1/2 now) and would love to be able to play it on my own station.

125. New Jazz Station in Atlanta

Newsgroup: rec.radio.broadcasting
Date: 1994-01-12 00:16:26 UTC
From: alcassel@netcom.com
Message-ID: <2gvfgq$5o7@vixen.cso.uiuc.edu>
Source record: 41580

Cox Enterprises, the outfit that owns WSB-AM 750 /FM 98.5 /TV 2 in Atlanta, recently acquired WYAI-FM 104.1 in La Grange, GA, to the southwest of Atlanta, but with a signal that can be heard in most parts of the city and suburban areas. WYAI-FM formerly simulcast country WYAY-FM 106.7 in Gainesville, GA, northeast of Atlanta, so as to cover the city.

WYAY-FM was acquired by Cap Cities/ABC (which also owns WKHX AM, Atlanta, and WKHX-FM, Marietta, GA), and WYAI-FM was acquired by Cox Enterprises.

At the beginning of the new year, the simulcast ended, WYAI-FM changed call letters to WHTK-FM, and started calling themselves "Jazz Flavors." Atlantans will recognize this as the name Russ Davis (more recently at WQCD-FM in New York) called his evening program on the old WQXI-FM several years ago. Of course, Russ Davis is not at WHTK-FM, but that station now becomes Atlanta's only full-time commercial jazz station, playing mostly modern jazz or "fusion" music. (I don't know the term used by cognoscenti.) The station also gives live weather reports for both La Grange and Atlanta, and cautions listeners to avoid confusing the station with WVEE-FM 103.3 in Atlanta and WALR-FM 104.7 in Athens. ("With all the stations near us on the dial, it is important to use our exact dial position . . .")

By the way, I hesitated briefly in calling it "commercial," since they have had no commericals or public service announcements in the past week -- just music, with live DJs identifying it and giving a weather report once an hour.

I think that even with the relatively weak signal in Atlanta, WHTK-FM will be a success. Jazz Flavors seemed to have a strong following, but neither WQXI-FM nor WPCH-FM (which carried something called "Peach Flavors" for a time) ever gave the format their full support like WHTK-FM. Instead, they treated jazz as an anomaly in their programming. Now, people who liked Jazz Flavors can get the format anytime they want.

I have been totally amazed at the feelings toward Charles Osgood endorsing a product and doing a commercial.

What's the big deal?

Sports figures to commercials all the time.

They have their name and face plastered all over all kinds of products.

I say if Osgood can make a buck doing a spot or two, let him do it.

Steve

>the radio jobs gripe when they have a shift longer than five hours -
>playing music! And playing classical pieces for six hours, where's
>the problem?

Whoa...as a DJ for the past three years, doing mostly "independent rock" but jazz and classical on occasion, I've just gotta say that doing a creative, interesting show 5 days a week for even 3 hours a day is pretty hard. (Then again, I work at a station where DJs choose everything they play - in all genres...maybe this makes a difference.)

It does... back in college, after about two hours of a free-format shift where I focused pretty heavily on flow, I was pretty worn out.

But now, doing part-time at the local rock station, my four-hour shift is about all I can handle at one stretch. You're right, it's hard to be creative and interesting for extended periods.

Full-time jocks, though, usually do more than just their daily shift, especially in non-major markets. The guy who does middays just might be the program director. And the afternoon gal might be promotions director. And rest assured, all the other jocks do gobs of production. It's easily a 40-hour week, often more.

130. 104.3 WVRT, Baltimore update as of 1/10/93

Newsgroup: rec.radio.broadcasting
Date: 1994-01-12 00:16:49 UTC
From: Jeff Koerber <S72UKOE@TOE.TOWSON.EDU>
Message-ID: <2gvfhh$5op@vixen.cso.uiuc.edu>
Source record: 41585

The Construction 104.3 "Song of the Week" is:

1. Stairway to Heaven

That's all ... just one song this week. They're playing it over and over and over with NO message in between, just one second of silence. Around the top of each hour they are still identify themselves as "WVRT, Baltimore."

Weren't they supposed to change to their new format today? Oh well ... I guess we'll just have to wait.

Construction 104.3 Rulz ... at least this week ;-)
Jeff

131. Baltimore's FM 104.3 WVRT

Newsgroup: rec.radio.broadcasting
Date: 1994-01-12 00:16:50 UTC
From: dh11s12@ocnet.cscns.com
Message-ID: <2gvfhi$5os@vixen.cso.uiuc.edu>
Source record: 41586

It's January 10 and I had expected Baltimore's 104.3 to have their new format today but apparently they're not ready because all I hear, believe it or not, is an endless loop of Led Zeppelin's "Stairway to Heaven"! That's right... no longer is it the same five songs over and over gagain, but rather the same ONE song over and over again. I don't know how long they're going to keep THIS up... it sure is a good publicity stunt though, especially if they're planning to go to AOR. I had expected it to be a new country station but an endless loop of Zep makes me doubtful.
They still give top-of-the-hour station IDs as "WVRT Baltimore"... voiced quickly over top of the song. No more construction carts.

132. Yes, perhaps this is getting silly...

Newsgroup: rec.radio.broadcasting
Date: 1994-01-12 00:16:51 UTC
From: ljason@wam.umd.edu
Message-ID: <2gvfhj$5ot@vixen.cso.uiuc.edu>
Source record: 41587

Hmm.

Today, turning on 104.3 FM in Baltimore yields...

"Thank God I'm A Country Boy"

by John Denver.

exclusively.

Now, I can imagine "Stairway to Heaven", but has anyone ever heard
this song over and over, ad infinitum? It doesn't lend itself to absurd
repetition very well.

I could wait until this is all over, and post the results. but,
for some reason, I'm just continually shocked, suprised, puzzled. I hope
to somehow share this with you.

thanks.

ljason@wam.umd.edu.
life ain't nothin but a funny funny riddle...

133. Finally! A new format for WVRT 104.3 Baltimore

Newsgroup: rec.radio.broadcasting
Date: 1994-01-12 00:16:52 UTC
From: ljason@wam.umd.edu
Message-ID: <2gvfhk$5ov@vixen.cso.uiuc.edu>
Source record: 41588

Welp. They did it.

They were playing so many country songs by last week, I figured
that the soon-to-be-reconfigured WVRT 104.3 in Baltimore would go country -
there seemed to be no question about it.

Well, they were supposed to change the format today, 1/10/94.

I turned it on a few hours ago.

What are they playing?

STAIRWAY TO HEAVEN, by Led Zeppelin.

that's it.

When "Stairway" ends, it instantly begins again. There is no end
to this. There's not even any message anymore saying "FORMAT UNDER
CONSTRUCTION." Just STAIRWAY, STAIRWAY, STAIRWAY, with the occasional
legal ID.

I thought it was interesting. Very post-modern.

Then, a friend mentioned that, perhaps, "The Stairway Station" is
a dream of no small number of obsessed classic rock fans the world over.

Well, here it is, folks.

Yes, I know you could just program it in infinite replay on your
CD player. But this is different. This is FCC-mandated airways. This
can be heard in your car, while jogging, while nursing the baby, while in
prison for life. This is UNAVOIDABLE. It is OMNIPOTENT. It is STAIRWAY.

let's hope it's not also PERMANENT.

in good stead,

ljason.

Autumn 1993

This information is gleaned from the Robert Feder Column in the Chicago Sun Times, and from my own observations. Robert Feder provides information and commentary on the radio broadcasting industry in Chicago and is a great source for information in our city. I heartily suggest your read him

The big risers in this period are WLUP's Jonathon Brandmeier (PM Drive) and Rush Limbaugh (Middays, carried on WLS AM/FM). Brandmeier has jumped from a 4.3 share to a 6.5 share. Although Rush is king if the midday heap, conservative talker G Gordon Liddy has done poorly on Adult Standards WJJD-AM bringing them their lowest midday ratings yet.

Classical music WNIB (97.1 FM) has continuously beat its upscale "Fine-Arts" WFMT (98.7 FM and Satellite uplinked). This time their share is double that of WFMT, despite 'FMT's image and standing in the classical community. Perhaps it is due to the fact that WNIB simply plays classical music. WFMT is a 'genre' station, featuring dramatic readings, concert news and (some have said) more snooty sounding attitude in their presentation. Whatever the reason, I am sure there were some memos shuffled 'round the hallowed halls of WFMT. WFMT now ties for 27th Place with West Suburban AC (now 70's oldies) WYSY-FM.

Country giant WUSN (US-99, 99.5 FM) rises over one full share point and continues to do well (they are the only country outlet in Chicago).

CHR/Urban/Dance WBBM-FM slips a little, although their morning team is up over 1 full rating point.

Speaking of mornings, WGN's Bob Collins continues to be untouchable with a COMMANDING 12.6 share (up from a 11.1). Why he is so successful is a mystery to me. Loop-FM morning wacko Kevin Mathews

(Is it Wrong) slips a little less that half a rating point this
quarter.

I am a Ph.D. Psychologist who has been practicing in that field for the past 20 years.
Almost went into radio broadcasting instead and never really have lost "the bug".
I am looking to re-kindle my involvement by: (a) involvment in a radio station (commercial
or otherwise; volunteer or otherwise) and/or (b) procurring, in partnership, a small AM
radio station.

New to the world of computers, INTERNET, and airwaves, I would enjoy hearing from
others.

136. Jock Shout - where to order

Hi:

I am interested in gettting a jock shout for a name which
I will be using very soon - "Bear O'Brian".

I am going to work for a station which will have a tight
budget for the next three months and may end up buying the
shout myself if I want it now.

If any of you has advice on getting one of these puppies
produced at a reasonable rate, please let me know.

I am looking for just a simple shout (maybe 1 or 2 additional
cuts with different styles), acapella with strong voices (male and
female).

I will be doing some post production myself later to add sfx like a
bear's growl, etc.

Anyway, I've run on at the mouth enough ...

If you have any ideas, please e-mail me.

Terry

OK, so its the Arbitron Purist in me that's asking this:

Are the numbers you quoting ADULTS 12+ Monday through Friday, Chicago Metro or TSA?

Sorry...having looked at ratings books for so many years, I just had to know so I know what to think about the numbers.

GaryB

[Editor's Note: Yes they are 12+, I believe M-F, Metro {top 35 stations I think} Bill]

*** HERITAGE COMMITTEE REPORTS ON BBC FUTURE

The House of Commons National Heritage Committee has published its report on the future of the BBC. It recommends the renewal of the present BBC Charter for another 10 years. However, it does not believe that the present structure of the Corporation can be sustained much beyond that point.

The report says the BBC will face a big challenge in adapting to the multimedia revolution and a world of 500 channels. It warns that if it does not do so then it will 'vanish down the technological plug-hole'. Members of the committee hoped that the 10 year extension would give

the BBC sufficient time to work out a new future for itself. This could include concentrating on programme production or linking up with major international media owners to provide new services.

The committee also recommends, with what they describe as 'great reluctance', that the licence fee should be extended for another 10 years. Although they believed it could not be sustained in the long term, it currently had the fewest objections of any funding system. It recommended that the BBC should be more lenient with those unable to pay.

*** BBC LAUNCHES LISTENERS' CHARTER

The BBC Board of Governors has launched a viewers' and listeners' charter which it hopes will make the Corporation more accountable to the general public.

The charter brings in annual promises of performance against which BBC services can be judged. A major complaint against the BBC by Independent Radio stations has been its ability to change formats as and when it desires. Independent stations have to conform to promises of performance as part of their licence conditions.

The document, An Accountable BBC, introduces new procedures to handle serious complaints about programmes and to keep BBC staff better informed on public opinion relating to broadcasting issues. As part of this there will be ten Regional Advisory Councils in place of the current three. The role of the governors is also properly defined for the first time.

*** FINAL REGIONAL AWARDED

Central Scotland Radio has won the last of the regional licences to be awarded in the current round. It will broadcast to around 2.3 million listeners from Edinburgh to Glasgow and will be primarily talk based, but with some adult contemporary music. Studios will be based in Leith and CSR have a staff of 35. It will begin broadcasting in September.

CSR has faced criticism from one of its contenders over its backers. Grampian Television will take a 55% shareholding, Border Television 35% and the remainder will go for public subscription. Tony Currie, Managing Director of rival Radio Six says this does nothing to bring in new investment to broadcast media in Scotland, which is already concentrated in a small number of companies. The two TV stations may also be vulnerable in the current take-over battles in the ITV system.

*** GWR BUYS FOUR STATIONS

GWR has bought three Midlands radio stations from Capital Radio in return for cash and shares, and one other station for cash. From Capital, the group is buying Radio Trent, Mercia Sound, and Leicester Sound, in return for UKP 4.8 million and 1 million ordinary shares in GWR. The three stations were acquired by Capital when it took over the

Midlands Radio Group last year, primarily so it could gain control of Birmingham station BRMB. Shedding the smaller stations leaves Capital free to concentrate on its major city stations. GWR has greater expertise with small to medium sized stations.

The other new purchase for GWR is Shropshire's Beacon Radio, for which it is paying UKP 3.7 million. Beacon was the last major ILR station to be independently owned. The new acquisitions almost double the size of the GWR group, which will now own 17 stations. The expansion is to be funded by a share offer and the placing of shares with Capital Radio and the Daily Mail and General Trust, taking both up to the maximum 20% stake.

*** KISS FM FACES 'SELL-OUT' CRITICISM

London dance music station Kiss FM is facing growing criticism that its programmes are becoming too geared to the mainstream. The latest spur has been the introduction of a new late-night playlist-formatted show hosted by Chris Philips. This resulted in specialist evening shows covering rap, house, techno, trance, and jazz being reduced from 3 hours to 2. Station management have also been accused of becoming too remote from the scene which spawned them and too reliant on research and charts when making programming decisions.

*** DAB DEMOED

The BBC has demonstrated the first proper implementation of Digital Audio Broadcasting. The new technology will allow near compact disc quality sound and is much more resistant to interference than existing AM or FM broadcasting - particularly when used in vehicles. DAB also allows a larger number of channels to be squeezed in the same frequency band, opening up the possibilities of more stations. The BBC hopes that manufacturers will have DAB radios on sale within 18 months.

*** LOCAL LICENCES

Faze FM has won the licence for Manchester previously held by Sunset FM. Sunset left the air last autumn and called in the receivers. Like Sunrise, Faze FM will broadcast with a dance music format. A second Manchester licence was awarded to Fortune AM, an easy listening station. There were a total of 17 applications for both licences.

The Radio Authority has readvertised the licences serving Preston, Blackpool, Blackburn and the surrounding Lancashire area, currently held by Red Rose Radio.

The Radio Authority has readvertised the licences for Hereford and Worcester, currently held by Radio Wyvern.

Choice FM are to apply for the ILR licence for Birmingham currently held by Buzz FM. They plan a 24 hour service of soul and contemporary music, together with news and local information for Afro-Caribbean listeners.

Eurojazz, which failed in its bid to oust Jazz FM from London's airwaves last year, is to apply for a licence to run an arts and entertainment station for the capital.

*** PEOPLE

Angus Deayton, Paul Merton, Vic Reeves and Bob Mortimer, Alexei Sayle and Eddie Izzard are among the comedians who will be hosting a new Sunday lunchtime programme on Radio One.

Simon Bates has begun his new programme on Atlantic 252.

Gary Davies is to join Virgin 1215.

Adrian Juste is to leave Radio One after 17 years.

Jo Brand, Jan Ravens and Frances Edmonds are to host a new Radio Four programme called Women's Troubles, a humourous 'agony column of the air'.

James Whale is to join LBC, following a brief spell at GLR.

Trevor Dann, former boss of GLR, is behind an application for a new station to replace North London's WNK and London Greek Radio.

Jim Black, former Managing Editor of Radio 5, is considering bidding for third INR licence with a youth and children's service.

*** FINANCIAL NEWS

The Metro Radio Group has announced pre-tax profits of UKP 2.36 million for the year to the end of September 1993, up 27% on the previous year. Turnover rose to UKP 17.7 million against UKP 15.2 million in 1992. Metro owns 7 ILR stations in the North East and Yorkshire.

Radio Clyde tripled its pre-tax profits to UKP 3.03 million for the year ending 30 September 1993. However, this included an exceptional gain of UKP 618,000 after the group disposed of half its stake in Satellite Media Services. Turnover grew 12 per cent to UKP 14.6 million. The group, which has a stake in all but two of Scotland's ILR stations, intends to change its name to Scottish Radio Holdings.

The Chiltern Radio Group returned to profitability in the second half of the year up to September 1993. However, this was not enough to overcome losses in the first half. This resulted in an overall loss of UKP 246,000 on a UKP 5.76 million turnover for the full year.

Southern Radio, owner of stations in Kent, Sussex and Hampshire, increased pre-tax profits by 24% for the year ending 30 September 1993. Profits were UKP 956,000 on a turnover of UKP 8.61 million.

Buzz FM has been sold to production studio owner Muff Murfin.

Melody Radio is to more aggressively market itself to advertisers. Although turning over UKP 1 million a year in advertising, Melody has still been making a loss.

*** BITS

The Broadcasting in Scotland campaign has published a new report attacking the centralism of BBC broadcasting. It claims that while 86% of the population lives in England, over 96% of programming carried on the BBC is made there. The group is campaigning for at least 10% to be produced in Scotland, Wales and Northern Ireland. It also wants the BBC governors to more representative of the UK as a whole.

The Johnnie Walker show on Radio One is to be independently produced by Wizard Radio. Station Manager Matthew Bannister is having discussions with independent producers over other programmes on the station.

The BBC is to close its Paris Studio, home for over 50 years of many of its radio comedy programmes. In future these will be recorded in the BBC Concert Hall at Broadcasting House, which is to be refurbished.

The BBC is to shed 100 administrative jobs following the restructuring of its capital projects department.

London News Radio has denied rumours that it is trying to buy out LBC in order to get on the air earlier. Other stories circulating suggest that LBC may take a stake in the new station.

Virgin 1215 has joined the Radio Advertising Bureau, which was set up by leading ILR stations to promote Independent Radio to advertisers. There had been criticism that Virgin and Classic were reaping benefits from the Bureau's work while not becoming members. Classic FM has yet to join and is in disagreement over how large its subscription should be.

Radio One's half-hour evening news show, News 94, is to be merged into the new afternoon drivetime show presented by Nicky Campbell. This will give the programme a similar style to that which station boss Matthew Bannister previously introduced for drivetime on GLR. Richard Evans, presenter of the lunchtime Newsbeat, will work on the programme alongside Campbell.

Glasgow's Radio Clyde celebrated its 20th Birthday on New Year's Day.

The Broadcasting Standards Council is to carry out research into what people consider acceptable material for radio and at what times.

Former Radio Caroline ship The Ross Revenge has moved from Dover to a new Harbour. Its operators were forced to sign an undertaking that the ship would not leave British waters or recommence unlicenced broadcasting. Meanwhile, Caroline founder Ronan O'Rahilly is reported to be involved in a plan to return the station to the air via Baltic Radio International based in Lithuania.

*** NEW UK-RADIO MAILING LIST

Following interest from a number of AM/FM readers, a new Internet mailing list has been set up for discussions about radio in the UK. If you would like to join the list write to

listserv@orbital.demon.co.uk

with a message whose body starts with the line

subscribe uk-radio Your Name

replacing Your Name with whatever your name is.

You will receive an e-mail back confirming your subscription request and giving details of how to submit messages to the list, how to opt to receive a daily digest rather than individual messages if you would prefer that, and how to unsubscribe.

Postal address: AM/FM, BCM Box 225, London, WC1N 3XX, England.
E-mail: amfm@orbital.demon.co.uk. Fax: +44 81 509 0729

The AM/FM Newsline. Updated weekly. 0336 404550. Calls charged at 36p per min cheap rate, 48p per min other times. Available in the UK only. Service provider: TQM Communications, PO Box 2306, London, E17 4TU.

The AM/FM Newsletter. Published monthly. Subscriptions priced at 22 pounds sterling within the UK, 28 pounds sterling to elsewhere in Europe and 38 pounds sterling by airmail to the rest of the world. Payment should be by cheque or bankers draft in pounds sterling made payable to 'TQM Communications' and sent to AM/FM, TQM Communications, BCM Box 225, London, WC1N 3XX.

The AM/FM Online Edition. Published monthly. To subscribe write to listserv@orbital.demon.co.uk with a message whose body starts with the line 'subscribe amfm Your Name'. Back issues are available from the same list server - send the command 'help' for more details. The Online Edition is also available on the Usenet rec.radio.info newsgroup, in the 'broadcast' conference on London's CIX conferencing system and UKFORUM on CompuServe.

Copyright (C) 1993 TQM Communications. All rights reserved. This publication may be freely distributed provided it is done so in whole, no alterations are made and only basic online charges are levied.

139. Radio Watcher Report: New York

Newsgroup: rec.radio.broadcasting
Date: 1994-01-13 08:11:47 UTC
From: slutsky@tesla.njit.edu
Message-ID: <2h2vo3$ckk@vixen.cso.uiuc.edu>
Source record: 41594

Pat (Paraquat) Kelly was fired as the morning man at WNEW-FM.

He will be replaced by Pat St. John currently program director and midday DJ at WNEW-FM. St. John's will give up his duties as program director and his midday shift will be taken over by Harris Allen and Dennis Elsas until a permanent replacement is found.

A spokesman for WNEW-FM said the morning show will focus on music instead of personalities.

In other NYC news there will be a 24 hour Frank Zappa special on WBAI on Saturday January 22nd. I don't know if the other Pacifica stations will carry it.

Bruce Slutsky

Here are Arbitron's final Fall ratings. They look very similiar to
Arbitrends that I posted in December...

Top 10 Boston stations in 12+ :

1. WBZ-AM 1030 7.9 News All Day/Talk All Night "50,000watts of power"
2. WMJX-106.7FM 6.6 AC "Continious Soft Hits - Magic OneOSixPointSeven"****
3. WXKS-107.9FM 6.5 CHR/Top40 "New England's #1 Hit Music Station KISS 108"
4. WRKO-AM 680 5.7 All Talk/Red Sox "The Talk Station- AM 680"
5. WJMN-94.5 FM 5.3 CHurban/Dance "The New Jam'n 94.5 -Today's Hottest Music"
6. WBCN-104.1FM 4.7 AOR "The Rock of Boston -OneOFourPointOne"
7. WZLX-100.7.FM 4.4 Classic Rock "Boston's Classic Rock- OneHundredPointSeven"
8. WBMX-98.5FM 4.3 Hot AC "Boston's Best MIX 98.5"
9. tie WODS-103.3FM 4.1 Oldies "All Oldies, All the Time - Oldies 103"
WSSH-99.5 FM 4.1 "Easy Favorites of Yesterday and Today - Boston's WISH 99.5"

**** - Highest 12+ rating for *any* AC station in the major TOP 10 markets.

Top 10 Boston stations in 25-54 :

1. WMJX-106.7FM 8.2
2.tie WBMX-98.5 FM 6.3
WZLX-100.7FM 6.3
4. WBCN-104.1FM 6.1
5. WODS-103.3FM 6.0
6. WBOS-92.9 FM 5.8 "Soft Rock - 92.9"
7. WXKS-107.9FM 5.4
8. WBZ-AM 1030 5.2
9. WSSH 99.5 FM 4.8
10. WRKO AM 680 3.5

Top 10 Boston stations in 18-34 :

1. WXKS-107.9FM 10.2
2. WBCN-104.1FM 8.8
3. WZLX-100.7FM 8.0
4. WMJX-106.7FM 7.8
5. WJMN-94.5FM 7.7
6. WBOS-92.9FM 5.6
7.tie WBMX-98.5FM 4.6
WFNX-101.7FM 4.6 Alternative Rock/"On the Cutting Edge of Rock -101.7"
9. WILD-AM 1090 2.8
10. WCGY-93.7FM 2.7 AOR "Boston's Real Rock-93.7"

* Deserving mention : Imus is cranking out some serious numbers for
all-sports WEEI 590 since coming aboard in July '93. As predicted,
he's scoring well with men 25-54 : I-man went from 9th in the summer

to 4th in Fall in the 6-10am slot...Overall,Imus has leaped into 8th place in the morning drive-time race behind such established AM-drivetime leaders as WBZ,WRKO,WXKS,WMJX,WJMN,WBCN and WODS.

Monday,January 17 is the day when Group W Radio(WBZ parent firm) supposedly takes over 'EEI from the Celtics pending final FCC approval...'EEI sale price was based on summer ratings...With the release of Imus fall numbers earlier this week, it's quite obvious Group W got a steal...WEEI is now ranked nation's #3 sports station behind WFAN in NYC and WIP in Philly... However, WEEI's overall 2.8 rating is still nothing to get excited about. An overall 3.5 or better in the spring book should make it a bona fide player in the market...Can Imus and the new rich owners make that station a force it once was? We'll find out the first week of April...

* Greater Media's WMJX-FM has had one of its best books ever in the history of that AC station...Adult Contemporary is the king of music airwaves once again in Boston. 'MJX's main competitor Hot AC WBMX is having one of its best numbers since changing calls(WROR) and adjusting format 3 years ago...

* Infinity better take a look at its aging AOR rocker WBCN. The station numbers are slipping and slipping steadily...If it wasn't for Stern at night, they'd be in real serious trouble...The morning show with Charles Laquidara, once the pride and joy of that station, is now in 6th place...I'll venture out and predict that Imus(8th) might tie or overtake Laquidara in the next book. That wouldn't be hard to do since Laquidara is acting totally bored with his show and is ready to move on any day now...

-Mark

>>would get into the car ... we listened to and sung along with at
>>least one cycle of the songs. I wonder if we will continue
>>listening this week with the new songs. Anyone else actually
>>listening to this crap?

I listened to the first week of songs, and almost enjoyed it.
Copacabana, You Light Up My life....mmmm, love it. I have a tape or two
of it, and finally became sick of it after listening to the tape in the car
once or twice around. I think I finally had my "Copacabana" limit.

>You know, I thought I was the only radiophile in this area that actually
>has no life and listens to this crap...Yes, we all are poor saps, knowing
>the playlist, but continously listening anyway...It cracks me up...What
>they're doing (creating hype) is sure working.
>
>I think they'll go country, since WPOC-FM 93.1 HAS NO DIRECT
>COMPETITION..oops! Sorry for caps.
>
that was my guess, too. I turned it on today, planning to hear "Achy Breaky
Trachea" and its ilk.....but, er, no new format yet. just STAIRWAY, STAIRWAY,
STAIRWAY.

gotta love that classic rock, D0000D!!

Well ... they tricked me. I ASSuMEd that they were going to play
"Stairway ..." all week. They apparently are playing a different song
each DAY.

Today's song of the day: "Thank God I'm a Country Boy"

I'll post the rest of the songs Sun., unless something BIG happens.

WJZ-TV news at 5 reported that WVRT will announce their new format today (Wed.) at 6:00 PM (Just in time for the news ;-). I don't know if this means that they will announce on their air or if they are just going to have a press conference. I'll have a report tomorrow.

BTW, they are still playing "Thank God I'm a Country Boy" with no other messages except for the "WVRT, Baltimore" ID around the top of each hour.

Jeff

{Bill - if this doesn't make Airwaves before 6:00 PM today (Wed. 1/12), then please delete it, I'll post an updated message ASAP).}

145. WVRT, Baltimore Announces New Format, Finally!

Newsgroup: rec.radio.broadcasting
Date: 1994-01-13 08:12:02 UTC
From: Jeff Koerber <S72UKOE@TOE.TOWSON.EDU>
Message-ID: <2h2voi$ckt@vixen.cso.uiuc.edu>
Source record: 41500

It's now called Soft 104.3. Here is how they made the transformation.

At about 10:00 AM, I flipped 104.3 on and heard the following:

```
/\/\/\/\/\/\/\/\/\/\/\/\/\/\/\/\/\/\/\/\/\/\/\/\/\/\/\/\/\/\/\/\/
|SFX: ALARM CLOCK TICKING UNDER FOLLOWING
|
|SFX: BOW AND ARROW; ARROW HITS TARGET [I think that's what it is]
|
|ANNCR: It's coming at six
|
|Ticking continues for 10 sec and announcement repeats.
/\/\/\/\/\/\/\/\/\/\/\/\/\/\/\/\/\/\/\/\/\/\/\/\/\/\/\/\/\/\/\/\/
```

I don't know what time they started playing this announcement but
it was sometime between 12:30 AM and 10:30 AM.

Right before 6:00, they identified themselves at WVRT, Baltimore.
At 6 on the dot, I heard the clock ticking fade out and the
following happened:

```
\/\/\/\/\/\/\/\/\/\/\/\/\/\/\/\/\/\/\/\/\/\/\/\/\/\/\/\/\/\/\/\/\
|9 SECONDS SILENCE
|
|MUSIC: (PROBABLY A BARBARA STREISAND SONG) UNDER FOLLOWING:
|
|ANNCR: Baltimore has a brand new radio station. A fan of Barbara
|Streisand ....
|
|MUSIC: (PROBABLY A NEIL DIAMOND SONG) UNDER FOLLOWING:
|
|ANNCR: Like Neil Diamond
|
|MUSIC: "I Write the Songs that Make the Whole World Sing," Barry
|Manilow UNDER FOLLOWING:
|
|ANNCR: Love Barry Manilow. You'll want to hear this...
|Introducing the new Soft 104.3.
|
|MUSIC: VARIOUS SONGS UNDER FOLLOWING:
|
|ANNCR: Now the new Soft 104.3 is the only station specializing in
|soft relaxing favorites. While the other stations have started
|playing Top Forty, the new Soft 104.3 plays Barbara, Barry and
|Neil. We're brand new ... so listen. The new Soft 104.3.
\/\/\/\/\/\/\/\/\/\/\/\/\/\/\/\/\/\/\/\/\/\/\/\/\/\/\/\/\/\/\/\/\
```

Then, they played the following songs:

1. "The Way we Were," Barbara Streisand
2. "September Morning," Neil Diamond
3. "Cats," Barry Manilow
...

I haven't heard any DJ's yet. Just pre-recorded bumpers in between some of the songs. I also haven't heard any commercials yet.

Well ... there goes the Country and the Hard Rock hypothesis. This sounds like it is competition for Lite 102, but it is slightly different. They play more of the older lite classics. My mother was instantly in love when the station as soon as they mentioned Barbara Streisand, Neil Diamond, and Barry Manilow.

Isn't Lite 102 number 1 in the ratings? I remember talking to one of the Mix 106 jocks a while back and she told me the 106 had been trying to beat 102. So, Capitol may be trying to beat them with the new Soft 104.3.

I just heard a report on WJZ TV news that the call letters will be WSSF. I'm sure that the people at Soft 104.3 are mad at Al Sanders (The WJZ reporter) for calling it B-104. It hasn't been called B-104 in years.

At 7:00 PM, they identified themselves at "WSSF, WVRT, Baltimore." I guess they need to change the calls with the FCC since everything has been so secret.

Dear Airwaves and r.r.b. reader,

You may know that Radio Caroline was the first off-shore radio station in England. It started broadcasting at Easter 1964 from a ship and has been around ever since despite technical problems and legal actions by the authorities of various European countries. For the last couple of years she had to restrict her broadcasts to a weekend service on shortwave (6295 Khz.) and an evening service on satellite (intelsat). The past two weekends, however, no programs were aired on the shortwave frequency. Does anybody know what is going on?

Hello!
I am a graduate student at Central Michigan U. and am currently working on a research paper involving "Farm Radio" programming. A couple of months ago I posted asking for information on the subject. Since that time, I have narrowed my research area to four states: Nebraska, Kansas, South Dakota and North Dakota. I am interested in hearing from anyone who has knowledge about:
1) The Farm Radio format (or agricultural programming) in general. Including historical and contemporary data on programming trends, farm population trends, and economic trends (both station and community).
2) I am especially interested in hearing from anyone who has information specific to my research area. Again, both historical and contemporary information would be appreciated.
3) Anyone who might have, or know of someone, who has done research on this sort of thing before.

You may respond directly to me at: <3X7RHRS@CMUVM.CSVCMICH.EDU>

I get the impression that it is unusual to have 6 hour shifts on US Radio.
Here in England, the station I work for has 4-5 hour shifts throughout the day,
and 6 hour shifts through the night and at weekends.

I don't get to choose any of the music I play. Selector takes care of the playlist
and DCS takes care of the commercials. But i'm not just a button pusher. It takes
a lot of mental effort to concentrate for 6 hours with material that you are not
always familiar with (being only 20 years old, anything older than Duran Duran
gives me a problem!!) and also to link genres of music smoothly for the listener.

The playlist *has* to be adhered to, (especially during PRS sampling) but
you often get over 55 minutes of music scheduled so selected dropping of crap
is not unknown.

But i agree that it is tough concentrating for so long - and why cant anyone make
a coffee machine that outputs a *drinkable* product???????????

Source record: 41505

UK Radio (Fact or Fantasy?)

The longest running UK soap opera, Radio 4's "The Archers", is today making the news.

The story so far...

An escaped convict returned to visit his sister in Ambridge and forced her to part with money. She also allowed him to stay with her for a few days whilst he was on the run. He left the village mugging Old Tom and has not been heard of since. His sister has however been charged and convicted of` harboring and abetting a criminal and received a gaol sentence.

(My apologies to anyone who listens to the Archers and perhaps knows the plot better than I, I am not an Archers fan and have been told the story second hand.)

The consequence...

A woman in the North of England has appealed to the Home Secretary for the immediate release of a fictional character from a fictional gaol.

The controversy is based around the argument that if such a sentence is passed in a soap opera should a similar case come to trial a judge may be persuaded to give a similar judgment. Since the crime was committed under duress the sentence may be too severe.

I wonder whether such a crazy state of affairs has occurred elsewhere, I am reminded of the infamous "War of the Worlds" broadcast, but similar situations must have arisen at some time.

151. Sony SRF-42 sighted?

Newsgroup: rec.radio.broadcasting
Date: 1994-01-13 08:12:27 UTC
From: twl2@po.CWRU.Edu
Message-ID: <2h2vpb$cl4@vixen.cso.uiuc.edu>
Source record: 41506

According to a January 10th NAB Radio TechCheck newsfax the Sony SRF-42 was shown (not a prototype) at CES in Vegas last week. Some compromises had to be made for this receiver however. "The AMAX certification requirements for portable receivers differ from other receivers in the following ways: (1) noise blanking is not required for portable battery-only operated radios; (2) an external antenna connection point is not required and (3) the maximum total harmonic distortion specification is relaxed from 2% to 5% for battery operated portables."

When I was closer to Long Island I listened to WLIR-FM, which subsequently changed its call letters to WDRE. I've since moved out of range. Imagine my surprise when driving in South Jersey, to hear WDRE-FM coming from Philadelphia (103.9). I hadn't heard that WDRE in Garden City NY had died ... so how could a Philadelphia station be using the same call letters? This is not a repeater; all the ads etc. were for Philly businesses.

154. Cincinnati Radio Ratings -- 4th Quarter 1993

Newsgroup: rec.radio.broadcasting
Date: 1994-01-14 00:52:05 UTC
From: john.simpson@sdrc.com
Message-ID: <2h4qbl$ajl@vixen.cso.uiuc.edu>
Source record: 41509

Country music is hot as B-105 won the #1 spot for the 4th quarter. B-105's sister station, Y-96, "Young Country", showed a big improvement over their 3rd quarter ratings. WLW slipped to #2, due in part to the miserable performances of the Reds and Bengals. A format change at WSAI is likely in the next few months. Local attorney Chuck Reynolds has applied to purchase WSAI and WAQZ. The format of WAQZ will not change, and it will continue to be operated by Jacor Communications, owners of WLW, WLWA, and WEBN. The move of WIMJ, "Majic 92.5", to a hotter mix of adult contemporary has apparently paid off, at the expense of WWNK, "Wink 94.1". A change at WWNK is also possible, as Frank "Bo" Wood, former president of Jacor and son of WEBN founder Frank Wood, Sr., takes over that station this spring. Here are the numbers:

1. WUBE-FM 105.1 Country 10.5
2. WLW-AM 700 Full Service 9.7
3. WKRQ-FM 101.9 Contemporary Hits 6.9
4. WGRR-FM 103.5 Oldies 6.7

Here are the Dallas/Fort Worth Arbitrons listed in today's DALLAS MORNING NEWS:

ARBITRON

Overall
Summer Fall
1 KSCS country 5.4 6.9
2 KHKS CHR "106.1 Kiss FM" 4.4 5.9
3 WBAP news/talk 5.9 5.5
Note: WBAP switched from country/news/talk to news/talk after the Summer ratings period
4 KVIL AC 4.4 5.3
5 KYNG hit country "Young Country" 5.3 5.1
6 KPLX hit country "K-Plex" 4.6 4.6
7 KOAI new age/jazz "Smooth Jazz" 3.7 3.5
8 KKDA-FM urban "K104" 4.5 3.4
KDMX AC "Mix 102.9" 3.2 3.4
10 KZPS classic rock 3.8 3.3
KJMZ urban "100.3 Jamz" 4.8 3.3
KLUV oldies "K-Love" 4.0 3.3
KEGL AOR "Eagle" 2.7 3.3
14 KRLD news/talk "News Radio 1080" 3.4 3.0
KLIF talk "Talk Radio 570" 2.7 3.0
16 KTXQ AOR "Q102" 4.5 2.9
KDGE modern rock "Edge" 2.8 2.9
18 KESS Spanish "La Fabulosa" 1.5 2.6
19 WRR classical "Classical 101" 2.2 2.5
20 KLTY contemporary christian 2.1 2.4
KKDA urban AC "Soul 73" 2.2 2.4

Mornings:

1 KSCS/Terry Dorsey
2 KVIL/Ron Chapman
3 KHKS/Kidd Kraddick

The DMN only lists the top 20. The new classic rock-oldies KRRW "Arrow 97.9" obviously didn't make a huge splash since they weren't in the top 20. They seem to also have sucked ratings away from co-owned KTXQ so that KEGL has managed to overtake them (and the first time KTXQ has been out of the top 10 in ages). Also, both KJMZ and KKDA-FM lost ground, but KJMZ lost much more than KKDA-FM, that KKDA-FM has finally become the #1 urban in town again.

Howard Stern on KEGL still has not managed to crack the top 3. In fact, Stern replaced Kraddick on KEGL and Kraddick's show picked up by KHKS is doing better than Stern is on KEGL. Kraddick is #1 with 18-35 yr olds.

Rush Limbaugh has the #1 show during middays.

Below are the first AccuRatings report for Dallas/Fort Worth, which came out last week (the DMN only listed the top 10 and only there rankings):

ACCURATINGS

1 KSCS
2 KYNG
3 KHKS
4 KJMZ
5 KDGE
6 WBAP
7 KPLX
8 KKDA-FM
9 KRLD
10 KVIL

/* Written 11:29 am Jan 12, 1994 by resystom in web:amarc.radio */
/* ---------- "African Independent Radio" ---------- */

THE DAWN OF AFRICAN INDEPENDENT RADIO

by Manon Hogue

"...The liberation of speech is as indispensable as economic liberation. Without one the other is simply an illusion."

John Madjiri - "Radio and Popular Participation" in _Airwaves for Pluralist Africa_, AMARC/CIERRO, 1992.

A wind of democratization is blowing across Africa. One of its manifestations is greater freedom in the expression of ideas and opinions. Some of these new freedoms are indeed fragile, but we are nevertheless experiencing the dawn of independent media. On a continent where illiteracy is increasingly rampant, the emergence of approximately 200 new magazines and newspapers over the last few years provides an astonishing display of the vitality of the press and the desire for self-expression on the part of a growing number of sectors in African societies.

This situation exists alongside another phenomenon, which is perhaps more predictable, though just as rapid and explosive: the emergence of free radios. The latter operate independently from authorities, who, depending on the country, repress, tolerate or encourage such new voices.

Of course, radio is not unknown to the people of Africa. For decades it has accompanied peasants in their backbreaking work in the fields or slum dwellers in their cramped solitude. As a natural extension of oral tradition, radio has been at the very heart of African culture. Throughout the years, it has constituted the main source of information and even training for the great majority of Africa's population, particularly the illiterate and the rural population.

However, until very recently radio broadcasting was subject to almost total monopoly by the State, which used it essentially as a tool for political power. This is not to say that interesting educational experiences and even popular communication did not take place on the radio during the decades that followed independence. They did. Nevertheless, on an overall basis, rural populations remained confined to the role of receivers, never having the opportunity to question the State's absolute control over radio broadcasting.

In a context in which many different languages exist in the same country and ethnic groups find themselves arbitrarily divided by the borders of colonialism, authorities have usually justified their nearly unlimited power by the need to strengthen national unity. Even today the most recalcitrant of governments use such arguments to shield themselves against the emergence practically everywhere in Africa of a huge movement toward decentralization and democratization of the airwaves.

>From Rural to Local Radios
==========

It is increasingly acknowledged that rural radios, when controlled from urban centres, do not respond to the needs of the rural population. Despite its important role throughout the last few decades, it is generally agreed that rural radio has become bureaucratized and has grown more and more distant from its listeners.

Some of the things criticized have been too much centralization of production, a lack of programming in the numerous national languages and a low level of participation by the population in program design and production. In this context, the establishment of local radios, as opposed to simply rural radios, has become a priority in several countries, especially in West Africa. These radios are more participatory, more accessible and less schoolish.

Among other countries, Burkina Faso, Guinea, Mali and Benin have been pioneers in this field. The Agency for Cultural and Technical Cooperation (ACCT) has been present alongside these countries, as well as the Congo and the Central African Republic.

Free Radios Serving Democracy
==========

Though many countries have undertaken a thorough reorganization of their radio operations, encouraging participation and decentralization, none has gone as far as Mali, one of the few countries to make an official announcement of its intention to free the nation's airwaves. The March 1991 events ended nearly 25 years of dictatorial power and marked the beginning of independent radios.

Just in the region of Bamako, there are currently more than ten such radios. Some of them are purely commercial. However, others are intended to be tools for democracy, development and social justice.

A few months ago, one of them (Radio Bamakan) won over an immense number of listeners in Mali's capital city of Bamako with its live broadcast in Bambara of the "Blood Crimes" trial of those accused of violence and repression. Throughout the trial, which lasted for several weeks, Radio Bamakan bellowed so loudly in the

streets of the capital that people did not need a radio to hear how the hearings were unfolding.

Whether it be in Mali, Senegal, Benin or Guinea, significant changes are in progress, entailing the much-needed decentralization of power in the field of radio broadcasting. Moreover, in several of these countries, truly associative or participatory radio projects are being developed.

The Dark Side of Free Airwaves

Obviously, the democratization of airwaves and the right of Africa's majorities to communicate will not be attained smoothly. On one hand, even when authorities act sympathetically and cooperatively, some sectors continue to oppose the changes that are occurring if their privileges are questioned. According to reports, an associative radio in southern Mali was recently vandalized after it warned the population about abuse of power on the part of certain members of the police.

On the other hand, freeing the airwaves implies their internationalization. Two large international radio networks have already gained a significant number of listeners. One of these is RFI Plus Afrique, Radio France International's African channel, which transmits its daily shortwave broadcasts throughout French-speaking Africa. As of 1991, RFI has also been using two local transmitting stations: one in Benin and the other in Senegal. The other major international station is Africa Number 1, which broadcasts from Gabon, also on shortwave. Without question, these stations constitute a serious threat to local broadcasters because they have technical and financial means that are vastly superior to those of local, regional or even national stations.

Finally, in some countries, the end of State monopoly has enabled repressive and antidemocratic forces to express themselves more loudly than in the past due to the fact that they can now voice their sometimes openly hateful messages on behalf of the right to freedom of expression. In particular, this is the case in South Africa, where a new independent authority, responsible for regulating radio broadcasting, will soon succeed the all-powerful South African Broadcasting Corporation (SABC), which has been one of the primary tools in the promotion of apartheid, maintaining until now a monopoly over radio broadcasting. However, the government has already made it known that the Independent Broadcasting Authority (IBA) will not be able to begin licensing before the first multiracial elections, scheduled for April 1994.

Meanwhile, after obtaining a license initially valid for only 24 hours, an extreme right-wing radio has continued its broadcasts. Radio Pretoria has been broadcasting German military music,

patriotic Afrikaans songs and speeches by D. F. Malan, one of the principal architects of apartheid. Authorities have made no attempt to close down this radio, whose facilities are watched over by armed guards.

This situation clearly demonstrates the double standard adopted by South African authorities on the issue of radio broadcasting. Some time before, they had seized the transmitter of a Cape Town community station named Bush Radio. Moreover, the members of the radio's broadcasting team are presently facing legal proceedings for "unlicensed radio broadcasting."

Despite the many pitfalls, the movement for democratization of the airwaves is well under way in Africa, where people are increasingly aware of free radio's tremendous mobilizing potential. As the director of a South African radio pointed out, "it is no longer a question of whether radio can respond to the needs of Africa's populations, but rather of how it can do so."

157. AM Radio Station Listing??

Newsgroup: rec.radio.broadcasting
Date: 1994-01-14 00:52:10 UTC
From: boehmerp@ttown.apci.com
Message-ID: <2h4qbq$ak0@vixen.cso.uiuc.edu>
Source record: 41512

Dear Bill,
I tried posting this to rec.radio.broadcasting, but my newsreader is
a bit of a pain and digested the post.
I am an occaisional DX'er who lurks mostly on the AM band. I enjoy
getting the radio stations from all over North America (well, the clear ones
anyway!) and I usually am uncertain that I am receiving the radio station
that I am truly receiving. Would you be able to direct me to where I could
find a listing of AM radio stations across North America with frquency, call
letters, daytime and nighttime power and of course, location. Any help in
finding such a compilation of the internet would be greatly appreciated.
Maybe you could post this for me in rec.radio.broadcasting so that
others may have a crack at it. Like I said, my newsreader leaves much to
be desired.

Thanks very much in advance,

Rich Boehme
boehmerp@ttown.apci.com

158. Armed Forces Network

Newsgroup: rec.radio.broadcasting
Date: 1994-01-14 00:52:21 UTC
From: ch01ig@surrey.ac.uk
Message-ID: <2h4qc5$akh@vixen.cso.uiuc.edu>
Source record: 41513

Does anybody have the frequencies for the US Armed Forces Networks
broadcasts to Europe please?
Also, does anyone know if the Superbowl is going to be broadcast on
radio in the UK (I don't have a TV) or will I have to tune into
the Armed Forces Network to hear it?

Thank you in advance
Ian :> ch01ig@surrey.ac.uk

Sedge Thomson's WestCoast Live
San Francisco's Live Radio Show to the World
January 11, 1994

Dear West Coast Radio Listener, Visitor, Bagel Catcher:

Well, the first WestCoast Live was a standing room only sold
out event. It was an incredible show with Trance Mission,
Anna Deavere Smith, Lady Bianca, Pulp Playhouse, Josh
Kornbluth, Meredith Tromble, Bonnie Loyd, Diane Hidy, and
Sedge Thomson (as the bearded guy with the microphone).

WestCoast Live airs live in the San Francisco Bay area
Saturdays on KALW 91.7 FM, 10 a.m. to Noon, following KALW
91.7's 9 a.m. broadcast of Car Talk. The local rebroadcast
is at 8:00 p.m. on KALW 91.7 FM. The show is uplinked to
the NPR satellite, so other NPR stations have an opportunity
to broadcast the show. Call your local NPR station and ask
them to broadcast the show.

Here (hear) is the upcoming schedule as we see it now;

January 15th; The Persuasions, Ian Shoales, April Sinclair,
Anne Lamott, and Claire Peaslee.

January 22nd; Adam Levy and the Lost Wax Process, Judith
Viorst, and Carl and Karl (or is it Karl and Carl?).

January 29th; Yes it's true, I'm not making this up, I
wouldn't joke about this, Dick Dale (King of Surf Guitar)
and the Deltones! Ya! Bring your surf boards and zinc oxide
to this show.

The live show takes place on Saturday morning 10:00 a.m. to
Noon, at Fort Mason (San Franc Carl?).

January 29th; Yes it's true, I'm not making this up, I wouldn't joke about this, Dick Dale (King of Surf Guitar) and the Deltones! Ya! Bring your surf boards and zinc oxide to this show.

The live show takes place on Saturday morning 10:00 a.m. to Noon, at Fort Mason (San Francisco) in the Cowell Theater, which seats approximately 400 people. There's plenty of free parking, free Stan's Cheesecake, and moderately priced coffee. We occasionally sell every seat, so we encourage you to reserve your seat in advance by phone. Seating is $10 per person. Reservations may be made by phone (415) 664-9500, with a VISA or MasterCard, prior to 6 p.m. p.s.t. on Friday evening.

Well, I finally did it! I finished the novel I was working on.

It's a fictional murder mystery which takes place at a talk radio station.
The realities of today's radio is the backdrop for it. Personally, I think it's
pretty good, too! I'm searching for a publisher now.

In the meantime, I've put together a shareware electronic book version
of it with automatic bookmarks and other nice ammenities. I would
like to offer it to anyone for the cost of shipping and handling: $4.00.
Add an extra $2.00 for overseas. It is not crippled in anyway! I am also
most interested in YOUR comments! Specifiy disk size.

Eric Matthews reports on distant FM-band reception in OZ-NZ. He attributes this to "atmospheric conditions". This is 99% surely IONOSPHERIC propagation, by reflection from the E layer at a height of about 100 km above the Earth's surface. The 800 mile / 1200 km distances he mentions are about optimum for single-hop E-layer propagation. Very occasionally, usually in the summer, there are VERY dense, but sporadically occuring, E-layer ionization, dense enough to support 100 MHz propagation. This is called Sporadic E propagation. (or Es). Es propagation is very common on the 29 MHz amateur band, fairly common on the 50 MHz band, less common on the 100 MHz band, and occurs only a few dozen times a year on the 144 MHz amateur band.

There is another, lesser, peak of Es occurance in midwinter. As I write this note at 2100 EST 12 Jan 1994, an Es opening on the 50 MHz band has recently ended here near Washington, DC. I was able to make ham contacts near New Orleans, and in central Mexico. The Mexican station was by two-hop Es, with reflection from the Earth half-way between here and Mexico - which happens to be around New Orleans - not a coincidence.

The frustration part was that I could hear a ham in Texas contact a ham in New Zealand !!!!, but I couldn't hear the NZ ham .... too much attenuation from the about-5 hops involved. Still this must be one of the first Es contacts between NZ and USA. Such many, many hop contacts by Es are RARE. Single hop is the norm, and double-hop is fairly common at 50 MHz, but double-hop is extremely rare at 100 MHz.

As for a 28-day recurrence:- This is very near the 27-day solar rotation cycle which is seen in nearly all IONOSPHERIC propagation effects.

Regards from Bob Carpenter w3otc@amsat.org

I can understand the agony over the Baltimore station. About 2 years ago, a station, WEZV, playing classical music, was bought and changed to WJLT (its sister station, WEZR, went dark) They began to play oldies. One weekend, whether a promo stunt or not, they changed their sign to Louie 101 (they were at 101.7) and began to play different versions of "Louie, Louie" God was it awful. One version after another... Anyone hear of stations doing the same besides Balt and mine.

```
/* Written 11:27 am Jan 12, 1994 by resystom in web:amarc.radio */
/* ---------- "AMARC's Networks" ---------- */
AMARC'S REGIONAL NETWORKS IN ACTION

Work on strengthening AMARC's regional networks continued
enthusiastically over the last few months. From Nairobi to
Fribourg, without forgetting our always-active Lima office, the
three regional networks now in place defined their upcoming
stages of activity.

Africa: Renewal of Activities

The coordinating committee of the African Network for Popular and
Participatory Radio Producers met in Nairobi, Kenya, in April.
The objective of the meeting was to revitalize the organization
and the development of the network. This meeting was followed by
one in Windhoek, Namibia, where those present examined the
possibility of establishing a radio training centre for the
English-speaking countries of Africa. This latter meeting was
the result of a joint initiative by UNESCO, AMARC and URTNA.
UNESCO was asked to support the upcoming steps aimed at creating
the much-desired centre.

CIERRO, AMARC's partner in activities on the African continent,
now publishes a magazine entitled "Convergences", which deals
with rural and community radio in the French-speaking African
countries. Beginning with the next issue, which is planned for
December, a new section will include information from AMARC and
the different components of the African participatory-radio
network. This section will take over from the "Lettre africaine"
and will be translated into English.

Over the last few months, CIERRO has organized two training
seminars. One of them, on the subject of local-radio management,
was held in the Ivory Coast. The other, which studied trainer
education, took place in Burkina Faso. Reports on these seminars
will be available at CIERRO.

Europe: Strengthening East-West Ties

The AMARC-Europe Working Group held a meeting on June 22-23 of
this year. The issue of East-West solidarity was in the
forefront of the group's discussions, as was a partnership
project with the Soros Foundation for the purpose of offering
training for Central and Eastern European community radios.
```

On another front, concerns initially expressed by the Working Group regarding possible impacts on community radio resulting from the implementation of digital audio broadcasting (DAB) have extended to AMARC members in other continents. Community broadcasters in Oceania, Europe and North America have joined the Working Group, which would like to continue recruiting new members, particularly in Latin America and Africa. Those interested should contact the office in Sheffield or the AMARC Secretariat in Montreal.

The European network also announced that the second version of the European Community Radio Charter, drafted on the basis of suggestions made by members, has been completed. Furthermore, a network member is responsible for collecting information on the situation of copyrights in different countries on the continent.

Finally, the European office has begun to publish a newsletter, whose first edition is already in circulation.

Latin America: A Growing Family

In Latin America, as well as organizing women's workshops (see the article in this edition), the Lima office has undertaken an enormous membership campaign in order to expand what is already our largest network. Moreover, to celebrate the creation of the women's network, the Lima team published a directory of the etymological origins of women's names. Dime como te llamas y te dire quien eres (Tell me your name, and I'll tell you who you are) is the name of the directory, which can be used to organize contests, encourage female listeners to participate or simply to stimulate creativity. On this last note, according to our friends in Lima, "it is no coincidence that all those muses known as sources of inspiration have been women!"

Finally, we want to mention a specially fitting internetwork linking experience. Radio Unique, in the Netherlands, and Radio Pachacutec, from the Peruvian Andes, have "twinned." As its first solidarity activity, on the occasion of its fifth anniversary, Radio Unique managed to collect the funds necessary for purchasing a low-power transmitter for Radio Pachacutec, and the Lima office has become the sponsor for this linkage. Long live the new bond!

Several posters have responded defensively unnecessarily -
by saying "I do more than just play records for four hours".
That's why I was saying, "for those of you LUCKY enough to have
a job in radio," You have shown that you are aware how much
more you have to do than just "dj" - but such dedication was not
evident in the posting I responded to where an employee at a
classical station (often given to playing long passages)
was said to be griping about having to work a 6 hour shift,
without stating what her other duties were that made her work
day more than six hours.

I have worked in radio and understand the burnout of playing
records for long hours, (even all 45's!) but if that's what
part of the job entailed to maintain a job in radio I'd do it
and so would you.

170. RadioWatcher: Along I-90, Buffalo to Rochester

Newsgroup: rec.radio.broadcasting
Date: 1994-01-14 10:42:15 UTC
From: fybush@world.std.com
Message-ID: <2h5su7$qba@vixen.cso.uiuc.edu>
Source record: 41525

I'm normally based in Boston, I know...but sometimes I make the trek along the Mass Pike and the NY State Thruway (I-90) to my ancestral home of Rochester NY. Here's what I encountered along the drive last weekend:

WEBSTER MA: Look for WXXW-FM, a class A on 98.9, to take the airwaves soon. The format will be adult contemporary via satellite, and the station will serve the Worcester market (which already has local soft rockers WXLO 104.5 and WSRS 96.1, plus Boston's WMJX, WSSH, and WBMX). The transmitter is in place, and the single FM bay goes up within the next week on the AM stick of sister WGFP-940. WXXW is listed on the Don and Mike list; they're not confirming that that's true, though.

SOUTHBRIDGE MA: WESO-970 and WQVR-100.1 are moving from their cramped studios on Hamilton Street to a more spacious location nearby in the next couple of weeks.

SPRINGFIELD MA: WSPR-1270 is back on air after two years dark, with a Spanish format. Class D WNEK is no longer on 97.5, but is not yet on air on its new freq of 99.7.

ALBANY NY: WROW-FM 95.5 is no more. WROW and sister WROW-590 have finally been sold to Albany Broadcasting Co., owners of crosstown WPTR-1540 and WFLY-92.3. At the dawn of the new year, WROW-FM became WYJB-"B 95.5". Format is essentially unchanged; soft rock. WROW-590 is now simulcasting all-news (mostly CNN HN) WPTR. Expect the all-news format to move to 590 this month, with WPTR to take on a new talk format. WROW/WYJB will likely be shoehorned into WPTR/WFLY's cramped studios behind Rt. 5 between Albany and Schenectady. That means an end to 4 decades of WROW sharing space with WTEN-TV 10. WTEN began as WROW-TV 41 in the early '50s. The station became WCDB-TV 41, co-owned with WCDA-29 Hagaman NY and WCDC-19 North Adams MA. In 1959, Cap Cities won a VHF allocation (against the wishes of WHEC-10 Rochester and WJAR-10 Providence) on channel 10. WCDA-29 left the air. WCDB-41 became WTEN-10. Cap Cities sold the stations in the 80s.

SCHENECTADY NY: Stopped in to visit WGY. The station is in very funky, old-fashioned studios built by GE to house the GY stations and WRGB-TV. The walls are lined with historic photos. Although the radio and TV have been separately owned since 1982, they still share the building...no locked doors, and the WGY-FM studio has a window that looks down into the TV news studio! WRGB-TV has 3 enormous studios...the Golden Age of TV lives! Videos on request...

UTICA/ROME NY: The duopoly with 1350/102.5 Rome and 1480/93.5 Remsen has shaken out like this:

1350-WRNY and 1480-WADR now simulcast...satellite music of your life most of the day, with few IDs. The top-hour legal did not fire the hour I heard them...yes I have it on tape! In PM drive, they run a really bad talk show. The host never ID'd the station, had zero phone callers in the hour I listened, and did 3-minute live spots for both advertisers. Yawwwnnnn... Meanwhile, the duopoly flopped calls and formats on the former WUUU-102.5 and WKDY-93.5. WUUU's oldies moved to class A 93.5, WKDY's country to class B 102.5.

Meanwhile, WFRG-1450/96.1 "Frog Country" is now WODZ-AM/FM, "Oldies 96". The Big Frog has hopped to a new home on 100kw FM 104.3 Utica, historically WKGW, and for the last few months WKFM, "Kix" classic rock (the format and calls formerly heard on 104.7 Fulton-Syracuse).

SYRACUSE: The late WEZG 100.9/WNSS 1200 are back on after a few months of darkness, now as WKRL AM-FM, "K-Rock". They simulcast WKLL Frankfort-Utica 94.9 and its hard-rock format. The 100.9 signal, a weak class A, holds up going east just to the point where 94.9 gets strong...so a good duopoly.

Class A drop-in WTKW 99.5 Bridgeport-Syracuse has dumped satellite country for live classic rock.

Despite plans and a CP to move to 90.9, Baldwinsville High School's WBXL-FM is still on 90.5, where I heard a surprisingly professional-sounding female jock one afternoon. Must have a good training program there...

ROCHESTER: The big news is the on-air debut in December of WEZO-FM 93.3. This is the CP that belonged to WYSL-1030 in Avon NY, south of Rochester. It was to have been WYNQ, and signed on simulcasting WYSL for one month in Dec.

Then owner Bob Savage entered into an LMA-to-buy with Lincoln Group, owners of WHAM/WVOR/WHTK Rochester... and the station became automated EZ, under the historic WEZO calls. WEZO was Rochester's monster EZ on 101.3 from 1971 until 1987, when the station became WRMM, "Warm". This move brings the historic EZO calls back to the market, and with the old 101.3 morning host Jerry Warner no less!

The new WEZO has a so-so signal, a class A from Rts. 5/20 and Oaks Opening Road in West Bloomfield, about 15 miles S of Rochester. It's OK south of the city, less so in the northern 'burbs.

Oh yeah...historically this is revenge. See, the original WEZO made its mark by stealing the entire WVOR 100.5 audience. WVOR was the original EZ listening station...but in July 1971, it was knocked off the air by a fire. While VOR stayed off for weeks, country WNYR-FM 101.3 quietly changed format to EZ and calls to WEZO, and took over the EZ franchise in town. When VOR came back on the air, its audience had already defected! And who's behind the new WEZO 93.3? The Lincoln Group, owners of WHAM and... WVOR! I wonder if anyone there gets the irony of it all?

Meanwhile WIRQ, the first noncomm FM in Monroe County (circa 1959), plugs along with its 30 watts on 94.3, its third frequency (original was 90.9, then 93.3, then the move to 94.3 when the WYNQ/WEZO CP was issued). Now they have to move again...and this time may have to go dark. A new CP has been issued for Brighton on 94.1 (can you say OVERBUILT MARKET? knew you could...), and now there may be nowhere to go for poor WIRQ. I'm rooting for them to bump W238AR off its 95.5 channel in Rochester. W238AR is a translator designed to help rimshotter WRQI-95.1 "Rock-It 95" S. Bristol get into Rochester...but translators CAN be bumped by class D noncomms...so stay tuned!

On the AM side, the former WPXY-AM 1280 is now "Hot Talk 1280", WHTK...being sold by Pyramid to Lincoln Group (WHAM/WVOR/WEZO). The format includes Imus in the Morning, Liddy, Gene Burns, Don and Mike, and Dr. Joy Browne.

And that's the buzz from my old hometown.

One New England note: WKBR-1250 in Manchester NH is coming back on the air. It's been testing with dead carrier on both day and night pattern...look for it! Sid Whitaker (sid@acs.bu.edu) was up there for one of the tests...maybe he'll write about it!

Oh yes...I have tapes of ALL of this...just ask!

Your friendly itinerant Radio Watcher,

/* Written 4:55 pm Jan 13, 1994 by resystom in web:amarc.radio */
/* ---------- "Pluralism & Radio - Africa" ---------- */
Extracts from the Bamako Declaration on Pluralism in Radio
==========================================================

A colloquium on radio pluralism in West Africa was held in Bamako
from September 14 to 18. It was organized by the Panos Institute
and the Union des Journalistes de l'Afrique de l'Ouest (West
African Union of Journalists). Eighty-six people took part in
the discussions, which ended in an official declaration. Because
of its importance, we are publishing the following extracts.

1) Radio is a foremost means of social communication,
particularly in Africa.

2) Pluralistic radio must be an essential component of any
attempt to further the democratic process already in progress.
It allows people to have greater access to diversified
information, which guarantees their increased participation in
sustainable human development.

3) Pluralism in information requires the elimination of
monopolies over radio and the existence of a broad spectrum of
radios that can report on the diversity of viewpoints and
aspirations of the different components of society.

4) Opportunities to be informed and to express oneself on the
airwaves remain unequal in terms of different areas (urban and
rural) and different social groups (in particular, men/women).

5) Initiatives aimed at creating private and community radios
should be encouraged so as to promote multiplication,
diversification and decentralization of these radios (commercial
or associative). In particular, initiatives designed to create
village radios should be supported by measures that facilitate
authorization procedures.

6) African States should hasten the removal of monopolies over
the airwaves and grant frequency-allocation priorities to people
in their own countries who promote projects in favor of private
radios. Furthermore, they should take urgent measures to develop
new legislative and legal frameworks, create truly independent
regulatory bodies, define and implement fiscal, customs and other
measures likely to favor the expansion of private radios.

7) State radios should be transformed into real public-service
radios; this process should include all relevant statutory,
```

administrative, editorial and managerial changes.

In addressing other subjects, participants brought up the need for professional associations to organize themselves regarding the issue of pluralism in radio. They also urged international-cooperation organizations to provide themselves with the institutional and financial means needed to offer efficient support for the liberalization of West Africa's airwaves.

Message-ID: <2h5su8$qbc@vixen.cso.uiuc.edu>
Source record: 41527

About five years ago I roamed around north Florida for a week and ran into a wierd FM station. From the log books and IDs, it was in far-southern Georgia.

The entire program consisted of swamp/jungle sounds... running water, birds chirping, etc. No announcements except for the top-of-the-hour ID. This lasted for at least the week I was in range.

I SUPPOSE they were changing format.

Just a note of another promo scheme..
Bob w3otc@amsat.org

I'm currently working with the National
Lawyers Guild Committe for Democratic Communications in San
Francisco. We are currently representing micro radio
broadcasters in action being taken against them by the United
States Federal Communication Commission. In addition to this
we are advocating a statutory or regulatory system in the US that
would legalize microradio.
We are currently looking for the text of the laws or
regulations that allow microradio in other countries such as
Canada, Italy, South Africa or possibly Argentina. While we are
to get brief reports that mention some degree of radio freedom in
these countries, we are interested in getting copies of the actual
laws to use as examples of how a microradio scheme may be implemented.
If you have access to text of these regulations and could
supply us with them or if you know of someone who could do this, we
would be sinerely thankful.

I am informed by those obviously more experienced at this than me, that Prodigy doesn't have an Internet gateway, so I guess that means I won't be e-mailing them...sorry if I've posted incorrect info, I'm a relative newbie at telecomputing.

Happy listening...

Can you say "aimless", boys and girls?

The yo-yo management of the morning show finally made me give up WNEW-FM
on the morning commute.

Before Kelly joined, the morning show had telephone jokes, banter,
contests, and laughs. Then they started playing obscure oldies that people
didn't even listen to when they were current releases ("Deep Cuts") and
canned the morning show staff rather unceremoniously. St. John ran
recorded spots saying that he responds to what the listeners have to say,
and that the music will be more important. Then he puts on Kelly whose
smirk was so obnoxious I could hear it over the radio. So now where are
we? Obscure b-sides from 20-year old albums, and no personality? Sheesh.

These guys should really listen to WDHA-FM (105.5) in Dover, NJ
They play a more balanced selection of old and new rock, and have DJ's
with personality that does not over-power the music as the prime program
material.

coming from Philadelphia (103.9). I hadn't >>heard that WDRE in Garden City
NY had died
>>... so how could a Philadelphia station be using the same call >>letters?
>>This is not a repeater; all the ads etc. were for Philly businesses.

Well, it IS a repeater of sorts... the station you heard was actually WIBF-FM
103.9 Jenkintown/Philadelphia, co-owned with WDRE Garden City, Long Island.
They carry 90% of the Long Island station's programming via T1 lines,
splitting only for spots and local chart, dance, and local-band shows. This
arrangement started in late 1992 and is now being duplicated at WMRW 98.5
Westhampton, Long Island (East End). The Philly studios are at the Benson
House on Old York Road, Jenkintown with antenna on the Channel 29 tower
(channel 29 was originally WIBF-TV in the '60's), and it's a Class A- 3000
watts equivalent, but 1000 feet above average terrain, so the coverage is of
most of the metro. Cool, huh? Look for that situation to repeat itself (no
pun intended!) not only at WDRE but elsewhere; it's one way to keep
operational costs down...

178. ** NOTE: Modification to RadioWatchers program **

Newsgroup: rec.radio.broadcasting
Date: 1994-01-17 00:15:48 UTC
From: rrb@radio.aiss.uiuc.edu
Message-ID: <2hclbk$rrt@vixen.cso.uiuc.edu>
Source record: 41533
Cross-posted to: rec.radio.broadcasting,rec.radio.noncomm,rec.radio.info

This is a modified copy of the RadioWatchers proposal which was published recently. The only major change was in the area of the ID cards and access to AIRWAVES by password protected software for card holders.

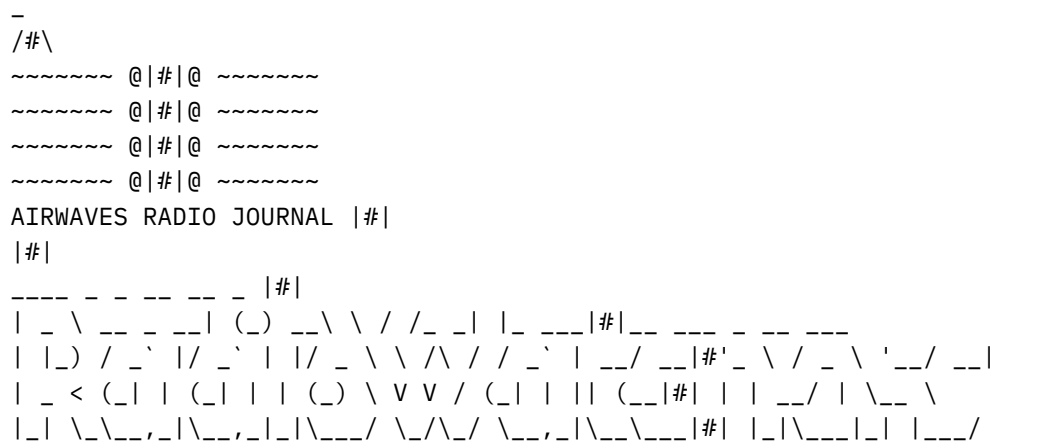
I am changing this clause, because I have received mail indicating that what it does is tant amount to selling access to those who have paid a fee for the RadioWatchers card (which nobody has yet to do).

To clarify, the offer was to allow RadioWatcher card holders to post to AIRWAVES radio journal without my intervention, after they had shown themselves to be competent. The card was offered for $10.00 a year, which I felt coverd my costs in creating the laminated photo ID, mailing and maintaining records. Note that this offer applied to AIRWAVES RADIO JOURNAL only and not to rec.radio.broadcasting, where the majority of AIRWAVES articles are ported to and from. I can easily understand, however, how that distinction may not have been made clear.

So as of now, and from no to the foreseeable future, the ID card offer has been suspended, pending discussions and decisions on how to amicably proceed. I am still anxious for your participation in this program. Since nobody has taken me up on the ID card offer anyway, it should not change the scope and focus of the program in any way.

Sincerely

William Pfeiffer Moderator: rec.radio.broadcasting
Editor: AIRWAVES RADIO JOURNAL



If you are really interested in broadcast radio in your own area, you might wish to get involved in the AIRWAVES "RadioWatcher" project.

We are currently asking for individuals who are either active in the industry, or are very much involved in the happenings around their town/city/community and would like to become recognized as a "RadioWatcher" for AIRWAVES.

As a RadioWatcher, you will be responsible for reporting the goings-on in your locale, and will be, in effect, a staff reporter for AIRWAVES. While anyone can write an article for the Journal, RadioWatchers will be considered the de-facto correspondent in a given city.

As a RadioWatcher, you will be asked to keep an eye and ear out for news and schmooze about the broadcasting scene in your market. You are asked to submit at least one report per month (more if you choose) and will be kept on file here at AIRWAVES as an official member of the press.

The purpose of this program is to create a base of volunteer staff reporters who's job it will be to keep a steady flow of good information about various markets coming in to AIRWAVES. It does not mean that the pages of AIRWAVES are closed to any of the other posters in net-land. It is just a way to assure that the readers will have something good to read, when the more casual posters are not available.

Q: What do I need to do?

A: RadioWatchers are basically the same thing as reporters. To remain on the RadioWatcher program, you are expected to be involved with radio in your market, either by profession, or by a strong personal interest. You will be asked to report on any interesting goings-on in and around your market. Such as format changes, station sales, interesting trends, market ratings, and whatever else seems appropriate. The depths to which you dig for information is up to you.

It is important, though, that you are a true fan of radio, and not merely a fan of one sort of format. Your reports can have personal commentary, but should be based on actual facts (as you know them) rather than how those facts match up with your personal opinions.

In general, we need good, solid reporters who will do the job based upon their love of radio, and desire for more exposure. AIRWAVES is not a profit making entity, and so salaries cannot be offered. If you are a budding journalism student, or a seasoned pro, this may be a chance for you to show your stuff to the world. Airwaves is read across the globe via the Internet, and is available to subscribers of CompuServe, GEnie, AOL and on a host of BBS systems, via email. Your input will not go unnoticed.

So if you are interested, drop me a line and tell me about yourself. I will be in touch by return mail. Those of you who

expressed an interest in the past, are encouraged to get back in touch. Those of you who are already RadioWatchers, thank you and keep up the great work. As AIRWAVES expands, your contribution will be even more important.

Message-ID: <2hcmvp$p8@vixen.cso.uiuc.edu>
Source record: 41535

Greetings! As I type this,we are suffering through -20 to -40 wind chills. However,the radio news here might warm you up. (They all are personnel shifts.)

1. Kevin O'Neil(aka The Real Deal)has moved from WKSE-FM (Kiss 98.5;dance-based CHR)-where he was a weekend DJ-to WMJQ-FM (Q102;hot A/C),where he takes the same duties.

2. Mike Manion,midday host at WBUF-FM,joins WPAT in New York City for that shift,replacing Jay Victor.

3. The rest of the news has to do with WGR-AM(NewsRadio 55; news/sports/talk). First,Greg Brown,who has been with the station since the late 80s,has joined the announcing staff of the Pittsburgh Pirates.(He'll replace ex-Bucs reliever Kent Tekulve, whose contract wasn't renewed.) Brown has been the color man for the Buffalo Bisons and one of the color announcers(with Marc Stout)for the Buffalo Bills. It's a reunion(of sorts)for Brown and the Buccos:he worked in their organization for a few years before joining WGR.
WGR has decided to add more sports talk to its lineup; to do this,the station took Tom Ragan and Karen Pingar off the 2-6pm shift,which they held for about 7 months. Art Wander moves up from 6-11pm to take their place(his show will be from 2-7pm), while Chuck Dickerson(former Bills defensive line coach)will follow him(unless a Sabres or Bisons game is on at the same time).
Some observations:Chuck is a character,there's no denying that; however,I feel that it certainly isn't going to give it any more intelligence in its talk segments. He may be knowledgable about football,but that's about it. I am willing to give him the benefit of the doubt. Incidentally,this is his second foray into sports talk:he was on WWKB-AM(talk/sports) for a brief spell after getting fired by the Bills in 1992.

[lotsa ratings tables and info on Don Imus deleted]

>Monday,January 17 is the day when Group W Radio(WBZ parent firm) supposedly
>takes over 'EEI from the Celtics pending final FCC approval...'EEI sale price
>was based on summer ratings...With the release of Imus fall numbers earlier
>this week, it's quite obvious Group W got a steal...WEEI is now ranked
>nation's #3 sports station behind WFAN in NYC and WIP in Philly...
>However, WEEI's overall 2.8 rating is still nothing to get excited about.
>An overall 3.5 or better in the spring book should make it a bona fide
>player in the market...Can Imus and the new rich owners make that station
>a force it once was? We'll find out the first week of April...
>

They shouldn't do too badly over the next few months -- they've got all the NFL action in town right through the Super Bowl, plus the Bruins, Celtics, and the NCAA Final Four. Not a bad lineup for a sports junkie like me. And with Group W behind them, they could go places. If.

If they could do something, anything, about their atrocious signal west of Boston. I live in the Wellesley-Natick area, and at night their signal is nearly impossible to find. [Not quite as bad as WMEX 1150 AM, where Boston Bruins games are shoved off to when they conflict with Celtics games on 'EEI, but still atrocious.] Strong programming _plus_ a strong signal counts for a lot. I do understand that their signal conflicts with some small signal at 580 in central Mass., but there has to be some other way. How about a frequency move? Say, up into the new area above 1600 kHz? Or am I being naive...

Off-hand question: Does the purchase give Group W the right to move some Bruins games to WBZ in the event of conflict? Or must this be renegotiated whenever the contracts are redone? And does anyone know when the various contracts for Boston's major sports teams are next up for renewal?

"Nobody asked, just my opinion."

I'm sorry to see that venerable WSAI has fallen on hard times. In the early 1960s I was the all night DJ in a Boss Radio Top 40 format under the name Mike Sherman. Currently I anchor and report news at WBBM Newsradio 78 In Chicago under my real name, Sherman Kaplan. But, those r'r days were golden. I was a kid still in college, just married, doing rcord hops...bought a used Jag xk120, did not realize that you actually had to work for a living. A few of my old fellow jockss are here in Chicago (Mark Edwards and Ron Britain), and I recently got word that Dick Wagner (who was Dick Braun at WSAI) just retired in Louisville.
I do know that Dusty Rhodes is still around Cincinnati. I see his name on all the gas pumps when I go back to visit family. (he's county auditor).
I was saddened to hear that WNOP finally dropped the Jazz format after a long and valiant struggle to make a go of a limited appeal format on a teapot watt station. Too bad.
And, if someone can please clarify something for me. WKRC is now WLW-A?. Do they operate separately? What's the deal?

182. Dancin' Danny. Where is he?

Earlier this week, my friends and I were talking about a dead, sorely-missed Cleveland radio station. WGCL-FM 98.5 was on the air from 1971 through 1987 and for much of that time was the market's only Top-40 radio station. Some really great personalities worked at G98, including Uncle Vic and Dancin' Danny Wright (my favorites). Well, Uncle Vic now runs a bar named Vic's out in Elyria. However, I don't know where Double D is. Here's what I do know:

1987: Left G98 when it changed format. Went to 92Q (WRQC 92.3, now WJMO).
1989: Left 92Q when it changed format. Left radio for a while
and became a real estate broker, living out near Akron.
1990: Joined the staff of Akron's WKDD (which at the time was top-40).
1991
or 92: Moved from WKDD to Mix 94.9 (WQMX).

WQMX has just recently changed format from AC to country, and I don't know whether DD is still there (I can't stand country music). I assume that he is not. Does anyone know where he's working?

Great, WDRE can be heard in Philly and now New Mexico. When are they going to fix it so I can hear it in Hoboken, N.J. just across from Manhattan. As a longtime alternative music fan I figured moving to New York would put me in radio heaven. Why is it that all I can get at home is classic rock radio?

STERN'S EMPLOYER MAY GROW DESPITE FCC COMPLAINTS
New York Times News Service 1/8/94

Pointing to a recent court decision that struck down federal restrictions on indecent broadcasting, officials at the Federal Communications Commission (FCC) said this week they might not be able to stop the company that employs Howard Stern, the radio personality, from buying more stations.

Mr. Stern's chief critic at the FCC, James Quello, a commissioner, conceded Thursday that the commission would face big legal obstacles in any attempt to block Infinity Broadcasting Corp., Mr. Stern's employer, from buying three radio stations for $170 million.

Last week, the commission turned aside pleas by Infinity executives and delayed approving the company's application to buy the three stations. But an outright denial of the transactions now seems unlikely.

"I don't think we can use the withholding of a license as a sanction in itself, Mr. Quello said.

Mr. Quello, who has tried to block Infinity's plans for expansion, said the deals could be stopped only by trying to revoke all of Infinity's radio licenses -- an unlikely move that would lead to a long court fight.

The commission has been locked in a running battle with Infinity over Mr. Stern's raucous, scatological broadcasts and discussions of topics like the size of sexual organs.

Since 1990, the commission has imposed about $1.2 million in fines on Infinity. The company is challenging the fines in court and has yet to pay them.

Infinity Broadcasting executives and Mr. Stern declined to comment on the issue Thursday.

In December, Infinity executives said that a delay on at least one acquisition past Jan. 1 would cot it millions of dollars because on financial penalties in its contract to buy a Los Angeles station, KRTH-FM, for $110 million.

In addition to the deal to buy the Los Angeles station, Infinity is trying to buy two stations in the Baltimore-Washington area - WPGC-AM (1580) and WPGC-FM (95.5) -- for $60 million.

Infinity already owns three area radio stations - WJFK-AM (1300), WLIF-FM (101.9) and Washington's WJFK-FM (106.7). Mr. Stern's show airs on WJFK-AM and WJFK-FM, from 6 a.m. to 11 a.m. weekdays.

Infinity, which is based in New York, owns 20 stations in big cities and has been one of the most aggressive buyers of radio stations.

Other officials of the commission are unhappy about remarks Mr. Quello made last week to reporters.

Aides to two commissioners, Ervin Duggan and Andrew Barrett, disputed Mr. Quello's contention that they had agreed to delay a decision on Infinity simply because of new complaints against Mr. Stern.

Rather, they said, the decision was held up because the commission was still analyzing a recent federal court decision on indecency rules.

Mr. Quello said Thursday that his earlier remarks were "absolutely accurate" and that he had an informal agreement to delay action from both Mr. Barrett and Mr. Duggan until the FCC resolves two new complaints stemming from several of Mr. Stern's shows last summer.

Back when I was younger, with much more stamina, I worked 3 stations
at once on weekends. One was a 12-hour shift (midnight to noon, Sunday).
The idea of 'burnout' never occured to me. I was working.

We're looking for the call letters and any other information
available about a coop radio station that was broadcasting in
the early 80's and may still be doing so in the San Francisco
Bay area. (Steve Phillips was associated with the station then.)

Please reply by email so we won't miss the answer.

thx

>following ways: (1) noise blanking is not required for portable battery-

IMO noise blanking on an AMAX quality radio is useless. I've
never noticed a signal on my Denon TU680NAB where turning noise
blanking on made a signal any higher in quality. A noise
blanker is useless on computer and TV RFI, and only slightly
effective on light dimmers or power line noise.

In a communications setting, if a signal is weak enough to
benefit from a noise blanker high fidelity is out of the question.

I'm posting this for a person who has no Usenet access. Please respond
via the e-mail address at the end of the post.

Hi! I'm a student at college in England who has just begun my PhD
examining the relationship between the media (particularly black
radio) and the Civil Rights and Black Power movements in America.

I was wondering if there was anyone out there who was, or knows,
someone who owned or worked for a black-oriented radio station in
the States at these times, or maybe someone who was involved in
the civil rights movement who might have something to say about the
role that black-oriented radio stations might have played in spreading
news, messages of black pride, etc. If so, would you be interested in
getting in touch?

If anyone was interested, could you please e-mail me at the following
address: s.r.j.walsh@newcastle.ac.uk

Thanks,
Steve Walsh.

191. Canadians plan Digital Radio transition

Newsgroup: rec.radio.broadcasting
Date: 1994-01-17 21:53:36 UTC
From: ah617@FreeNet.Carleton.CA
Message-ID: <2hf1d0$4o4@vixen.cso.uiuc.edu>
Source record: 41546

New Kind of Radio promises CD-quality sound

Canada is moving quickly to introduce a quantum improvment in the quality and the reliability of radio. Using digital transmission techniques, the new form of radio will provide listeners with the same high quality sound as a CD-player, and without the interference present with current AM/FM analog radio.

In 1992, Canada proposed using L-Band for digital radio, and the World Administrative Radio Conference (WARC) endorsed Canada's position and officially designated space in the L-Band as the future home for this exciting new form of radio.

Canada is now moving to introduce this improved form of radio as quickly as possible. An industry-government Task Force, charged with coordinating the necessary steps and providing advice, has developed a critical timetable which could see the introduction of CD-quality radio broadcasts as early as the end of 1995. Members from Canada's public broadcaster, private broadcasting, campus and community radio broadcasters, the regulator, the federal government, the electronic equipment manufacturers and the Canadian sound-recording industry, are working together in this effort.

The Task Force on the Introduction of Digital Radio has forged links with broadcasters, manufacturers, associations and governments around the world to develop technical and regulatory standards, share transition strategies, and form strategic alliances aimed at assuring the successful introduction of this improved quality of radio.

Digital Radio Research Inc., (DRRI), a corporation composed of shareholders from Canada's public and leading private broadcasters, is establishing full-time digital transmission facilities on the CN Tower in Toronto, and the Mount Royal Tower in Montreal. They will be available for broadcasters to experiment with new programming forms appropriate to the transmission of CD-quality radio.

DRRI will also conduct a second test of a Single Frequency Network (SFN) between Montreal and temporary sites in Rigaud and Saint-Sauveur, Quebec.

The testing is crucial to the successful development of frequency allotments at L-Band, leading to the licencing and regular digital radio service to the public by 1995. Canada continues to

be on the leading edge of this new technology which provides sound quality that is equivalent to that of compact discs. The first SFN test was conducted last December using experimental transmitters in Toronto and Barrie, Ontario, 82 km apart using the advanced European digital system Eureka 147/DAB.

Canada has been testing the Eureka-147/DAB wide-band system at L-Band (1452-1492 MHz) since late 1991. Digital radio permits a cellular-style reuse of the broadcast spectrum, and both terrestrial and satellite digital radio services can use the same band. This efficient use of spectrum resources achieved by Single Frequency Networks is a Canadian innovation which will help ensure maximum benefit from minimum spectrum use.

This information comes from The Task Force on the Introduction of Digital Radio, an industry-government body which is coordinating the various steps required for the transition to digital radio service in Canada.

Information and Communications Division
un.ifad@agora.stm.it

PERU:
COMMUNICATIONS FOR RURAL DEVELOPMENT
SIERRA "COMMUNITY RADIOS" TO INFORM FARMERS

A novel IFAD approach to helping the poorest of the poor in rural development is being tried out in some remote villages of the northern and southern sierra of Peru. The approach is to use new "community radio stations" for two hours a day to promote rural development.

The idea is to set up 20 radio stations, each serving about 15 communities. One of their main purposes will be to inform farmers of the prices in various markets and the state of supply and demand. There would be a group of local reporters covering rural development, elected by local assemblies.

The stations will transmit information about the IFAD development programme as well as information about how to obtain access to its transfer-oftechnology project. The villagers will be told how to seek the help of agricultural advisers. The radio stations, which may eventually be linked in a network, will bring together peasants and specialists, aid agencies, NGOs and the government. The aim will be the spread of information - from modern technology to the peasants' traditional expertise - to boost agricultural production. The daily two-hour programmes will, in addition to news about local markets, carry news about cultural activities in the community, as well as the results of agricultural research where it is relevant.

The project requires only that each radio station devotes two hours a day to it. For the rest of the day, the station can broadcast what it wants, including publicity spots, which should provide enough money to pay the staff. To succeed, the project will need to train people to run the radio stations, and repair radio sets and the tape recorders to be used by the "peasant reporters". If it succeeds, the project will reach and revive poor, remote and neglected communities. It may also, says one of those involved, "generate a dialogue which will avoid intolerance, racism and paternalism".

A shipment of some St. Louis news, from the St. Louis
Journalism Review (SJR):
(NOTE: This is a GREAT publication. If you're interested in
the media, you should subscribe to it, no matter where you live.
It is a thought-provoking, lively publication. Subs are $25/year;
address is 8380 Olive Blvd., St. Louis, MO 63132. I am not
associated with the SJR in any way other than as a longtime
(12-year) subscriber.)
Now, on with our show....
***
Plans by the Lutheran Church-Missouri Synod to take over operations
of KSLH(FM) have been delayed.
The station, at 91.5 mHz, was to be transferred to the church by
the St. Louis Public Schools by the end of the year. However,
the transfer has been delayed until mid-summer.
The church already owns non-commercial limited-time station KFUO(AM)
at 850 kHz and commercial classical station KFUO(FM) at 99.1 kHz. The
church plans to use KSLH to simulcast KFUO(AM) and extend its schedule
to 24 hours a day.
Webster University currently is programming KSLH for the school
district. The station is playing jazz music in mono, and signs off
the air at 6 pm. The church plans to increase the station's power from
12,500 to 100,000 after the transfer of ownership is complete.
***
St. Louis is one of 32 radio markets in which Arbitron will increase
the sample size by 30 per cent.
The change takes effect for the Winter 1994 survey starting shortly.
For St. Louis, the change means about 3,200 diaries will be distributed
in the market.
Supporters of the change have said the higher number of diaries
will provide a more accurate indicator of stations' listenership.
***
A report in the SJR says clear-channel powerhouse KMOX(AM) is
registering some of its lowest numbers ever, according to the latest
Arbitrends.
The report says 25-54 numbers for the station at 1120 kHz seem
to be especially hard-hit.
***
The formation of the St. Louis market's newest duopoly has meant
consolidation for KYKY(FM) and KSD AM and FM.
All KSD departments except for the air staff have relocated from
Corporate Square in West County to the KYKY building on Market Street
in the City of St. Louis. However, construction of new studios to
accomodate the KSD air staff and production requirements have not yet

begun, according to the SJR.
In addition, KSD program director Scott Strong resigned just before Christmas, citing philosophical differences with the new management of KSD.
KSD and KYKY are now owned by EZ Communications. Gannett sold KSD to EZ shortly after selling KCMO AM and FM in Kansas City to Bonneville International, representing Gannett's total withdrawal from Missouri. In the early and mid 1980s, Gannett's radio division was headquartered in St. Louis.
(KSD(AM) is at 550 kHz, talk, 5 kW, DA-N; KSD(FM) is at 93.7 kHz, class C, classic rock; KYKY(FM) is at 98.1 kHz, class C, adult contemporary.)

A Kansas City radio station is among those stung by a phony concert promoter who sold more than 300 tickets to a nonexistent performance by drag singer RuPaul and house-music singer Robin S.
The concert promoter, who has not been arrested, sold $25 general admission tickets to a show that he said would be held January 12 at Memorial Hall in Kansas City, Kansas.
According to a report on KMBC-TV, KISF(FM) paid $2,500 to be the exclusive radio sponsor of the concert. The station also gave away tickets to the concert on the air.
When concert-goers showed up Wednesday night, they learned that the tickets and the show were not real. The man who sold the tickets reportedly left Wichita, Kansas the preceding day en route to Los Angeles.
However, subsequent reports have said the man may still be in the Kansas City area.

Source record: 41455

I guess it all depends on what you are doing during the time of your shift and how much you enjoy it. I used to work 11p-7a at one Top40/CHR station, and had a great time cracking jokes on the ramps of songs, playing the occasional 'jock choice' song (at an automated station (hey, if they didn't want us to infuse the program with our own selections at four in the morning, they wouldn't have left the turntable in the control room)), and talking to the occasional listener. At the end of the shift I would trade barbs with the morning guy and go home happy. The only thing I didn't like about that job was the pay, $3.85 an hour (this was in 83-84).

Another job I held was a 7p-12m shift, but for a station where the format was elevator music (actually, that may be offensive to elevators). The only 'work' I did was the station id and 'rip and read' news at the top of the hour, and weather at the bottom of the hour. I was bored to tears, but wound up working there for about 2 years because I could study all night. (I was in college at the time). One annoying side-effect of working for that station was that after I stopped working there I couldn't sleep at night without a radio on. Even then, if the radio went off, or the station I was listening to had any dead air during the night I would wake up in a cold sweat looking for the empty reel and the automation's 'next' button.

200. Imus on the FCC/Infinity/Stern

Newsgroup: rec.radio.broadcasting
Date: 1994-01-19 04:46:43 UTC
From: field@bedford.progress.COM
Message-ID: <2hidvj$dfh@vixen.cso.uiuc.edu>
Source record: 41456

What follows are comments made by Don Imus on the `Imus in the Morning' program Friday, January 7, 1994. The words are his, the punctuation and spelling are mine. This is reproduced with permission.

FCC / INFINITY / STERN

"Let me take a minute here to put this Federal Communications Commission, Infinity Broadcasting, Howard Stern story into a context for you from my point of view, since every talk show and newspaper on the planet has been calling me about it and I thought this would probably be a good opportunity to do that.

"I should say initially in the spirit of fairness that I own a bunch of Infinity stock, that I work for Infinity, and that I have enormous respect for Mel Karmazan who runs Infinity. I might also add that I can work for anyone I want to and I am only beholding to Infinity because I signed a contract a couple of years ago for what many agree now was chump change. But to the point.

"To put the Stern mess into context from my perspective, you've got to to break it down to its component parts in order to see what's really involved: The FCC. What Stern does. What Stern ought to be able to do. And finally Stern himself.

"Well first of all the FCC is egregiously wrong in holding Infinity Broadcasting hostage to Stern by delaying the purchase of radio stations we want to buy while it considers the complaints against him. It is a peevish petulant attitude at best. At worst it is piling on - a power abuse trip by a smug band of regulators who are a text book example of what happens when you give tin badges to people who suffer a persistent sense of inadequacy. It's the same psychosis that produced the Rodney King incident, and now gives us the commissioners of the FCC. Their interference with Infinity Broadcasting's ability to do business before the Stern matter is adjudicated is not only unethical but I bet you'll find is unconstitutional as well. The irony here is Infinity is currently abiding by the law while the FCC is not. But then the commissioners are political appointees, aren't they?

"Now, it's also clear to me - to me - that Stern should be able to say what ever he likes. No matter what puddle of putrescence he happens to be wallowing in at the moment: `Praying' for the former commissioner of the FCC to die of cancer is an example for example. The point, though, is this: If every time some slug says something that offends us we are thrown into wild expurgatory paroxysms then let's just repeal the first amendment right now and be done with it. And please, spare me the 'my kids might listen' rap because that's why they make radios with dials.

"As inherently offensive as suggestions about losing the first amendment should be to everybody, equally offensive to me are the self-appointed arbiters of taste around the country who are holding Stern aloft now as some first amendment champion locked in a noble struggle to defend fundamental constitutional guarantees. This nit wit couldn't of distinguished the Bill of Rights from his utility bill until somebody pointed it out to him about twenty minutes ago.

"To cast him now as some guarantor of the constitution is so preposterous it is laughable. It is absolutely nothing more than another step along along the path of least resistance that led into the voyeuristic rabble that constitutes his audience.

"The plain truth is that Howard Stern is a vile misogynistic, xenophobic punk who panders to the worst instincts in the worst people and even to the worst instincts in some people who should know better. But then folks do slow down at a car wreck, you know, looking for pizza guts there on the pavement, and sometimes if you think that's funny, fine. And some times it is, like if it were Howard's guts spilled as a result of the accident he just had on his way to an appointment with his proctologist, or whatever.
"The issue is that Stern should be able to say what he wants, you should be able to listen to what you want, and Infinity Broadcasting's ability to do business should suffer for neither. Stifled by some strutting panel of culture cops decrying the excesses of his species.

"You know what the real deal is, cause I worked with him, he's stupid, I mean that's the deal, there's nothing more nothing less, he's stupid. I mean I realize better than most folks that humor is subjective, you know, he's just stupid. I also understand that the first amendment isn't a stupidity test and that it guarantees both contemptuousness and virtue. I mean if it didn't, how would I be on the air?

"Perhaps the worst insult in all of this occurs when some referee of refinement equates Howard Stern to George Carlin or for God's sake Lenny Bruce. Two guys who stuck controversial humor in your face for a purpose. When Lenny Bruce said nigger it was a brilliant attempt to drain the malice from that term to the point that when some little five year old black kid heard it, it wouldn't break his heart. The only thing Stern sticks in your face is a repulsive, mean-spirited bully demeanor energized by the power of his cheap celebrity that allows him to humiliate people who can't defend themselves. Anybody can do that, I can do that, I mean we do work for the same company, and as the saying goes: Been there, done that. Because I mean I did start all this shock jock business back when it was novel. And for those of you that think Howard's act is the result of some neuvo creative genius the facts are when he came here to New York from Washington, D.C. he was doing my act, obviously he had to come up with something else. And the tapes are available by the way.

"So Stern is doing what he wants to do, I am doing what I want to do, Infinity Broadcasting should not be made to suffer in either case, and you should be able to listen to whatever you want.

"Coming up in a few minutes I will be talking to Senator Bill Bradley
and Howard's gonna have a lesbian stick a tent pole through her nipples
.... maybe I can tape it."

201. Kansas City Guessing Game??

Newsgroup: rec.radio.broadcasting
Date: 1994-01-19 04:48:01 UTC
From: ucsd!tyrell.net!transvox@uunet.UU.NET
Message-ID: <2hie21$di0@vixen.cso.uiuc.edu>
Source record: 41453

It's time for our favorite game here in the frozen hills
of Kansas City (predicted low tonight: -5 Fahrenheit)...
<< Which Radio Station Will Change Format for the Spring Book? >>
This is not one of the more innovative markets (though it beat
New York when it came to installing a hard-rock format). It has
the reputation among broadcasters as being a difficult market in
which to sell time. Of course, some of that can be the
broadcasters' fault, for being the most risk averse in the country!
Around this time of year, however, changes happen:
* In 1993, KBEQ(FM) dumped its 20-year CHR format to go to
"Young Country." And it brought back controversial morning
DJ Randy Miller.
* Also in 1993, KLZR(FM) in nearby Lawrence dumped its automation
and went to modern rock, causing much frustration among Kansas City's
miniscule slacker community and probably boosting sales of rabbit-
ear antennae at Radio Shack. (I know I bought one.)
* In 1992, the Milwaukee Journal sent "The River" (KRVK) down
the drain with its "male AC" format and instituted a hard rock
format known, creatively enough, as "The Rock" (KQRC).
* And in 1992, the bizarre LMA involving KXXR(FM) happened.
Why was it bizarre?
(1) KXXR(FM) announces plans to abandon its CHR format at
106.5 mHz, and lease out the station to Sconnix, the
owner of country station KFKF(FM).
(2) A week later, KXXR leases the Lexington, Mo. frequency
at 107.3 mHz (which is a rimshot class C signal but still does
OK in most of the area). KXXR announces plans to move
the CHR format to 107.3.
(3) On February 15, KXXR became KKCJ, playing satellite
country, and the Lexington station becomes KXXR, playing
CHR. (It's now KISF(FM), "Kiss 107.3")
So lots of fun things can happen in the winter. What could happen
this year?
* One of the weaker stations in the market could go to an "Arrow"
style 70s-oldies format. There is only one oldies station in the market
now, and this market is crazy about living in the past.
* There is no AAA (Adult Album Alternative) station here. But
would the demos work?
* There is no modern rock station within KC proper. But the presence
of KLZR (albeit a downgraded class C1 signal) always will mean a drain on
the potential audience for such a station.
* All-news? Naaah. Bonneville has two of the market's three
news/talkers. Never fight a church.
* We now have *five* country stations, splitting up more than a

quarter of the market. Someone's going to give that fight up sooner or
later.
All the above, of course, is merely mildly informed speculation.
Stay tuned....

202. Radio Watchers--Kansas City

Newsgroup: rec.radio.broadcasting
Date: 1994-01-19 04:48:38 UTC
From: ucsd!tyrell.net!transvox@uunet.UU.NET
Message-ID: <2hie36$dj7@vixen.cso.uiuc.edu>
Source record: 41457

(The following appears in "The New Times," Kansas City (Mo.), biweekly, January 13, 1994 issue, titled: "Radio In-Active: Kansas City rock radio refuses to give the new generation a chance," by Danny Alexander, excerpted below):

In the trades, the two most talked about radio formats of the 1990s have been country . . . and alternative rock. But in 1993, the country boom leveled off while alterntive rock radio continued to grow. . . Kansas City's airwaves are now dominated by country, but alternative rock can only be found late at night on community radio station KKFI or (in limited doses) on KY-102 [KYYS] (generally late at night or . . . on the Sunday evening show "radio Free Westport").

Because listeners tend to turn to radio as it meets their schedules, most alternative rock fans in Kansas City attempt to tune in KLZR in Lawrence [Kansas], but the terrain between Kansas City and Lawrence manages to obscure the station's 100,000 watt signal, leaving most Kansas City alternative rock fans as disenfranchised as they have been continually since the rise of the underground and the punk/new wave boom of the late 70s. With alternative rockers such as Pearl Jam and Nirvana opening doors for groups like 4 Non Blondes, the Lemonheads, and the Gin Blossoms in the Top 40, the time is ripe for a 24-hour alternative rock station in Kansas City, but none is in sight. What gives?

*** *** *** ***

. . .[A]n audience that is eager and willing to listen to new sounds is driving the record industry with greater force than ever before. "Alternative" no longer means risk; it means contemporary--and Kansas City rock radio refuses to give this new generation a chance.

While dance-oriented stations like KISF 107.3 are boldly exploring a younger urban radio market, our guitar band stations are playing it conservative. The Rock (98.9) [KQRC] does an admirable job marketing the pop end of metal, and KY-102 timidly slips in a Gin Blossoms cut after every four or five tracks by 60s and 70s veterans such as Eric Clapton, Tom Petty, and Rush. . . .

It is easy to see why radio stations might choose to err in the direction of conservatism. The economy of the 90s is such that advertisers are targeting the aging audience of baby boomers who, frankly, outnumber the younger generation. The universal target demographic tends to be 25-54, which means teen-oriented formats such as Contemporary Hit Radio (CHR, you know, Top 40) are being abandoned. Ironically, or perhaps predicably, this shift comes at a time when Top 40 radio is not only more race- and gender-integrated than *ever* before . . .but also when it is embracing alternative rockers as varied as the Cranberries, Gin Blossoms, the Lemonheads, and the Breeders.

This shift threatens to turn Album Oriented Rock stations into oldies rock stations, and, certainly, one new format growing in popularity is

70s-based oldies. Stations such as KY-102 then are at a crossroads whether or not they like it. As Ken Barnes of . . . Radio and Records put it: "That's the essential dilemma of the AOR station. You can aim old or you can aim young, and typically, a heritage (in this case, an AOR station with a long-standing tradition) tends to stay with the old audience."
*** *** *** ***
. . . Though KY-102 pretty intensively experimented with integrating more alternative music for approximately five months last spring and summer, when former Program Director Larry Moffett resigned and Scott Souhrada took his place, a hard look at the numbers suggested the experiments weren't paying off. Marty Wall's New Music Hour showed declining numbers that led it to be moved from 7 to 8 pm and eventually to 11 pm. And it makes sense that a new PD might rethink the alternative format because the perception of the alternative format is such that no one at the station could even let corporate owners Great American Broadcasting (which also owns Channel 4 [WDAF-TV]) know that the alternative shows existed.
One might wonder why a format that has proven to be successful in college towns would be so frightening in a metropolitan area of approximately 1.5 million people containing a network of . . . small colleges, the Kansas City Art Institute and UMKC [the University of Missouri-Kansas City], but the simple truth again comes down to perception.
. . . Tellingly, Lawrence's KLZR did not spring from a heritage rock format. Though it had a similarly adventurous format, recently it had been an Adult Contemporary station . . . . It didn't have much of an audience to hang onto when employee Trace Taul approached the general manager about a format change. Music director Bob Osburn explains, "Lawrence being a college town, the perception was we could get by with the university . . . ."
Reality and perception have little to do with each other here, except that one dictates where the money goes and what new realities it could create. . . .
Of some recent concern that marketing to baby boomers is overlooking a $125 billion teen-to-twentysomething market, [Spin publisher Bob Guccione Jr.] exclaimed, "Now they're waking up to the discovery of 46 million people, which is like all of a sudden noticing France."
*** *** *** ***
Looking at Kansas City from a national perspective, Barnes thinks that the format's time has probably come. "There is certainly more impetus to start a station," he said. Though radio stations are tightening their belts, Barnes says, "the double-edged economics of radio are such that finding a niche that nobody's serving is a great way to do well." The new format may not come from a heritage station with a lot to lose, but maybe some quieter part of the FM dial.
<end of quote>

My comment: Good luck. Kansas City has the reputation of being both a difficult market to sell in, and one whose operators show even less imagination than the typical broadcaster. Which problem causes the

other--or do both feed on each other??

203. Hearing an AM station on FM!

Newsgroup: rec.radio.broadcasting
Date: 1994-01-19 04:48:40 UTC
From: ug930066@mach09.scs.carleton.ca
Message-ID: <2hie38$dj8@vixen.cso.uiuc.edu>
Source record: 41458

When driving in to school every morning, I often listen to CHXL-FM 103.7, which transmits from Brockville, Ontario (about 60 km to the south, ACF).

On my way in, I pass two AM transmitter sites, the first for CJSB AM-540 (54 Rock). As I drive past the site, I can hear quite clearly, but only for a couple of seconds (at 80 km per hour), the AM station in place of CHXL.

As far as I am aware, it is impossible to hear an amplitude modulated signal with an FM radio. So, how could I be hearing CJSB on 103.7? Are there situations in which a station might transmit its signal on another frequency from the transmitter site, which I am hearing on the FM band because I am so close to the transmitter? Like for some sort of station-transmitter link in reverse? Or am I perhaps hearing the STL (which I believe is in the VHF band)?

Organization: Eotvos University, Budapest, Hungary
News-Moderator: Approval required for posting to rec.radio.broadcasting
Lines: 58

Hi,
Do you want to hear the programmes of far radio-stations in FM quality?
I do.
So, I have this idea: to exchange radio-programmes on cassette.
This way you can listen to (conserved) radio-stations far away from you.
We can exchange certain programmes, just as general ones.
I mean: you tune to a station, push the record button and stop at the
end of the cassette in 30 or 45 minutes)

1. You don't must wait for extraordinary possibility of the FM wave-spreading,
There are many stations, which ones are too far from you, you can't even
imagine their programmes. (Whai are the Mongolian Radio's programmes like?)

2. You can listen to stations in foreign languages.
Also - for example - news in Enlish, but from other perspective:
how tell the same news in Serbia, in the U.S, ect.
You can practice a language or just listen to an unknown one.

3. You can programmes about unusual events from local radios. (What is in the
Australian radios nowadays? (the bush-fires), or what was in the
Miami-area-radios when hurricane Andrew was in that region.

4. This way you can acquainted with other cultures, listen to Spanish, Polish
or Arabic music - in stereo, FM quality, and not via SW.

I add: here in Budapest only 6 FM stations work, all in Hungarian.

WHAT IS YOUR OPINION OF THIS?

Here is a list, I can make dubbings of these cassettes:
Programmes of all the hungarian stations
Kossuth - News, culture, politics
Petofi - Music, youth programmes
Bartok - classical music
Danubius - commercial, pop music
Juventus - Commercial, pop music from Siofok-Studio Base
Bridge - Commercial, pop, with VOA news
```

Tilos R. - Budapest's late pirate-Radio "Forbidden R."
and Serbian, Slovakian, Austrian stations.

! In some countries this kind of record is prohibited by law !

If you are interested, post your list!

I think (I hope), there are many people, who want to do this trucking.

An example in a cassette:(continuus, unbroken record)
Side A: music - 5'
commercials- 5'
news - 10'
music - 25'
1992.01.06. 16.50-17.25, Radio XYZ in XZY State.

Henrik Hargitai
Budapest.

When I was on the air at WDOM we ID'd once an hour at five minutes to the hour with the full station callsign, location, and frequency. But listen to any radio station, they tell you at least 30 times an hour what you're listening to. Doesn't take a rocket scientist to figure it out. At WALE we ID'd at 20 past, 40 past, and on the hour. We weren't as hyper about letting people know who we were.

207. Master of Journalism student seeks internsip

Newsgroup: rec.radio.broadcasting
Date: 1994-01-19 04:48:55 UTC
From: tacraft@superior.ccs.carleton.ca
Message-ID: <2hie3n$djp@vixen.cso.uiuc.edu>
Source record: 41461

There's no life like radio.

I'm a Master of Journalism student at Carleton University and I'm looking for a summer internship position in radio.

I am currently enrolled in more than 20 hours a week of radio classes, including a radio documentary class.

Why would you want to hire someone like me?

That's easy.

I have the enthusiasm and inquisitive mind you need.

I am a quick learner. I am dedicated. And I put my all into everything I do.

Here's some of my experience:

* I worked full time as an elected Students' Union President. I managed and motivated others. I gave a lot of public speeches. I was constantly introducing myself to people and having to mingle. I oversaw the day to day operations of a $2.5 million corporation with a volunteer staff of over 600.

* I won three volunteer awards at Wilfrid Laurier University.

* I worked on two student newspapers and a bi-weekly community newspaper.

* I served as a director on the board of student publications at Wilfrid Laurier University.

I can tell you more about myself if you simply write to me through my email: tacraft or tacraft@carleton.ca.

I am willing to move anywhere.

Sincerely, Christina Craft.

Hello:

I just started reading this newsgroup, so I'm not quite sure if
this is the right place to post this, but here goes.

My boyfriend has quite a good radio voice, and is hell-bent on
getting a job as an "on-air personality." I was curious to find out if
anyone had any tips on making an air-check tape or resume tips. He is
the station manager of Nova Southeastern's radio station, WNKR. At this
point, he is applying for a job here in South Florida, and is working on
his tape. Any suggestions would be greatly appreciate.

Oh, I'm a DJ at WNKR, and have been doing radio for about 6
years.

209. KIDS MUSIC

Newsgroup: rec.radio.broadcasting
Date: 1994-01-19 04:49:00 UTC
From: gbsaylin@ucdavis.edu
Message-ID: <2hie3s$dk0@vixen.cso.uiuc.edu>
Source record: 41464

DELICIOUS RADIO RAVIOLI has hit the airwaves. This musical variety radio show, geared for kids, one to 90.3 originates from Davis, Ca.,USA
SUNDAYS 5PM to 7PM on KDVS (90.3 fm)
for Sacramento/Davis area listeners

This show steers away from being real commercial (some commercial kids stuff is thrown in), letting the music basically do the talking. Really, it is sophisticated childrens programming, not cutesy but still very childlike. Both adults and kids can appreciate it. Sorta NPR-ish, but not that stiff! Sixties and offbeat stuff are thrown in to give the show an edge, not to mention reggae, lots of folk music and even very rootsy stuff including Klezmer, Cajun, Latin American and Native American ceremonial music. Some old swing jazz/Big Band, Musicals and even a touch of satire like Tom Lehr are thrown in as well.

The show aims to be a fun multicultural experience with an emphasis on high quality music with good clever lyrics. Some songs with World Beat arrangements are laced in to give the show a contemporary feel.However, lyrics remain king. This show is meant to be listened to!

RADIO RAVIOLIS TOP TEN
January 1994
LAST MONTH

1. YOU CAN GET IT IF YOU REALLY WANT - SEBASTIAN 2
2. Jump For Joy - Joanie Bartels 1
3 It's Better Than That - Lou and Peter Berryman 6
4. Flabbergabble - Greg Brown DEBUT
5. I Don't Wanna Go To Bed - Craig N Co. 3
6. Watermellon - John McCutcheon 8
7. Teddy Bear's Picnic - Jerry Garcia/David Grisman 9
8. I Can See Clearly Now - Jimmy Cliff DEBUT
9. Straighten Up and Fly Right - Norman Foote 5
10.Eight Little Notes - Rowlf THe Dog 4

Its easy to find these and other kids recordings. Just ask your local music store to look in their order catalogs. They can order them if not in stock. Also, the syndicated RADIO AAHS plays most of these and all the others. AAHS is usually on the am dial. I know of AAHS in L.A., Salt Lake City, Phoenix, Minneapolis, etc.

If you need more information about kids music, call your public library. They can help you.

>>longtime alternative music fan I figured moving to New York would put me in
>>radio heaven. Why is it that all I can get at home is classic rock radio?
>
>Wrong-o, NY radio has always been ultra-conservative, thanks to Madison Avenue,
>i guess. I'm even surprised that Z100 has tried (and is succeeding) with 'leaning
alternative.

Heck, even WDRE is somewhat conservative when it comes to it's modern rock
mix, i.e. sticking to a playlist which includes a lot of tunes from the
80s. I don't really know what WHTG is like, since I can't pick it up when
I'm at home near Philly. I did notice that Y100 is playing a lot of
"alternative" tunes in it's mix also.

Speaking of stations leaning alternative/modern rock, you should check out
what has happened to WMMS in Cleveland. Their night time mix is very
modern, with less and less of the good ol' AOR standards. Also on Jammin'
92, (sorry I forgot the calls) which is a dance station, they are leaning
alternative with a night-time mix called Channel X which consists of a
dance/rap tune then alternative tune...on and on....it's rather
interesting. I'm guessing this was done to compete with WENZ, which is
the commercial 24 hr a day modern rock station. They, BTW have changed
from a WDREish format, to one a little more outgoing since they switched
music directors in August.

I apologize if this has been covered elsewhere, but I have looked
through the archives and have not seen anything posted on this subject.

I am interested to know what the legalities are concerning making
transcripts of radio shows for distribution. Would it be a question of
degree of commercialism involved (if I give away the transcript, or
provide them for a nominal fee, it is legal, but if I charge a lot of money,
it is not), or are there other issues involved?

If there is enough interest, I will happy to post a summary of the replies.

Regards,

Here's the general information for the list you've subscribed to, in
case you don't already have it:

Sedge Thomson's West Coast Live
San Francisco's Live Radio Show to the World

January 1, 1994

West Coast Live, hosted by Sedge Thomson, is San Francisco's Live
Radio Show to the World. Well, at least to North America, via
the National Public Radio satellite.

West Coast Live is broadcast weekly, every Saturday morning in
front of a live audience, from the Cowell Theater at Fort Mason
in San Francisco (the city of hills, restaurants, and arbitrary
parking laws). We broadcast live on our host station KALW 91.7
FM, from 10 a.m. to Noon. KALW is carried on many cable systems
through out the San Francisco Bay area. Other NPR stations may
carry the show at a different time. Please contact your local
station for programming information.

This Internet list server was established to help maintain
contact with our audience. We intend to use this list to
distribute a weekly show bulletin to let you know who's scheduled
for upcoming shows. The audience may use this list server to
contact the show. We appreciate your feedback.

The list is currently moderated by "The Lone Liberal" (a.k.a.,
Michael Faklis, ESSMJF@netcom.com).

For those of you on The WELL (well.sf.ca.us), we welcome your
participation in the West Coast Live topic (#362) in the Radio
conference (g radio).

@nntpd.lkg.dec.com:francini@munch.dnet.dec.com (John Francini) writes:

>>Monday,January 17 is the day when Group W Radio(WBZ parent firm) supposedly
>>takes over 'EEI from the Celtics pending final FCC approval...

More like the end of the week...but it WILL happen very soon.

>If they could do something, anything, about their atrocious signal west of
>Boston. I live in the Wellesley-Natick area, and at night their signal is
>nearly impossible to find. [Not quite as bad as WMEX 1150 AM, where Boston
>Bruins games are shoved off to when they conflict with Celtics games on
>'EEI, but still atrocious.] Strong programming _plus_ a strong signal
>counts for a lot. I do understand that their signal conflicts with some
>small signal at 580 in central Mass., but there has to be some other way.
>How about a frequency move? Say, up into the new area above 1600 kHz? Or
>am I being naive...

It's more complicated than just "a small signal at 580 in central Mass."
WTAG-580 in Worcester is less than 40 miles away from WEEI-590 in
Boston (transmitter in Medford, just N of Boston). The directional
patterns for both TAG and EEI are pretty much north-south figure 8s.
That means 'EEI booms into Portland ME, 80 miles north, but is
largely inaudible in Shrewsbury, 30 miles west.

The FCC set this mess up in the late '30s, and that means both stations
feel they're cast in stone. In an ideal world, Group W might buy WTAG,
take it dark, and expand the 590 signal to the west. In the real world,
WTAG's owner Knight Quality Stations will never sell its heritage
WTAG, which is THE authoritative AM news/talker for the Worcester
market. There's no room to move WTAG to 570 (thanks to stations in
NYC and Syracuse), or to move WEEI to 600 (thanks to WICC Bridgeport
CT and WGIR-610 Manchester NH).

WEEI's old owners partially solved the problem by leasing the airtime
of AM 1440 in Worcester, WVEI. But WVEI operates from the same
diplexed antenna array as WTAG, and hence has the same inability
to reach the Wellesley-Natick area.

It is, in short, a most intractable problem, and one reason WEEI has
not done better in the past. (And it's extremely unlikely that
having bought WEEI for $2 mill, that Group W will want to explore
moving it to 1640 or higher. Anyway, WJIB-740 and WILD-1090 have
far better claims on any expanded band frequencies that might
open up.)

>Off-hand question: Does the purchase give Group W the right to move some
>Bruins games to WBZ in the event of conflict? Or must this be renegotiated

>whenever the contracts are redone? And does anyone know when the various
>contracts for Boston's major sports teams are next up for renewal?

Question 1: Yes, the Bruins games will apparently be bounced to
WBZ-1030 in a conflict...so it must be legal, right? Question 2: The
Pats are up right now, but Group W is renewing (although they'll
now appear on 590 not 1030). The Sox are, I believe, up after
the 1994 season, but WRKO is likely to renew. The Celts are
locked into WEEI through I believe the 1998 season, and I don't
know about the Bruins.

>"Nobody asked, just my opinion."

"Nothing official, just my opinions..."

I've noticed stations mentioned with "modern" jazz/fusion as part of the format. Are there any (or a list of) stations which as part of the format/specialty programs play classical music on modern instruments (i.e. electric guitar, synth, electric violin, etc) or neo-classical music? (On community, college, classical, jazz, commercial, etc. stations?)

Kevin

gst@gagme.wwa.com (George Thurman) writes:
>
> What are the latest rules regarding when a full-power AM or FM station
> has to run a LEGAL station ID ??
>

According to the latest edition of Pike & Fisher's FCC Broadcast Rules:

73.1201 Station identification.

- (a) When regularly required, broadcast station
identification announcements shall be made: (1) at
the beginning and ending of each time of operation,
and (2) hourly, as close to the hour as feasible, at a
natural break in program offerings. Television
broadcast stations may make these announcements
visually or aurally.

(b) Content. (1) Official station identification
shall consist of the station's call letters
immediately followed by the community or communities
specified in its license as the station's location:
provided, that the name of the licensee or the
station's frequency or channel number, or both, as
stated on the station's license may be inserted
between the call letters and station location. No
other insertion is permissible.

> I am hearing I station in the Chicago area that is running thier ID at 15min
> to the hour. I just beleive that is proper.

If you meant to say that your Chicago station was acting *im*properly, you
appear to be correct as the FCC would like all stations to identify
themselves at the *top* of the hour--not 15 minutes before.

>Deregulation is going too far.

You may be right but the FCC has taken so many cuts in budget of late that
they are all but powerless to enforce the rules that remain.

Chas.

I hear a LOT of stations that give their 'nickname' all the time, (KISS,
The Rock, The Eagle, etc.) but only give the legal ID on the hour. A fair
amount of the time, the legal ID is so rushed, you can harldly understand
it. It almost seems like some of these stations are embarrased by their
callsigns.

221. Legal Id's

Newsgroup: rec.radio.broadcasting
Date: 1994-01-21 04:25:34 UTC
From: WEOS-FM <BLACK%HWS1@HWS.bitnet>
Message-ID: <2hnlfu$jkg@vixen.cso.uiuc.edu>
Source record: 41476

Here is the rule regarding radio & TV ids:

73.1201 Station identification.

- (a) When regularly required, broadcast station identification announcements shall be made: (1) at the beginning and ending of each time of operation, and (2) hourly, as close to the hour as feasible, at a natural break in program offerings. Television broadcast stations may make these announcements visually or aurally.

(b) Content. (1) Official station identification shall consist of the station's call letters immediately followed by the community or communities specified in its license as the station's location: provided, that the name of the licensee or the station's frequency or channel number, or both, as stated on the station's license may be inserted between the call letters and station location. No other insertion is permissible.

(2) A station may include in its official station identification the name of any additional community or communities, but the community to which the station is licensed must be named first.

(c) Channel.

(1) General. Except as otherwise provided in this paragraph, in making the identification announcement the call letters shall be given only on the channel identified thereby.

(2) Simultaneous AM (535-1605 kHz) and AM (1605-1705 kHz) broadcasts. If the same licensee operates an AM broadcast station in the 535-1605 kHz band and an AM broadcast station in the 1605-1705 kHz band with both stations licensed to the same community and simultaneously broadcasts the same programs over the facilities of both such stations, station identification announcements may be made jointly for both stations for periods of such simultaneous operation.

(3) Satellite operation. When programming of a broadcast station is rebroadcast simultaneously over

the facilities of a satellite station, the originating station may make identification announcements for the satellite station for periods of such simultaneous operation.

(i) In the case of a television broadcast station, such announcements, in addition to the information required by paragraph (b)(1) of this section, shall include the number of the channel on which each station is operating.

(ii) In the case of aural broadcast stations, such announcements, in addition to the information required by paragraph (b)(1) of this section, shall include the frequency on which each station is operating.

(d) Subscription television stations (STV). The requirements for official station identification applicable to TV stations will apply to Subscription TV stations, except during STV-encoded programming such station identification is not required. However, a station identification announcement will be made immediately prior to and following the encoded-Subscription TV program period.

****

Notice the as close to the hour as feasible, at a natural break. The FCC recognizes the end of a song as a natural break. Many stations stretch this to mean "stop set". Therefore, you here legal id's anywhere from 15 minutes before to 10 minutes after.

Notice the provisions made for the simulcasting and common source Id's made at the source. In addition, the FCC has made provisions for the AM expansion. The FCC has not strictly gone after the "when" aspect of legal id's. They are more concerned with if you are id'ing or the content. Hope this clears up the question. It may not change what people are doing, but at least you now know.

222. Re: Imus on the FCC/Infinity/Stern

Newsgroup: rec.radio.broadcasting
Date: 1994-01-21 04:25:41 UTC
From: ds003@cleveland.Freenet.Edu
Message-ID: <2hnlg5$jkq@vixen.cso.uiuc.edu>
Source record: 41477

In a previous article, field@bedford.progress.COM (Mark Field) says:

>What follows are comments made by Don Imus on the `Imus in the Morning'
>program Friday, January 7, 1994. The words are his, the punctuation and
>spelling are mine. This is reproduced with permission.

[Imus genius deleted]

Not much to add here but: "Bravo". He sums up many things in this oratory,
the state of our ridiculous bureaucracy and the truth about Stern.

There is, however, one tenuous but real connection one can draw between
Stern & Lenny Bruce:

Near the end of his career, Bruce, constantly hounded by the police and
courts, was reduced to solely reading court transcripts and commenting on
them, which would largely constitute his act. Few dug it, from what I hear.
Any time I'm tuning past the station Stern is on here in Cleveland (WHICH, I
might add, is a great station otherwise, I only listen after I know Stern
is off) all I ever seem to hear is Stern going on about his problems with
FCC, Infinity, what went on, who said what, etc etc etc...For this the
Cleveland station paid $500,000 a year?!?!?!?! If he actually did something
entertaining, I might listen to try & weed thru the crap, but this is all
I've heard, him & his idiot female "co-host" going on about censors, the
FCC, etc. This equates with Bruce in his failing years...the difference is,
Bruce was a comic genius, Stern...well, what does he really do beside the
s**t he panders over the air? [Now don't call me Terry Rakolta, my beef is
with Stern's lack of talent, not the use of public airwaves...I watch
"Beavis & Butt-head" and am PROUD of it.]

All I wanted to say is that Imus is on the mark as usual. And he's funny.

In a previous message that indicated that KRAK-AM in Sacramento was dropping its country format and going talk, it must be true because Don & Mike started touting KRAK as one of their new affiliates beginning in February.

A couple of days later, they were joking around about how they let the cat out of the bag and no one was supposed to know that
KRAK was going to drop country and go news and get a new call.

Well, today, Monday, Jan17th, they talked about it some more and referenced KRAK would be getting a new call KHTK (hot talk) and that they would be on their next month.

Guess you should never tell Don & Mike anything that needs to be kept quiet, Huh! <grin>.

Steve

224. West Coast Live - NEWS

Newsgroup: rec.radio.broadcasting

Sedge Thomson's West Coast Live
San Francisco's Live Radio Show to the World
January 18, 1994

Dear Audience:

First some business news; We just migrated to a mail list server. We originally created a West Coast Live email group alias list from parsing Sedge's email, looking for valid Internet addresses. In the last couple of weeks, we've been picking up some Internet addresses from the audience sign-in list and from the business cards left in our fish bowl. This is a labor intensive exercise, and we're a bunch of volunteers trying to find a life away from our computers. This week we migrated the group alias list to a mail list server. We have a stack of documentation telling us what that really means. To the audience, it means that you're now empowered to subscribe or unsubscribe to our list any time you wish. To receive complete instructions for modifying your subscription, send a dummy email message to;

West_Coast_Live-Request@netcom.com

I'm still learning how to use this mail server, so here's my best explanation: First of all, you can still reach Sedge Thomson directly at Sedge@netcom.com. Please be aware that Sedge is voice activated (hence the microphone). Don't expect a timely response to email sent directly to Sedge, as he's currently overwhelmed with his email inbox. Many of these incoming messages are from NETCOM's email deamon, asking Sedge to process his inbox. A timely response is ensured by sending the mail to;

West_Coast_Live-Approval@netcom.com

I don't know why that "Approval" suffix was selected, but mail sent to this address retains the From (you) address, and is forwarded to the mail list server moderator. This is (I am) a real person (although without a life), who is ASCII activated. You will get a timely response. The moderator may forward your message to Sedge if it needs his attention.

We still take Audience Adventures over the Internet. No, that's not true. We no longer have Audience Adventures. We now have "Audience Plausible Stories". Please address these to West_Coast_Live@netcom.com, and use Audience Plausible

Story as the Subject. Messages sent to this address lose the original From (you) address, so we can't reply directly to you. What we can do is bounce these back to the mail list server, so that everyone else can read your adventure. So remember, Audience Plausible Stories should be plausible and legible. Please include a signature (name and email address) in the body of your message.

So much for the business, so on to the good stuff.

I was informed last week that our new show has been renamed already. It's no longer "WestCoast Live", it's been renamed as "West Coast Live". It sounds like the same show, it's got a familiar look to it, but I have to revise all of my templates. Hey, it's public radio. I've also been made aware that our new logo, which was meant to resemble a map compass, looks very similar to NATO's logo. I presume I'll have to revise my templates again soon.

West Coast Live airs live in the San Francisco Bay area Saturdays on KALW 91.7 FM, 10 a.m. to Noon, following KALW 91.7's 9 a.m. broadcast of Car Talk. The local rebroadcast is at 8:00 p.m. on KALW 91.7 FM. The show is uplinked to the NPR satellite, so other NPR stations have an opportunity to broadcast the show. Call your local NPR station and ask them to broadcast the show.

AUDIENCE PROJECT: Here's a project for our San Francisco bay area audience. We're told that our host station KALW 91.7 FM is carried on many local cable systems, but nobody really knows which cable systems. For those of you with a few minutes of free time, please call your local cable system's office, and ask them if they carry KALW 91.7 FM. If they do carry the signal, ask them what frequency it's carried on. Please send us a note with what ever information you can get, even if your cable doesn't carry the signal. We'll send out the results of this survey to everyone on our list. Thanks.

Here (hear) is the upcoming schedule as we see it now;

January 22nd (This Saturday);

The Turtle Island Sting Quartet. Need I say more?

Adam Levy and the Lost Wax Process, part of San Francisco's new jazz renaissance, bringing fresh material to jazz from rock and world music. This description sounds like the Grateful Dead to me, but it's the copy I was given.

Judith Viorst, nationally syndicated columnist and author of "Murdering Mr. Monti".

Melanie DeMoore, singer/songwriter with a thrilling deep voice.

January 29th;

Yes it's true, I'm not making this up, I wouldn't joke about this, Dick Dale (King of Surf Guitar) and the Deltones! Ya! Bring your surf boards and zinc oxide to this show.

Carl and Karl (or is it Karl and Carl?), with travel tips for people with too much free time.

February 5th;

Five Year Plan, passionate folk rock. This is my favorite local band. This group includes David Brian (vocals, guitar), Klaus Fluoride (bass, vocals), Robert Davis (drums) and Nancy Balemi (vocals, guitar synthesizer.).

February 12th;

The Mermen, San Francisco's premiere surf band.

February 19th;

Zydeco Flames, Cajun roots music.

February 26th;

San Francisco Symphony Chorus, This Grammy award winning group, with West Coast Live's own Cynthia Hobgood, will feature music from Carmina Burana.

The live show takes place on Saturday morning 10:00 a.m. to Noon, at Fort Mason (San Francisco) in the Cowell Theater, which seats approximately 400 people. There's plenty of free parking, free Stan's Cheesecake, and moderately priced coffee. We occasionally sell every seat, so we encourage you to reserve your seat in advance by phone. Seating is $10 per person. Reservations may be made by phone (415) 664-9500, with a VISA or MasterCard, prior to 6 p.m. p.s.t. on Friday evening. You can also RSVP West Coast Live shirts or Stan's Cheesecake by phone.

i guess it was a couple of years ago now, but once FM 97.1 KEGL "The Eagle" in the Dallas/Ft. Worth area played "Hotel California" for a few days on end, and then followed with a week of "all Eagles, all the time" while they were deciding on thier current Howard Stern/AOR format. I missed it, but a lot of friends told me about. I had one friend that tuned in at the end of H. Cali, was bummed he missed it, and then was happy to hear it again, by the 3rd time thru tho, it gets old. the really suprising thing is that my little bro listens to 97.1 other than in the mornings, and was also around for the H Cali-athon, but still can't place the name with the tune. It baffles the mind.

>Original Newsgroup: chi.media
>Subject: Re: STAR 107.9!!!
>Date: 20 Jan 1994 05:23:03 GMT

[I wrote this in chi.media and am reprinting it here]

According to Robert Feder, [media columnist] in the Sun Times (this is a blast), WYSY [FM Aurora Il] has been
hit with a temporary restraining order prohibiting them from using their "Star" positioner.

Yep. To paraphrase Feder.. "in a classic David versus Goliath" A small (1450 watt) N.W suburban FM WZSR (105.5 fm, Woodstock) has stopped broadcast giant Cox from using the 'Star" positioner because WZSR has been using it for over two years!

Now this order is only in force till Friday, when a hearing is supposed to be held, but the ironic thing in my mind is that Cox has supposedly done all this wonderful research on exactly what ex-hit parade songs it will play from those marvelous seventies, but it seemingly failed to do enough research to come to grips with what should have been an obvious conflict of positioners.

If WLUP is willing to pay a large sum for the WMVP calls from a small Milwaukee soft-urban outlet, and if WSCR is willing to pay a Scranton Pa. Christian outlet for their calls, why couldn't/didn't media giant Cox give the flegelling satellite-fed WZSR a couple hundred thousand to get the 'STAR' positioner from them, or at least to gain permission to use the positioner in tandem *with* WZSR? I cannot imagine that WZSR is so in love with that positioner that they could not be persuaded (bought off) with relatively little effort and cash outlay.

I imagine that that Cox will probably take that way out now, but they could have saved themselve the embarrassment had they shown a fraction of the forsight in selecting a postioner as they claim to have taken in selecting their marvelous music mix.

I did give the "New <star deleted from promo> 107.9 an extended listen today and I must admit the song selection was not as bad as it seemed in shorter listenings. I did dig "keep on smiling" which I have not heard in a while.

Anyway, this little "too close to the forest to see the trees" turn of events is slightly amusing at best and a bit sad at worst IMHO.

Bill

228. Radio Watcher - Boston,MA

Newsgroup: rec.radio.broadcasting
Date: 1994-01-22 01:25:03 UTC
From: nhmas@gauss.med.harvard.edu
Message-ID: <2hpv9f$89m@vixen.cso.uiuc.edu>
Source record: 41484

A slow week in the Boston radio. Things should be pick up soon.
They always do :-)...

* I was just listening to the press conference regarding the sale of NFL's
Patriots on WEEI AM-590. Midday host Dale Arnold cut in around 12:20pm
to acknowledge and thank WBZ-TV4(WBZ's radio sister station) for their
audio feed. I know that WEEI's takeover by Group W is not technically
official yet but it looks like the new guys are in the house...One thing
that will surely improve in 'EEI's coverage of local sports press conferences
as the result of new ownership is the elimination of always
unreliable(causing embarassment with poor connection) cell-phones which
were used for audio feeds...

Aaron Daniels'(WEEI's interim GM) last day was on Wednesday(1/19).

* If you tune in to Granum's soft adult rocker WBOS-92.9FM during early
morning/late-night hours on weekdays or on a weekend afternoon, you
might hear a familiar husky female voice - Annalisa,formerly of WZLX-100.7,
is back on the Boston airwaves. She was let go from 'ZLX last March - almost 2
months after the new owners(Infinity) took over the classic rock
station and then proceeded to reshuffle its on-air talent...

* The talk station WRKO-AM 680 has a new 3-year Red Sox deal(a low-key
signing was done in December).

* As Scott mentioned, the Bruins games conflicting with the Celtics
games on the same night will be heard on WBZ-AM 1030 as soon 'EEI deal is announced.
The B's conflicts will no longer air on Greater Media's WMEX-AM 1150.
There are about 2 dozen regular season B's-C's conflicts during the
regular season and a few more in the playoffs(it's very possible that
both teams won't even make it that far this spring :-). Out of local
3 professional teams that will be heard over on 'BZ-'EEI, only the
Patriots appear to have a very bright future which will no doubt
continue to be a great promotional tool for the Group W radio operation..

* Friday Morning Quarterback(FMQB), a radio trade mag, named Pyramid's
CHR/Top 40 powerhouse WXKS-107.9FM the Best Station in a Major Market.
The same publication also named Mark Parentau,PM-drive personality
on Infinity's WBCN-104.1FM as the Best Afternoon jock in a Major Market.

-Mark

> (which I believe is in the VHF band)?

It's the same thing as when you hear some yah-hoo's CB radio transmit over
your television. I would imagine you'd hear CJSB on 104.1 (or whatever
other FM channel is active near 103.7 in your area) also, and even perhaps
if you were listening to a cassette. See if anyone else has this problem
-- or drive someone else's radio past the station -- and if the signal
doesn't come across the other radio, I'd suspect your radio is the culprit
and would probably just ignore it from now on. But if others are also
hearing it, could be something is technically wrong at the station and you
might want to drop a dime and let them know.

[Moderator's Note: Thanks to the many many people who ventured guesses on this topic. However this answer is the closest to the truth of the matter so I say 'thanks' to the others here, rather than print the scores of varyingly accurate posts. Bill]

>In ARJ-#489 Rene Kahle {ug930066@mach09.scs.carleton.ca} wrote about
>having hearing an AM station on her FM auto radio.

You have rediscovered one of the oldest means of radio reception: DIRECT DETECTION. Modern Integrated circuits and transisters used in receivers are as you may well know "solid state" devices. These devices can respond to very small voltage levels, and at quite a rapid switching rate. While you were driving in close proximity to the antenna farm of CJSB (540 AM), you were entering a field of VERY INTENSE electromagnetic radiation. This radiation will induce a standing voltage on every metallic surface, and wire in your vehicle.

In the old days prior to the modern receiver circuits, the method of reception was to amplify the signal coming into the antenna directly at the frequency of that signal until it was strong enough to be converted into an audio signal by the detector circuit, and then amplified to drive a speaker or headphones. There were tuning circuits used to select the specific station desired from among the others also broadcasting.

In your case, your automobile wiring, the speaker wires, and even the very skin of your vehicle acts as an antenna. You normally won't be aware of this, but in the presense of such a high field of radio waves as exist near the tower, the voltages induced are of such an intensity (measured in VOLTS), that the circuits of your receiver are overloaded. It is most common that the low level audio stages, just following the detector circuits are swamped out, ACTING AS A DETECTOR of these AM signals, even though you were listening to FM. These AM signals are then amplified to such a level that you hear them in your speakers in place of the FM (CHXL) which you had been receiving.

This is the same example as when, for example, public address systems or some electronic church organs would receive citizens band, or amateur radio transmissons in the case of a mobile transmitter operating nearby. As a test, have a tape playing instead of your FM when you drive by the transmitting site. If you still hear the AM signal, it will definitely have been brought in through your audio circuits of your receiver.

Best wishes.
Lionel Barley

> south, ACF).

Rene,

I'm not an expert in the radio area so take what I'm about to say with some salt ...

My guess is that what you're hearing is due to the behavior of your car radio. More specifically, your car radio's selectivity is such that when you are in the presence of a very strong radio source, the radio "overloads" and the strong signal swamps all other signals. As most radios convert the broadcast frequency (at least once) to an intermediate frequency which is then used to actually derive the audio you hear on the speakers, the strong signal becomes the only signal you hear. Hence the appearance of the strong AM station on the apparent FM side. (The intermediate frequency is common for all AM and FM broadcast signals.)

A better (meaning more "selective") car radio might not exhibit the behavior you notice.

Regards,
Helmut
--
Helmut Korp
Motorola Corp. S/W Center
Rolling Meadows, IL 60008 USA
Opinions expressed above are solely my own!!

[Moderator's Note: You are close, Helmut. Selectivity is less likely the cause as is poor shielding. What is happening, is more likely that audio circuits are acting as a detector of the high level signals as this person passes an antenna farm. A friend of mine in Milwaukee Wi, had that problem even on cassette, living less than a mile from an AM transmitter. Bill]

234. Boston: WBZ - where's the NEWS?!

Newsgroup: rec.radio.broadcasting

Lately, I have noticed WBZ has dropped the NEWS at the half hour, in favor of another 5-10 minutes of David Brudnoy later in the evening. Now, I tune in to WBZ for the NEWS and occasionally listen to Brudnoy when he has an interesting subject going! But without NEWS at, say, 11:30 pm, I tend to shut it right back off -- and this is "NEWS RADIO", the "RIGHT CHOICE!", etc. Is NEWS going the same way as "Traffic on the Threes" in the evening?! Maybe "TALK RADIO 1030" is more appropriate :-) !!! I like hearing Darryl with the news!

I find this almost as annoying as those moronic "paid commercial programs" that have displaced Norm Nathan on weekend nites!

Does anyone else feel the same? Is anyone listening?! :-)

(-- flames off --) Ah, I feel better now!

Hello,
if you are living in L.A. (esp near San Fernando Valley),
and you have got a tape record of any local or regional FM
radio transmission (recorded after the quakes), please write to me!
Or if you can catch any L.A. FM Radio, please record the transmissions
(30 or 45 minutes, Unbroken record (including commercials, too)
And PLEASE PLEASE send me the cassettes.
I can send you anything you want from Hungary.
I'll send you your cassette(s) back.

If you could do it for me, please, send an E-Mail.

Thanks in advance

As far as I know, there are no ftp sites with FCC rules
available. I'm considering doing an FOIA request with the FCC or the
GPO to get the rules in machine readable form. Just did an FOIA request
with the FCC to get all violation notices issued to stations in 1993.
Those typically run about 3,000 pages.

Harold

/* Written 10:07 am Jan 19, 1994 by resystom in web:amarc.radio */
/* ---------- "Francophone Radio Meeting" ---------- */
FRANCOPHONE RADIO MEETING IN GRASSE

In June 1993 representatives from approximately 40 radio stations, three continents and all different parts of France met in Grasse (southern France) for the second Summer University of Free Radios. The participants spoke of radiant weather, an enchanting setting and a warm atmosphere for discussion, though they would have liked to see a larger attendance.

There were people from all over the French-speaking world: Canada, Mali, Burkina Faso, Senegal, Acadia and Quebec. Joining them were many representatives of organizations, particularly those involved in the defense of human rights. Sponsored by Radio Agora FM on the initiative of the Confederation Nationale des Radios Libres (CNRL) -- National Confederation of Free Radios -- the Summer University allowed for a greater convergence of these hundred people who shared both a language and a passion for promoting free radio communication.

Three important themes marked the discussions, the first of these being North-South exchanges and the need for stronger ties so as to provide more assistance to the dawning of independent radios in French-speaking Africa. All agreed on the importance of paying special attention to training needs. Radio twinning projects already exist, as do cultural and musical exchanges and concerted lobbying campaigns with associations from the North and South. All of this is intended to protect spaces that have already been secured.

The issue of using program banks and canned music to round off programming made for lively discussions. Some people are convinced that risky deviations can occur when community radios allow their criteria for quality to be influenced by an attempt to gain more listeners.

The third major subject of debate was the usefulness of radios from the perspective of large associations that defend human rights and promote popular education, i.e. all those that make the word "democracy" meaningful.

The statement issued following the meeting (Declaration de Grasse) referred to commitments concerning the establishment of necessary solidarity links. "Solidarity" was clearly the key word to this experience: solidarity amongst radios, North and

South, in addition to the solidarity, no longer to be ignored,
among all those who share the same global values.

With information from "Frequences libres", the publication of the
National Confederation of Free Radios in France.

> listening to. Doesn't take a rocket scientist to figure it out.

Not necessarily, Tony. Some stations are calling themselves psuedonyms like "Q101" or "K-Wave" ... and they do manage to squeeze in call letters when they have to ... but if you asked someone where to tune for "WQCI" no one would know, even though that station is number one in the market as "Q101."

DISCLAIMER:
Call letters and names used as examples only - any similarity to
actual call letters or names is just one of those things <grin>.

>--scott

What really drives me up the wall is the fact that "programmers" seem to hate call letters and IDs. If there's one thing we Americans are, it's creatures of habit- we are ingrained in certain things...that's why network news is at the top of the hour...it doesn't do well any other position because WE EXPECT IT THERE. We also EXPECT as listeners to get the station ID at the TOP of the hour. It's our TIME CHECK. It's also something diary keepers can write down. And that's really what it's all about. It's what a station has that can't be copied in their market. There are Lite Rock, Rock Easy, Pirate Rock stations that get mis-identified by Arbitron because NEVER does the station use its call sign or something to CLEARLY identify themselves.

Example: In Des Moines, a CHR saw a consistant slump in ratings. They quit using the Q-102 slogan they'd been using for years and instead their signature became "102.5...More Music, More Variety without all the Heavy Metal and Rap". Don't think that didn't lose them a lot of diaries. Look away from this screen and try to repeat that slogan word for word... They're now "Star 102.5" and nothing else...and slowing the ratings dive.

Another example: My station, WHO, has the #1 12+ slot nailed down evenings with only NBC/Westwood One's Talknet programming and some other satellite shows. How? By inserting call letters everywhere...using custom-cut IDs, liners and fillers to insert in the program to make it sound local.

...But my experience with most music programmers in the 90s is they spend too much time massaging their music databases and too little time with

the actual human element on their stations.

240. India - opening of airwaves?

Newsgroup: rec.radio.broadcasting
Date: 1994-01-22 01:25:45 UTC
From: resystom@web.apc.org
Message-ID: <2hpvap$8al@vixen.cso.uiuc.edu>

/* Written 6:20 pm Jan 19, 1994 by resystom in web:amarc.radio */
/* ---------- "India - opening of airwaves?" ---------- */
India: A Move Toward More-Democratic Airwaves?

On August 1, 1993, the FM channels of All India Radio (AIR) were opened to independent producers in the greater metropolitan regions of Delhi and Bombay.

The governmental network, All India Radio, is the only radio broadcaster in the country. Of its 153 stations throughout the country, 65 are FM. Ten of its twelve daily broadcasting hours are now available to independents. Though the news of this change was generally well received, this recent opening does entail serious restrictions. Despite the diversity of programs to which listeners currently have access, information, current affairs and news programs are forbidden. The programs produced thus far seem to be exclusively designed for entertaining listeners.

According to Mira Mozommder, from the Advocacy Group, "the general policy of public-service broadcasting has been side-tracked in favor of commercialization and play of market forces, so similarly are the objectives of local radio being distorted."

Nevertheless, the recent changes have created a breach in India's State-held monopoly of radio communication, and some groups are determined to make the most of it. For example, the Women's Feature Service (WFS) is preparing to present a proposal for a weekly program on women's issues.

Jennifer Morrow, the WFS radio coordinator, says: "For now, our priority continues to be access to the airwaves. The question of contents will be discussed once that access has been ensured."

Attention JAZZY 100 Family Members and Jazz Fans:

Has the recent cold snap got you down? Do you have cabin fever? Looking
for some *Jazzy* entertainment to warm you up this coming weekend? Well,
take a look at this:

==========
COMMITTEE TO BRING BACK
==========
J A Z Z Y 100
==========

P.O. Box 27806 * Washington, D.C. 20038 *
New 24-Hour Hotline Number (202) 387-1003

The Maryland Hall for the Creative Arts, The Committee to
Bring Back JAZZY 100, and Bob Linden's Jazzy Music Scene Present:

"The New World Jazz Concert Series"

featuring

****
* DEBORAH HENSON-CONANT *
* AND *
* GRANT GEISSMAN *
****

LIVE IN CONCERT AT

"The Maryland Hall for the Creative Arts"
801 Chase Street, Annapolis, MD 21401
Box Office: 410-263-5019
(Call the Box Office or the New Bring Back JAZZY 100 Hotline
(202) 387-1003 for details)

SATURDAY, JANUARY 22
Concert begins at 8:00 p.m.
(Doors open at 7:00 p.m. for ticket sales)

* There will be CD/cassette door prizes and a "New World Jazz Concert" raffle!
==========
PLEASE NOTE: We have a new Internet/Usenet news coordinator! Mark Goldberg
as graciously volunteered to be the new Internet/Usenet news coordinator
for the Committee to Bring Back JAZZY 100. Please send any questions or
comments re: JAZZY 100 to Mark's email address:

goldberg@oasys.dt.navy.mil

We at the Committee to Bring Back JAZZY would like to publicly thank
Kerry Ehrlich for all of her help in keeping the "Bring Back JAZZY 100"
cause 'alive and well' on Internet/Usenet. We wish her and her husband
the best in their new locale.

242. Bob Lassiter

Newsgroup: rec.radio.broadcasting
Date: 1994-01-22 01:25:47 UTC
From: ejanik@Firewall.Nielsen.Com
Message-ID: <2hpvar$8ap@vixen.cso.uiuc.edu>
Source record: 41497

Bob Lassiter was the ONLY thing that WLS ever broadcast
since it started the all talk format that was worth listening
to. Note that their PD, Drew Hayes is a right-wing Republican.
I wonder how much that has to do with their station's editorial
stance, or if Chicago talk show listeners are really just a
bunch of right wing morons.

They should just change their call letters to WGOP. I cannot
STAND to listen to that station...except sometimes when Jay
or Catherine are doing something SUBSTANTIVE which is rare.

These opinions are MY OWN, and not those of my employer, of the
makers of my workstation or of Elvis, Barry Manilow or Sammy Hagar.

ejanik@Firewall.Nielsen.Com (Edward Janik) writes:

>Bob Lassiter was the ONLY thing that WLS ever broadcast
>since it started the all talk format that was worth listening
>to.

I also thought Stacey Taylor was fun. He quit (never came back from vacation) when Lassiter was uncerimoniously fired (after a shift with no advance warning or opportunity to address his audience). I guess he saw the writing on the outhouse walls.

>Note that their PD, Drew Hayes is a right-wing Republican.
>I wonder how much that has to do with their station's editorial
>stance, or if Chicago talk show listeners are really just a
>bunch of right wing morons.

I think talk radio in general is heading to the right. Drew, though, once stopped a Rush Limbaugh broadcast in the middle (and WLS was the ONLY station on the network which did this) because Rush did a bit about how distracting it is to have ladies 'farding' in their cars while driving.

Well Mr Cool Hayes took the bait, thought Limbaugh was saying 'Farting" and cut him off the air and took local calls untill they could cue up a rerun. Heh. Yep, in Podunk Mississippi they didnt take Rush off, but here in the Big City, he was yanked.

BTW, 'Farding' is an antiquated expression which loosly translates to "applying makeup'. If Mr "public service" Hayes had really listened, he would have realized that nobody could be 'distracted' by a motorist in another car passing gas.

I imagine Mr Hays (and his partner in mediocrity, Traddup) were rightfully embarrassed :-). They got on the air and talked about how they felt Mr Limbaugh's remarks were 'offensive' and other such things.

>They should just change their call letters to WGOP. I cannot
>STAND to listen to that station...except sometimes when Jay
>or Catherine are doing something SUBSTANTIVE which is rare.

Jay is acceptable because he is a predictable liberal. He is basically 'equal time' for the rest of the program day. Jay will rant and rave and make a number of good points, but he does not have the persuasion power of a Bob Lassiter (or of a Rush Limbaugh, for that

matter). Jay fills the "token liberal" spot well, but he is on late, and all the main dayparts are, as you suggest, very right-wing and very neo-conservative.

However, I would not lable everyone who is conservative, a 'moron'. In fact many are very smart indeed. One thing to always remember is that an intelligent debater (a master debater :-)) does not confuse disagreement with another person's point, with lack of intelligence on tha part of that other person. A lot of people call Rush Limbaugh an idiot or a moron because they disagree with him and cannot conjur up subsanitive arguments to support their disagreement, so they call him a moron. Truth is, Rush is FAR from a moron. He is among the more intelligent hosts on the air. He may not speak for you and he most assuredly does not speak for me, but an argument based on "He's an idiot" speaks more for the intelligence of the speaker than of the intended recipient.

>These opinions are MY OWN, and not those of my employer, of the
>makers of my workstation or of Elvis, Barry Manilow or Sammy Hagar.

My opinions are the product of a random cliche' generator :-).

In regards to hearing different versions of "Louie Louie" over & over again, I do remember when KMGK, a short-lived station at 107.9 known as "Magic 108" met its demise in 1988. (Station located in a suburb of Minneapolis, MN) I think Anoka was the city of license... Anyway, the attention-getter for the new station was the repetition of many versions of Louie Louie. This went on for a couple of days!
This eventually turned into KQQL, better known as KOOL-108, (oldies). Surprisingly this station is still going strong after a number of formats were tried on 107.9. KQQL is agressive in promotion and call-in-for money type games. I'm not sure if that would have much bearing on station survival though...

NEW TECHNOLOGY

I'd like to tell you about a new FM, AM/Stereo Walkman that has just come on the Market from Sony. This Radio does not have either a tape deck, nor a speaker in it and is almost Credit Card size. It takes 2 Pen Light Batteries and plugs in to a standard set of Walkman Earphones.
The radio has a Slide On/Off switch located on the front of the set. On the Right side of the set is a slide switch.

Nearest the top of the unit the setting is FM which is full Stereo. Moving the switch down one notch is AM/Mono and moving the switch to the bottom produces AM/Stereo. On the top Back right of the set you will find the tuning dile and on the left side you will find the Volume control. The Jack for the Earphones is located on the top left of the set and on the back of the set you can install the snap on belt clip. At the bottom of the set on the rear is the battery compartment.
This unit uses a New Motorola Chip and I Purchased it here in The Bay Area from I.R.T.I. which is located in Mountainview, Ca. The price is $32 pluss $2.39 for shipping via U.P.S.
There are several stations broadcasting in AM/Stereo and I find the Stereo to be reasonably True on AM. As the Decoding is diferent on Am compared to FM the sound of the stereo is slightly diferent but it seems to be reasonably accurate. The Model number of this unit is SRF42/BM and I encourage you to Purchase this newest Technology. I found it's performance excellent on AM and FM.
I assume that Sony dealers can get this set for you but you may order the set through I.R.T.I. at either (415) 961-3161 or (800) 322-4784. If you order this interesting Technology I'd be interested in your comments and if you call I.R.T.I. to order, Please let the friendly person you talk with know that you heard about this unit from Don Coco in Oakland, Ca. I am a totally

blind person and whenever new interesting technology comes along I try to buy it and let you know my observations about it. I do not work for I.R.T.I. but have done business with the owner, who is a blind person himself and who sells fine Electronics for people, since 1990. May you become the first person on your block to Tell your Neighbors that you can listen to AM/Stereo.

248. Wichita broadcast market news

Newsgroup: rec.radio.broadcasting
Date: 1994-01-22 01:26:13 UTC
From: "LIONEL B. BARLEY" <73321.571@CompuServe.COM>
Message-ID: <2hpvbl$8bg@vixen.cso.uiuc.edu>
Source record: 41403

FOR SALE signs have popped up in the windows at KXLK-FM and legacy AM station KFH both owned by Midcontinent Media Inc., based in Minneapolis, Minn. Word on the street in Wichita is that a still unidentified owner of other Wiichita broadcast properties is warming to the offering. Midcontinent has released a prospectus to a number of potential buyers. Most of Midcontinet's broadcast and cable properties, video stores, and movie houses are based through the upper Great Plains states, from Kansas into the Dakotas and from Montana to Minnesota. There is an additional cable system in Key Largo, Fla. {convenient! :) }, and a satellite transmission system in Washington, D.C.

Four of Wichita's six primary coverage AM stations are programming SPORTS TALK in head-to-head competition for the late pm drive and early evening listener. That leaves long time country regional power house KFDI (1070 k khz - stereo AM - 3 tower near omni pattern) and gospel formatted KSGL (900 khz @ 250W/daytime - 2 tower directional) as remaining local choices on AM.

KQAM (1410 khz) is doing a local sports call-in at 6pm, but I don't follow sports closely at all, and don't have a name for you. KQAM has been a ne'er do well in the Wichita market, 5 tower directional; with a particular note to fame of having been a minority owned station, held at one time by country singer Charley Pride. He sold.

Legacy station KFH (1330 khz - single tower), and currently up for sale, is filling their hours from 5 to 7 pm with former hardballer Pete Rose's nationally syndicated program. 'Nuff said.

Jumping down the dial to KZSN (1480 khz - 4 tower directional) from KNSS (1240 khz - single tower) is Dave Phillips, announcer for the Wichita Wings soccer team. Dave was released by KNSS at year's end. Dave is doing an hour from 6 - 7pm with another former KNSS announcer and former Wichita State University (Shockers) basketball player Tom Kosich. Kosich, interestingly enough does a weekly sports show on KFH as well, besides now providing color on broadcasts by KAKE-TV (10) of Wichita State basketball games. KZSN - Wichita's current #1 in the local book, and strong country competition to KFDI - is using Phillips/Kosich as lead-in to broadcasts of Kansas City Royals baseball, Kansas State University basketball, and Wichita Wings soccer.

KNSS has replaced Phillips with Brian Sexton, an existing member of KNSS advertising sales staff for their 6pm sports interview/call in show. Sexton's background includes sports stints at WIBW (AM/FM) in Topeka, KS as well as KCTV in Kansas City, MO.

So, you have it! Religion at 900 , country at 1070, and sports at 1240, 1330, 1410 and 1480. The book has got to be so thin for any one of the four, I don't see how they can approach an advertiser without feeling guilty.

249. Radio Watchers -- Columbia, MO

Newsgroup: rec.radio.broadcasting
Date: 1994-01-24 05:21:13 UTC
From: Mark Roberts <transvox@TYRELL.NET>
Message-ID: <2hvls9$7sm@vixen.cso.uiuc.edu>
Source record: 41404

(The following are excerpts of a set of three articles about
Columbia (Mo.) community radio station KOPN(FM) that appeared in
the Columbia Daily Tribune, 1/23/94)

For two decades, KOPN has been Columbia's beacon of counterculture consciousness, providing a forum for unpopular views and a venue for music that appeals to small but fiercely loyal audiences.

*** *** *** ***

The station's board of directors is making a decisive break with the past, rearranging KOPN's eclectic mix of programming if not its identity as "the old hippie station." In its place will be a daily format intended to bring predictability to KOPN's sound.

*** *** *** ***

Opponents of the change, rooted mainly among KOPN's on-air volunteers, contend the makeover is a sellout designed to make money from new listeners while limiting the microphone access of alternative voices.

" . . . I fear that we will lose the community radio identity altogether," said Butch Burrell, a former KOPN programming director who, along with his wife, Joanne, hosts the "Cedar Creek Pickaway" show under the pseudonym of the Tennessee Hound Dog.

The Burrells' show is one example of how far programming director Brian Mann went in rearranging the schedule. The bluegrass show was on from 9 a.m. to noon every Saturday for most of KOPN's existence. It now airs from 7 p.m. to 10 p.m. on Sundays.

*** *** *** ***

Since it went on the air in 1973, KOPN has been a jumble of programs of widely varying quality and content. A listener tuning in at random might encounter a Chinese-language program aimed at new Asian immigrants, hard-core punk rock, the icons of bluegrass music or a program dedicated to prison inmates.

Only the most avid listeners could recall large amounts of the schedule. The casual listener could never be sure, hour to hour, what might come next. From that varied mix came some highly respected programming, including the 15-year-old Midwest Radio Theater Workshop, which brings radio artist from across the nation to Columbia.

But for the most part, the programming has had limited subscriber appeal. By 1990, the number of station contributors fell to 500, its lowest ever.

*** *** *** ***

KOPN's [40,000-watt] signal has the potential to reach 300,000 people in Central Missouri. But in 1990, only 500 people sent donations. In 1993, the figure was higher, but still only about 850 people subscribed.

Meanwhile, [University of Missouri]-owned KBIA [with 100,000 watts] is able to draw in more than $260,000 from 3,800 listeners. [Station manager P.T.] Martin said her goal is to raise half as much as KBIA.

*** *** *** ***

KOPN does not appeal to large numbers of radio listeners because it has not presented itself in a predictable manner, program director Mann said. That changed Jan. 3. Every weekday morning and afternoon, listeners can now hear a format that relies, like many commercial stations, on a core of 100 artists. And most evenings, jazz and blues are the mainstay from 7 p.m. to midnight.

"To me, it is ironic to be squabbling about this," Mann said in December. "The guidance provided is actually more diverse and more inclusive than any of the programs we have right now."

Opponents aren't so sure. They say KOPN is duplicating a sound that can be heard elsewhere on the dial.

One morning last week, the station played Bruce Springsteen, John Mellencamp, and a song by a band that disc jockey Austin Taylor said she saw on MTV.

*** *** *** ***

Board member Chris DeFacio said lucrative bingo revenues allowed difficult decisions on programming to be avoided.

"The money was coming in, so they didn't have to worry about programming," she said. . . .

*** *** *** ***

The current battle wouldn't be so important if KOPN had the resources to weather a flop on the new programming. But it can't.

The budget for 1994 is one-third less than 1993. The staff has been cut in half and salaries slashed 10 per cent. The main culprit is bingo, which had grown to 50 per cent of the annual budget. That money disappeared in July when the game moved from the VFW Post 280 hall to the Knights of Columbus hall. When bingo began in the new location, the VFW auxiliary began a competing game at the old location.

For three months, the game produced nothing. It is profitable again, Martin said, but the take is far below the $1,000 a wekk needed to meet this year's budget.

*** *** *** ***

David LePage has seen it all before.

Volunteer programmers fighting with staff. Financial woes that threaten to put community radio off the air. And a lack of focus for programming that leaves listeners cold.

LePage is director of station outreach and development at the National Federation of Community Broadcasters. . . . Armed with a grant of $30,000 from the Corporation for Public Broadcasting, the federation is making KOPN a pilot station for its Healthy Station Project. The focus of the project, LePage said, is to reaffirm missions, create goals, and plan how to reach them. . . . Many community radio stations have gone through debates similar to the controversy wracking KOPN, LePage said. People involved at the station have to decide whether they are going to focus on the community or themselves.

*** *** *** ***

LePage said he is not deciding what kind of programming changes KOPN should make. "The major programming directions and changes were taken long before we were involved on a direct consulting basis."

Although he professes benevolence, LePage's motives are being questioned. KOPN board member Steve Andsager [the only KOPN board member to oppose the

changes] noted that LePage had told a December station meeting that few, if any, additional community radio stations will be getting on the air. "That tells me, the only way the NFCB will grow and his salary will go up is if member stations grow themselves and geenerate more revenue."
LePage's detractors also question his assumptions about radio listeners. The lessons from national studies may not apply here, they said.
<end of excerpts>
*** *** *** *** *** *** *** *** *** *** *** ***
PERSONAL OBSERVATION: This isn't the first time KOPN has been through something like this. In 1984 and again in 1991, new program directors came in, reshuffled the schedule, and made plans to change KOPN's image as a leftover from the old counter-culture.
Well, Columbia never had much of a counter-culture in the first place, and the influx of newcomers *not* affiliated with the University of Missouri altered the community's socioeconomic complexion considerably in the 1980s. KOPN was at its best when serving interests that were not being served otherwise--Columbia's Black community for instance, which for years had no other media outlet other than KOPN's regular Saturday afternoon programming. And KOPN produced excellent public-affairs programs in the early 1980s. But, at some point in time after that, it lost touch with those goals, even while having to compete in an increasing crowded radio and media marketplace.
The station also had to contend with a transmitter relocation (which upped its power at the expense of antenna height) and now has to contend with the relocation of its downtown Columbia studios.
Since KOPN was one of the pioneers in community broadcasting, it could be that its troubles are a foretaste of bad news for other community stations. With the vast number of commercial stations and underwriting-hungry NPR stations now on the air, can stations whose mission is to serve underserved communities of interest not just survive but thrive?

250. Radio Watchers -- KC (Arbitrons)

Newsgroup: rec.radio.broadcasting
Date: 1994-01-24 05:21:15 UTC
From: Mark Roberts <transvox@TYRELL.NET>
Message-ID: <2hvlsb$7sn@vixen.cso.uiuc.edu>
Source record: 41405

The Kansas City market is showing an unusual amount of
volatility for individual radio stations in the fall Arbitrons.
The leading country stations, WDAF(AM) (610 kHz, 5 kw) and
KFKF(FM) (94.1) lost listeners but remained in first and second
place, respectively.
The winner in the country market is KBEQ(FM) (104.3), "Young Country
104," which has seen a steady increase in its market share since it
dumped its ailing CHR format almost one year ago.
The Kansas City Star quotes KBEQ program director MIke Kennedy
as saying, "We're not done until we're the Number One country station in
Kansas City. We'll keep plugging until we hit that."
KBEQ features many of the same personalities it had during its
Top 40 days, including Kennedy and morning man Randy Miller.
The Star quotes WDAF general manager Herndon Hasty as saying, "We've
had bad falls in the past and come back strongly in the winter.
That's the anticipation this year as well."
While Kennedy told the Star he believes his listeners are coming
from other formats as well, the numbers do not confirm his belief.
Based on the 12-plus numbers, country listening held relatively
steady compared to last fall (24.9 in Fall 1993; 25.7 in Fall 1992)
and is nearly identical to this summer's share of 25.0.
Listenership to rock-based formats is also nearly steady, (16.2 in Fall
1993, 16.8 in Fall 1992, and 17.0 in Summer 1993) but KCFX(FM)
(101.1) has emerged as the clear winner with a 7.3 share.
General manager Bill Newman told the Star that his station's status
as the Kansas City Chiefs' flagship has been a big help.
In addition, Newman said KCFX has been increasing the number of
1960s rock classics in its rotation, helping make "The Fox" number one
in the 25-54 demographic.
The losers are KYYS(FM) (102.1) and KQRC(FM) (98.9). KY-102 continues on
its downhill slide, despite some (apparently temporary) strength this summer.
Other than Summer 1993, KYYS has been continually losing audience, despite
brief attempts at evening modern-rock programming and several changes in
program directors.
The KQRC decline is a surprise. General manager Jon Schweitzer, however,
told the Star he expected some loss in listeners to KCFX ever since the Chiefs
signed quarterback Joe Montana. Schweitzer also cited the rise of
KBEQ as a country station as another factor siphoning listeners from
"The Rock."
Also surprising is a relatively high 3.4 share for classical KXTR(FM)
(96.5). That's KXTR's highest 12+ share in at least five years.
*** *** *** *** *** *** ***
OK, so who are the winners and losers this time out?
WINNERS:

* KCFX: Its best numbers *even* and now number one in 25-54.
* KBEQ: Its decision to go country is paying off and, despite
claims to the contrary by all involved, it's slicing heavily into
the two seemingly unassailable leaders, WDAF and KFKF.
* KLTH: "Lite 99.7" keeps steadily climbing with its soft rock
that my dentist plays in his office.
* KPRS: An institution in Kansas City's Black community, with
great loyalty and a unique status as one of the nation's oldest
minority-owned broadcasters.
LOSERS:
* KQRC: Why did "The Rock" suddenly sink? Grinding guitar metal
usually goes over well in this city. It must have been out-Foxed.
* KYYS: Please put this station out of its misery. Once dominant,
KYYS just can't cut it with a format that sounds like it belongs to the
later years of the Carter Administration.
* KKCJ: "CJ 106.5" was misconceived from the start as an effort by
KFKF to scare off any other station from thinking about doing country.
KBEQ proved that premise false. This station is a waste of bandwidth.
* WHB(AM) (710 kHz, 10 kW/5 kW, DA-2): It used to be Kansas City's
Top-40 powerhouse until KBEQ banged it around in the mid-70s. September
26 was its last day as a rock-and-roll station. Now it simulcasts
KMZU(FM) (100.7), Carrollton, "Missouri's Farm Voice." Sad but true.

The numbers follow. Some of the lines are *exactly* 80 characters
long, so I hope you can read them!

From: Mark Roberts <transvox@TYRELL.NET>
Message-ID: <2hvlsb$7sp@vixen.cso.uiuc.edu>
Source record: 41406

Some brief snippets from St. Louis (I haven't been out of
Kansas City lately, so here's all I know):
* WKBQ(FM) (class C1, 106.5) and WKKX(FM) (class B, 104.1) have
swapped frequencies. Both stations are owned by Zimmer Broadcasting
of Cape Girardeau, which bought Q-106.5 from Evergreen Media this
fall. The Q's CHR format is now at 104.1; the "Kix" country
format is at 106.5 where it can better compete with long-time
country powerhouse WIL-FM (class C, 92.3).
* Heritage, the owner of WIL-FM and WRTH(AM) (1430 kHz, 5 kW,
DA-2) has bought KRJY(FM) (class C1, 96.3) from longtime owner
Richard Miller. KRJY has an oldies format.
* Clear-channel CBS O&O KMOX(AM) (1120) is about to start carrying Rush
Limbaugh's daily talk show (if it hasn't already). The move has generated
considerable adverse comment in the St. Louis media. It's believed to
be the first time since CBS bought the station in the early 1930s that
KMOX has aired a daily program produced by a non-CBS source. Limbaugh
formerly was heard on WIBV (1260 kHz, Belleville, IL, 5 kW, DA-2).

OK, fine. Now there is a very strong signal coming from a tower in my area,
but when I pass it it doesn't bleed over everything, just one or two stations.
Why?

I would just like to mention first that I am of the MALE persuasion.

>In your case, your automobile wiring, the speaker wires, and even the very
>skin of your vehicle acts as an antenna. You normally won't be aware of

[...]

>This is the same example as when, for example, public address systems or
>some electronic church organs would receive citizens band, or amateur
>radio transmissons in the case of a mobile transmitter operating nearby.
>As a test, have a tape playing instead of your FM when you drive by the
>transmitting site. If you still hear the AM signal, it will definitely
>have been brought in through your audio circuits of your receiver.

Thank you to all those who replied to my question. Most of the
responses were in the same ballpark as yours.

I did a little more "testing" on Wednesday and Thursday. First, when
CJSB is switched down to 10,000 Watts (from 50,000), there is no audible
effect (no surprise). Second, I tried tuning around the FM dial, first
to 106.1 (a local station) where I heard nothing, then to 106.9 (a CP so
it's basically empty), where again I heard nothing. Hmmm. I will try
something closer to 103.7 next time I go by. I will also try a
cassette, which many people suggested.

Anyway, this "interference" doesn't bother me. I just found it
interesting.

TTYL!

One of the most magic moments I've ever heard on the radio was shortly before Bob got the ax. He spent the full three hours of his program talking about his radio career from start to finish. The story was not only well-told, it was CAPTIVATING. He had me hanging on every word! I was driving out of town...and had the radio up full to catch it all. I have never heard someone in this era who had such a command of the english language that he could paint word pictures as well as I heard that night.

Lassiter is sorely missed.

256. Boston Radio on TV SAP

Newsgroup: rec.radio.broadcasting
Date: 1994-01-24 05:21:29 UTC
From: fybush@world.std.com
Message-ID: <2hvlsp$7v8@vixen.cso.uiuc.edu>
Source record: 41411

Straying just a bit from "broadcast" radio here...I'm pleased
to announce that starting a few weeks ago, WBZ (AM) 1030's
audio is now available on the second audio program of WBZ-TV 4.
This move makes WBZ radio available with greater clarity to
many cable viewers throughout Massachusetts, NH, RI, and other
corners of New England.

Here's what else I've heard on SAP:

WGBH-TV 2 Boston: BBC World Service
WBZ-TV 4 Boston: WBZ-AM 1030
WENH-TV 11 Durham NH: Talking Book Service (also on 25, 44, and the 67kHz
SAP of WERS-FM 88.9 Boston)
WFXT-TV 25 Boston: Talking Book Service
WSBE-TV 36 Providence: Occasionally a relay of WOON-1240 Woonsocket RI,
otherwise same as main channel audio
WGBX-TV 44 Boston: Talking Book Service

One more note about the WBZ-TV SAP: It's the WBZ radio "predelay" channel,
not the air signal of WBZ radio. That makes listening to talk shows
a LOT more fun :-)

Source record: 41413

In a previous post in this thread, someone mentioned the rules on IDs being callsign, city of license, and if the station wanted, frequency or channel number. My fathr has a very old FM radio (a Pilot mono tuner) with its dial marked with frequencies and channel numbers. Each FM broadcast frequency has a channel number. Think the range was like 200 at the bottom of the dial (88.1 MHz) up to 299? for 107.9 MHz. *Never* heard an FM station ID including its channel number. Not suprising, as my father seems to own the only radio that had the channel numbers on the dial. Imagine hearing "WDRE, channel 223, Garden city". Though, some program director might think it cute and unique. "you're tuned to Channel 223, music in your ears and picture in your mind!" or some such. Only thing is virtually noone will know where to find ch 223 other than people thinking it's some screwball nickname.

259. ISLAND RADIO/680 AM PHOENIX

I live in Northern Calif. The other night I picked up two interesting stations. One at around 680 am from Phoenix, I believe, is a country station (KTNN?) that also occassionaly broadcasts native American ceremonial music. Also, around the 1350 am area I picked up a station that mostly plays Hawaiian music billing itself as "Island Radio".

Anyone know anything about these two stations? Very curious.
Also, is Coast 1040 from Vancouver still on the air?
Gary

Thanks!!!

And then there are some stations that do what Kiss 98.5 does (or at least used to do when I drove through the area)... give a spoken legal ID at about 10 before the hour ("WKSE Niagra Falls/Buffalo") and then have another ID at the top of the hour ("Kiss 98.5, BUffalo") which is not technically a legal ID but at least tells you where the signal is coming from.

I feel EXACTLY the same (about the info-junk). Norm Nathan is the greatest. They ought to put him on FULL-TIME in the weekdays and get rid of that unfunny charlatan named Bob Raleigh. Bob Raleigh stinks. A (mostly) politically-oriented talk show host with barely a high school diploma. Go figure. Anyone who says he wouldn't mind getting into politics "for fun" MUST have something wrong with him. So long live NORM! And Happy 50th anniversary of being in broadcasting coming up in May.

Message-ID: <2i2qs7$eoq@vixen.cso.uiuc.edu>
Source record: 41419
Cross-posted to: rec.radio.broadcasting,rec.radio.info

A poster has sent in three 900 line files consisting of media fax
numbers. They are too big to realistically post to the entire world,
so they are being added directly to the FTP and GOPHER archives for
AIRWAVES RADIO JOURNAL, which as most of you know is the email digest
reflector for rec.radio.broadcasting.

To access the archives via FTP...

ftp radio.aiss.uiuc.edu /misc/rec.radio.b-cast/FAX

They, like the rest of the archive, are in compressed form and must be
transfered using FTP's binary mode. (Type binary at the ftp prompt).

To use gopher, ...

gopher radio.aiss.uiuc.edu 7070

Then follow the prompts. Use ? for help in gopher.

To get them via email, send mail to rrb@radio.aiss.uiuc.edu with ...

Subject: FAXDIR-1 (for letters A-H)
Subject: FAXDIR-2 (for letters I-M)
Subject: FAXDIR-3 (for letters N-Y) <there are no Z listings>

NOTE: ONE FILE REQUEST PER LETTER PLEASE. If you want them all you
must send three letters. YOU MUST PLACE THE ABOVE IN THE SUBJECT OF
YOUR EMAIL.

You should get them back in return mail.

Also note that I make no claims as to the accuracy of these lists.

Close Eric:

WYSY-FM and WBIG AM (1280, Aurura Il) were separately sold. The FM
went to Cox Broadcasting who placed a 70's oldies format on the old
AC/Metal dayparted station.

WAUR is another statuon altogether, it is not part of the deal.

WBIG, which was in limbo, simulcasting the FM, was sold to Elgin
Broadcasting, owners of WRMN-AM (Full Service) and WJKL-FM (Unistar
AC). They have just signed the station on the air today with a
combination of local AM/PM drive programs, and syndicated gab fests
all day and night.

I am getting a lineup in the mail soon, but it includes Pat Buchanon
(sp) show, Larry King, and Bruce Williams. WBIG is going to try to
serve the underserved Fox Valley with a combination of local input and
syndicated talk.

WBIG is 2500 watts daytime and 500 watts nighttime with a three tower
directional array which throws a null right at Chicago both day and
night, althoug the daytime signal is defineitely less restrictive.
Their best direction is west (yeah, right over the cornfields.

Mike Lawrence, the managing part-owner, is enthusiastic and has 'big'
plans (sorry for the pun) for his little teapot signal. I wish him
success.

As far as keeping the Aurora offices, yes. The transmitter has long
since been moved atop WMAQ's tower near Glendale hts. I dont
understand the office thing, there are a couple of stations, actually
several, who have all their operatins in Chicago, although are
licensed to suburbs. Anyone know the law on this one?

Canadian Marketers of Consumer Electronics Impressed with
Canada's Digital Radio plans
-----------------------------------------------------
Canada's electronic equipment marketers were clearly impressed
with the Canadian plans to introduce regular digital radio
service in Canada as early as 1995.

Representatives from Goldstar, Lenbrook, Matsushita, Mitsubishi,
Pioneer, Radio Shack, Sanyo, Sharp and Sony attended a full-day
presentation in Toronto in late August 1993 by the Task Force on
the Introduction of Digital Radio.

Participants were particularly interested in Canada's development
strategy, the transition concepts and timing, as well as the
technical characteristics of this new medium.

In December, 1993, Pioneer Electronic Corporation announced that
it had officially joined the Eureka-147 project, which aims to
establish a world standard for digital radio. At the same time,
Pioneer Electronic Corporation, Digital Radio Research, Inc.
(DRRI) in Canada and Pioneer Electronics of Canada Inc.
annouunced that Pioneer will make prototype receivers available
by early 1995.

The Consumer Electronic Marketers of Canada, an industry
association of companies who sell radios and other electronic
products in Canada, is a full member of the Task Force.

- 30 -

This information comes from The Task Force on the Introduction of
Digital Radio, an industry-government body which is coordinating
the various steps required for the transition to digital radio
service in Canada.

>(88.1 MHz) up to 299? for 107.9 MHz. *Never* heard an FM station ID including
>its channel number. Not suprising, as my father seems to own the only radio

Actually, if you listen to a translator, or a station IDing a translator,
you will hear the channel id, just like LPTV.

K280CE was on the air in Tucson, for instance on 103.9 (channel 280).

Since all of the numbers were three digits with an initial "2" there
was little differenciation in IDing that way. Hence the use of
the frequency. Just as the wavelength, in meters, became passe, so to the
stations being id'd by channel. In the early years, yes ... well ... look:

Here's a listing of FM stations from 1941.

I believe the calls with an 'X' are still experimental stations. The
other calls use the pre-1943 FM call letter system which reveals the
stations's frequency.

From: jwg@sedv1.acd4.acd.com
Message-ID: <2i2qsk$epd@vixen.cso.uiuc.edu>
Source record: 41423

I have a question about AM/FM simulcasts and legal IDs. The station I work for, 107.5 WZZQ/Terre Haute, simulcasts on AM 1230, WBFX/Terre Haute. I'm not at all comfortable with the way we ID these stations.

o In the mornings, we have news going into the :50 stop set. The newsman finishes the cast with, "I'm Taylor Brown for 107-5 WZZQ and 1230 WBFX, Terre Haute." That's supposed to be the ID.

o Everywhere else, jocks say "WZZQ WBFX Terre Haute" right out of the :50 stop set and read the weather.

o We do no ID between songs near :00. Instead, we run a sweeper.

FCC 73.1201, posted by WEOS-FM and others, makes no specific provision for an AM/FM simulcast situation, especially when the calls are different. What's the right way to do it? Or, what's wrong about how we're doing it?

(We *do* have a WTHI AM/FM combo here, and when they simulcast, they run a "WTHI AM & FM, Terre Haute". That "feels" right.)

Thanks!

^^^^^^^^^^^^^^^
the only time i remember reading the channel number of a station i worked at waswhen i signed on or signed off the air. Thus to this day i can remember that
89.7 FM = channel 209A.

Hi Robert,
Legal IDs for radio stations now consist of the call letters
followed by the city of license, and it is optional to put the
name of the owner between these. "WAMA, Vogel Broadcasting,
Selma, Alabama." You may say anything you like immediately
before or after the call/city. So it's perfectly legal to add
the channel designation, though as you say there probably aren't
a lot of Pilot mono tuners around these days.

I'm pretty sure that here in the Toronto/Hamilton/London area, the stations play their ID's at least every ten minutes. I may be misinterpreting positioning statements as ID's, but I still here them all the time.

Chris..

I suspect that DAB (Digital Radio) will bring back the use of channel
numbers to radio. I can't imagine "Majic 1458.35" or "1477.8 Rock" (in
L-band, as proposed).

^^^^^^^^^^^^^^^

I just tuned around the band and found a station at 1380 - quite weak so it might be on one of the outer islands. There is no Oahu island station on 1350, but there might be a 1350 kHz station on one of the other islands.

Aloha from chilly Hawaii (it only got up to 75 today - 65 last night - its gotten so cold here that I finally had to start using a blanket at night; gad, I hate winter...)

KTNN is from the Navajo Nation in Window Rock, AZ, quite some distance from
Phoenix in the four corners area. It is also not on 680 ... 660.

KTNN - 660 kHz - Window Rock, AZ. Owned & Operated by the Navajo Nation.
Indians playing cowboy records.... I love it!

KCCN-AM Honolulu plays Hawaiian music & IDs as "Island Radio". It's at
1420, though, and only 5kw - making it an extremely unlikely candidate.

KTNN is at 660, licensed to Window Rock, which is on the Navajo reservation
in northeastern Arizona. Obviously would be protecting the 660 station
from New York City (whatever *its* call letters are these days), so it may
be shooting a lobe up your way.

KTNN is owned by the Navajo nation. I don't think it's been on the air
more than four or five years; it was a 50-kw station made possible by the
FCC's decision to reduced the protected coverage contour for clear-channel
stations at night.

Another classic was on Bob's attempts to deal with his smoking "addiction."
He described his endless attempts to break the habit. (In fact,
I believe one of the motivators was the agonizing death of at least one loved
one to lung cancer.) His accounts of the moments leading to him breaking
down and picking up a cigarette were totally engrossing. All the
while realizing that this "insane" act brought him that much closer
to an early grave. (The downside was the _plethora_ of calls from
emotional listeners begging him to "try to quit just one more time!")

Stacey Taylor also did numerous riveting shows.

Those were the days. Now we're left with the likes of Roe Conn (sp?)
and "Ty and Ed"...major bore-fest. Sure is a vast difference between
the pro-talkers and the mere wannabe's.

Bonneville International Corporation is a wholly owned subsidiary of the LDS Church. It goes back to 1927, when KZN radio began broadcasting. KZN became the company flagship, KSL. It was making plenty of money, so the corporation got involved in broadcasting all over the West and then moved into major markets. Right now Salt Lake City is the smallest market Bonneville serves with KSL-AM and TV.
Other Bonneville stations include KIRO-AM and TV in Seattle, KZPS in Dallas and other stations whose call letters don't come readily to mind in Kansas City, Chicago, Los Angeles and New York City.
Bonneville has a subsidiary in Teaneck, New Jersey that provides programming. In the 70's and 80's it specialized in automated format tapes for the so-called "beautiful music" format. I'm not certain what they're producing these days.
Bonneville also had a satellite subsidiary until recently, when it was spun off to become Keystone Communications. They provide uplink services for all kinds of programming.

In spite of its ownership, Bonneville operates pretty much as a secular company. I used to work for them about ten years ago. I did get some hassle once about leaving the middle initial of a top Mormon church official out of a newscast, but that was about the only evidence I saw of meddling. Since then, it's been my joy and privilege to watch them decline in the Arbitron and to make fun of them on a competing station as "Eleventy-Heavenly Establishment Boom-Boom." They've been pretty good sports, considering.

I have a few questions for anyone who can answer.

1. What types of SIGNAL PROCESSORS/EFFECTS are typically used in FM radio?
2. What are typical compressor settings (ratio, threshold, attack, etc..)?
3. How does an "exciter" do it's exciting?
4. Is there actually a difference between a compressor and a limiter?
5. I've noticed a "fuller"-than-normal (wider stereo response coming from FM stations compared to music found on my CD's at home). How is this acheived? By utilizing processors mentioned in #1?

A pre-thank-you for anyone who can help.

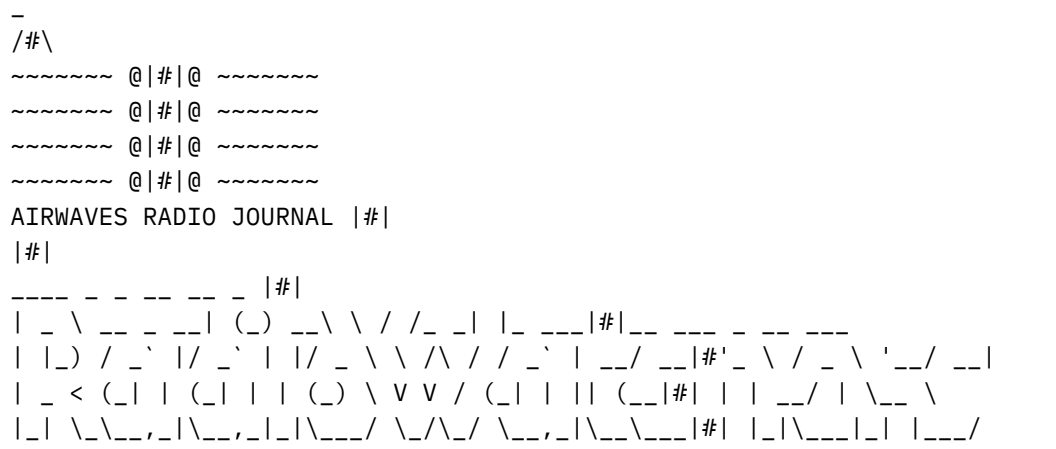
282. Join the 'AIRWAVES' RadioWatchers program

Newsgroup: rec.radio.broadcasting
Date: 1994-01-26 05:54:32 UTC
From: rrb@radio.aiss.uiuc.edu
Message-ID: <2i50io$3hf@vixen.cso.uiuc.edu>
Source record: 41437
Cross-posted to: rec.radio.broadcasting,rec.radio.noncomm,rec.radio.info



If you are really interested in broadcast radio in your own area, you might wish to get involved in the AIRWAVES "RadioWatcher" project.

We are currently asking for individuals who are either active in the industry, or are very much involved in the happenings around their town/city/community and would like to become recognized as a "RadioWatcher" for AIRWAVES.

As a RadioWatcher, you will be responsible for reporting the goings-on in your locale, and will be, in effect, a staff reporter for AIRWAVES. While anyone can write an article for the Journal, RadioWatchers will be considered the de-facto correspondent in a given city.

As a RadioWatcher, you will be asked to keep an eye and ear out for news and schmooze about the broadcasting scene in your market. You are asked to submit at least one report per month (more if you choose) and will be kept on file here at AIRWAVES as an official member of the press.

The purpose of this program is to create a base of volunteer staff reporters who's job it will be to keep a steady flow of good information about various markets coming in to AIRWAVES. It does not mean that the pages of AIRWAVES are closed to any of the other posters in net-land. It is just a way to assure that the readers will have something good to read, when the more casual posters are not available.

Q: What do I need to do?

A: RadioWatchers are basically the same thing as reporters. To remain on the RadioWatcher program, you are expected to be involved with

radio in your market, either by profession, or by a strong personal interest. You will be asked to report on any interesting goings-on in and around your market. Such as format changes, station sales, interesting trends, market ratings, and whatever else seems appropriate. The depths to which you dig for information is up to you.

It is important, though, that you are a true fan of radio, and not merely a fan of one sort of format. Your reports can have personal commentary, but should be based on actual facts (as you know them) rather than how those facts match up with your personal opinions.

In general, we need good, solid reporters who will do the job based upon their love of radio, and desire for more exposure. AIRWAVES is not a profit making entity, and so salaries cannot be offered. If you are a budding journalism student, or a seasoned pro, this may be a chance for you to show your stuff to the world. Airwaves is read across the globe via the Internet, and is available to subscribers of CompuServe, GEnie, AOL and on a host of BBS systems, via email. Your input will not go unnoticed.

So if you are interested, drop me a line and tell me about yourself. I will be in touch by return mail. Those of you who expressed an interest in the past, are encouraged to get back in touch. Those of you who are already RadioWatchers, thank you and keep up the great work. As AIRWAVES expands, your contribution will be even more important.

I have never noticed the detection of an AM station on FM . Located just a
few miles from where I work are two 50,000 watt AM transmitters. It would
be interesting to try and detect their signals on FM or cassette player.
The two transmitters are within a few miles of each other

Does anyone have a profile of the FM stations in the Bay area?
In particular I'm interested in stations that carry BBC news
and other programs.

>I am getting a lineup in the mail soon, but it includes Pat Buchanon
>(sp) show, Larry King, and Bruce Williams. WBIG is going to try to
>serve the underserved Fox Valley with a combination of local input and
>syndicated talk.

This is interesting. It looks like WBIG is going to be the WRMN of
the southern Fox Valley (both King and Williams already
appear on the Elgin AM station). WRMN produces a handful of local
shows, including its morning drive, and switches to TalkNet in
the afternoon and evening. They run a locally-produced Spanish-language
program, "Radio Fiesta," from noon to 5:00 on weekends.

I live in Algonquin (the northern edge of WRMN's service area), but
I can pick up WBIG fairly easily as well: I suppose this will
give people at different ends of the Fox Valley similar service.

>...
>Mike Lawrence, the managing part-owner, is enthusiastic and has 'big'
>plans (sorry for the pun) for his little teapot signal. I wish him
>success.

Mike is a pretty energetic guy, and one of his biggest successes
is his "Radio Shopping Show," which airs on both WRMN and WJKL-FM.
He was the Sales Manager for the Elgin stations, and whoever
replaces him will have a big job in front of him/her.

jtl
--
jtl@mcs.com

[Moderator's Note: Yes it was 'dark'. It left the air shortly after
(or before) the sale of the FM. Before that, it simulcasted. While
you may be able to get BIG and RMN in Algonquin, WRMN's directional
antenna at night keeps it from going south, so the same is not true
for listeners south of Elgin. Bill]

286. Request for Durham, NH area radio info (Second attempt)

Newsgroup: rec.radio.broadcasting
Date: 1994-01-26 06:57:19 UTC
From: mre@christa.unh.edu
Message-ID: <2i548f$adq@vixen.cso.uiuc.edu>
Source record: 41441

As it seems that I was ignored on my first attempt, I'll try this again.

I'm looking for information on radio stations in the Durham/Portsmouth/Dover/
Fremont, NH area. I need to know the stations' names, addresses (snail mail),
telephone numbers, and formats. I'm doing this for an acquaintance of mine
(long story), so I really don't have any interest in it otherwise. Thanks.

Mike

[Note: Follow-ups are set to 'sender' -- I don't read this group on a regular
basis.]

Although it might not "feel right", the verbage in your station ID is
legal. You are allowed to use frequency and licensee in the middle of an ID.
As far as the time the ID is done, that's up for grabs. ID's are supposed to
be done at the nearest break in programming at the top of the hour...PDs now
interpret that as being permission to put it before a "music sweep", but I
doubt if they had enforcement capability the FCC would sanction this.

I used to work for 95.9 WAX-FM in Youngstown...which, according
to the FCC, was WAXF(FM), Sharpsville, PA. Like most stations in
small towns not far from metro areas, we did as you said, and
snuck in our legal ID in a *very* low voice in between two spots.
It used to just say "WAXF Sharpsville", and one day, my former
program director Ed Hill came into the studio and said, "you know,
we should tack 'Youngstown' onto the end of that".

Now, we had all of our liners and such voiced by some big booming
voice down in Dallas, and so I was more surprised than anyone
when the *very next day*, the ID said, "WAXF Sharpsville/Youngstown".
Overnight delivery? Wasn't enough time...

It turns out that the ID was in such a low voice and said so
fast that I had no idea that it was voiced by our very own "S.T."
Fine, the 7-midnight guy. ;)

> >
> > What are the latest rules regarding when a full-power AM or FM station
> > has to run a LEGAL station ID ??

If the stations' natural break in programming is at
:45 then it is quite legal to ID at that time!! The
station I work for has 2 breaks, per hour at :15 and
at :45, we I.D. at the :45 break every hour, that is
hourly, as close to the hour as feasible, at a "natural"
break in program offerings!!!

> > I am hearing I station in the Chicago area that is running thier ID at 15mi
> > to the hour. I just beleive that is proper.

If they run a stop-set between there and the top their in trouble,
but, if that's where the "natural" break in programming is then it
is O.K.!

Several stations around the country, run programs that run from :45
til :15 should they stop the tape and utter those magic words or do
it as the rules state at a natural break??

Scott D Fybush (fybush@world.std.com) wrote:
: Straying just a bit from "broadcast" radio here...I'm pleased
: to announce that starting a few weeks ago, WBZ (AM) 1030's
: audio is now available on the second audio program of WBZ-TV 4.
: This move makes WBZ radio available with greater clarity to
: many cable viewers throughout Massachusetts, NH, RI, and other
: corners of New England.

Which causes me to ask:

I know there are two SCA lo/mid-fi subcarriers that are commonly used.

Why hasn't someone come up with an SAP-like service (10 kHz or so frequency response) for FM that's readily available to the public?

Would be great for talk stations (like 'BZ, etc.).

Here in Kansas City, only KCPT makes use of its SAP channel, either to provide Spanish-language programming (we have a substantial Hispanic community here) or to provide "Enhanced Descriptive Audio." A good example of the latter service ran on the recent airing of "Tales of the City" on American Playhouse on PBS....

Source record: 41449

In regards to the various criticisms surrounding the radio programs of Howard Stern and Don Imus:

If you don't enjoy their programs, change the station. As a broadcaster, I appreciate what each has done to increase the visibilty of radio in our video-happy society. The only drawbacks to each man's show is that they put a local personality out of work in each city that picks them up.
The criticism, and "no-talent" comments are subjective, and open to personal interpretation. I happen to like certain shows, and despise others. Does that make one better than another? I think not. I subscribe to the theory that each person's tastes are different,and one should be hesitant to criticize lest they be willing to be subject to the same criticism.

Just venting,

Paul Munafo-- "Don't burn any bridges"

[Moderator's Note. I agree wholeheartedly about the "putting local talent out of work" aspect of syndicated radio. In fact, I agree with it all. Bill]

Cross-posted to: rec.radio.broadcasting,alt.radio.pirate,rec.radio.shortwave

[Note: This was received by the moderator of rec.radio.broadcasting and was felt to be of sufficient intereste to cross-post. Bill]

[In Canada] Non-profit broadcasters have gained an advantage when applying for Low Power radio allotments in congested areas with a new CRTC Policy announced last summer.

Public Notice 1993-95, entitled "A Licensing Policy for Low Power Radio Broadcasting" establishes guidelines for the allotment of unprotected allotments of less than 50 watts ERP. This policy does not affect licensees or applications for protected class allotments of greater than 50 watts.

The Comission initiated a review of Low Power policies in 1991 in response to the growing requests for LP frequencies, especially for non-conventional services in congested areas. The NCRA's comments to the Commission calling for preferential treatment for conventional non-profit services and severe limits on non-conventional services was well reflected in the new policies.

The notice establishes two tiers of priority services for low power frequncies in congested areas. This means that some types of services will have priority over others when the commission makes licensing decisions. The Commission notes congested areas to currently include the Montreal area, Southern Ontario and the lower mainland / Island of British Columbia.

The new heirarchy of service places conventional not for profit radio services (community, campus, native, etc.) at the top of the first tier, followed by originating private broadcasters, local private rebroadcasters and distant rebroadcasters (including CBC rebroads). The second tier will include non-profit public information services (i.e. traffic/weather info services) and commercial announcement services (real estate / talking billboards).

The Commission also established a policy of issuing a call for competiting applications upon receipt of any application for a low power drop in allotment in areas where frequencies are scarce. This will include applications from non-profit broadcasters. The commission noted that, in addition to the priority heirarchy, the duration of the proposed service, the proposed power and the availability of alternate delivery means may be used in assessing competing applications.

The new policy also places a general requirement on all LP licensees to adhere to all existing policies for other services. However, the

Commission notes that individual applications for exemptions
from specific policies will be dealt with on a case by case basis.

Ah,only 2 days(as I write this)before the Super Bowl in Atlanta. I hope the Bills win,but please,stop the hype! It's out of my ears!

To bring you up to date on what's up with the radio scene around here:

1.If you didn't see it the first time,here's the Buffalo Fall '93 Arbitrons for 12+(unfortunately,these are the only ones I've got-if anyone has more extensive #'s,e-mail me with them):

```
# Calls/freq. Format(slogan) Sum93 Fl93 +/-
-----------------------------------------------------------------
1 WBEN(930 AM) News/talk(News 930) 10.0 9.9 -.1
2 WYRK(106.5) Country 9.7 9.7 NC
3 WJYE(96.1) A/C 8.1 8.2 +.1
4 WGR(550 AM) N/T;Bills/Bisons/Sabres 7.2 7.3 +.1
5 WBLK(93.7) urban contemporary(Power 94) 6.7 7.1 +.4
6 WHTT(104.1) oldies(Oldies 104) 7.1 7.0 -.1
7 WKSE(98.5) dance-based CHR(Kiss 98.5) 5.8 6.5 +.7
8 WGRF(96.9) classic rock(97 Rock) 6.5 5.8 -.7
9 WMJQ(102.5) hot A/C(Q102) 5.0 5.2 +.2
10 WUFX(103.3) album rock(103.3 the Fox) 5.7 4.8 -.9
11 WECK(1230 AM) adult standards/jazz 3.6 4.2 +.6
12 WBUF(92.9) soft A/C 3.8 3.1 -.7
13 WWKB(1520 AM) talk/sports;Howard Stern 2.2 3.0 +.8
14 WNUC(107.7) new country 2.4 1.8 -.6
15 WDCX(99.5) religious 1.8 1.4 -.4
16 CFNY(102.1) modern rock(The Leading Edge) 1.5 1.3 -.2*
```

*-Brampton,Ont.(Toronto market)

Also note WWKB is positioned as The Big 1520(though I think,IMHO, that its format of Stern,G.Gordon Liddy & Don & Mike deserves the title of The Puny 1520-Satellite Radio,due to the fact that it runs virtually NO local programming-or do they? More on that later.)

Some observations:
-Don't let GR's high 12+ fool you. They finished tied for 11th in the 25-54 demo and didn't do too hot in the 3-7pm slot(where the former team of Tom & Karen resided for 3 of their 4 hrs.). This may be a reason why evening sports talker Art Wander was moved up to the 2-7pm shift;he does 2-6 solo,then has Chuck Dickerson on for the last hour of his show,then it's "The Coach" until 11pm.

-As much as I hate Stern(not because of his talent,it's that he's just plain stupid:for more proof,just check Don Imus-he should know,he worked with him many years ago),you have to admit he's done a helluva job at reviving The Big 1520. From .9 in the fall of '92 to a 3 in this book(for the whole day)-incredible. But,does it translate into full-day success? From what I know,no.
-Ah,the danger of contests. How can you explain it? Kiss 98.5's jump could be attributed-in part-to its "Free Money in a Zip(code)" contest(where you could win $100 for being the first to call in from a specific code)on Dr.Maims and Janet Snyder's morning show, while the Fox tried the "Best 103 Hours of Your Life" contest and dropped. Not saying that it's the reason,or even part of the reason, but...(BTW,anyone see that sign at the Bills AFC title game that said,"We're back! Deal with it,America!" That won the guy that made it 2 tix to the Super Bowl and was seen on Letterman,ESPN,the Buffalo News,etc.

2.Lest you think that religious stations don't make news(don't read anything into that please),they do. Neil Boron will return to WDCX's midday talk show "Lifeline" on Monday(1/31). The show will now run from 1-4pm;it was from 1-3. Boron left 2 years ago to work at Family News in Focus,part of the group Focus on the Family. In his place,they used a rotating team of hosts-including Dottie Klein and Duane Motley.

3.Finally,in reference to contests,here's one for those who had more than their share of bills from the holidays. Toronto's CKFM-FM(A/C mix;The Variety Station-Mix 99.9)had a contest where they would pay any bill you had(their promos said they had money for advertising,but they'd spend it on the listeners instead. For lucky callers,they would pay your phone(Bell Canada),electric (Ontario Hydro)or your credit card bills. Alas,it's over-but it will return.

298. Radio Watchers -- Kansas City

In the Tasteful Programming Department, I encountered the following this morning (January 27) on page C-2 of the Kansas City Star, reprinted here without permission in its entirety:

John Wayne Bobbitt, the Virginia man whose penis was cut off by his wife, will appear Friday at a Kansas City restaurant.
Bobbitt, 26, will stop by between 6 and 9 a.m. at a breakfast buffer sponsored by radio station KYYS-FM at Stanford & Son's Restaurant in Westport.
"We really don't want to talk about the controversial issues. We're not going to have a point-counterpoint about what happened," said Scott Souhrada, the station's program director. "We're just looking for the fun angle."

Based on the fall Arbitrons, one might be callous enough to suggest that Scott instead look for the listeners his station keeps losing with its AOR format that's been frozen in time for nigh on 15 years, but I'm just not that kind of guy.
Can't wait to see what kind of "fun angle" KY-102 can find for the ongoing civil war in what used to be Yugoslavia....

<no wonder I got out of radio!>

Btw, Westport is Kansas City's bar-and-entertainment district.

299. Listening to Cuban Radio in Fla.

Newsgroup: rec.radio.broadcasting
Date: 1994-01-29 13:36:21 UTC
From: CHESSER@UKCC.UKY.EDU
Message-ID: <2idool$17h@vixen.cso.uiuc.edu>
Source record: 41306

Many thanks to those who offered advice on hearing Cuban radio
stations while in the Florida Keys. Here's a report on what
I heard. Radio Alegria, on 640 KHz, can be heard over a large
area of south Florida even during daytime hours. It has the
signal strength to cut through noise very well. Since it acted
like a local station, but was no less than 90 miles away, it
seems likely the station operates with a lot more than 50 KW.
There were long talk segments that I didn't enjoy, but also
a wide variety of music, both modern and traditional.
At night it seemed to be more talk and less music.

I could not get any other Cuban stations during the day with that
kind of signal, though at night there seemed to be a number of
Cuban stations. Spanish language radio is quite common in south
Florida, as you can well imagine. Both AM and FM stations
cover wide areas. I enjoyed the music on the
FM stereo stations, particularly "Stereo Fiesta" on 103.9 MHz,
which can be heard from Homestead to well down into the Keys.
I did hear the US V.O.A. station, Radio Marti, 1180 KHz,
located at Marathon, but there are considerable interference
problems, presumably from Cuban jamming.

-----Roger Chesser, WUKY, Lexington, KY.

I throw this question out to FCC regulations afficionados and lawyers:

What is the proprietary status of taped segments of radio programs taken off the air from a listener? Where do I look for regulations pertaining to "public domain" broadcasts? Is it possible, for instance, to call Beverly LaHaye Live, record the broadcasted conversation, and then to distribute the piece? What if talk radio segments are incorporated into a piece of music which is in turn broadcast over the radio?

BOSNIAN PEACE REPORT

94 - 2 B

INDEPENDENT RADIO AND TV "STUDIO 99" - SARAJEVO

CONTACT PERSON: Adil Kulenovic, Editor-in-chief
CONTACT ADDRESS: Sarajevo, Djure Djakovica 41
tel. (387)(71) 664 550, 664 505, 664 506
fax 664 551

Respected gentlemen,

Independent radio and TV "Studio 99" operates in Sarajevo,
covering the area of the city - 100 km diameter. "Studio 99"
is completely independent media both financially and in the
means of programme. It is an urban radio whose basic programme
orientation is aimed to promote democratic, civilised and
progressive way. "Studio 99" does not approve nor except
trisided national form of arrangement of the Republic of
Bosnia-Herzegovina, and stands for so called "fourth option",
option of all citizens who appreciate common life as a local
tradition and the only way of existence.

Radio leads its own struggle against war terrors in its
special way. It supplies the listeners with hope, even in the
hardest of times. Because of this, it represent the most
popular radio station. It gathers free thinking intellectuals
as its contributors. While other medias were stepping back, at
the beginning of the war, "Studio 99", on the contrary, was
achieving its biggest affirmation. However, this independent,
nongovernmental and nonparty orientation is exposed to all
kinds of pressures from the forces willing to oppress freedom
```

of speech. Thanks to strong support from our listeners, we managed to survive various attempts of elimination (from power-cuts, taking equipment by force, financial repressions and to all political pressures as well). It may be unnecessary to mention the devastation of the studio during artillery attack, intrusion and arrest of almost all staff members by unidentified paramilitary group, or wounding of our reporters. Our rejection of the triple national formula makes it understandable that our staff consists of all nationalities, for the simple reason of orientation toward capability of our workers.

In our programme we had a great number of our international colleges, from all well known world medias, and if you are interested about our programme orientation and independence they could be a valuable source. (RFI, CNN, Radio Stutgart...) On our radio there is 55 employees, students and intellectuals mostly, who preparing 24 hours daily programme. From the day the war started, we did not work for 12 days because of the already mentioned reasons, then in period of 17th of July till 15th of September 1993 because of taking the transmitter by force, by official state Radiotelevision Centre. "Studio 99" is now situated in a basement with very simple worn out equipment still working only thanks to enormous efforts of our technical crew.

As we are sure that, in our circumstances, we represent truly independent media, even a phenomenon of a sort, we are addressing to you, pleading for support in a way you find the most appropriate.

With respect,

Adil Kulenovic
Editor-in-chief

It seems to me that we're at the same stage of kids' radio that children's television has been at in the past (and still is in some places). That's the stage where there are so few outlets or opportunities that we have to discuss what "it" should sound like or consist of. Children represent as diverse a group as adults, and have the desire...nay, need...for the kind of variety we expect. I'd love to have radio available for my kids that had all the kinds of music you've mentioned, plus radio drama, news, talk, etc.

The children's music scene has certainly diversified and gotten more "substance" in the past few years. When I grew up, it was pablum...Now, there's such a great variety (glad to discuss specific favorites with anyone who is interested...). Perhaps we have Raffi to thank for it hitting the mainstream, but perhaps there's a marketing lesson in there as well. I'd be interested in some sort of exchange of information with the people in charge of marketing children's music.

A question from the technologically innocent -- I've read recently about radio shows being delivered via the Internet. Is this a potential market for children's radio (is "radio" even the correct term for material delivered this way?), since young people seem to be leading the adults in tapping into new technolgies? Is there a way to charge, or would our friends still be living in cars and dumps?

Bye for now...

Firstly, I apologise if this is the wrong group to post to.

I have a friend living in Russia who, together with some partners, is seriously considering setting up a local VHF FM station there. He has asked me to help him find a source of the necessary equipment (transmitter, antenna etc).

If anyone involved in the radio industry or elsewhere can offer any advice, it will be greatly appreciated.

Steve.

Source record: 41305

Just a few comments since I posted all of the part 73 for legal id's:

First, this was in a section that covered all station rules. Channel # can means TV channel, more than FCC channel # for FM. Rarely does anyone use the FCC designator, ie Channel 290, etc.

The FCC rules clearly state that the only thing allowed between the Call letters and the city of license is the frequency. Stating "This is WXXX, a BOB SMITH STATION, NEW CITY" is not a legal ID. You can add anything you want before or after, but not inbetween. Many stations use the "Q104 is WQDE Smalltown-New York , where Smalltown is the legal scity and they add the Big City after, which i s
also OK.

AS for IDing simulcast on two different stations, The ID rules apply. To ID WXXX AM & FM New City is OK. I do not believe that "WXXX 1230 and WTHR 90.9 New City is legal, if the call letters are different, as you are not following what the rule states. More correct would be WXXX 1230 New City & WTHR 90.9 New City. Also, I still do not beleive IDing at 10 before and running just a sweeper at the top of the hour is legal. At least it violates the intent of the law, if also not the spirit of the law. Until the FCC comes out with a strong do or don't type enforcement action, stations will still stretch it out.
Here is somehting we do: We tag our promos that run in NPR programming hours with an ID tag, ie Today at 5PM on WEOS Geneva. This makes sure we get ID's in each hour at the right time, in case an announcer forgets.

Glenn, I could not agree more with that assessment.

The flimsy argument of interference protection has been debunked by most logical minds who don't have a vested interest axe to grind. Today, stable, low wattage equipment is easily constructed at a very low cost. Licensing could easily be done and such stations would certainly brighten up the choices available to listeners as well as give a community voice to those without the multi-thousands of dollars to invest in the most minimal legal signal.

While I love broadcasting and while I cannot convict the industry of this as a whole, I believe it is patently obvious that the main (if not the only) reason that the FCC has refused to legalize micro-radio, while at the same time opening the flood gates to multiple-station ownership in the same market, allowing 'drop-in' stations in the fringes of existing services (most of which are just satellite-fed money machines with little or no local content or community service) and relaxing public service requirements, is that the existing corporate broadcasting structure likes the idea of having a monopoly interest in broadcast radio.

By keeping the financial and regulatory barriers high, the Commission is pandering to the high-powered broadcasting interests, and abandoning the public, who the airwaves supposedly belong to. Duopoly (the provision whereby a single entity may legally own up to 2 AM and 2 FM stations in a market) has been touted as a way to bring more money and therefore better programming to the airwaves. Can someone site for me examples whereby a duopoly purchase has significantly improved the quality of programming on the station(s) involved?

My impression is that duopoly is just a further eroding of the last crumbling ruins of the illusion of public ownership of the airwaves. The fact of the matter is, if you got big bucks you can acquire more

and more of the so-called 'scarce resources' of broadcasting.
Otherwise, you can go poop in your hat.

The multi-ownership restrictions of the past, were there to assure diversity in media. Not that it always worked that way, but at least you had different money-ships competing and vying for the listeners. Now, with the double-edged sword of duopoly and cheap, homogenized satellite feeds, more and more of our radio media is becoming little more than repeater stations for a handful of media corporate giants.

These Goliaths know that to lower the barriers to access to the airwaves would be tant amount to slitting their wrists, as the public gains (albeit limited) access to the same playing field that the Goliaths now enjoy near total control of, would force them to create a more innovative product, to work harder and to get off their complacent duffs, kick the bean counters out of the programming booth and start doing radio again.

If Micro radio did *nothing* else but to stem the tide of generic boring, sound-alike AC, Oldies, Classic Rock, and Hot Country jukeboxes, I would be in favor of it.

But no, we cannot have that. that would be a travesty. Imagine, someone without a multi-million dollar investment being able to create imaginative programming on the fly. Imagine the memos at Cap Cities when a 'new breed' of talk radio emerges. Yeah I know there would be some crap on Micro Radio too. There would be a lot of empty egos, bad music and worthless opinions.

Hey wait a minute, that sounds like the current state of Goliath radio today. Hmmmm.

Bill

I work as a technician at KRNA radio in Iowa City, IA.

I have been asked by my supervisors to feel around on the net to see
if anyone out there has recommendations on mac/pc based recording and
editing systems such as protools, etc.

I can't seem to find a FAQ or a comparison anywhere (using gopher), but I
know that this subject has been discussed at length here.

If anyone can direct me to a repository of information on professional
quality audio editing systems, or tell me your experience with particular
systems, I'll appreciate you forever, and summarize to the net.

I'd like to point out that this is for high-quality professional audio
production, so things like the mac AVs aren't what we're looking for.
We'd really AES/EBU digital input, a minimum of 44.1 KHz, stereo, as many
tracks as possible (in AND out). Other features are also certainly desireable.

Thanks!

Ryan Nelson (via AJ Bautista)

314. WKBR-AM 1250 back on air soon!

Newsgroup: rec.radio.broadcasting
Date: 1994-01-29 14:30:42 UTC
From: sid@acs.bu.edu
Message-ID: <2idrui$3u3@vixen.cso.uiuc.edu>
Source record: 41319

After going dark nearly two years ago, WKBR-AM 1250 in Manchester, NH, will soon return to the air. WKBR was recently purchased by Bob Bittner, a name some of you will recognize as the owner of WJIB-740 in Cambridge, Mass. WKBR had been in slow but steady decline through the 80's, thanks to overwhelming competition from two local FM powerhouses and the weakening NH economy. KBR, once *the* station in Manchester, had sunk to the depths of simulcasting some satellite religious from a station north of Manchester. After an onwership and format change, the station folded and went dark, until Bittner discovered it and decided to purchase it.

WKBR is a 5000-watt fulltimer on 1250 kHz, DA-2. The signal is medium grade, and poor to the south/southwest. WKBR must protect WARE in Ware, Mass., and WEZE, 1260 in Boston. WKBR utilizes a 46-acre site with a 5-tower array a few miles west of Manchester. The signal is excellent in greater Manchester (if there is such a thing) and is satisfactory in nearby Nashua, NH, and Concord, NH, the third and second largest cities in the state, respectively. At night, WKBR's pattern is almost a straight beam into the city proper. I am told the equivalent power on the Manchester plane (due east) is 18,500 watts, which gives you some idea of how quickly it fades in every other direction. The main transmitter is a 1986 Collins MW-5, and is in fine shape. The towers and transmission line is relatively new, all having been rebuilt in 1987. The backup transmitter is an early 50's Collins MW-5, which takes about 45 minutes to warm up but purs like a kitten once it gets going. Overall, the transmitting system is in decent shape. Bittner hopes to add an Optimod-AM processor to clean things up before he gets going.

Probably the biggest question on most peoples' minds is what kind of programming WKBR will carry. To better understand Bob Bittner's programming philosophy, it helps to know a little bit about WJIB. I am assuming that WKBR will modeled directly after WJIB.

Basically, WJIB is semi-automated. There is an announcer there during daylight hours (usually Bob himself), but save for some leased-time on Sunday mornings, the station plays continuous beautiful music from 60-minute cassette tapes. A typical hour on WJIB consists of this:

00:00-03:00 = USA Radio Network news
03:00-04:00 = 2x :30 PSAs
04:00-59:15 = uninterrupted beautiful music
59:15-59:50 = live weather update, announcer says "hello"
59:50-00:00 = legal ID

That's it. The only time the mic is open is for 35 seconds an hour. At night, WJIB drops from its daytime power of 250 watts ND to 5 watts ND, and the announcer goes home. All night, WJIB plays beautiful music from two hi-fi VCRs with 8-hour tapes. A timer trips a cart machine for the top hour ID.

That's it.

WKBR will most likely be a duplicate of WJIB, right down to the automation. Bob is toying with the idea of doing live rock and roll after sunset on WKBR, but that it still unresolved. He is building a small studio in one corner of the transmitter shed, however. (Original KBR studios were downtown; have been converted to other use...no studios included in purchase agreement.) Bob was looking into the possibility of a direct simulcast of WJIB, but STL was too far and phone lines too expensive and prone to problems. Off-air simulcast impossible at night. Most likely, there will be two VCRs in the WKBR transmitter shed, and they will originate most of WKBR's programming. Leased-time is still a possibility, as there will be no (to the best of my knowledge) sales or promotion staffs. It is unlikely Bob will hire anyone to work there, as he tries to run his stations in the most efficient manner possible.

Bob's programming philosophy is unique. He considers beautiful music a public service because he feels it helps to reduce tension and stress in peoples' lives, and that it occupies a niche in the market. The one-time WJIB-FM, which played beautiful music, was a solid contender in the market (Boston) for nearly 20 years, before it was sold and changed formats and calls. That's how Bob got the JIB calls for 740, and they enjoy tremendous recognition to this day.

It will be interesting to see what kind of reception WKBR gets in Manchester... At the very least, Bob loves what he's doing, and the station will be back on the air. I'll let folks know when it's back on.

Cross-posted to: rec.radio.broadcasting,chi.media

Does anyone know what happened to the rumors that Kevin Mattews (of Chicago's WLUP) was going to be syndicated to Milwaukee (or elsewhere)? I used to listen to him when he was on am1000, but since their change over to all sports I really haven't listend to the station, and can't hear the FM loop here (outa range and blocked by several large, or at least what milwaukeeans call large, buildings.)
If you have any suggestions as to which stations might make a good home for him please, let me know...THis is important to me because I can't stand the stupidity that the Milwaukee raadio stations let go over the air. I think that most of our morning shows are wannabe DJ's who never would make it in a Major Market. ie M.C. and those sports guys (93.3 WQFM) morning show is a couple of south side milwaukee guys who just happen to be in the right place at the right time to get on this show. But it is a pale immatation of Stern, Imus, Mattews, Don&Mike, or anyone for that matter. THis is what I would say is the BEST that Milwaukee has to offer for a morning show (All of that was IMHO).
There are several frequencies that are laying dormat (for all practical purposes) around town. One suggestion that was made to me was for a place on am1340 (am WLZR laser). But that station and it's FM sister where sold to another of the local (if you want to say) giants and most likely won't be utilized for a while because of the new PD is very slow on change.

Any thoughts, facts, opinions, would be appreciated.

Chris H.

WINGS - Women's news award
==========================

In March 1994, the Women's International News Gathering Service
(WINGS) will announce the winner(s) of the Katherine A. Davenport
Award for Women's News (DAWN), established in memory of that
journalist, who was also a founder of WINGS and an associate of
AMARC for many years. The prize will be awarded for the radio
piece judged to be the "hottest" women's news story of the
previous year. The coverage must deal with recent events or
previously unknown information. Entrants should submit their
stories on cassettes or open reels by February 2, 1994.

To obtain further information or enter your story, write to:
WINGS; Attention: DAWN; PO Box 33220; Austin, Texas 78764; USA.

/* ---------- "Alternative media in L.A." ---------- */
ALTERNATIVE MEDIA IN LATIN AMERICA
==================================

Representatives of 67 alternative and popular media meeting in
Quito, Ecuador, have agreed to form a Latin American network to
promote democracy and counteract the social influence and economic
domination of the mass media. Delegates agreed to share technical
and financial resources, exchange information via electronic
networks, and initiate joint training programs to improve the
quality and impact of their work.

They also drafted a declaration calling for protection of "the
right to communication" as an inalienable right of individuals and
communities and a "fundamental instrument of democratization". The
meeting was organized by the Latin American Information Agency
(ALAI), the Latin American Association of Educational Radio (ALER)
and the Exterior Center for Informative Reports on Guatemala.
Delegates said their job is made more difficult by privatization
and the concentration of the means of communication in fewer hands.
"The advance of transnational information companies, protected and
supported by free trade expansion, is attacking our national
identities and reaffirming the exclusive and monopolistic
concentration of the means of communication."

321. BBC radio in the Bay Area

Newsgroup: rec.radio.broadcasting
Date: 1994-01-29 18:45:28 UTC
From: calton@aol.com
Message-ID: <2ieas8$keo@vixen.cso.uiuc.edu>
Source record: 41330

Two I know of off the top of my head:

KQED-FM (88.5) carries a couple of hours daily of the BBC World Service at 9p (Newsdesk) and 1 or 2a. Signal should be strong enough to pick up easily.

KALW-FM (91.7) has a weaker signal, but carries MUCH more of the BBC World Service, including "Newsdesk" (daily 11a), "Outlook" (daily 3:05a), "World of Books" (Sunday 7p), "Science Magazine" (Thur 10a), and "Science in Action" (Wed 10:30a).

But the real big BBC block is their overnight service: Every night from midnight to 6a they broadcast the BBC World Service, SIX HOURS worth. If you can't pick up the signal, I seriously suggest checking out your cable TV connection.

The BBC overnight schedule is available by dialing up their BBS at 415/648-3246. A printed KALW guide (free) is available by calling Bill Helgeson at 415/695-5740. Tell 'em Cal sent you.

322. BBC in San Francisco

>Does anyone have a profile of the FM stations in the Bay area?
>In particular I'm interested in stations that carry BBC news
>and other programs.

KALW 91.7 carries much BBC and CBS programming. Also KQED 88.5 has some BBC Stuff. Both are affiliated with NPR and APR. I have been finding myself listening to KALW a great deal more lately. While there is much Blah Blah on both Kalw hold my interest for a longer period of time.

Both KQED @ 88.5 FM and KALW @ 91.7 FM carry some BBC stuff. Both transmit out of SF. KQED has the stronger signal. I don't know if either one reaches the South Bay.

324. Bob Bittner

A question on Bob Bittner: Do you know if we was involved at a station in Brockport New York back in the early 70's? The call sign at the time was WADD and was on 1560 daytime. The station is now at 1590 and has the call WASB and is a God Squad station.

In Toronto, CFMT-TV 47 carries CFTR (680 NEWS) on SAP when it is not otherwise using the SAP (both stations are owned by Rogers Broadcasting). CFMT, just two days ago, fired up their new relay transmitter here in Ottawa on channel 60, and I'm pleased to say that it also includes 680 NEWS on SAP!! I like the station because it is NEWS, and only NEWS. We have a NewsTalk station in town (580 CFRA), but they only have news on the hour during their talk shows. I like being able to tune in anytime for the latest news.

Some other stations I know with SAP's:

WXXI-TV 21 Rochester, NY carries WXXI-FM (National Public Radio)
WUTV-TV 29 Buffalo, NY carries a reading service
WKBW-TV 7 Buffalo, NY carries the same reading service
CITY-TV 57 Toronto, ON has program promos on SAP

These are all stations that I picked up one day in December when we had miraculous reception, although I can pick up WXXI and WUTV on occasion.

Am I straying off-topic?

In a previous article, mhd@world.std.com (Mark H David) says:

>Is there a reasonably priced computer-controlled tuner on the market?

Your question is kind of vague. What kind of bandwidth is the tuner expected to cover. Is the computer stand alone or of the PC sort. There are readily available VHF/UHF scanners on the market.

Title 47 still requires that stations maintain a presence in their city of license. Most recently, the FCC has interpreted that to mean at least one management personal and one programming person at that location during regular business hours. Those two positions can actually be the same person. So, minimum requirement: one office (complete with public inspection file, of course) and one employee 9-5 M-F.

329. 80's Music - New Format?

Newsgroup: rec.radio.broadcasting
Date: 1994-01-29 18:45:44 UTC
From: at403@yfn.ysu.edu
Message-ID: <2ieaso$kf8@vixen.cso.uiuc.edu>
Source record: 41336

Our station, "Impact 89FM" (WDBM, East Lansing MI) has a show on Friday nights called "The 80's at Eight," which has become very popular. Basically, the playlist consists of hits of the 80's (Culture Club, Prince, Wang Chung, all that stuff) as well as some earlier disco stuff. The other "alternatvie" station in the market seemed to pick up on this and now plays 80's music for a good part of its rotation.

I'm wondering--are there other stations that do this? Are there any "full-time" 80's-playlist stations? I'm wondering if we're looking at a potentially new format--not really oldies, but certainly not current music either.

Comments?

Please supply your call letters and location for forwarding on to Roy Stewart,
chief of the Mass Media Bureau. Unless he has retired and a successor has
implemented a different policy, he is *on record* as stating that what you'
are describing above is NOT LEGAL. A segue is not considered to be
programming without a natural break. The Rule as designed, is to provide for
continuous presentations of LIVE programming, or pre-recorded programs
of other than the standard 3-5 minute musical selections.

I assure you ... I heard it with my own ears. I have it on tape from the
Atlanta NAB convention. What you suggest above is playing with fire.

Sincerely
barry

I actually spoke to an FCC inspector about this very question at an SBE conference and he was definitely of the opinion that a station can be cited if they arrange their programming to cover the top of the hour on a regular basis. His official interpretation was that waiting until a "natural break in programming" referred to live events that cover the top of the hour or the occasional Mahler symphony, say, that goes beyond one hour in performance time. He was quite specific that regular programming contrived to cover the top of the hour without legal ID was *not* legal. You might contact the FCC for further clarification. Please post what you find out.

COLOMBIA: Radio journalist Jesus Medina Parra killed by
unidentified gunman

Originator: Inter American Press Association, Miami, news reports

An unidentified gunman shot radio newsman Jesus Medina Parra on
January 28 while he was on his way to work at a radio station in
the border city of Cucuta, 250 miles northeast of Bogota. Parra
died hours late in hospital.

New reports said that Parra was shot three times in the head
outside the radio station where he hosts a morning talk show.
Police said the assailant escaped on a motorcycle. The motive for
the killing was not known.

In the same city last March, a leftist rebel group shot dead
Eustorgio Colmenares, the publisher of Cucuta's main newspaper, "La
Opinion." Since October 1988, 47 Colombia journalists have been
killed, making it the hemisphere's most dangerous country.

RECOMMENDED ACTION:
Please send appeals to the Colombian authorities urging a thorough
and impartial investigation into the killing of radio journalist
Jesus Medina Parra on 28 January by an unidentified gunman in
Cucuta; request that the findings be made public and that those
```

responsible be brought to justice.

I agree that a licensed approach would be great. It would afford protection for
the larger stations and at the same time, protect the microradio stations.
WE all remember class D FM. I still have my doubts on these "stable kits".
I think if the FCC grants a clss of broadcast, it may be back to type accepted
equipment and low power radio will be priced out of the market again. I like the
frequency coordination scheme, having set power limits on certain frequencies
,
for licensed operators, with equipment that will work. THis would allow all
to benefit, and at the same time serve the public. I am not a fan of "drop ins"
especially, since some are no being used locally as Bill describes, but are
being gobbled up by religous interests. This is FAR WORSE than satellite fed
churned out formats. I have strong concerns on interference caused by micro-
radio to existing stations. I think this is evidenced by some of the
broadcasters who have already done this. Perhaps with an FCC green light and
some regulation, a reasonable compromise can be reached.

In a previous article, bautista@icaen.uiowa.edu (Antonio J Bautista) says:

>I work as a technician at KRNA radio in Iowa City, IA.
>
>I have been asked by my supervisors to feel around on the net to see
>if anyone out there has recommendations on mac/pc based recording and
>editing systems such as protools, etc.
>

Well, I would suggest to call NPR radio productions in Wahsington
DC. I was in there working for one day, as well as working at the
Smithsonian Institution on Sonic Stations. All the production work was for
radio - so I know where you are coming from. In particular - I worked on
Folkmasters - national radio program that gets aired on APR radio. I was
working as an intern at the time - and have had lots of experience with the
Sonic Systems before hand. I feel that Sonic proves that it works very
well for radio production.
The prices on the Sonic Systems are coming down in prive do to
Sadie and other manufacturers competint in the market. The system that I
feel that is most useful from Sonic Solutions (the company that makes
Sonic), is the Quattro Sonic System. THis system has 2 channels ins
(adaptable now for more), background loading and unloading, network
capabilities (more than one workstation can work on the same audio file),
effects, and automation. If you would like more info - email me and I'll
tell you more either via email or voice.

>
> 1. What types of SIGNAL PROCESSORS/EFFECTS are typically used in FM radio?
There is some variance, but the most common since about 1977,is the Orban Optimod 8000, , 8100 etc. This is an integrated compressor/limiter/ stereo generator.

> 2. What are typical compressor settings (ratio, threshold, attack, etc..)?
"compressors" are generally set pretty fast attack, slow release, the rest depend upon the taste of the Chief engineer or Program director.

> 3. How does an "exciter" do it's exciting?
The standard Exciter is really a complete low-power 10-50W transmitter, with the "transmitter" actually being an amp. Aphex makes what they call an aural exciter that generates even harmonic energy (audio) and mixes it with the program material...this is really an effects box.

> 4. Is there actually a difference between a compressor and a limiter?
the basic difference is attack/release time and comp ratio... the limiters typically are faster, and have a steep "brickwall" ratio.

> 5. I've noticed a "fuller"-than-normal (wider stereo response coming from FM
> stations compared to music found on my CD's at home). How is this
> acheived? By utilizing processors mentioned in #1?
This "bigger and bolder" sound is usually created by matrixing L,R to get L-R (which is the amount of separation) L+R which is the compatible mono signal, and then dynamically process the L-R, with re-insertion into another matrix to get L,R.

337. Maintaining station facilities in city of license

Newsgroup: rec.radio.broadcasting
Date: 1994-01-29 18:46:02 UTC
From: hhallika@tuba.aix.calpoly.edu
Message-ID: <2ieata$kiq@vixen.cso.uiuc.edu>

73.1125 requires stations to maintain a "main studio" within the
station's principal community contour (5 mV/M daytime contour for AM) as
defined in 73.24(j), 73.315(a) and 73.685(a). Various exceptions are
available. The most common one is to allow the location of an FM studio
at the AM studio/transmitter of a co-owned AM.
Although I do not find it in the rules, it appears to be FCC
policy to require a main studio to have program origination capability
and a full time staff presence.
An excerpt from the February 9 Insight On Rules in Radio
World...

Main Studio

An FM station in Red Bluff, CA was fined $10,000 for not
maintaining a "main studio" within its 3.16 mV/m contour. (7 Fcc
Rcd No. 16, page 4860) The station had asked the FCC to allow
the studio move in 1990, and the FCC denied the application. The
station asserts that a "main studio" maintained in the community
of license had program production and transmission capablities,
but the FCC did not find these capabilities present during an
inspection. The station also asserted that the auxiliary studio
WAS within the 3.16 mV/m contour, so even if the "main studio"
were to not comply, the auxiliary studio would. The FCC replied,
"It appears that having been unsuccessful in obtaining Commission
permission to locate your main studio in Chico, you nevertheless
relocated it to that community, and when discovered, rely on the
same arguments previously rejected."

The AM is WBIG AM1280, the FM is WYSY FM107.9. The AM was sold to
Jakle Broadcasting of elgin, Owners of WRMN, WJKL, The FM was sold to
Cox Enterprises, Owners of 12 stations nationwide, including WCKG
here in chicago.

>
> 2- that the studios are being moved downtown, but that they are(read: have

> are licensed?

Ain't the FCC wunnerful, you can move the studios and the sales
office, but ya gotta keep an office in town. The transmitter for
the FM is in Bloomingdale, and because the signal isn't city grade
1.0mw over the studio site you gotta keep an office in the city of
license. If we did have a city grade over the studio then we could
just keep the public file in the city of license.

339. Vintage radio info please

Newsgroup: rec.radio.broadcasting
Date: 1994-01-29 18:46:04 UTC
From: steve@info.pgh.pa.us
Message-ID: <2ieatc$kjc@vixen.cso.uiuc.edu>
Source record: 41343

Fellow NetNewsers,

I picked up a vintage radio at an auction this evening and was wondering if anyone could help me out with some info.

The unit is an AM/FM radio with a phonograph (the auctioneer called it a "stereo", but it had but one speaker, silly auctioneer). The reason I bought it was the nice mahogoney (sp?) case, which I figure I'll gut and make into a nice free-standing flip top bar.

What I'm wondering about is the FM radio. The scale goes from 200-300, rather than the current 88-108. What gives? Was this the FM broadcast band at one time? Any idea as to the vintage of the beast given the above?

The phonograph has no obvious speed control, and plays largish records (about the size of 33s?), and seemed to have a stacker/dropper if that is of any help.

I'll appreicate any info you folks can give me re: the FM scale and relative vintage of this beast. Bonus points will be awarded for telling me something about the phonograph.

Steve

Sedge Thomson's West Coast Live
San Francisco's Live Radio Show to the World

January 25, 1994

State of the Show Address

My Fellow Audience;

West Coast Live airs live in the San Francisco Bay area Saturdays on KALW 91.7 FM, 10 a.m. to Noon, following KALW 91.7's 9 a.m. broadcast of Car Talk. The local rebroadcast is at 8:00 p.m. on KALW 91.7 FM. The show is uplinked to the National Public Radio (NPR) satellite, so other NPR stations have an opportunity to broadcast the show. Call your local NPR station and ask them to broadcast the show.

Our Email Server is Up and Running:

You may subscribe to West Coast Live's mail list. For instructions, send a note to;

West_Coast_Live-Request@netcom.com

Here (hear) is the upcoming schedule as we see it now;

January 29th (THIS SATURDAY);

Yes it's true, I'm not making this up, I wouldn't joke about this, Dick Dale (King of Surf Guitar) and the Deltones! Ya! Bring your surf boards, wet suits, and zinc oxide to this show.

S. Kwaku Daddy, master percussionist.

Carl and Karl (or is it Karl and Carl?), with travel tips for people with too much free time.

Nguyen Qui Duc, author of "Where the Ashes Are: The Odyssey of a Vietnamese Family".

February 5th;

Five Year Plan, passionate folk rock. This is my favorite local band. This group includes David Brian (vocals, guitar), Klaus Fluoride (bass, vocals), Robert Davis (drums) and Nancy Balemi (vocals, guitar synthesizer.).

Brother Guy Consolmagno, astonomer for the Vatican observatory.

Claire Peaslee, passionate naturalist.

February 12th;

The Mermen, San Francisco's premiere surf band.

Danny Ferrington, Guitar maker to the stars.

David Cale, performance artist.

February 19th;

Zydeco Flames, Cajun roots music.

Nikki Govanni, poet and author or "Racism 101".

Ethan Canin, author.

Nancy DeRoss, singer/guitarist/songwriter.

Guitarists Henry Kaiser and Knut Reiersrud.

February 26th;

San Francisco Symphony Chorus, This Grammy award winning group, with West Coast Live's own Cynthia Hobgood, will feature music from Carmina Burana.

Francis Wong and the Great Wall, music group.

The live show takes place on Saturday morning 10:00 a.m. to Noon, at Fort Mason (San Francisco) in the Cowell Theater, which seats approximately 400 people. There's plenty of free parking, free samples of Stan's Cheesecake, and moderately priced coffee. We occasionally sell every seat, so we encourage you to reserve your seat in advance.

341. Welcome To rec.radio.broadcasting/AIRWAVES Radio Journal (1-29-94)

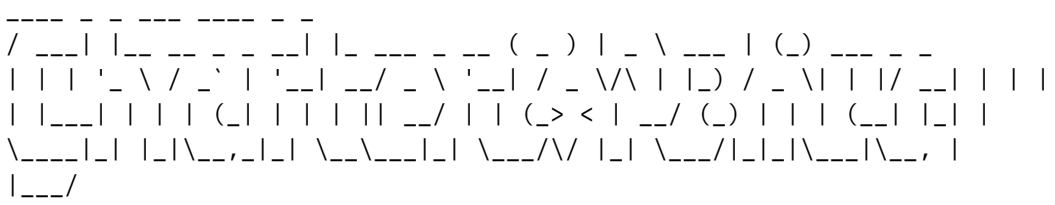
Newsgroup: rec.radio.broadcasting
Date: 1994-01-29 23:30:51 UTC
From: rrb@radio.aiss.uiuc.edu
Message-ID: <2ierjb$e0m@vixen.cso.uiuc.edu>
Source record: 41341
Cross-posted to: rec.radio.broadcasting,rec.radio.info,rec.radio.shortwave,rec.radio.noncomm

Hello:

Here is the most recent help/introduction file for AIRWAVES Radio
Journal and the Usenet newsgroup, rec.radio.broadcasting.

Comments are welcomed. Send them to...

info@airwaves.chi.il.us...



This document was last updated on 12-27-93.

Read rec.radio.info and rec.radio.broadcasting for further updates on
this file. This file will automatically be updated as news warrants.

Greetings:

The AIRWAVES Radio Journal (Formerly published as the Internet
Radio Journal) is a periodic email digest dedicated to
discussions about all facets of domestic broadcast radio.

Subscriptions to Airwaves are free, and available to anyone who wants
one, and who is equipped with Internet (or Internet gatewayed)
email service. While the subscription is free, some commercial
systems may charge a small fee for reading Internet email.
Currently all major email providers have Internet access to one
degree or another. Check with your local provider for details.

To subscribe to AIRWAVES, send mail to the Internet mail address of
- subscribe@airwaves.chi.il.us -

In addition, all articles in AIRWAVES are ported to and from the
Usenet newsgroup rec.radio.broadcasting (r.r.b) which was founded
in April of 1992, as a means to further discussion of topics
pertaining to 'domestic broadcast radio'.

By domestic, we mean broadcasts which are intended, primarily,for
reception in the same country/nation in which they originate. AIRWAVES

and rrb, are international in their scope, and the term 'domestic' should not be taken to imply 'USA' or even North American. Readers in other nations are encouraged to participate.

```
____ _ _ _
/ ___| _ _| |__ (_) ___ ___| |_ ___
\___ \| | | | '_ \| |/ _ \/ __| __/ __|
___) | |_| | |_) | | __/ (__| |_\__ \
|____/ \__,_|_.__// |\___|\___|\__|___/
|__/
```

If it has to do with broadcast radio, and not _specifically_ international shortwave, it is welcome here. Occasionally an article which IS primarily about shortwave will be posted if the subject seems broad enough that the readership of AIRWAVES/rrb might be interested, or be able to assist the poster in some way.

Generally, if a subject 'seems' like it would be of interest to the broadcasting community (which includes those involved in creating, transmitting or listening to broadcast radio) will be published. These subjects include (but are not limited to)..

1) Formats and programming.
2) Engineering & technical matters and interests.
3) DXing (long distance reception) on the standard broadcast bands.
4) Community broadcasting.
5) Pirate broadcasting (especially non-shortwave, domestic pirates).
6) Legislation affecting the industry, and its 'offspring' industries.
7) Technologies affecting the industry, and its 'offspring' industries.
8) General station information. Who is going on and off the air, and why.
9) Radio's historical and cultural significance.
10) Radio's current and future trends.
11) Political and news coverage and its impact.
12) Job openings and help to those seeking work in the industry.
13) Information on equipment and techniques involved in transmission and reception of broadcast radio signals.
14) The International Scene and how broadcast radio is shaping up in the various nations of the world.
15) Gabfesting and all matters of general interest to those involved in, or interested in, the general subject of domestic radio broadcasting.

```
_ _ _____ ____ _
| | | | _____ __ |_ _|__ | _ \ ___ ___| |_
| |_| |/ _ \ \ /\ / / | |/ _ \ | |_) / _ \/ __| __|
| _ | (_) \ V V / | | (_) | | __/ (_) \__ \ |_
|_| |_|\___/ \_/\_/ |_|\___/ |_| \___/|___/\__|
```

1) Post via rec.radio.broadcasting as you would any other Usenet group. Your articles will find their way to AIRWAVES as well.

2) Email your article directly to articles@airwaves.chi.il.us. Using other addresses to post will needlessly delay your article. You might

consider installing an alias in your mailer for emailed articles,
especially if you post a lot of stuff. See the end of this file
for all applicable addresses.

```
____ _ _ _ _
/ ___|_ _(_) __| | ___| (_)_ __ ___ ___
| | _| | | | |/ _` |/ _ \ | | '_ \ / _ \/ __|
| |_| | |_| | | (_| | __/ | | | | | __/\__ \
\____|\__,_|_|\__,_|\___|_|_|_| |_|\___||___/
```

* If you post a question that is of potential interest to others in
the group, ask that replies be posted, instead of emailed to you.
We all would like access to the answers. If you do receive email
replies, post a summary to the group. This forum is only as good as
it's posters and readers. Keep the info flowing.

* If you email an answer to a question, send a Cc: to the group's
submission address, articles@airwaves.chi.il.us, so we can all learn
from your knowledge. When id doubt... POST POST POST! :-).

* PLEASE edit quoted text to a minimum! Most users of this
group are fairly regular readers and do not need, or want, to read the
entire text of a recent article in every reply. Of course, if the
thread is not current, more quoted text may be appropriate. Use
your brain (and your editor :->).

* If your message is basically a one or two line "Me Too" or "I disagree"
post, consider emailing it to the poster. However if you go into
some details as to WHY you agree or disagree, then please post it.

* If you are replying to an article in the Airwaves Radio Journal,
simply use your mailer's reply feature, and again, edit the text to
ONLY the article you are replying to, and include the article's name
in the Subject field. Subjects of "Re: Airwaves Radio Journal" are
confusing and may result in needless delays.

* If you post about a local radio station or personality, realize that
most of the readers will know little or nothing about it.
Offer a little background, like location, station format, type of
music played etc.

* Last but not least, avoid flames and personal insults. AIRWAVES/rrb has
a high percentage of broadcast professionals among it's readers. We
try to maintain a reasonably high brain to B.S ratio here.
It is fine to disagree, but please stick to the issues and avoid
personal flames. If you *must* make personal attacks, do it in email.

```
_____ _ _ _ _ _ ____ _ _
| ____|__| (_) |_ ___ _ __(_) __ _| | | _ \ ___ | (_) ___ _ _
| _| / _` | | __/ _ \| '__| |/ _` | | | |_) / _ \| | |/ __| | | |
| |__| (_| | | || (_) | | | | (_| | | | __/ (_) | | | (__| |_| |
|_____\__,_|_|\__\___/|_| |_|\__,_|_|_| |_| \___/|_|_|\___|\__, |
|___/
```

AIRWAVES and rec.radio.broadcasting, are _very_ loosely moderated. Normally, all legitimate articles will be posted to the group. However, the moderator/editor reserves the right to edit or refuse any copy for any reason. Please note that it is not routine practice to edit or to otherwise modify articles. Usually such editing is limited to excessive .signatures and in some cases overly quoted text. On rare occasions, a brief (less than 6 lines) "Moderator's Note" may be appended to an article for clarification or other reasons. These appends are kept to an absolute minimum and are always placed after the poster's signature or (*very* rarely) at the beginning of a post. Spell checking is often done, when time permits.

Matters that may cause an article to be rejected, include...

* Articles which are not on (or reasonably near) the stated charter and scope of the group (domestic radio broadcasting) or pertain to 'non-broadcast' radio services, such as cellular, two-way, ham, citizens-band, and such.

* Articles that are too long for submission as-is. If your article is longer than 10k (10,000 bytes), consider splitting it into two parts, or better yet, edit it down to a more reasonable size. Check to see if you can eliminate any quoted text. If you believe that your article is of an especially urgent or informative nature, and you also feel that you cannot reduce the size without damaging the content, let me know and I will try to work with you.

* Articles which are merely multiple repetitions of an identical answer which has already been offered several times. Often these will be bundled together into a single article to conserve bandwidth and increase readability.

* Articles which contain 'miles' of quoted and multiple quoted text followed by a few lines or less of original text. Please edit quoted text to a minimum and try to adhere to the *50% rule*, that is 51 (or more) percent of original text to 49 (or less) of quoted text. If the thread is not current, more quoted text is appropriate. Only the worst offenders are omitted, usually I will edit quoted text myself, when I have time.

* Articles that solicit for funds or contain blatant commercial content. (see next section on this)

* Articles which are unwarrantedly offensive, abusive or contentious for the sake of contention. Personal attacks and ridicule are considered such. Discussion, even argument, of issues and opinions are welcomed and encouraged. However, we have discussions here, not shouting matches.

Note: All articles are auto-replied to as they arrive, to indicate that we have received them. Each piece of mail to the submission address(es) will generate a separate auto-reply message. Most articles which appear reasonable and on topic are published in the Journal/newsgroup. However the Editor/Moderator reserves final judgment on matters of acceptance or rejection of submitted material. When possible, rejected submissions will be returned with a note

explaining why the submission was rejected.

* * * * * * *

Articles which appear to blatantly solicit funds from readers
for a 'cause' or a 'project' are generally rejected.

I generally * DO * accept..

o Product reviews: ... provided they are objective and informative and contain
little or no 'motivational' language. Prices should be reduced to a
price 'range' and all inquiries must be directed to the poster -or- an
address of the manufacturer/distributor.

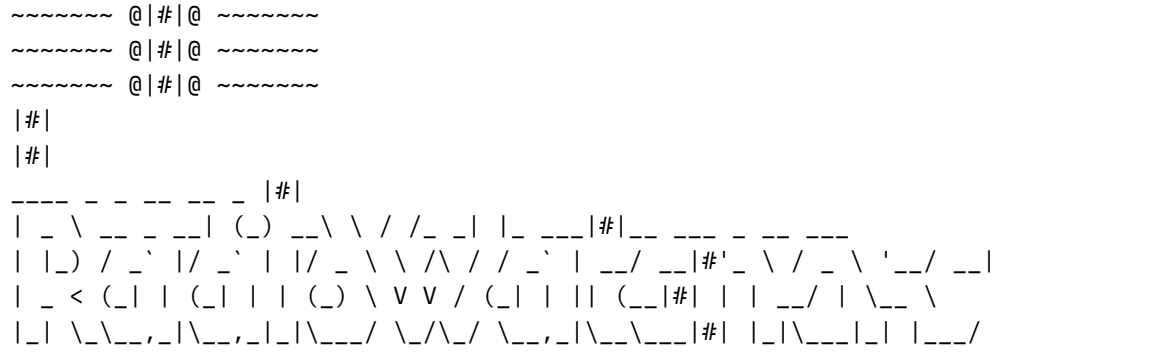
o Personal items: Such as old time radio tapes, a specific piece or two of
equipment etc. sold at a low, hobbiest price.

o Radio-related items for barter/trade: Self explanatory.

o Announcements for non-commercial workshops, conventions, radio related
flea-markets, etc. Pricing <other than small admission charge> and other
specifics (like 'we take your credit card') are considered commercial
content. If you want to publicize here, then you must deal with the
followup mail/calls yourself.

o Personal recommendations of a product/company that appear legitimate.
Especially when it is in response to another poster's inquiry.

In general I will take an 'err on the side of permissiveness' approach to
this. In other words, if your article is credible, informative, reasonably
intelligent, broadcast related, and has something to offer, I will do what
I can to pass it along to the readers. I will only reject the worst of the
lot. the rest I'll try to edit as necessary.



AIRWAVES has a program called RadioWatchers, which is open to any
readers who are interested. Basically RadioWatchers are volunteer
staff reporters who write about the goings-on in their market or area.
RadioWatchers differ from regular posters in that they are considered
part of the AIRWAVES organization, are given priority placement in
the AIRWAVES Journal.

RadioWatchers are expected to maintain at least one posting per month,
more as news warrants. For a complete file on the RadioWatcher
program, send email to radiowatcher@airwaves.chi.il.us and tell us
about yourself.

|_|
```

Archives of past Airwaves Radio Journals are kept for anonymous FTP at
the Internet site radio.aiss.uiuc.edu . They can be found in the
directory /misc/rec.radio.b-cast. In that directory you will find several
sub-directories. They are plainly labeled INTERNET_RADIO_JOURNALS
(which contains most issues through 399) and AIRWAVES_RADIO_JOURNAL
which contains issues 400 to present. The Journals are arranged in
sub-directories of about 100 issues each. In each main sub-directory
is a file called 00-INDEX, which contains the issue numbers of all
Journals, and the title of each article contained within. The
dated every week or so. To determine when the last update was, look
at the date on the file called "<-Archive Last Updated At".

If you need help with FTP, write me.

Journals are in Unix compress (.Z) format. The Unix compress
utilities are available free from many FTP sites for Unix, DOS and
Macintosh platforms. Remember that compressed files should
always be sent using the "binary" mode. If you have trouble accessing
anything, or if you have any questions about the archives, send email
to rrb@radio.aiss.uiuc.edu. If you appreciate the archives, send
your notes of appreciation to the site admin, C. Lance Moxley
<lance@radio.aiss.uiuc.edu>. He has been very gracious in his
willingness to store our archives on his machine.

```
____ _
/ ___| ___ _ __ | |__ ___ _ __
| | _ / _ \| '_ \| '_ \ / _ \ '__|
| |_| | (_) | |_) | | | | __/ |
\____|\___/| .__/|_| |_|\___|_|
|_|
```

You may access the archives via gopher, if your site is so equipped.
Gopher is a very fast, easy, menu-driven system requiring no remote
logging in, and which will deliver the issues in uncompressed form, as
well as permitting you to read or scan the files before downloading

them to your host system

To use the gopher system, type the following at your shell prompt...

gopher radio.aiss.uiuc.edu 7070 <return>

... then follow the simple menus. It is really easy. If you can use
a mailer or news reader, you can easily use gopher.

```
_____ _ _
| ____|_ __ ___ __ _(_) |
| _| | '_ ` _ \ / _` | | |
| |___| | | | | | (_| | | |
|_____|_| |_| |_|\__,_|_|_|
```

We are in the first stages of building an email archive server for
AIRWAVES. Currently you may obtain this help file and the INDEX files
for either the Internet Radio Journal, -or- the AIRWAVES RADIO JOURNAL.
You can also send for the file -COMMANDS-, which is updated as new
features are added. To access these servers, send email ti the
archive site address <rrb@deja-vu.aiss.uiuc.edu> with one of the
following commands as the SUBJECT of your message. The body of the
letter is ignored by the server but is scanned by me periodically.

** COMMANDS **

HELP - - - - - - - - Sends the latest version of the file you are reading now.
INDEX IRJ - - - - - Sends the 00-INDEX file for the Internet Radio Journal.
INDEX AIRWAVES - - - Sends the 00-INDEX file for the AIRWAVES Radio Journal.

```
__ __ _ _ ___ _ _ _
| \/ |___ __| (_)__ _ | __|_ ___ __ | \| |_ _ _ __ | |__ ___ _ _ ___
| |\/| / -_) _` | / _` | | _/ _` \ \/ / | .` | || | ' \| '_ \/ -_) '_(_-<
|_| |_\___\__,_|_\__,_| |_|\__,_/_/\_\ |_|\_|\_,_|_|_|_|_.__/\___|_| /__/
```

Send ALL requests to rrb@radio.aiss.uiuc.edu

A poster has supplied us with a three part file of media fax numbers.
You may obtain them via the usual FTP or Gopher means, or via the
email server. Follow above directions, but put one of the following
commands in the Subject of your mail. We take no responsibility for
the accuracy or currency of the information. One file request
per letter. If you want all three, send three pieces of mail.

FAXDIR-1 - - - - - - Organizations beginning with letters A - H
FAXDIR-2 - - - - - - Organizations beginning with letters I - M
FAXDIR-3 - - - - - - Organizations beginning with letters N - Y

Soon we will be expanding this service to permit email access to the
entire archive site. Stay tuned for further developments.
Remember that only mail addressed to the archive
address will be processed by the server.
- rrb@radio.aiss.uiuc.edu
-

-=*=- ENJOY THE GROUP! -=*=-

I hope you enjoy the group. Remember, it is only as good as it's contributors. So don't be shy :-). If you have a question, or answer, even if you are not sure, post - post - post.

I am open to suggestions on how to improve this group. Send them via e-mail to wdp@airwaves.chi.il.us -or- rrb@radio.aiss.uiuc.edu.

Thanks to all who have, and continue to, participate.

We now return you to your regularly scheduled newsgroup :-).

Source record: 41347

Hi everyone, this is an interesting market to keep an eye on...I recently heard saw a few things on it...thought I'd pass them along.

WRNX-100.9 FM Amherst, Mass.: filed a CP to change 1340w, 692ft. RNX currently uses a slightly higher power (forget exactly what) from something like -300ft HAAT. The signal is awful. I believe they are moving to the WAMH site, atop a hill about 2 mi. E of Amherst proper. This will help tremendously. Cuurenlty, they are a tough catch anywhere outside of Amherst.

WNMH-91.5 FM Northfield, Mass.: This station is stuck in the middle of one of the worst non-comm areas outside of a major market. A first adjacent, WGAJ-91.7 FM Deerfield, is 11 mi. south. GAJ has 100w from 315ft, and causes considerable interference in the southern reach of NMH's signal. There is another 91.5, WMHC, just 26 miles south. Then there's 91.1 WMUA in Amherst, 17 mi. south. To the west, there's WRPI 91.5 FM, and although they are 79 miles away, their 10000 watts has been known to make it into the Connecticut River valley. Since going on the air in 1984, NMH has been plagued with signal problems. They are licensed for 235w horizontal only from -309 HAAT. The -309 converts to about 79ft above ground, enough to cover the campus and a 2.5 mi radius. But the school has two campuses--the other is 5 mi southwest of the transmitter. The 2nd campus is much higher above terrain, which means that it not only gets NMH okay but also takes a pounding from GAJ, which is line of sight south. In order to better serve the other campus, NMH has filed a CP to increase to -272, an increase of 37 ft above ground. Originally, there was a plan to increase ERP to 600w, but that appears to be on the shelf. NMH has considered other possibilities, too...freq change, different antenna system, translators, change in xmtr location...none appear feasible. Look for GAJ and MHC to raise hell, maybe even RPI, too. Although GAJ was on first, they supposedly signed an agreement with NMH to take steps to prevent interference. However, there have been times when GAJ has appeared to be operating outside of licensed parameters. Also, I'm told the signed agreement has been declared null and void. What a mess. I'm curious to see if the FCC approves it.

WNNZ-640 AM Westfield, Mass.: recently filed a CP to change to 50000w/15000w, DA-2. NNZ currently uses 1000w nighttime. The 50kw daytime does very well. Too bad most of it is satellite talk...

CALLS UNKNOWN 1270 AM Springfield, Mass.: rumor has it this is back on after being dark for awhile. I'm not even sure the freq is right...Scott, can you expand on this?

WHYN-560 AM Springfield, Mass.: was hit up late last fall for $15,000 by the FCC for failure to comply with EEO laws. Ouch! (I believe co-owned FM was found in violation as well...fine is total for both stations.)

Haven't heard anything from the latest book, but will look into it...

343. Houston Fall Arbitrons

Newsgroup: rec.radio.broadcasting
Date: 1994-01-31 03:57:02 UTC
From: "chip (c.d.) kelley" <chipk@bnr.ca>
Message-ID: <2ihvie$eqb@vixen.cso.uiuc.edu>
Source record: 41348

>From the HOUSTON CHRONICLE, here are the Houston Arbitrons. They include rankings for non-commerical stations KUHF-88.7, KSBJ-89.3, and KPFT-90.1. I know a couple of years ago, KUHF paid Arbitron to rank them for a quarter. The CHRONICLE doesn't explain why Arbitron has apparantly ranked these three this time around, since Arbitron doesn't normally rank non-commerical outlets.

1 KILT-FM hit country "FM100 KILT" 6.3 pretty low for KILT-FM
2 KKBQ-FM/AM hit country "93Q Country" 5.7 overtakes KIKK-FM as #2 country
3 KODA soft AC "Sunny 99.1" 5.4
4 KQUE soft AC/MOR "FM103 KQUE" 5.3 highest numbers/ranking
5 KRBE-FM/AM top 40, modern nights 4.9
6 KBXX urban "97-9 the Box" 4.7
KIKK-FM country "Kick" 4.7 pretty low; usually overall #2
8 KMJQ urban "102 Jamz" 4.6
KTRH news/talk "News Radio 740" 4.6
10 KHMX adult top 40 "Mix 96.5" 4.5
11 KPRC talk 4.3
12 KLDE oldies "Oldies 94.5" 4.2
13 KHYS urban AC "Y98-5" 3.9
14 KZFX classic rock "Z107.5" 3.2
KLOL AOR 3.2 pretty low; usually near top 5
16 KSBJ contemporary christian 2.2* non-commercial
17 KQQK Tejano "Tejano 106" 2.0
18 KKRW clx rock-oldies "Arrow" 1.9 debut of KKRW; down from 2.7 KLTR
19 KKZR SMN Z-Rock "Z-Rock" 1.8
20 KUHF classical, NPR 1.7* non-commerical
21 KCOH urban, black talk 1.5
KSEV talk "Super Talk Radio" 1.5
23 KLTN Spanish AC "Estereo Latino" 1.4
24 KXTJ Tejano "Super Tejano 108" 1.0
KLAT Spanish "La Tramenda" 1.0
26 KRTK/KRTS classical "K-Arts" .9
27 KLVL Spanish .7
KXYZ Spanish .7
29 KEYH Spanish .6
30 KIKK clx country, country // FM .5
31 KPFT Pacifica .3* non-commercial
KILT clx country, country // FM .3
KNUZ news, talk .3

KKRW "Arrow 93.7"'s debut wasn't that spectacular. Although, it is not as bad as the debut in Dallas (KRRW debuted with a 1.4, down from a 3.1 as soft AC KLRX).

This is the first time Beaumont/Port Arthur move-ins KLTN-93.3 and KXTJ-107.9 have cracked a 1.0. KLTN and KXTJ followed KHYS in making the 90 mile move.

The Spanish FM's still have yet to make the impact in Houston as they have in other big Spanish markets like LA (where KLAX is #1 again) and San Antonio (where KXTN-FM/AM is #2, down from #1).

See _Billboard_ a few weeks ago; they did a cover story on the fragmentation
of modern rock radio. What you're describing would be 'classic modern rock' -
a heavy dose of 80's bands with some new music added in. They mentioned
KDGE/Dallas and Jacobs' "The Edge" format as examples.
The other types, i believe, are 'heritage modern rockers,' what i call 'top
modern rockers' - stations with tight playlists are heavy rotations, and
'modern leaning top 40's/CHR's.'

I belive you have it the nail on the head. I think the early '80s rock is what Generation X wants to hear. I am not aware if any specific station is doing just early '80s, but certainly some of the alternative stations have expanded their playlists to include this music. Many Top-40 stations are branching out to pick up some of the 'classic' early 80s stuff.

One neat format I've heard recently. Our Top-40 station here in Greensboro (WKSI - 98.7 Kiss FM) is experiencing with a 'Time Warp' format. Every so often, the station announces a 'Time Warp Weekend'. During that weekend, they play just about anything that is requested. You'll hear Disco back to back with Feelings (although the DJ usually gags when he plays it). It also comprises a lot of early 80s stuff. (ie Flock of Seagulls, Berlin, Wang Chung, etc). It is really neat when it works and down right horrible when it fails.

But - getting back to the topic - the early 80s format will do nothing but gain acceptance over the next 5-7 years. I look forward to it!

Cheers

Matthew [WMAG-FM - Greensboro/High Point/Winston-Salem NC]

I think it's a great idea for a format. The 'modern rock' station
here has an 80's at eight thing too on week nights. Being in my
early 30's, the late 70's and early 80's were my high school/early
college days. Aren't those the days that everyone likes to hear
songs from? My age is at the tail end of the baby boomer generation
and I'd think music that appeals to us would go over pretty well.

I am part of a 2hr weekly program that plays the top-40 hits of the 80's, at KRUI-FM in Iowa City (the University of IA student-run station). The responce has been unbelievable, the request lines have been on fire.

I do think an all 80's format is a very real possibility, as those who grew up with this music become "economically viable." Already several stations are heading in that direction; KSTZ-FM in Des Moines plays the "hits of the 70's, 80's and 90's" but they don't solely focus on 80's schlock, such as Dexy's Midnight Runners, Falco, and Men Without Hats. It's "oldies for college students" and it will be here before we know it.

Feel free to contact me.

Source record: 41355

baltimore's 106.5, wwmx (the station that started the 104.3 fiasco) did this as their legal id. (at least, they did when i used to listen to it).

106.5 is the ''mix station'' - ''the greates hits of the 70s, 80s, and 90s'' stuff. anyway, they call themselves ''wmix,'' the generally identify themselves as ''wmix'' and their phone number is 481-wmix. i suppose this is legal, because they do it.

anyway, on or close to the hour, they do the news. as their hourly id, a hurried male voice says, not too loud, ''wwmx''. immediately following is a completely different set of voices, slow and musical, saying ''baltimore weather'' at which point they do the ''five day forecast'' (well-known for only covering four days).

again, i assume that this is a legal way of getting around the requirement of actually using their real name and id.

Mercifully, we don't have many AM/FM simulcasts in Dallas (what a waste of a station). New Tejano pair KDNT-1440 Denton and KICI-FM-107.9 Corsicana do it this way: "KDNT Denton, KICI-FM Corsicana, Dallas/Fort Worth's new Kick."

AC KVIL does it this way: "KVIL Highland Park and KVIL-FM Highland Park/Dallas/Fort Worth." It's odd, but I like it since the AM is weak and is not really audible in Fort Worth.

In Houston, KRBE-104.1/1070 does "104 KRBE-FM and AM Houston" and KKBQ-790 Houston/KKBQ-FM-92.9 Pasadena: "KKBQ-FM Pasadena, KKBQ Houston, the new 93Q Country, Houston's Fresh Country Hits."

I wish that the FCC would even look at some of the stations in _my_ area.
The intereference argument is even more bunk when you see the kind of
terrible signal a few of our local stations are putting out. One station
has clear harmonics all over the dial, and at about 2MHz above and
below their "true" signal, you can pick their station without static,
and with a stereo carrier, on almost any radio I've tried. Now how
much worse can a micro power transmitter get than that?!

>If Micro radio did *nothing* else but to stem the tide of generic
>boring, sound-alike AC, Oldies, Classic Rock, and Hot Country jukeboxes, I
>would be in favor of it.

Hey, Micro Radio can even keep the standard stuff playing, provided they
take their limiters and compressors and turn them down from the "MAX"
settings. Listening to any station around here except public radio is
like hearing an amplifier clipping. Everything is equalized, has a
sound floor that's far too high, etc. Even when I'm getting the
signal perfectly, the compressor/limiters make it sound like I'm on the
fringe of reception. Our audio technology moves ahead each year, and
FM quality gets worse! Why is that?

>But no, we cannot have that. that would be a travesty. Imagine,

353. Low Power Broadcasting

Newsgroup: rec.radio.broadcasting
Date: 1994-01-31 03:57:19 UTC
From: Robert Carpenter <rc@cmr.ncsl.nist.gov>
Message-ID: <2ihviv$eqv@vixen.cso.uiuc.edu>
Source record: 41357

Sorry Bill, but I think that you (and many others) are off-base regarding the interference that would be created by low-power stations on the FM band. In the parts of the country where MOST of the population lives, the FM band is VERY full, as you know. The FCC allocated stations only protecting them to their 1 mV or so contours, upon which the mileage separation rules are based. Everyone knows that many people outside the protected contours want and need service, and in fact do get it. Otherwise you would only have the local no-content off-the-satellite to listen to in far suburban areas. Dropping in low-power stations would deprive these listeners of the diversity they now enjoy, as has happened with a lot of the 80-90 allocations. The AM band, and the 88-92 MHz portion of FM, are PRIME examples of destruction by too many stations.

A low power station would likely be audible for only a couple of miles, but would cause interference to other stations for many more.

I'm NOT opposed to low-power (FM) stations, but trying to claim they won't cause interference is to deny the laws of physics. What to do? I propose two approaches:
1. Reinstate the Class D rules, but follow the distance table strictly. This will not allow many low-power stations in the East & California.
2. Expand the FM band by 1 or 2 MHz, by getting frequencies above 108 MHz. Assign all/most of this space to 5 (or 10) low-power channels. Do NOT assign stations to specific channels in this range, do not offer or or guarantee interference protection to these low-power stations. Assign Travelers Info Stations to 108.1 to protect 107.9 MHz stations. With GPS and other new navigation systems, and much narrower receivers, I claim that the aviation interests can give up a MHz or two.
How's that for dreaming?
With Approach 2, low power stations would be licensed, but NOT assigned to any specific channel among the 4 or 5 (or 8 or 10) channels within the 1(or 2)MHz low-power band. This would greatly decrease the FCC's administrative load, since there would be thousands of applications, many more than would apparently fit, but I contend that the span-of-attention of many of the station operators would be shorter than the license period. Why bother the FCC by having them choose between the thousands of applicants, just let stations fight it out on the air. Perhaps frequency coordination groups would spring up as has happened for amateur VHF FM repeaters.... But there, the new fellows who HAVE to have "their" repeater, are ignoring coordination in some cases.

Another item: I think it would be a BIG mistake to require low-power stations to be non-commercial. Just one more rule to be gotten around as we see in the 88-92 MHz part of FM and on "Public" TV.

With Approach 2, one or more of the channels should be reserved for Travelers Info Service, which will have to get an FM frequency some day. With the leaky-coax non-radiator, the long-distance interference now common on 530 and 1610 kHz would go away. Maryland has state-wide coverage on 530 kHz, but much is just a big jumble of interference. Similarly, when I drive to Dulles Airport and tune to 530 as the signs say, I hear the Park Service as Great Falls instead.

SOOOOooooo, my answer is "Don't make the present FM band worse than it is by adding thousands of low-power stations". Give them a play-pen of their own, with only themselves to bother - and with the resulting MUCH lower cost for preparation of the technical portion of the application, and no fights and hearings to claim/deny interference, to choose the "best" applicant and all the VERY EXPENSIVE things that go into the present assigned-frequency approach to licensing. Have you priced FCC-practice lawyers lately? ditto people to prepare/fight the interference claims for you?

Regards from Wrong-headed Bob

Bob Carpenter

354. Re: radio station digital audio production.

Message-ID: <2ihvj5$er8@vixen.cso.uiuc.edu>
Source record: 41358

greetings from wosu-am-fm production manager gob!

i went to the digital conference in detroit this summer and there are
many good systems to choose from.

sadie runs on a dos computer and does real time crossfades. this is
important. digidesigns soundtools2 uses ram based crossfading. these
crossfades are very limited, ie. they just kind of dump out.

digidesigns deck2 is a 4 track recorder type editor that runs on a mac.
it is more affordable than digidesigns protools. deck2 is what i am using
now. i can get about 1hr 40 min of stereo at 44.1. 1hr 30min at 48k.

that is on a 1.2gig hard disk. dub the aes/ebu music into tracks 1 & 2,
put the announcer audio on track 3. cut and paste regions to their
proper place in time, then draw crossfades on the waveform displays.

i am just learning deck2, but it is noticably better than soundtools2.

my next wishlist item is dinr. digital intelligent noise reduction.
sample a bit of room noise, hum, buzz whatever, and it learns it and
removes it from the audio. so they say. too cool. there is also
timecode sync, ect.

the osc guy i've talked to at customer service is great. deck2 seems
the best mac system for a public radio stations budget.

hope this helps,
gb

As a devout Sonic user, I can say that it is a fine system that does a
multitude of functions. We use it for editing, mixing, restoration,
and CD mastering, etc etc. But the learning curve is atrocious,
particularly for broadcast, where being able to throw toget a
60-second spot in under 60 seconds is what is most important.

The system you want is the DSE 7000 by AKG, most likely. This is
specifically designed for broadcast users, and any reasonable
broadcast prdduction engineer can learn it in a day. And best of
all, one of its designers (Dick Pierce) is on the net and will
likely respond to your message. Or email him at dpierce@world.std.com
for more info.

This is a note announcing the ongoing discussions underway on the Internet Mailing List called Kidmedia (reflected) and Kidmedia-d (Daily Digest). Kidmedia is dedicated to discussions between people interested in, or involved in, the creation, production, distribution and/or consumption of media who's primary target audience is children. For the sake of inclusiveness, the list is defining 'children' and anyone under the age of 18 years, although most of the media to which this list is targeted would be aimed primarily at those under 12.

The kidmedia list is a medium volume list. Expect an average of 2 - 10 messages a day, some days have none, occasionally you will receive more. The load is seldom over 10 articles per day. If mail volume is an issue, consider the digest format.

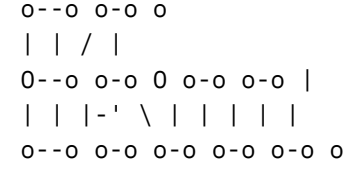
|
o

Some of the topics suggested for discussion are (but not limited to)..

Children's Public Television programs and their impact
Commercial Children's Television and its impact
The rising trend of "Children's Radio" Such as 'Radio AAHS" and how
that is impacting the overall Children's Media situation.
Kid's Music and Musicians.
Producing Children's media.
Cartoons Today and Yesterday.
Separating Fiction and Illusion from Reality in Kids Media.
The role of computers and computer animation in Kids Media.
How Kids Media deals with Societal Issues like AIDS, Sexuality
Family problems, Abuse, Racism, Drugs, Self-Esteem, etc.
How do Families view the role of Kids Media?
How so-called 'adult' or mainstream media affects kids.
The Selling of our Children.. Commercials aimed at selling
products to kids and to parents via the influence of their kids.
Education via media.
Kids movies and videos. How and why are they made?
Contemporary re-makes of classic fairy tales (like Aladdin, etc).
How media does (or does not) effect children and what is
being done in that arena?
Current and future trends in the industry.

These are just some concepts off the top of my head and from those
sent in by interested parties. The scope and direction of this list
is still mostly un-formed and (as I said) is up to the participants
to determine by their posts.

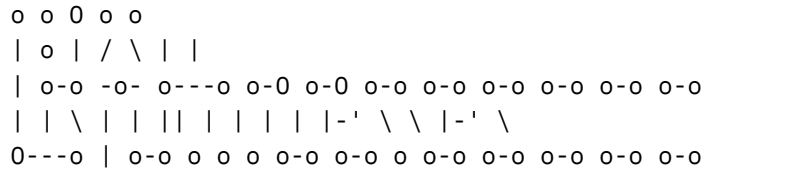


This list was primarily designed to offer those involved in the
creation of kids media an opportunity to talk among themselves about
matters pertaining to their craft(s). Later it seemed appropriate to
not limit or restrict the membership to just kid media professionals,
but to open it to the public at large. None the less, it is our
intent to keep the list from becoming a flame-fest or a place to air
"I Hate Barney" types of messages, or other non-constructive traffic.

Since we have quite a few media professionals, who have chosen to be
on the list already and hope to attract more, we do not wish to take
up bandwidth on personal holy-wars and irreconcilable arguments. In
short we would like to keep the brain-to-balone ratio as high as we
can :-).

Other than that, the podium is yours.

Also, spread the word. there is no reasonable limit to the number of
list members and the more the merrier. We all look forward to a
spirited and educational time here.



Here are the addresses for the kid media list. Please keep
these handy or assign them to aliases in elm or whatever
mailer you use.

Cross-posted to: misc.legal,pdx.general,pdx.sports,rec.skate,alt.hackers,alt.sex,alt.security,rec.radio.broadcasting,ba.broadcast,comp.mail.maps,news.newsites

As we approach the Feb 18th deadline, with each passing day, I continue to wait in anticipation for the Great Frame-Up of Tonya Harding to begin. So far the D.A. has not brought charges, but there are still 17 more days to go. And even if no charges are brought, these three hoodlums, Gillooly, Eckart, and Stant have made so many lies and false statements that Tonya's career is now finito. Some legal experts say on misc.legal that even if there were no evidence against her at all that she was involved, she would not be able to win any lawsuit against the USOC and the USFSA. Thanks to these three hoodlums, she is "dead in the water"
As far as *I* am concerned, Stant, Gillooly, and Eckart are guilty of TREASON against this country. The three of them injured one skater and ruined the career on another. I believe they should be tried, convicted, and EXECUTED for comitting crimes against this country and the people. They have disgraced the United States, I call upon the Federal Prosecutor to levy charges of treason against these three, in order to set an example. I call upon the Federal Government to pass a law making a MANDATORY DEATH SENTENCE for ANYONE who injures, assaults, attacks, defames, disgraces, harasses, or harangues ANY qualified American athelete qualifed to compete in international competition. If my law were in effect now, Gillooly, Stant, and Eckart would all be facing the death penalty for their crimes.
However, such a law will not be passed until we throw these CRIMINAL CODDLING ANTI-CHRISTIAN LIBERAL BASTARDS out of our government. End plea-baragaining NOW!!!! Pass a "truth in sentencing" law!!!!!! We must take our country back from the liberal bastards who are sending us to total ruination.

Dear Lord: We pray that you will continue to keep Tonya safe from these hoodlums are the lies, false statements, and false accusations. May his holiness guide her and protect her and let truth shine over all. May Your ultimate wisdom cause non-believers of her to see the light

-Amen

THREE STRIKES AND YOUR'RE OUT!!!!!!!!!!!
RUSH LIMBAUGH IS GREAT!!!!!!!!!!!!
DOWN WITH CLINTON!!!!!!
IMPEACH THE PRESIDENT AND HER HUSBAND TOO!!!!!!!
I DIDN'T VOTE FOR THE DOPE FROM HOPE!!!!!!
FRIENDS DON'T LET FRIENDS VOTE DEMOCRATIC!!!!!!!

359. Fall 1993 Arbitron ratings for Albuquerque, New Mexico

Newsgroup: rec.radio.broadcasting
Date: 1994-02-01 05:59:24 UTC
From: Robert Smathers <roberts@triton.unm.edu>
Message-ID: <2ikr3s$4q5@vixen.cso.uiuc.edu>
Source record: 41364

>From the Fall 1993 Arbitron Radio Survey (data from a column in the local newspaper):

Top 12 Albuquerque radio stations (out of the 40 or so serving the market)

Based on age 12-plus demographic measured Monday-Sunday 6am to midnight:
1) KKOB-AM (talk, sports, a/c) 13.5 market share
2) KRST-FM (country) 12.0 market share
3) KKSS-FM (contemporary hit/urban) 7.8 market share
4) KKOB-FM (adult contemporary) 7.4 market share
5) KLSK-FM (classic rock) 5.6 market share
6) KZRR-FM (album rock) 5.1 market share
7) KZRQ-FM (SMN's ZROCK) 4.3 market share
8) KMGA-FM (light rock) 4.2 market share
9) KASY-FM (country) 4.1 market share (tie)
KZKL-FM (Top 40 oldies) 4.1 market share (tie)
11) KHFM-FM (classical) 3.7 market share
12) KKJY-FM (easy listening music) 3.2 market share

Morning Drive -- age 12-plus measured Monday-Friday 6am to 10am
The Top Six:
1) KKOB-AM (talk, sports, a/c) 18.8 market share
2) KRST-FM (country) 12.6 market share
3) KKOB-FM (adult contemporary) 8.3 market share
4) KKSS-FM (contemporary hit/urban) 7.7 market share
5) KZRR-FM (Album rock) 6.5 market share
6) KZKL-FM (top 40 oldies) 5.0 market share

-=-=-=-

other notes:

KKOB-AM has taken over the number one spot in this Aribtron survey from KRST-FM. Quite interesting to note how talk has overtaken country (formats). KKOB-AM general manager Jim Pidcock is quoted as saying that country music is probably dying out because there is such a saturation of it over the last few years.

Cindy Weiner, GM of country station KRST, disagreed. She is quoted as saying that country is continuing to grow. She stated country music is gaining listenership in Phoenix and Las Vegas, NV.

KKOB-AM's 12-plus midday (10am to 3pm) listenership rose from 11.6 in the summer books to 17.8 in the fall 93 books. Rush Limbaugh is in the 10-1:30p slot and Gene Burns is in the 1:30p-4p time slot.

361. KKOB-AM programming change -- local talent Terry Leedom off the air

Newsgroup: rec.radio.broadcasting
Date: 1994-02-01 05:59:25 UTC
From: Robert Smathers <roberts@triton.unm.edu>
Message-ID: <2ikr3t$4q6@vixen.cso.uiuc.edu>
Source record: 41366

The trend towards satellite delivered talk-shows continues at KKOB-AM.

Terry Leedom, a liberal talk show host and number one in his 10p to 2a time slot at KKOB-AM, did his final show on January 28.

KKOB management said it was a business decision. I read it as they are not making as much money as they could. They probably find it less expensive to go with satellite delivered talk.

Starting Monday Jan 31, satellite delivered Stan Majors will take over that time slot, followed by the normal 2a-5a repeat of the Rush Limbaugh show.

I think Albuquerque is going to miss this local talent. He portrayed a good image throughout the Western United States on the 50,000 watt clear channel KKOB-AM. I know I am going to miss his talk show.

The previous satellite delivered talk show move happened about 1/2 to 1 year ago. There was a program on KKOB-AM in the afternoon called "RE-RUSH", a show devoted to discussing local politics as well as what Rush said. That show was replaced by the Gene Burns show.

Note: copy also sent to poster.
>>I was wondering if I could extract some expertise from the radio buffs on
>>this newsgroup... I'm a sticker collector who's resources are getting
>>outdated, and the library's are even more so... So I have a bunch of
>>unidentified stickers sitting around. Help? I listed the easier ones
>>first. The worst are those that just say "Z103" with no call, no accurate
>>freq., and no printing on the reverse which might give clue as to WHERE...
>>Aauuugh! I tried to describe the appearance of the decal in those cases.

>>WHOT 103.9 - 99.7 Central PA's Hot FM (Pepsi) --Must be from 1992-93.
>>Need City in PA.

The city in PA is Muncy, and the call letters were actually WHTO (they cheat,
except in the legal ID)

>>Z 104 FM --has three little stickers also. Station is in Virginia Beach,
>>VA. Need callsign. (1993)

Callsign is WNVZ, city of license is Norfolk (been there!)

>>i 95 FM The Home of Rock & Roll -- Static/cling type window sticker. Red "i
>>95 FM" Black words below... on white background. On reverse, there is
>>mention of Rye, Waterbury, and Thomaston, NY and 95.1 FM.
>>Need callsign/city of license.

"Weather from WRKI Brookfield" is how they sneak in their (little) city of
license serving the much larger (choke) city of Danbury, CT (been there too)

>>K105 FM -- this is in or near Ft.Wayne, IN. Need callsign, and city of
>>license.

WQHK-105.1 Decatur - Fort Wayne. Thanks to the M Street Radio Directory,
which has lists of stations by market. Order one thru me (1994 edition for
$30, list price is 34.95)

>>B-106 FM, also has small sticker on side "KILLER BEE" May be near
>>Ft.Wayne, IN Need callsign, city.

WDJB-106.3 Columbia City - Phort Wayne. second city spelled with PH due to
presence of aphorementioned Phlash Phelps (previous posting).
Been there, done them too!

>>Country 102 FM (round) --in or near Auburn IN? Need callsign, and city.
Sorry

>>B96 PARTY RADIO (9 HUMAN HANDS (MANY COLORS) REACHING UP) Need callsign,
>>city.

Could be WBBM-FM Chicago at 96.3, which goes by B96, but cant say for sure, not familiar with the sticker.

>>Z93 The Home of Rock & Roll --Red "Z" yellow "93 The Home of..." plus blue
>>triangle behind the 93 and The Home... White background.
>>Callsign/city needed.

>>THE mountain 96.5 new country --Yellow "THE Mtn" Red "96.5" white "new
>>country" on BLACK BACKGROUND. Dominoes coupons on reverse. No mention of
>>town. Callsign/city needed.

>>The BEAR 104.5 FM --Static-cling type window sticker, Big yellow bear paw
>>with black outline, black lettering inside, square shaped sticker,
>>Callsign/city needed.

Sorry on these three

>>HOT 97 FM JAMS! --a big silver splat in the "O". brick wall background.
>>Sticker is black/white/grey. Need Callsign, City, State.

Could be WQHT New York City. Are they block letters? most Hot 97 stickers have that characteristic. Most of their stickers are obnoxious colors like hot pink and teal, together forever.

Paul Richards
testnet%pr@pegasus.att.com

[Moderator's Note: B96 Party Radio Is indeed WBBM-FM 96.3 Chicago and there is a "Country-102" in New Carlisle Indiana (near South Bend) 102.3 WGTC. Whether this is the same or not I don't know. Bill]

363. Classical Format stations

Lately, I have been having problems picking ANYTHING else up
on 640 AM at night -- R. Alegria comes in7 really strong up
here. It doesn't allow me to pull anything after around 4PM
this time of year (about the time that WSM shows up on 650).

<heavy sigh>

Michael
(still trying to log KFI-Los Angeles on 640 when WOI-Ames, IA
drops power on the same freq)
--
As falls Wichita, so falls Wichita Falls....
Pat Metheny

[Moderator's Note: I don't know where you live, but in Chicago the
640 dominant station at night is WWLS sportsradio near Oklahoma City
(Moore OK) with 1000 watts directional, I assume away from LA and
perhaps away from Ames too. Probably they go east or Northeast. Bill]

365. RE: '80s formats

Newsgroup: rec.radio.broadcasting
Date: 1994-02-01 05:59:34 UTC
From: "chip (c.d.) kelley" <chipk@bnr.ca>
Message-ID: <2ikr46$4qc@vixen.cso.uiuc.edu>
Source record: 41370

>I'm wondering--are there other stations that do this? Are there any
>"full-time" 80's-playlist stations? I'm wondering if we're looking at a
>potentially new format--not really oldies, but certainly not current music
>either.

I don't know of all '80s format. KCBQ San Diego has an oldies format ("modern oldies") that is largely '80s. KSMG San Antonio is '60s-'80s oldies.

Most adult top 40s and hot ACs play quite a bit of the '80s. For example, hot AC KEYI "Key 103" Austin bills itself as "the hits of the '80s, best of the '90s."

Rock 40s (top 40/album hybrids) usually play quite a bit of '80s rock. KIOC "Power Hits K106" Beaumont, for example, plays quite a bit of that. Last month when I heard them, they had quite a bit of old Duran Duran and Bill Idol mixed in with some other old '80s hits like the Hooters/"And We Danced." However, of all the top 40 subformats, rock 40s are the hardest to find since there are so few of them (KIOC, WRFY "Y102" Reading PA, KWTO-FM Springfield MO, KTUX "Tux 99" Shreveport LA, WZAT Savannah GA among the few). Almost rock 40s KNIN Wichita Falls TX and WQUT Johnson City TN play a lot of '80s hit rock.

MTV's sister channel, Video Hits One (VH1), spent most of Saturday playings '80s hits on a "where are they now?" weekend (ABC, the Hooters, Corey Hart, and Journey among the bands).

Occassionaly, some top 40 stations have similar weekends. KHKS "Kiss" Dallas did one the week before - kind of cheesy, only one or two '80s hits each hour. Better ones were done by WJET "Jet FM102" Erie PA a year or two ago when they were top 40/rock and last year by top 40 KHFI Austin ("this weekend, KHFI is a thing of the past").

Source record: 41371

} From: michael moyle <mmoyle@blue.weeg.uiowa.edu>
} Subject: Re: 80's Music - New Format?

} I am part of a 2hr weekly program that plays the top-40 hits of the 80's, at
} KRUI-FM in Iowa City (the University of IA student-run station).
} I do think an all 80's format is a very real possibility, as those
} who grew up with this music become "economically viable." Already

I want to say, first, Mike that I wish you great success in the industry. My comments below are not aimed at you, but at a trend in the radio broadcasting medium. This thread about 80's music being a new format just brought all this to the surface.

[entering soapbox rant mode]

It never ceases to amaze me how much slicing of the 'hit radio' pie is going on today. Nostalgia is king and these days nostalgia is defined as hits from as little as 3 - 4 years ago.

What defines the 'music of the eighties' anyway? I mean other than looking at the date of release? Is that the point here, what year a song was released? Is there a 'style' of the eighties? Perhaps so, but it blows my mind how the programmers are tripping all over them selves to carve an imaginary niche out of the air.

I mean we have had all Elvis radio, all Beatles radio, all Led Zepplin radio and I have heard of an all Garth Brooks station as well. We have Hard Rock, Real Rock, New Rock, Soft Rock, Soft <but not too soft> Rock, Dance Rock, Classic Rock, Classic Hits, Good Times Rock, Christian Rock. We have Top-40, Rock-40, CHR, Urban, CH-URBAN, Dance, High Energy, New Rock, New Rock Alternative, New Music, AOR, AOR-Classic, Hard-AOR, Progressive (I think we still have progressive), Easy listening, Easy hits, Easy Light Favorites, Oldies, Good-Times Oldies, "No-Fifties" Oldies, All 50's Oldies, Sixties AM Oldies <WITH NO FIFTIES, They promise you that>, 70's oldies <With none of those Weird songs from the eighties> and now 80's Oldies <certainly with none of those corny old songs from the seventies>. We have New Country, Classic Country, Real Country, Hot Country, Young Country, Traditional Country, and of course Compromise Country :-).

We are on the verge of having radios (with RDS) which can automatically tune ONLY to the formats you designate. God forbid that you should tune past a Country station on your way to Soft <but not too soft> Rock, or catch a moment of a talk show on your way to the All-Garth-Brooks station.

How specialized do we need our hit radio to be, and what imaginary lines do we draw in the sand next? How about "Your station for all those great songs from the mid seventies beginning with the letter G"? Or, How about "We promise to only play music made by American recording Artists"?

Don't get me wrong, you should listen to what you want, but with some 35 stations in Chicagoland (the #3 market in America) we have precious little variety beyond the main formats (except for WLUP, that is). It is IMHO a testimony to the dissatisfaction of radio listeners that all this micro-slicing of the mainstream pie is going on, and a testimony to the fragmentation of musical tastes too. Not to mention the inability of most program directors to see beyond the trend of shrink-wrapping the main formats, and refusal to branch out into different areas of programming.

Example, Chicago has no major commercial Jazz station. We have NAC (New Age Contemporary) WNUA, which bills its self as "Smooth Jazz", and is basically a light urban by day and contemporary instrumentals at night. But it is NOT jazz. However they started doing very well in the ratings once they started calling themselves 'jazz'. This indicates to me that the people *want* a jazz station, even one which is not jazz, but says it is.

The mega-success and national recognition of WLUP, which broke all conventional rules of programming, should indicate to programmers that the public wants something different. They like a fresh choice and will beat a path to the door of anyone who provides it and does it well. WLUP is a legendary station in the industry, and became such while traditional program directors (the guys with the satin jackets) continued to posture themselves as "more rock from female artists who wear one earring" or some such stuff, and said that LUP could not survive unless it played more music. Oh yeah?

Howard Stern, although not my cup of tea, is another testimony to the desire of the public to listen to 'something different'. Same goes for Imus, Don & Mike, Greaseman and even Rush. These people burst on the scene with a fresh and unique product. Arguing who is better is pointless. They flew in the face of conventional programming and people beat a path to their door. Should this not indicate that it makes more sense to try to be a bigger and more unique fish, rather than to reduce the size of your pond by doing what has always been done, just in a smaller and smaller circles?

Veteran rock radio personality, Ron Brittian, commented on a recent interview that "Radio Programmers think you <the listeners> are the stupidest things on earth". Ron should know, he has worked for a bunch of them in his 30 + year career.

Radio is a marvelous medium. It has so much potential for communication, information and imagination. Yet it is being used at a fraction of its value. Radio in its current form (with many exceptions, of course) is like buying a Rolls Royce to go to the Mc Donalds 2 blocks away. It's like using your mainframe computer to

play pac-man.

If I hear one more person tell me how 'liberal' the media is, I think I will die. There are no more ultra conservative, stubborn, status-quo-loving, no-risk-taking, bunch of imagination-less drones on earth that those who control the direction of our marvelous, creative-potential-filled, medium of radio. Before I get flamed for this statement, I want to say that I know this is not universal. I know that there are many with great ideas. Some are great simply because they exist in the face of such sameness (like Howard Stern). I also know, though, that the majority of those with wonderful ideas never get to use them because they are told that there is more money in the "Greatest Disco Hits of 1976" than in trying something new.

Sad.

[leaving soapbox rant mode]

So, if you are a budding radio personality or programmer out there, I would urge you to continue to push the envelope and develop new material and ideas. It wont be as easy of a go for you, compared to being the next CHR drone in a satin jacket, but if you have a product that is good, you will eventually be able to sell it and once you do you will be glad you did.

Bill

367. WFAN AM-660 (New York) from Rochester?

Newsgroup: rec.radio.broadcasting
Date: 1994-02-01 05:59:42 UTC
From: zinkin@acsu.buffalo.edu
Message-ID: <2ikr4e$4qf@vixen.cso.uiuc.edu>
Source record: 41372
Cross-posted to: rec.radio.broadcasting,rec.radio.shortwave

Hello from a newcomer to the rec.radio.* groups!

My brother in Rochester, New York wants to be able to receive New York City's WFAN, 660 AM locally. Unfortunately, no matter what we've tried, he can't get a clear signal except at night. Even the Select-A-Tenna, which seems to have little trouble getting WCBS (880 AM) and WABC (770 AM) for most of the day, can't do anything for reception of WFAN.

Any ideas? Is there a shortwave station that duplicates WFAN's signal, as is done with WRNO? A different kind of antenna, perhaps? A specific model of AM radio that's designed for long-range AM reception?

Any information would be appreciated. You can either post or E-mail responses; I'll summarize E-mail responses to the net.

Thanks to all!

Bill Pfeiffer (rrb@airwaves.chi.il.us) wrote:
: is pandering to the high-powered broadcasting interests, and abandoning
: the public, who the airwaves supposedly belong to. Duopoly (the
: provision whereby a single entity may legally own up to 2 AM and 2 FM
: stations in a market) has been touted as a way to bring more money and
: therefore better programming to the airwaves. Can someone site for me
: examples whereby a duopoly purchase has significantly improved the
: quality of programming on the station(s) involved?

: My impression is that duopoly is just a further eroding of the last
: crumbling ruins of the illusion of public ownership of the airwaves.
: The fact of the matter is, if you got big bucks you can acquire more
: and more of the so-called 'scarce resources' of broadcasting.
: Otherwise, you can go poop in your hat.

Couldn't agree more. As a matter of point, one of the most touted
duopoly setups was Viacom's here in Los Angeles (KYSR/Star 98.7 and
KXEZ). Both stations offer similar formats (both are AC, Star being
the more "upbeat", newer version), and both are turkeys, and the ratings
prove it. (I think both stations combined don't add up to a 1 share...)

Even in a market the size of Los Angeles fewer and fewer stations seem truly
interested in providing the "public service" of radio, and more interested
in just purely making money. While I don't have a problem with the latter,
duopoly only seems to enhance the money-making opportunities while at the
same time, reducing "public service". And now, even if duopoly is reversed
(not likely), Viacom will still make money off the sale of the station,
because here in LA you can't start a new station, you gotta buy an old one.

I know I'm gonna get flames on this one, but oh-well. Life goes on.

A Manual on How to Build Your Own Transmitter
+--+

For the last two years, through technical workshops bringing together technicians from several radio stations, AMARC's Latin American office has been perfecting a low-power transmitter that can be easily assembled for less than US$800. The fruit of this research is offered in a manual entitled "Nuestra radio comunitaria: como construir una emisora FM de baja potencia" (Our Community Radio: How to Build a Low-Power FM Transmitter). The technicians mentioned above have already tested all the equipment described in the manual. If you know a little about electronics, you will have no trouble following the instructions and building an excellent transmitter.

The manual includes a general description of the necessary technical equipment (studio, microphones, mixing table, etc.), as well as a detailed and illustrated description of the steps to be followed in building the transmitter.

This manual represents a concrete commitment on the part of AMARC's Latin American office to make technical know-how more accessible. According to the technical team, "Community radio can and must grow. On a technical level, all that has to be added is a more-powerful amplifier and a longer-range antenna. The fact that you increase your broadcasting power does not mean that you lose your community nature."

The preface states: "In this manual we propose a small transmitter only because we are realistic and must consider the modest budgets available to most neighborhood and peasant organizations. Of course, we are tiny when we come into the world, but that does not mean we have to be midgets for the rest of our lives."

The manual is available only in Spanish. For information contact AMARC's head office in Montreal at amarc@web.apc.org or the Peruvian office at ignacio@amarc.org.pe

Now that my computer room is again in a semblance of order, I can do what I can for the KC info:

KCMO AM and FM were bought from Gannett for the astonishingly low price of $7 million this past fall. KMBZ and KLTH were bought from the Midland Broadcasting Company in 1961, when KMBC-AM/FM/TV were split up and KMBC-TV went to Metromedia. (KMBC-TV is now owned by Hearst.)

KMBZ is news and sports-oriented, but has Limbaugh. KCMO is going through some turmoil but seems to be more of a pure talk station.

KLTH is a consistently high-rated station. It successfully transitioned from beautiful music to soft rock over a one-year period in 1991. It was one of the slowest transitions to a new format I ever heard. But it worked. The station kept its share while improving its demos considerably. It is the most common background music station in KC.

KCMO-FM is now the market's only oldies station. (But it's almost February; who knows what will happen?) Its market ranking hovers around #10 or so in the 12+. It *does* have the market's best FM signal (sited on the KCTV (formerly KCMO-TV) tower at 1220' -- which was the world's tallest self-supporting tower from 1956 to 1968) but never has seemed to make effective use of it.

Bonneville so far has been tinkering a *lot* with KCMO(AM); they've left KCMO-FM alone for now.

All stations are licensed to Kansas City, MO; but KMBZ and KLTH are physically located in Westwood, KS, just across the Missouri line. The KCMO studios will be moving there from the Westport section of Kansas City, MO soon (if not already).

I think that an '80's format would work OK...just as long as they avoid the songs that got too much airplay over the years. (For instance, a mix of songs like "Against All Odds" by Phil Collins, "Power of Love" by Huey Lewis, and "Urgent" by Foreigner would get old VERY fast!!!) However, an airplay mix like "Marlene on the Wall" by Suzanne Vega, "I Need You Tonight" by Peter Wolf and "My Ever Changing Moods" by that post-Jam group (can't remember the name at the moment) would be interesting to listen to. Just as long as they rotated the list well (no song should ever be played more than once every 2-3 weeks on a station like that if they go deep enough).

>Is there a reasonably priced computer-controlled tuner on the market?

Your question is kind of vague. What kind of bandwidth is the tuner expected to cover. Is the computer stand alone or of the PC sort. There are readily available VHF/UHF scanners on the market.

I would just like to get AM/FM to start. Shortwave bands would also be nice.

376. grundig & cbs

Newsgroup: rec.radio.broadcasting

Message-ID: <2ikt5m$75d@vixen.cso.uiuc.edu>
Source record: 41381

has anyone noticed that short wave maker grundig is now buying time
on cbs radio? i have heard several spots in the cbs news, as relayed
locally by wcco. the spots (:30's and :60's) talk about how a major
technological breakthrough enables grundig to make its new receiver,
the yb-500 available to the public. the ad uses actual sound bites
of shortwave broadcasts (with slight fading). the bbc i-d includes
the familiar theme (lilli bolero). i've also heard a clip from
the radio kol (lsrael) english language service.

the commercial gives no price, but says the radio is only available
through an 800 number (i shoulda called. the ad mentions nothing
about the receiver's features...e.g., does it get lsb and usb, does it
have syncro detect, a notch filter, a timer, etc.

this is the first time i have heard a radio manafacturer advertise
directly on a major network. the demographics certainly seem right...
the afternoon audience for cbs radio news is likely receptive to
a radio that brings you the news "direct and unfiltered"

as short wave listeners know, there is a different perspective to be
had from various national (and private) broadcasters. its also
interesting hearing the voice of america, to find out what we're
telling the rest of the world

i just hope the radio isn't junk, and is fairly priced.

378. Re: LPFM Interference

Newsgroup: rec.radio.broadcasting
Date: 1994-02-01 06:34:34 UTC
From: Neil Griffin <J735@NEMOMUS.bitnet>
Message-ID: <2ikt5q$763@vixen.cso.uiuc.edu>
Source record: 41383

Before commenting on on microbroadcasting and low power FM, let me introduce myself. I'm Neil Griffin, a student at Northeast Missouri State University in Kirksville, MO. I'm not working in radio at the moment, but have worked at stations in Iowa, Indiana, and Kentucky.

I agree with Bob Carpenter about LPFM. There is an interference problem already on FM in most areas, especially in the areas that probably need LPFM the most. Many of the areas that need local services the most are urban areas since many stations ignore the inner city and go for the more affulent suburban areas. The stations that have had the most trouble competing are the lower powered AM stations, since their signals do not tcover the entire metro areas any more. Why not form co-ops and acquire these stations. These stations could become open access or shared by several groups and provide programming geared to the limited areas they serve. A station may even find that if it is serving a very small area, it could switch from a higer powered directional array to a low power non-directional array, lessening AM interference and allowing them to sell the real estate that houses the array.

The biggest problem would be acquiring the stations. Possibly a tax credit could be given to a company that donates an AM. Another idea might be to award the licenses of stations that go dark after the expanded band simulcast period to community radio groups. The licenses could be modified to low power non-directional. As a kick in the butt to simulcasters, ban simulcasts unless the AM serves a signficantly different area or has wider daytime coverage than the FM.

I don't think we could get part of the aviation band very easily, plus you have the problem of getting radios to cover the band. The unused channel 200 (87.9) could be useful, but adequate protection would have to be given the Channel 6 stations. If 87.9 worked out, 87.7 could also be a possibility. A station could even put up a LPTV on channel 6 and advertise itself as "TV 6 and 87.7 FM." Put a community bulletin board on the video.

There's my suggestion for low power community radio.

Robert Carpenter <rc@cmr.ncsl.nist.gov> wrote:

} Sorry Bill, but I think that you (and many others) are off-base regarding the
} interference that would be created by low-power stations on the FM band. In
} the parts of the country where MOST of the population lives, the FM band is
} VERY full, as you know. The FCC allocated stations only protecting them to
} their 1 mV or so contours, upon which the mileage separation rules are based.

Very true. But in a way that is the point. The FCC is carping about
the interference of a 1 - 5 watt signal off of a groundplane on a 30
foot roof and they, themselves, have allocated hundreds of drop-in
stations with thousands of watts off of 300 foot towers which chop up
the band. If the FCC would say "Gee we cant give you 2 watts to
cover your community because we gave 3500 watts to a speculator to
run SMN or brokered ministries" then I would be a little quieter. But
as it stands, they are fining people tens and twenties of thousands
of dollars for 1 and 5 watt signals and acting like it is a capitol
crime. Then they wax poetic about interference. I am sorry,
but while congestion is certainly a problem in most areas, it is the FCC's
licensing practices which have caused it.

} Everyone knows that many people outside the protected contours want and need
} service, and in fact do get it. Otherwise you would only have the local
} no-content off-the-satellite to listen to in far suburban areas. Dropping in
} low-power stations would deprive these listeners of the diversity they now
} enjoy, as has happened with a lot of the 80-90 allocations.

Good point. But again, you cite, correctly so, the 80-90 allocation
mess. On one hand the Commission says we cant have micro radio, and
with the other they license hundreds of these drop-ins. My *BIG*
gripe here is that there was absolutely concern given to whether these
drop-ins would serve the communities of licnese. Many drop-ins were
snapped up by speculators, placed on the air with minimal investment,
and kept for later sale. Many of them HAVE deprived the local
communities of ajacent channels they were getting (or even
co-channels) from semi-distant areas.

So it is OK to deprive listeners of choice if you are a speculator who
drops in a satellite repeater or another megabuck ministry, but if you
are a community group with something to offer your community, then you
are a criminal for placing 5 lousy watts on the band? Sounds fishy
to me.

If these drop-ins were licensed with some required minimum commitment
to their communities, like local programming, news, a local staff to

respond to community needs, I would have no gripe at all. But that
was not the case. If you could squeeze a 3000 watt signal between two
exixting signals, and could afford the fees and such, great, you are
now a broadcaster. Who cares if the people who enjoyed the classical
music from a city 50 miles away, could now only hear Z-Rock or
'Good-Times Oldies' from some 80-90? Tough, that is business.

} The AM band, and
} the 88-92 MHz portion of FM, are PRIME examples of destruction by too many
} stations.

Agreed.

} A low power station would likely be audible for only a couple of miles, but
} would cause interference to other stations for many more.

How is that? It is audible as far as it is audible. How does a
station interfere beyond the point where it becomes inaudible?

} I'm NOT opposed to low-power (FM) stations, but trying to claim they won't
} cause interference is to deny the laws of physics.

Agreed, now go tell that to the Commission who sold the airwaves out
from under the public (who supposedly owns them) by opening the
floodgates with 80-90. My point of contention here is the two-faced
hypocritical approach of the Commission. It is OK to interfere and
deny local content at 3000 watts, but it is not OK to risk
interference and *offer* local content with 5 watts. What is wrong
with this picture?

What to do? I propose two
} approaches:
} 1. Reinstate the Class D rules, but follow the distance table strictly.
} This will not allow many low-power stations in the East & California.
} 2. Expand the FM band by 1 or 2 MHz, by getting frequencies above 108 MHz.
} Assign all/most of this space to 5 (or 10) low-power channels. Do NOT
} assign stations to specific channels in this range, do not offer or
} or guarantee interference protection to these low-power stations.
} Assign Travelers Info Stations to 108.1 to protect 107.9 MHz stations.
} With GPS and other new navigation systems, & much narrower receivers,
} I claim that the aviation interests can give up a MHz or two.
} How's that for dreaming?

Both of the above ideas have great merit and I am pleased that someone
of your stature is willing to examine the options like you seem to be.

Approach #1 is good, but it would have to be re-defined in some way to
accomodate the situation as we now have it. I suggest a class E (or
redefining a class D) allowing 1 to 10 watts, into a simple antenna
with a height restriction, and with no interference protection.

}With Approach 2, low power stations would be licensed, but NOT assigned to any
}specific channel among the 4 or 5 (or 8 or 10) channels within the 1(or 2)MHz

}low-power band. This would greatly decrease the FCC's administrative load,
}since there would be thousands of applications, many more than would
} apparently fit, but I contend that the span-of-attention of many
} of the station operators
} would be shorter than the license period. Why bother the FCC by having them
} choose between the thousands of applicants, just let stations fight it out on
}the air.

I like the idea of specific channels for micro-radio, but we are
having enough trouble expanding the AM band. If the new band were for
micro-radio users only, there would be no impitus to manufacture the
new receivers to cover the band and we would essentially be placing
these stations in a place where the average household could not hear
them. No point in that.

As for fighting it out, that wont do either. See, Robert, that
'fighting it out' and 'attention span' concept implies that
micro-radio is and will be nothing more than (As Higdon likes to say)
sandbox radio. While there are a lot of 'sandbox radio' types in the
arena today, I dont see that as the goal of micro-radio.

With Goliath radio becoming more and more mechanized, formated and
profit-driven, and so-called 'public' radio going the same route
(ratings, underwriting etc). There is a need for radio that is
'people driven'. As a tool of *communication* not merely a vehicle
for marketing and profiteering. This is the side of micro-radio which
I support and am very much in favor of.

Why can Canada do something like this and we cannot? Money!

Robert, despite what I say about it, I am not anti-corporate, I am
just very disappointed at the state of radio programming when it is
done strictly for profit. Most would agree that some of the best
radio ever created was done at coroprate stations. But these days all
that matters is selling (and selling out). Creativity is balked at as
unprofitable. Sameness is the order of the day and that sameness
excludes and dis-serves large segments of the popualtion. If Goliath
radio cannot do the job because of their understandable need to
justify the mega-dollar investments they control, then let the small
'Davids' have a shot at it.

Perhaps when the investment is in the hundreds, or low thousands, the
axe they have to grind will be smaller and the access will be greater.
That is the crux of it, as far as I am concerned.

The success of telephone talk radio indicates that the public
wants and *needs* to communicate and they are calling talks shows
because they offer a modicum of access to the communications tool of
radio, even if it is only for a few seconds.

The Commission has allowed duopolies to flourish, with no requirement of better
programming or community access to the airwaves, they have put these
damned 80-90's in with a similar apparent 'lack of concern' for the

communities they austensibly 'serve'.

}Another item: I think it would be a BIG mistake to require low-power stations
}to be non-commercial. Just one more rule to be gotten around as we see in the
}88-92 MHz part of FM and on "Public" TV.

Ok, but this is a sensitive area. While I agree that these stations
should be allowed to support themselves, I would want to be very very
careful not to allow them to be co-opted by big money interests,
should they prove to be viable media entities.

I would say that these stations must be owned and operated locally, no
group onwership, no satellite formats, no automation. Taped programs
would be OK to a point, as would sharing programming, but if you are
going to operate a 'community' station you had better be doing it in
your community. Period. If you cannot find sufficient things to air
from within your community, perhaps there is not the need for that
community station that you thought there was, or perhaps another
segment of the community has a greater need for that channel.

There should be minimum hours of operation, offering any unused
portions of the broadcast day to others in the community who want a
voice. After all, this *IS* community service radio, not "Jimmy's Ego
Box". Those who cannot or will not program a minimum schedule would
be required to give up the licnese to someone who will, or to allow
that entity to program on the station. Those who went silent would
lose their licences and that license would be given to the next
person on a waiting list

In summary, what I support is not 'sandbox radio' although some of
that is bound to occur and that is OK. I am looking toward a small
return to the idea that the airwaves are the property of the people,
and not just the corporations. To be truthful, I really would like to
see a change in the attitudes of those who control Goliath radio. But
with the power of the big bucks and the current green-light to
unrestricted co-opting of our precious air resources, that is unlikely
to occur. But in this grand scheme of duopoly, drop-in FM
stations, 100 watt (and more) campus stations, the de-public-ing of
public radio and the plague of satellite fed boredom, surely there is
room for a couple of watts of 'people powered' radio.

}SOOOOooooo, my answer is "Don't make the present FM band worse than it is
}by adding thousands of low-power stations". Give them a play-pen of their
}own, with only themselves to bother - and with the resulting MUCH lower
}cost for preparation of the technical portion of the application, and no
}fights and hearings to claim/deny interference, to choose the "best" applicant
}and all the VERY EXPENSIVE things that go into the present assigned-frequency
}approach to licensing.

Yes, and with all of this expensive legal mumbo-jumbo, we still have an
FM band crammed with mindless jukebox feeds, interference levels never
before heard of, and no place for the common man (or woman) with

something to say. Yes I know you can buy an hour of time someplace or other, but that is not the point. The "protectors' of the airwaves (FCC) have sold them to the highest bidder. Public Radio has gone corporate, and talk radio has gone almost all right-wing. So you will excuse me if I balk at all this nonsense about 'protecting the airwaves' from the likes of Radio Berkely (although I hate to see Stephen Dunnifer be the test case for all of this) and Black Liberation Radio. Better we should be protected from the loss of our 'property' (the airwaves) at the hands of those whom we have entrusted to protect it for us.

} Regards from Wrong-headed Bob

Nothing wrong with your head, Bob. Thanks for the submission.--

380. Low Power Broadcasting

Newsgroup: rec.radio.broadcasting
Date: 1994-02-01 06:34:40 UTC
From: Robert Carpenter <rc@cmr.ncsl.nist.gov>
Message-ID: <2ikt60$76k@vixen.cso.uiuc.edu>
Source record: 41385

It would certainly take MANY years to pry any frequencies out of aviation. I'd probably be dead-and-gone by then.

Back when we were putting 102.3 MHz on the air in Bethesda, MD (Class A), we felt that the FCC interference rules were unrealistic. I still do. They offer too LITTLE protection for first adjacent (expecially with the wider receivers common with stereo), and too MUCH protection at 400 and 600 kHz spacing. Back before 103.1 (Class A) moved their xmtr from Kent Narrows, it was within a few hundred feet of US-50, yet they only bothered WGMS-FM (103.5 Class B) for a few hundred feet, yet 'GMS is over 30 miles away. My car radio is a standard Ford 1991 model (which only goes to 1610 on AM).

Back in the earlier days, our proposal was to consider use of BOTH EVEN and ODD 100 kHz steps on FM (as is common in Europe) and change the 400 kHz numbers to 300 kHz spacing, and likewise change 600 to 500 kHz.

Nowadays, my proposal is to keep stations on ODD 100 kHz steps, but to completely eliminate any limits on 400 kHz and 600 kHz spacings, and to put more restrictions on 200 kHz-spaced stations.

Here in the East, we have a lot of 400 kHz-spaced stations (nearly) in the same city -- since that was allowed in the early days of FM. Then the poor receivers of the day caused the current 400 and 600 kHz numbers. With today's receivers I hear no interference complaints on 400 kHz-spaced stations. Back in the old days there was no stereo, accounting for the 200 kHz numbers. But with the general power increases allowed, and the period when directional antennas were authorized on 92-108, we have a number of cases of nearby Class Bs just 200 kHz apart; two pairs in the Washington-Baltimore Common Metropolitan Area.

The 88-92 MHz portion of the band is still in the process of being technically degraded around here. WETA is elbowing its way into outlying areas with satellite stations 200 kHz from other classical/NPR stations. This now damages my reception of WVEP on I-70 in western Maryland (where I can hear WETA directly and don't need the satellite), and will interfere with WBJC in southern Maryland when WETA's satellite gets on down there. Some years ago a station 200 kHz from WBJC came on in northern Virginia, interfering with 'BJC in the Frederick, MD area.

The AM band was rejiggered about 1940 to clear up interference. Sure there were only about 600 stations, but there weren't any computers available, and lots of stations had directional antennas. Today, even a hobbyist with a 486 computer should be able to test how well various modifications to the FM rules would work. This sort of rejiggering of the FM band might provide a more realistic approach to getting a few Low-Power Broadcasting channels. If one could show that no current station would lose, and some could increase power, the political situation might be do-able.

Just another idea....

Regards, Bob w3otc@amsat.org

>distribute the piece? What if talk radio segments are incorporated into
>a piece of music which is in turn broadcast over the radio?
>
Telephone conversations may only be broadcast when the parties involved
know that it will be. Broadcasters may actually start rolling tape,
announce that the conversation will be broadcast (so they have a record
of notification), then air the tape from the point following that notice.

One minor exception is when people _initiate calls_ to a station. Those
who knowingly caall a station which regularly airs calls have implied
their consent.

> the above?

Back in the early days of FM (don't know the exact dates, maybe mid 40's) radio dials were marked with the FM Channel number rather than frequency. Why? Don't know.
In any event, the FM band is divided up into 100 channels of 200 kHz each. The first channel number is 201 (for 88.1 MHz) and the last is 300 (for 107.9). This is according to 47 CFR 73.201.
>
> The phonograph has no obvious speed control, and plays largish records

> of any help.

No doubt 78 RPM. That was 'hi-fi' back then. The records weighed a ton (as compared to 33's) and were fairly fragile. Because of the high speed, the play length for one side was on the order of minutes (rather than 10's of minutes for 33's). An 'album' really was one- 5 or 6 records per album.

We've just purchased some antennas that we had "cut to frequency" from Scala Electronic in Medford, OR (503)-779-6500. They are fairly expensive. A 5-element, 75 Ohm end-mounted, 7.5dB gain unit costs $250-300. Their 10 element version, 9.5dB gain costs $300-350. We also bought (as an experiment) a circularly-polarized 5-element yagi. You don't want to know what this costs... We have a particular problem receiving one of our network stations that we remote control from Madison (WHHI, Highland, WI 91.3). Between the multipath and the low RF, it is seldom listenable and sometimes we can't even tell if it's on the air!

I'd love to tell you how all this new gear works but before we could get it up on our new tower (on top of our building in downtown Madison) it iced up and snowed. It's not been above freezing since. I'll pass on the results after we thaw out! BTW Scala was the only company we found that would cut to frequency.

writes:

> [...] Still, there is no way to "compress" analog audio to
> get a greater frequency response than the wire it's travelling down.

Quite a few years ago, I read about experiments done in Eastern
Europe: They have (had?) almost exclusively AM broadcast transmitters.
Researchers were investigating alternatives for obtaining better sound
quality in a cheaper way than building up an all-new FM transmitter
network.

The research showed that the human ear is surprisingly insensitive to
small frequency variations in the higher harmonics -- any frequency in
the approximately correct range will be subjectively perceived as
overtones.

Also, while US AM broadcasts have a 9 kHz bandwidth, European ones
have only a 6 kHz bandwidth (Are these figures correct? I believe so,
but this is really too far away from my field of expertize!). This
applies to the consumer (and studio) equipment, though -- the
transmission equipment is "international", capable of handling 9 kHz.

So the following solution was tried: Anything below 5.5 kHz was
transmitted as before. Frequencies from 6.5 to 20 kHz was split into a
dozen frequency bands. The *total* energy in each band steered the
level of a *pure tone* transmitted in 6.5-9 kHz range, like the stereo
pilot tone, but each band had its pilot tone. Obviously, the pilot
tones where more closely spaced than the bands, in order to fit into
2.5 kHz!

An old 6 kHz receiver would filter the pilot tones away. A new HiFi
receiver would contain a dozen of white noise generators (with a
frequency range limited to the corresponding frequency band) whose
intensity was directly steered by the pilot tone for that band.

Listening tests indicated that the perceived music reproduction quality was, although not quite as good as FM, dramatically improved.

I never heard of this system being put into use, though. At time of writing it was not yet clear whether a sufficiently high percentage of consumer receivers in use actually did filter away everything above 6 kHz - if not, the listeners would be hearing a lot of high pitched noise, making it unacceptable. It could also be that the filters and white noise generators necessary in new HiFi receivers to exploit the higher quality sound turned out to be too expensive to be acceptable. Or it could be that the AM sensitivity to environment noise made it less interresting, after all.

Yet, these experiments did show one (more or less) viable approach, from a technical point of view, to analog sound compression to lower bandwidth requirements.

[Moderator's Note: While the bandwidth statememts are obviously incorrect, what does the group think of the oterh claims herein? Bill]

KIRO-FM (100.7) is now news/talk, though not (usually -ever?)
parallel to the KIRO-AM (710) side. The listener numbers of FM as higher
than the AM look suspicious to me. The local ratings, posted here not
long ago showed KIRO-AM as #2 in the market, W-A-Y ahead of the FM sister.

Just a quick note FYI: WOI, Ames beams slightly N.E. (about 80 degrees) at night with just 1K (5K non-directional days) to protect KFI and WWLS. Thus, at night, WOI puts a fairly poor signal into Des Moines, just to the south (30 miles) but can be heard fine in Cedar Rapid, 100 miles to the east.

392. Re: 80's music

Newsgroup: rec.radio.broadcasting
Date: 1994-02-02 10:12:43 UTC
From: Robert M Keefe <keefer@elwha.evergreen.edu>
Message-ID: <2inuar$fgq@vixen.cso.uiuc.edu>
Source record: 41397

This is my first post to Airwaves, so let me introduce myself. My name is Robert Keefe and I am a DJ at a 1500 watt community radio station, KAOS 89.3 FM Olympia, Washington. I've been reading Airwaves since issue 408 and have been a DJ for a year and a half (I co-hosted a show a year prior to that.) Greetings.

Frankly, I'm getting worried about you Bill, perhaps you've been forced to listen to Rush Limbaugh or Howard Stern and now you're constantly on your soapbox. :-) Oh well, keep it up. I agree with most everything you say. (Your bit on stronger public access to the airwaves touched my heart, though the 80's music bit seemed a bit more ranting.)

You ask:

> What defines the 'music of the eighties' anyway? I mean other than
> looking at the date of release? Is that the point here, what year a song
> was released? Is there a 'style' of the eighties? Perhaps so, but it
> blows my mind how the programmers are tripping all over them selves to
> carve an imaginary niche out of the air.

But then answer your own question:

> 70's oldies <With none of those Weird songs from the eighties> and now
> 80's Oldies <certainly with none of those corny old songs from the
> seventies>.

"None of those corny old songs from the seventies" seems an apropos definition of 80's music to me.

On a more serious note: I remember when KNDD unleashed it's corporate power in Seattle. At first I thought, "Hey, all the songs I listened to in my youth that nobody ever played on the radio." Then I thought, "Jesus, my generation has become a marketing construct." KNDD is one of the least adventurous radio stations I've ever heard, though they can be one of the finest Muzak stations. I miss WJJW, North Adams circa '83-'85 (last time I was back home, they played Kenny Rogers--on a college station?!) I miss KROQ, LA circa '88-'89 (probably not even their best years.)

It's strange (but significant) that 80's music made it to the general public without radio support (accept perhaps some college stations and KROQ). I'm amazed the affinity I have with people from different parts of the country who know the same music as I, music we alway say has never been played on the radio.

Music is reaching people despite radio and, unfortunately, not because of it. How should radio respond to such an accusation? By ignoring it and

following its market share? By waiting until there is large enough of a market for a product and then investing in that? (And what if they move too late?)

Things are easier for us in community radio, we have access to people. Our station doesn't have to worry about reflecting local tastes, a lot of its DJs are the local music (fans, musicians, record producers). We have problems meeting needs too, due to lack of volunteers, or having no one knowledgable of certain musics.

I guess I don't have a summation, just some thoughts to post over the airwaves.

Rob Keefe

> Dom Caristi

73.1125 requires each station to maintain a main studio within
the station's principal commnity contour as defiened in 73.24(j),
73.315(a) and 73.685(a) except for stations licensed as AM boosters, an
FM station whose studio is located at the collocated main
studio-transmitter site of a co-owned AM station licensed to the same
principal community, or the studio can be IN the community but outside
the contour. Exceptions are also made for "good cause".
If a station licensed to the suburbs puts a sufficient contour
over the "urb", the studio may be located in the "urb" without specific
authority from the FCC.
As a matter of policy (instead of what's in the rules), the FCC
has stated that a main studio should have program origination capability
and a minimum staff (as pointed out by Dom Caristi).
The February 9 issue of Radio World will contain a little on the
main studio rule in Insight On Rules. I've reprinted that below...

Main Studio

An FM station in Red Bluff, CA was fined $10,000 for not
maintaining a "main studio" within its 3.16 mV/m contour. (7 Fcc
Rcd No. 16, page 4860) The station had asked the FCC to allow
the studio move in 1990, and the FCC denied the application. The
station asserts that a "main studio" maintained in the community

of license had program production and transmission capablities, but the FCC did not find these capabilities present during an inspection. The station also asserted that the auxiliary studio WAS within the 3.16 mV/m contour, so even if the "main studio" were to not comply, the auxiliary studio would. The FCC replied, "It appears that having been unsuccessful in obtaining Commission permission to locate your main studio in Chico, you nevertheless relocated it to that community, and when discovered, rely on the same arguments previously rejected."

My local oldies radio station has been affiliated with the "Oldies Coast to Coast" satellite radio service -- which I believe is headquartered in Vancouver -- for some time now. At my station the service operates weeknights between 6 p.m. and 5:30 a.m. as well as on weekends.

However, in the last several weeks, the DJs have stopped referring to themselves as part of "Oldies Coast to Coast" and now use "G.T.O. - Good Time Oldies."

Does anyone know the reason for this shift? Does the satellite radio service have a new owner? Did someone claim copyright infringement? Does `G.T.O.' "test" better? Or was it simply time for a change?

Thank you kindly for reading this message. I'd prefer E-mail as I'm posting this message to several newsgroups. If you want to post your reply for the possible benefit of others, please send a "carbon copy" E-mail to me.

>for more info.

Learn it in a day? HA...I picked it up in about half an hour.
I've just come off a week living in the squalid room at WBZ where
our DSE 7000 resides, editing our entries for the AP and RTNDA
awards contests. Last year I put the entries together on 1/4"
2-track open-reel. This year I had the DSE 7000. There's just
no comparison.

The DSE 7000 gives you the equivalent of an 8 track tape to work
with (although my applications never used more than 2 tracks).
Unlike the less-expensive Mac or PC based systems, the DSE 7000
has a proprietary controller that looks something like a
10-pot board. That makes it a lot easier to use. I can make
splices and loops it fractions of a second...and they're instantly
reversible. None of that rooting through the trash for
the last bit of tape I discarded.

And did I mention the perfect digital sound? The instant locating
of the head and tail of the tape, the location of the last splice,
etc. etc. etc.

If I had 30 large ones, I'd buy one of these babies for my
living room!

St> I'll appreicate any info you folks can give me re: the FM scale
St> and relative vintage of this beast. Bonus points will be awarded for
St> telling me something about the phonograph.

I know the FM band did start out some place other than 88-108,
and moved to its current locale many decades ago. But I don't
remember how many decades (it was long before my time).

As the record player, it is obviously 78 RPM. 78's were 10
inches in diameter and extremely fragile. Some time in the
fifties, they were replaced by 45's.

WABC in New York also has a strong conservative lineup, featuring
Rush Limbaugh, Bob Grant, and Jay Diamond.

Last time I was in listening distance of WLS, the morning show
featured an intelligent, articulate conservative named Don Wade.
Unfortunately, his show was marred by having a liberal broad
known only as "Roma". The show would have been much better
without her. If that makes me a "right wing moron", I'm proud to
claim the title.

Just a couple of things of note:

1.WKSE-FM(dance-based CHR,Kiss 98.5)has now added some long stretches of music. I'm not talking about 30 minutes,etc.so in vogue,but 1hr-plus. Once I heard that the sweep was(I'm not making this up)over 2 hours.

2.From the world-famous "Where Are They Now?"files(from the home office in Wethersfield):Duane Walker,former host of WHTT-AM's afternoon talk show "SportsRap",apparently is now national. The last I heard,he was in Atlanta. So,as you can imagine,what a surprise it was to hear him call the Rapid City-Yakima CBA game Saturday on ESPN2(aka The Deuce). He was also the PA announcer for the N.Y.-Penn League's Niagara Falls Rapids(now in Jamestown, N.Y.)

3.While I'm on WHTT,morning man Danny Neaverth and his morning team now have a calendar out. It happens to be Danny's 35th year in Buffalo radio(he spent over 20 yrs.at WKBW as their AM driver, before it became Spin the Format Wheel radio-it's done satellite oldies,business news,news,and now talk/sports). Anyone that may be interested,please e-mail me privately.

In a previous article, rrb@deja-vu.aiss.uiuc.edu (Bill Pfeiffer) says:
>I mean we have had all Elvis radio, all Beatles radio, all Led Zepplin
>radio and I have heard of an all Garth Brooks station as well. We
>have Hard Rock, Real Rock, New Rock, Soft Rock, Soft <but not too
>soft> Rock, Dance Rock, Classic Rock, Classic Hits, Good Times Rock,
>Christian Rock. We have Top-40, Rock-40, CHR, Urban,
[etc etc etc]

The ongoing compartmentalization of radio is what will kill it. I was in college FM, as I'd imagine many of those here, and unbelievably we were switched from the typical eclectic college non-format (as it should have been) to...get this...Top100?!?!?!?! What were they trying to prove?!?!

Their attitude was that it should be a workshop reflecting the current state of commercial radio, so the music & format should reflect that. What I feel it ended up teaching the students was that radio has all these little niches, and anything just a little outside the norm isn't tolerated. "Sorry, it doesn't fit the format." I remember being frustrated calling a rock station and asking them to play anything by the band 10cc..."Sorry it's not in the format." It's rock ain't it??? So?

And why must it automatically be "hit" radio?

>Example, Chicago has no major commercial Jazz station. We have NAC
>(New Age Contemporary) WNUA, which bills its self as "Smooth Jazz",
>and is basically a light urban by day and contemporary instrumentals
>at night. But it is NOT jazz. However they started doing very well
>in the ratings once they started calling themselves 'jazz'. This
>indicates to me that the people *want* a jazz station, even one which
>is not jazz, but says it is.

This is possibly the biggest joke and the biggest insult to people who know music. Cleveland's WNWV (Cool FM) does the same thing...I have YET to hear a JAZZ recording on this station, it's like playing Beatles, Everly Bros, and Byrds and calling it Country! It's really an insult when I hear people (I'm a musician, jazz & rock) saying "Oh, I just LOVE jazz! Kenny G...." and the stations and MTV/VH1 help perpetrate this. Instead of reflecting the tastes & views of the people, they are the dictators. And it's wrong.

Radio must wake up to the fact that too much choice is not a good thing, as it relates to radio. I'd like to keep one station on and hear (if not jazz followed by doo-wop followed by Beatles followed by Chocolate Watchband, for example) a much wider array of styles & tastes. If limited to past chart action then fine! Go ahead & PLAY a disco tune, follow it with an older soul tune to show genesis...Our oldies station here (WMJI Majic 105.7) is fine, but they play the same 25 tunes or so over & over! Then

there are oldies I know I haven't heard since they came out, and the station never plays them! What gives?!?!

That's my rant...thanks for reading...I love radio but hate constantly flipping thru the micro-formats till I find something decent. Programmers hear the words of your audience! (that's me)

Cheers...

Ste. Genevieve, MO, and Jerseyville, IL, are both pretty far from
St. Louis. But for several years, KFXB at Ste. Genevieve (105.7)
and WKKX at Jerseyville (104.1) have aimed their signals into St.
Louis and are for all intents and purposes St. Louis stations.

In fact, both are listed in the 1992-93 M Street Directory with
only St. Louis addresses.

Even more interesting, KFXB is co-owned with WFXB at East St.
Louis, IL, which makes them a de facto duopoly!

I saw the Yacht Boy 500 at the Consumer Electronics Show in Chicago
last June. It's certainly attractive, and seems to have many features
that would make it live up to its advertising (features include RDS,
stereo through headphones, programmability).

The initial reviews on rec.radio.shortwave and by various shortwave
stations are a little different, though: so far, it's been described
as an average performer, with a few glitches in its design (see r.r.s
for more details). It really does *look* cool, though.

I was hoping to hear much more favorable reviews of this receiver,
and I'm certain that Grundig was, too. The smaller (and less expensive)
Yacht Boy 400 has received much better reviews, and I would
not trade my Satellit 700 for anything. Grundig would be pushing
those radios, I'm sure, if they were a little sleeker (like the '500).

KKOB was recently acquired by the company I work for, Citadel Communications. They're pretty good at the business end of broadcasting, and I suspect this decision, like many others, was strictly that. It beats some outfits I've worked for, where business had little to do with management's mindset. Over the long run, it makes expectations clear.

rrb@deja-vu.aiss.uiuc.edu (Bill Pfeiffer) writes:

> It is OK to interfere and
>deny local content at 3000 watts, but it is not OK to risk
>interference and *offer* local content with 5 watts. What is wrong
>with this picture?

Maybe I can help. Much has been said about interference and coverage and other technical matters. But there is another very important consideration: service.

A five-watt station is not a viable entity. If allowed to be commercial, it would not survive. As a non-commercial entity it lacks any resources to attract funding or any reasonable amount of institutional support. So what, you say?

What that means is that this five-watt "community station" exists, operates, and even survives at the whim of the person or persons who put it on the air. It is supported by them. We all know that what seems like a really fun toy on Christmas day is frequently forgotten by Valentine's day.

To avoid an endless parade of inconsistency (and the concomitant non-service to the community), the licensee should promise in writing to continue to operate the station in some manner for some fixed amount of time. But such an agreement could amount to slavery: the owner/licensee would be supporting the project out of what might be severely limited funds. So now we get to the matter of a possible "financial requirement". This would be in addition to the "service commitment".

There is much more to a radio station than the transmitter. Even if this community station had a group of people as principals rather than an individual, you then run into the problem of politics and infighting. It is axiomatic that the amount of bickering and political fighting is inversely proportional to the size and importance of the operation. Small college stations are hotbeds of contention, while network O&Os are smooth-running, well-oiled machines.

At least when the FCC licenses your "speculator's" station, the owner has a fiduciary interest in keeping the thing alive and at least doing something that serves somebody somewhere. A major part of a broadcast license goes to prove to the FCC that the applicant has the resources to actually run the operation. The FCC assumes that the licensee will be governed by the marketplace after that.

But that five-watt station is completely removed from marketplace considerations, which means that a good portion of the "autoregulation" that the FCC depends upon is not operative. What, besides the desire to

play radio, or to espouse a cause, is the incentive to maintain a continuity of operation of a flea-powered radio station?

In the absence of FCC micromanagement (it lacks anywhere near the resources to provide this and would be resisted at every turn if it even tried to do this) and the absence of market forces which provide a certain amount of "autoregulation" for commercial stations and even non-commercial stations, low-power broadcasting would degenerate into chaos and ultimately serve no one.

Finally, if you remove the "cause factor" of "us vs. the big, bad establishment", I suspect the motivation for the lion's share of proposed low-power operations would evaporate. What do you want to bet that many would lose interest real fast if the five-figure fines disappeared and you were expected to get in line and fill out the forms just like the big boys?

Interference is not the only consideration.

Hello

Regarding the CP for WRNX 100.9 in Amherst, Mass., I believe they may have already exercised that CP. I am an editor in WTFDA (World TV-FM DX Assoc) for Northern FM DX, and received a report from a correspondent in Northern Connecticut stating that while previously they were very weak there (indeed I was in Enfield, CT in Sept.93 for the NRC Convention and it was barely listenable, and WTYD 100.9 New London often dominated it), now they sound local like. So they have done something with their signal. Also, regarding 1270 AM in Springfield, I have heard that they are back on (they were not on in Sept. though I heard testing with an open carrier on occasion), with Spanish language programming, but I have not heard this myself to confirm.

Just want to say I enjoy reading this newsgroup very much, thanks to everyone for posting!

Quote From: TRANSVOX@TYRELL.NET (Mark Roberts)
* WKBQ(FM) (class C1, 106.5) and WKKX(FM) (class B, 104.1) have swapped frequencies. Both stations are owned by Zimmer Broadcasting of Cape Girardeau, which bought Q-106.5 from Evergreen Media this fall. The Q's CHR format is now at 104.1; the "Kix" country format is at 106.5 where it can better compete with long-time country powerhouse WIL-FM (class C, 92.3).

(end quote)

So the 106.5 station has come full circle. It was WGNU-FM in the late 60's and early 70's when I worked there, playing the best country music in St. Louis.

Scott Dorsey incorrectly refered to the BBE Sonic enhancer as a "distortion producing unit" it is not!

The BBE is not an Aphex Aural exciter, and does not operate in the manner.

The Aural Exciter is a distortion producing device, and generates High Frequency Harmonics (distortion) based on the audio information from the input, it then "mixes" these Harmonics back into the audio from the input to add High Frequency information back into the program that never existed!

The BBE is considered by some as an "unprocessor" and for good reason.

The BBE doesn't add harmonics, or distortion. It separates the audio into three bands (low, mid, and high), and delays the low frequencies by and very small amount, and the mids by even a smaller amount. The unit also "looks" at the amount of high frequency information that is in the program material to determine how much processing should be done, so the amount of processing with a BBE is dependent on the program materaial as well as the front pannel settings. In the case of the Aphex box the unit processes according to how the adjustments on the front pannel are set. The BBE is not known to overprocess like the Aphex box, and will even "gate" during the silence portions of the program, thus reduciing noise, the Aphex box will try to process that silence, and thus add noise.

It is quite obvious by Scott's "taken out and shot" remark that he is rather closed minded with the use of these processors. While I agree that all stations should mantain great audio, shooting the "bozo who designed them" is not a solution. For Scott's information both the Arual Exciter, and the BBE are very useful when restoring old recordings, in fact a very close friend of mine who is involved with the restororation of rare opera (that carries a very high price tag after restoration) loves the BBE processors, and he is very against processing in general!

By the way Scott forgot about the Orban Spatial enhancer to increase the difference (L-R) information. I doubt many (if any) stations are using the Hughes SRS processor in their airchain. Maybe Scott should be careful of the limited knowledge aquired by reading Stereo Review and/or "thinking" he knows how things are done
and how they are really done. It can really make one look like a fool when they give out incorrect infomation.

416. St. Louis radio

Tr> * Clear-channel CBS O&O KMOX(AM) (1120) is about to start carrying
Tr> Rush Limbaugh's daily talk show (if it hasn't already). The move has
Tr> generated considerable adverse comment in the St. Louis media. It's
Tr> believed to be the first time since CBS bought the station in the early
Tr> 1930s that KMOX has aired a daily program produced by a non-CBS source.
Tr> Limbaugh formerly was heard on WIBV (1260 kHz, Belleville, IL, 5 kW,
Tr> DA-2).

What a pleasant surprise! KMOX will be the third different St.
Louis station for Rush. The first time I ever heard him, he was
on KXOK (630). That was way back in the days when he was on only
a handful of stations in the whole country. I was immediately
captivated. Whenever I had to drive through St. Louis, I always
tried to plan to be in range of KXOK between 11 am and 1 pm
Central Time just so I could hear him. When KXOK dropped its
talk format, WIBV picked him up.

Glad to see him going to one of the clear channel biggies. Here
in Cleveland, he started on the relatively weak signal of WERE
1300 before moving up to 50kw WWWE 1100.

So what's WIBV doing these days?

(And BTW, what's my old employer, WGNU, up to?)

... You're only young once. You're immature forever.

=> As TransvoxAllyrell.net stated to All on 01-25-94 05:05: <=

Tr> KTNN is at 660, licensed to Window Rock, which is on the Navajo
Tr> reservation in northeastern Arizona. Obviously would be protecting the
Tr> 660 station from New York City (whatever *its* call letters are these
Tr> days), so it may be shooting a lobe up your way.

Its signal gets pretty far east from Arizona. At night it comes
roaring in loud and clear to Bentonville, Arkansas.

The 660 station in NY is WFAN. I wish it covered more territory
than it does, because I'm a Mets fan <G>.

Tr> KTNN is owned by the Navajo nation. I don't think it's been on the
Tr> air more than four or five years; it was a 50-kw station made possible

According to the 1992/93 edition of M Street directory, it signed
on in 1984.

A television program on CBC, Friday 4 Feb.'94 Newsday displayed the ability to access a BBS and select from a menu of a wide variety of CBC radio programs a sound file which could be downloaded and then replayed through the computers sound system. It was useful for both Macs and intel based machines.
The programs included Quirks and Quarks, As IT Happens, Sunday Morning. In short, some very excellent programming. The idea has excellent merit, (may well stimulate the sale of higher capacity hard drives)
The only important piece of factual information that was NOT included in the show was the bleeding phone number of the BBS.
If anyone is privy to this information please send me an e-mail either here on Freenet or rbuttrum@aol.com.
I would also like to learn more about Digital radio transmission.

419. Radio Watchers -- Kansas City

Newsgroup: rec.radio.broadcasting
Date: 1994-02-06 20:55:28 UTC
From: Mark Roberts <transvox@TYRELL.NET>
Message-ID: <2j3lg0$k5l@vixen.cso.uiuc.edu>
Source record: 41274

The following are excerpts from "It's raunchy and racy, and radio fans love it," Kansas City Star, Saturday, Jan. 29.

Are you getting your daily B's? Morning listeners of radio station KYYS-FM are.

Amid rock music, weather and traffic updates, KY-102 morning hosts banter about breasts, butts, bodily functions--and, of course, the Bobbitts.

John Wayne Bobbitt, whose you-know-what was cut off by wife Lorena Bobbitt and then surgically reattached, was an in-person guest on the show Friday.

<ObKYYS: How *else* were they going to reattach it? Tape? Krazy Glue??>

*** *** ***

Too crude? If you think so, you're probably not a fan of what passes for raunch radio in Kansas City. But there are plenty of folks who like what they hear from Guthrie and partners Max Floyd and Larry Moffitt.

On any given day, 108,000 people tune in to the show for at least 15 minutes, according to the most recent quarterly Arbitron ratings supplied by the station. <Is this cume? Must be; the station's shares have been steadily declining for two years or more--MR>

"Our listeners want to be entertained," said Mike Campbell, general manager at KYYS. "They're not the type that wants to hear the news in the morning. They're having fun. They want us to have fun."

Recent "fun" has included carefully measuring the busts of women, including Guthrie's, before and after a surgical hypno-therapist tried to make their bosoms grow. Another time a Midwest inventor brought in a device designed to increase penis length.

Earlier this week the station's morning crew sponsored its annual competition for the biggest rear end in Kansas City: "Butt Bowl '94."

And a morning doesn't seem to go by that some cliche reference isn't made to homosexual behavior.

*** *** ***

Radio listeners may have the sense that the "Max, Tanna and Moffitt" show is the closest thing the metro area has to the potty-mouth antics of Howard Stern, the New York disc jockey who sets the standard for raunch radio. (Stern's sex-driven syndicated radio show is not broadcast in the Kansas City area.)

But it's not as if other Kansas City morning jocks are strangers to sexually suggestive talk. This week Randy Miller of country station KBEQ-FM (104.3 on the dial) aired phone calls from listeners suggesting alternate names for John Bobbitt ("Peter Severino"?).

"You can pick out a bit that any one of 10 different stations do and say, 'Hey, that's a little bit on the edge,'" Campbell said. "But

comparing that with Howard Stern's daily dose of decadence--there's no comparison."
"Kansas City is a conservative city for the most part. And we fall within those guidelines. . . If you want to get some juicy stuff, you watch daytime television on the networks. That stuff is a lot more racy than anything we do on the radio."
*** *** ***
On one show, Guthrie and her partners play-acted the story of Lorena Bobbitt mutilating her husband and fleeing. . . .
Such stabs at humor dismay Jay Cooper, co-host with Dick Wilson of the morning "Dick and Jay Show" on KY-102 from 1975 to 1983.
"We were not dirty," said Cooper, now sales manager at urban adult contemporary station KPRS-FM (103.3 on the dial). "We didn't use bathroom humor.
"We were suggestive. We used double entendre. We tried to make people think a little bit and not come out and just tell a dirty joke."
Dick and Jay weren't above trying to titillate their audience. . . .
"You don't say 'breasts,'" Cooper said. "You allude to things rather than coming out and saying things." Otherwise, he said, "it's junior high level." . . .
<Well, Jay, that pretty much describes the 102.1 spot on the Kansas City FM dial....>

Ste. Genevieve, MO, and Jerseyville, IL, are both pretty far from
St. Louis. But for several years, KFXB at Ste. Genevieve (105.7)
and WKKX at Jerseyville (104.1) have aimed their signals into St.
Louis and are for all intents and purposes St. Louis stations.

In fact, both are listed in the 1992-93 M Street Directory with
only St. Louis addresses.

Even more interesting, KFXB is co-owned with WFXB at East St.
Louis, IL, which makes them a de facto duopoly!

Hi Christina,
I'm not quite sure what you mean by a "private radio station,"
but I assume you're talking about commercial stations. If that
be the case, you should be introducing yourself to program
directors in your town right now! Call 'em up, tell them
you're a radio student, and you'd like to make an appointment
to talk to them about radio as a career. Make a good
impression, leave a tape of some of your air work (I assume you
have a show on your college station), and ask if you can call
back in a week for an informal evalution of your tape and tips
on what you can do to improve.
Let them know you're hungry for commercial experience, even as
an unpaid volunteer, and you'd love to do whatever they need
done, such as helping set up remotes, sorting contest ballots,
etc. GET YOUR FOOT IN THE DOOR NOW!
I teach radio broadcasting at a 2-yr school in Champaign,
Illinois, and our students get jobs with astounding regularity.
Hope this helps--write back if you need more info. ---Dan

Quite true on both counts! WRNX now IDs itself as WRNX, Amherst, Northampton,
and Springfield. 1270 AM is WSPR, using the same call as before they
were driven dark by Dan Yorke, who now flames on WHYN-AM. (At least he
doesn't own it.) WSPR is Spanish language full time. I have heard that
WACE-AM, has a CP to go full time, night directional.

425. Arkansas Radio Question

Newsgroup: rec.radio.broadcasting
Date: 1994-02-08 18:23:53 UTC
From: v131kkdn@ubvms.cc.buffalo.edu
Message-ID: <2j8lbp$jtl@vixen.cso.uiuc.edu>
Source record: 41280

Hello!

I have a question hopefully someone out there can help me with. During a December e-skip oepning that reached into FM, I heard a station on 92.7 coming in with Arkansas Razorbacks basketball. Does anyone know what station(s) are on their network on that frequency? or, if you are not sure about that, does anyone know what their flagship station is. I could perhaps contact them and inquire about an affiliate list. I am an avid FM Dxer, and am veryc curious what station I heard as I do not think I have had this station before (I have never heard an Arkansas 92.7 before). I was slightly taken aback by the arkansas mention because the other stations that I heard at this time were WBBN 95.9 Taylorsville (hattiesburg), MS and WCKW 92.3 LaPlace-Baton Rouge_New Orleans. So it could always be a LA or MS station though I doubt a station outside the homestate would run this.

Thanks in advance for your help!

426. Re: Boston: WBZ - where's the NEWS?!

Newsgroup: rec.radio.broadcasting
Date: 1994-02-08 18:23:56 UTC
From: ab992@cleveland.Freenet.Edu
Message-ID: <2j8lbs$jtt@vixen.cso.uiuc.edu>
Source record: 41281

I am a dedicated WBZ listener in the late evening/weekend evenings. Here in Cleveland, there is no local talk programming (or very little- only sports on a couple of stations in the evening) I enjoy listening to Brudnoy (although I haven't really noticed the lack of news on the half hour - I'll have to pay more attention!). I REALLY love Norm Nathan and listen to him every Friday and Saturday when I can. I also miss him on Sundays.

I really hope BZ keeps its local format - I won't have anything else to listen to (except music!!) or maybe KDKA! I guess local programming is eventually going to be another victim of cost cutting, as it is more cost effective to buy syndicated programming. As I stated previously, Cleveland AM radio is probably 85% syndicated during the day and most of the night. BORING.

Here in Seattle KLTX (95.7) and KPLZ (101.5) just changed formats to a #1 hits of the 70's 80's and 90's. Segues range from Prince into U2 to Mariah Carey. It is a really strange format but KLTX was Lite AC,and KPLZ was Top 40.

Hi Dave:

Bear O'Brian here (93.3 WBBO - Today's Best Music) ....

We have a special morning show on Friday's on BBO called Funky Friday.
It consists of late 70's and early 80's hits.

Also, another station in the market (MY 102.5 WMYI) has a weekend show
(Saturday nights, I think) with call in requests for 70's & 80's hits.
It's unbelievable how many people want to her YMCA by the Village
people.

A third station (smaller and lesser known) (WBFM - The Biggest Hits and
the Best Oldies) has a format which is so broad in scope as to include
hits spanning from the 60's to today. Actually, it is a nice little
piece of diversity. They seem to emphasize middle 80's.

I agree with you that we may be seeing a new phenomenon in radio formats.

I for one (age 29) do not identify well with the oldies of the 60's or
all of the newer music of the 90's. I like the music I remember growing
up in the late 70's and early 80's. I hope it is a format which is up
and coming.

Bear (He's such an animal) O'Brian. One of the people who truly misses
the "personality" driven radio of the early 80's.

rrb@deja-vu.aiss.uiuc.edu (Bill Pfeiffer) wrote:
:
:Example, Chicago has no major commercial Jazz station. We have NAC
:(New Age Contemporary) WNUA, which bills its self as "Smooth Jazz",
:and is basically a light urban by day and contemporary instrumentals
:at night. But it is NOT jazz. However they started doing very well
:in the ratings once they started calling themselves 'jazz'. This
:indicates to me that the people *want* a jazz station, even one which
:is not jazz, but says it is.

No, Bill, I think you misread it. WNUA started attracting ratings when it dropped the "new age" crap and integrated fusion and contemporary jazz with the instrumentals. David Sanborn, Chick Corea, and of course in-house personality Ramsey Lewis are among the jazzmen featured regularly on 'NUA.

I still happen to think it's a creative format, all things considered.

The other examples you give are (largely) talk formats. As for the music formats, my outlook is this. Forget what some paper-shuffler in the front office wants to call it. What does it sound like to *you*? WNUA is a good example. It sounds to *me* like modern jazz meets Mannheim Steamroller. Interesting, not entirely artless, and works particularly well in the car and in the office (or at home if you're entertaining).

If someone wants to do an all-Zep schtick, okay, but let's understand it's mostly gimmickry. Labels such as Rock-40, modern rock, crossover country, and so forth are attempts, in my opinion, to codify something that's been cobbled together from a director's research, station experience, and ear. When a new-label format (like 'NUA's or the Loop's, or even WFAN's) works, it's probably not simply the outgrowth of research, but the programmer's experience and her or his ear as well, all giving management a good sense of "what works." At least I'd like to think some of my favourite stations weren't simply plotted on paper with no consideration given to if it sounds like a winner.

I think a good example of this would be the country music station scene in my hometown of Billings, Mont. In the early 1980s, at least four stations there were all country. But any listener could tell you the difference. KGHL (AM 790) played more "pop" country and had more news (better announcers, too). It has proven a remarkably durable format for nearly 15 years. Maybe if KGHL were in a major market, some knucklehead would have a special name for its format. But in Billings we jes' call it country.

This may come as something of a shock, but FCC inspectors aren't always right. ;) At one station where I was CE we were cited for allegedly repeatedly exceeding 100% negative modulation. The transmitter was a 5 kW Harris MW5. It was physically impossible to exceed 98% negative modulation without repealing the laws of physics. Go figure.

> His official interpretation was that waiting until a "natural

> hour or the occasional Mahler symphony, say, that goes beyond one hour in
> performance time. He was quite specific that regular programming
> contrived to cover the top of the hour without legal ID was *not* legal.

The inspector with which you spoke was *wrong*. He doesn't determine where the "natural break" in programming is, YOU do. I've run recorded and live symphonies, church services, and other complex programming that spanned as long as three or four hours that had no "natural break," and therefore no station ids. Those instances where you have to suspend station id's are admittedly rare (depending upon your format), but they do occur.

The real answer is if you're a mature adult, and capable of making decisions on your own, you decide for yourself. If programming management is not comfortable with "creating" breaks within complex programming, then you don't. It's that simple.

Hello...

I am employed by two local stations in Grand Rapids, MI, and I got into both of them the same way...INTERNSHIPS!!!

I was able to get course credit for both of them at my college, and thus it helped me to get my communications degree. A college degree is important, however, I was told the same thing by many people in the business...it's who you know and your connections that get you a job in this business.

Hope this helps...

Howdy!

On the lower penninsula of Nova Scotia, I've been able to pull in AM stations from as far away as New York city between sunset and sunrise. I've flipped around the dial and haven't been able to find anything resembling NPR. Does anyone know if NPR broadcasts on AM from anywhere in New York, Mass., Maine, etc, or are they strictly FM?

Thanks for the help.

/* Written 12:22 pm Feb 1, 1994 by resystom in web:amarc.radio */
/* ---------- "Radio Sumpul - El Salvador" ---------- */
RADIO SUMPUL: ECHOES OF PEACE IN EL SALVADOR

Now that guns have been silenced, El Salvador's peasants are striving more and more insistently to be heard. In the northern department of Chalatenango, Radio Sumpul, a joint project sponsored by the Fundacion Comunica and AMARC, is trying to echo the voices of those campesinos who have rolled up their sleeves to rebuild El Salvador.

It seems like just yesterday that the "guerrilla" radios, Farabundo Marti and Venceremos, were the only reliable sources of information for people living in the war zones. Now, those same people are determined to learn how to use radio for their own purposes and to turn it into an important tool in the framework of the vast reconstruction and democratization movement that is just beginning.

In July and August 1993, 23 of those people decided that they would learn everything they could about radio. Under the direction of Louise Boivin and Victor Carranza, 18 women and 5 men, all about 20 years of age, spent 5 weeks practising interviews and reporting, public announcements and skits, as well as the use of microphones and tape-recorders. Of the 23, 16 will soon be responsible for offering programming that reflects the aspirations, activities and dreams of 400,000 people living in 60 communities spread out over the northern departments of Chalatenango, Caban~as and Cuscatlan.

Above all, Radio Sumpul is an initiative on the part of the communities of "displaced" and "repatriated" people, the latter being refugees who returned to the country shortly before the hostilities came to an end. In this context, radio serves as a tool for mobilization, organization and social reinsertion. Though, at the outset, programming will be limited to music, community announcements and reporting by correspondents in different communities, the objective on a middle-term basis is to produce news bulletins and analyses, as well as educational and preventive programs. Issues specific to women will certainly be a priority. More training sessions have been planned for the coming year in order to strengthen the capabilities of broadcasters and their communities.

There remains one dark cloud on the horizon: the Salavadoran telecommunications authorities (ANTEL) have not yet issued a broadcasting license to Radio Sumpul, despite the fact that an application was submitted more than 10 months ago. Unlike the

former "guerrilla" radios, whose legality was explicitly acknowledged in the peace agreements, the community radios have no legal means to provide for their existence. Because they are aware of the mobilizing potential that such radios possess, government authorities may be tempted to postpone licensing as long as possible, or at least until after the presidential elections scheduled for February 1994.

However, the 60 communities that are impatiently waiting for their radio to begin its broadcasts plan to use all necessary means of pressure to further their cause. Judging from the enthusiasm displayed by people on the occasion of the preliminary broadcasting tests, which took place in the open air and right in the middle of the communities, we can bet that Radio Sumpul will be on the air by the end of this year. With the kind of determination and courage that Salvadoran peasants have shown us in the past, they will certainly be capable of making their voices heard.

436. Wichita Blacks Frustrated By Lack Of Access To Radio

Newsgroup: rec.radio.broadcasting
Date: 1994-02-08 18:24:25 UTC
From: Lionel B Barley <73321.571@CompuServe.COM>
Message-ID: <2j8lcp$k1j@vixen.cso.uiuc.edu>
Source record: 41291

This is a condensation of an article by Joe Rodriguez in the Wichita Eagle dated Sunday, 01/30/94.

When country music station KYQQ-FM was knocked down at bankruptcy auction last fall, Jeff Harris (executive director of the Wichita Minority Business Development Council) and a group of minority backed investors were shut out when bidding topped $500K. There are no broadcast properties in the Wichita market currently owned by a minority majority. The only previous minority owner was country singer Charley Pride who owned KQAM-AM for a time. That station was a hands-off investment, with programming not specifically targeted to minorities. Harris is seeking station because, "It's an important vehicle of communication in which you don't have to filter or have filtered what you want to communicate to your culture." Harris wants a station that includes air time for gospel music, pastors to deliver messages, and a public forum. The station would also have a strong r&b or jazz format. Harris goes on to state that, "There are just too few minority-owned companies in town" to totally support the station with advertising revenue, so his station will also seek advertising revenue from White owned businesses. Current plans for the group now focuses on KIBN-FM, presently a non-commercial and subscriber-supported station programming urban gospel. Station owners "New Life Fellowship" have been contacted, and support from Wichita's minority population is being sought.

437. What Else Ails Radio

Newsgroup: rec.radio.broadcasting
Date: 1994-02-09 00:29:05 UTC
From: Mark Roberts <transvox@TYRELL.NET>
Message-ID: <2j9aoh$22h@vixen.cso.uiuc.edu>
Source record: 41292

In the "Music of the 80s" thread, our honorable moderator took the opportunity to let it rip at program directors, placing upon them much of the blame for the increasingly fractionalized yet uncreative state of radio programming in the United States today.

Bill makes a lot of good points. And, it should be noted, I fared so badly at the hands of program directors over the years that it drove me from radio.

So we'll stipulate that program directors are part of the problem, 'cause they *are*. But I think it's a lot more complex than that.

One of my best friends owns a small chain in the Midwest and, knowing that I like numbers, lets me look at the books every once in a while. For all I know, he could be showing me the output of a random number generator, but I don't think so :-).

Anyway, based on what I knew when I was in the business and what I pick up from this and other friends still involved, here's my take at what ails radio today:

* Debt service. Since so many stations bought during the 80s (why buy pork bellies when you can buy a radio station?) have run into trouble, financing is a *lot* harder to obtain...and a lot more expensive when it *is* obtained. It's the same reason the federal deficit keeps growing. Interest payments consume so much of the budget that you can't do other things.

In the case of radio, this means that owners have a strong disincentive against trying anything that isn't a proven audience-grabber. Instead, the incentive is toward maximizing revenues, to make the interest payments and keep the lender happy.

* Ad agencies. They hire people who don't understand radio's intangibles. Most of them prefer TV or newspaper and think radio is that poor relative whom we really don't want to have anything to do with because he's just not elegant enough for us. So, when they *can* be bothered with radio, they just look at the latest book and buy by the numbers.

* Ratings. One of the great things about going from a career in broadcasting to a computer science graduate program is that you get to understand things like probability and statistics and survey methods--and relate them to how statistically corrupt the present ratings process really seems to be.

It's too bad Birch couldn't make a go of it. Its methodology of using random telephone calls was superior to the diary-based methodology of Arbitron. Between a methodology based on diaries and the sample sizes Arbitron uses, I estimate margins of error of anywhere up to 30%, depending on the market. Yet these rankings are what ad agencies use to

determine radio buys and what program directors use to evaluate the performance of their stations' announcers, newscasters, and programming in general. And they're what some of us use to track general station performance. (Some people follow the stock market; I follow the Arbitrons.)

* Quality of people. For the most part, the best and the brightest don't go into broadcasting any more. (I hear this from another friend of mine, a professor at a prestigious school of journalism in the Midwest.) Hell, I'm making twice as much as a computer analyst as I did as a major-market reporter and anchor (KTRH in Houston) nine years ago Friday. The kids pick that up. And go into engineering, or computer science, or, if they still want to go to J-school, advertising or PR. That's *not* to say there are *no* good people in radio; there just seem to be many fewer than there used to be.

* Public and college radio. WHAT?????, you're probably asking/yelling/gasping, all at the same time. Hear me out.
More educated (and presumably affluent) listeners are attracted to the discernibly higher-quality programming on NPR stations. Avant-garde types are attracted to the cutting-edge music played on college stations. Burnt-out hippies from the 60s (some of whom aren't so burned-out and have kids and spend money on 'em) are attracted to "community" stations for their diversity in programs and for the Sixties feel that some of them still have.
So the audience that's looking for diversity and quality doesn't even bother looking for it in commercial radio any more.

An anecdote probably best summarizes all this:
Just before I "left" KTRH, the news and program director (who had replaced the news director who had hired me) severely criticized me for two things:
-- "You're not appealing to Joe Six-Pack," and
-- "You should stop doing news the way Edward R. Murrow did it."

Since when did Edward R. Murrow become an example of how *not* to do radio?
For what it may be worth....

Re: Coast 1040 going dark,

Yes, it is dead. It was actually quite a shocxk for me, as I had left Vancouver for only a ferw months to find it had died. It is now, I kid you not, a 24 hour elevator music station now.

The main reason for it going dark was that it had lost a lot of money in its bid for an FM license.

Interesting story there. The CRTC is supposed to fight for Canadian content in the face of such overwhelming US media bombardment. CKST (Caost 1040) made a policy of putting good Canadian artists, and (gasp) LOCAL artists not signed on major, or even indie labels into its regular rotation, both to play good music, and to promote the native talent.

Who fought the bid for an FM license hardest? Yup, US FM statiions complaining about Candains possibly entering US markets.

And despite thoands of letters and much suppoirt, the CRTC denied 1040 saying that AM was fine for them.

I'm in a quandry in my home city of Portland, OR because the "alternative" (don't we need to use that word a little bit more often?) station here really sucks and i'd like to get a 1040-like station started here, but don't have a small mint.

any ideas on getting either a big interest to fund the idea and buy an existing wanker am station, or on starting a station up from scratch. Any inputr would be greatly appreciated.

439. Re: Real time audio compression

Newsgroup: rec.radio.broadcasting
Date: 1994-02-09 00:29:07 UTC
From: hhallika@tuba.aix.calpoly.edu
Message-ID: <2j9aoj$22i@vixen.cso.uiuc.edu>
Source record: 41294

: > [...] Still, there is no way to "compress" analog audio to
: > get a greater frequency response than the wire it's travelling down.
:

I consider bandwidth and signal to noise on an analog channel to
be "different forms of the same thing". A few examples... It we encode
audio at 16 bits per sample at 48,000 samples per second, we need about
768,000 bps, about half a DS1 circuit. This would have a Nyquist cutoff
frequency (ideally) of 24 KHz. It also has a dynamic range of about 96
dB.
If instead sample at 96,000 samples per second and use 8 bits
per sample, we get a Nyquist cutoff of 48 KHz with a dynamic range of 48
dB. So, over the same channel we have our choice: higher frequencies
transmitted or higher dynamic range.
This, of course, is based on some digital pipe (like a DS1)
where we can just shove so many bits per second down the pipe. What if
we have an analog pipe?
If we just send two levels down our analog line (one level
representing 1, the other representing 0), we can send 2 bits per second
for every Hz bandwidth (a simple assumption based on a phase linear line
with no intersymbol interference). If we instead send four levels down
the line (representing 00, 01, 10, and 11) we send two bits per baud and
can get 4 bits per second for every Hz bandwidth. We could just keep
increasing the number of levels we send down the line and get an
infinite number of bits per baud. Whether we use these lots of bits
per second to carry a higher bandwidth program or a higher dynamic range
program is up to the encoding. If, however, we have a noisey channel
(aren't they all!), we can't sort out the differnt levels when we get to
the receive end, since noise causes the receive level to cross the
receive level thresholds. We can fix some of this using error
correction codes, but they add overhead. At some point the throughput
lost by adding error correcting exceeds the throughput gained by adding
analog levels on the noisey line.
Using digital encoding allows us to trade easily between
modulating signal bandwidth and recovered dynamic range. Frequency
modulation does this to a certain extent. It allows us to give up
modulating signal bandwidth for improved dynamic range on the noisey
channel. Running AM on a 200 KHz channel would allow us to modulate up
with audio up to 100 KHz (actually, two 100 KHz audio channels using
either quadrature modulation or independent sideband AM). However, the
dynamic range on AM is directly related to the noise on the channel.
Nothing you can do about it. With FM we can run a wider deviation
consuming the 200 KHz RF bandwidth with our 15 KHz or so audio. In the
process, we gain dynamic range in the demodulated output (the

demodulated signal dynamic range can be substantially more than the dynamic range of the carrier channel). With FM, however, we cannot trade dynamic range for bandwidth and get the signal to fit in a smaller bandwidth than the original signal. For example, a 10 KHz audio signal takes a minimum of 20 KHz bandwidth on FM (narrow band FM generating one pair of significant sidebands). Going back to the digital encoding schemes mentioned above, we truly have the freedom to trade back and forth between dynamic range and bandwidth.
Some ideas I've played with, but haven't done anything with...
Can we make a better FM demodulator? Since FM sidebands are symmetrical, can we make a DSP demod that takes advantage of this symmetry possibly improving dynamic range? Can we properly recover the FM signal when one of the sidebands is corrupted by multipath cancellation?
Well... more opinions then you ever wanted... Coffee does that to me. And it was only decaf!

440. WANTED - DJs/prog dir interested in new techno/ambient album

Newsgroup: rec.radio.broadcasting
Date: 1994-02-09 00:29:08 UTC
From: arcana@netcom.com
Message-ID: <2j9aok$22k@vixen.cso.uiuc.edu>
Source record: 41295

EinProdukt is looking for DJs or program directors interested in playing Violet Arcana's new album, "In the Scene of the Mind". Please read the info provided below for a detailed description of Violet Arcana. If this album is something you think would fit on your playlist, please e-mail the following info to arcana@netcom.com so we can send you a copy:

Your name/position
Radio station name
Radio station address
Shipping address (if different)
Phone number

Also, it would be great if you could include some background information as to the musical format of the show you might work this into. :-) We're not shure how many people might respond to this, and because there's a limited number of copies we can send out, the more background you can give us, the better!

INTRODUCING VIOLET ARCANA

Often described as dreamy, ambient, techno-pop, Violet Arcana's debut album, "In the Scene of the Mind", presents a melodic atmosphere of ethereal vocals, spoken word collages, and contemplative lyrics. Haunting, moody sound textures weave their way throughout compositions creating an ethereal dreamlike quality that's hard to forget.

By introducing an organic and emotional feel to their compositions, Violet Arcana separates themselves from the sterility many perceive from electronically based music. Many sounds on the album are acoustic and include vocals, guitars, or ethnic percussion played or sung by the artists and processed through unique software programs to radically alter their timbre and pitch. Those who like their music to sound rich, lively and full of complex sounds will appreciate this philosophy. In keeping with this idea, there are many analog synthesizers alsoQanalog instruments are by their very nature warm, complex, and unpredictable.

WHO IS VIOLET ARCANA?

Violet Arcana combines the talents of Jeremy Wells and Dave Duddleston. Jeremy's background includes several solo projects done under the name 68000 (Silent Records, San Francisco) while Dave has produced electronic bands since 1989 (including 68000).

HOW TO GET A FREE AUDIO/VISUAL SAMPLER

For those with FTP access, you will find various audio and visual samplers by anonymous FTP on "netcom.com" (path: /pub/arcana). There are

also samplers on most of the commercial on-line services including Compuserve, Delphi, and America Online (search for files using the keyword, "Violet Arcana").

Violet Arcana is exclusively distributed by EinProdukt in the US and Canada and Music Research for the rest of the world.

Ah yes, Cleveland. Quite possibly the largest market w/o a true CHR station. Question for all you fans of Cleveland radio: Do you think the radio stations in Cleveland serve the needs of the listeners with their current format? I've been hearing a lot of gripes lately about how Cleveland doesn't have any stations that fit people's tastes. Some have given up on radio altogether, and are instead listening to CD's. What do y'all think?

: station. It's long intrigued me the lengths that PDs (and OM/Gms and Consul-
: tants) will go through to avoid a painfully simple, entirely reasonable law
: from the boys on M street.

<...snip...>

: It really seems so simple. The FCC allows you SO MUCH room to program and
: be creative. They've even dropped the PSA requirements. Why is it that these
: Pds and consultants can't abide by these brutally simple rules.

: Maybe the offending potentates are just brutally SIMPLE people.

: Any guesses?

I think you just answered your own question.

And a consultant is nothing more than a PD who got fired one too many
times. (Though I do know of a couple of consultants out there who are
sharp and who are worthy of respect.)

Creativity in radio these days seems to be limited to the discovery of the
number of ways in which exclusively biological activities can be described.

Robert Casey (wa2ise@netcom.com) wrote:
: Some humor I heard on KITS (a promotion for the band that has the song "Loser":
: "Are you a loser? Take this test:

: - Has it been more than two years since you got laid last?
: - Do you think a report card with all D's is good?
: - Are you considering a career in radio?

: If you answered "YES", you qualify as a loser! First loser to call in gets
: concert tickets!

: "Duh, I'm a radio announcer"

KITS is a *wonderfully* creative station. It's sharp, funny, and
interesting to listen to. Most modern rock stations tend to be somewhat
dull aside from the music they play (KPNT St. Louis is an exception,
fortunately). But KITS is consistently bizarre and ironic.

: --This is the same station that tends to play songs with the "f" word in them.
: I considered calling their request line and saying "Hi, I'm from the FCC,
: think you should avoid playing those songs with dirty words, OK?"

Please don't do that! I wouldn't want to scare them. We need more KITSs
out there, fricatives and all.

And, it should be noted, KITS does *not* usually use scatalogical/locker
room humor to shock. The "f" word is an integral part of Radiohead's
"Creep." Fortunately, you can buy the CD and hear the version most radio
stations won't play.

KITS is one of the best radio stations *ever*. Too bad it's
two-thousand-plus miles away from where I live....

446. Digital Radio Propagation Measurements (Canada)

Newsgroup: rec.radio.broadcasting
Date: 1994-02-09 00:29:24 UTC
From: ah617@FreeNet.Carleton.CA
Message-ID: <2j9ap4$231@vixen.cso.uiuc.edu>
Source record: 41201

Canada Continues Digital Radio Propagation Measurements

Important tests to more precisely understand the propagation characteristics of L-Band digital radio transmission have been recently concluded at a temporary installation at Trois-Rivieres, Quebec.

These measurements follow up on the successful Single Frequency Network (SFN) measurements performed during the winter of 1992-93 in Toronto-Barrie, Ontario, which demonstrated the feasibility of large area SFN at L-Band with transmitters spaced up to 85 km apart.

Results of these measurements, using various antenna patterns and gains, and different transmitting antenna heights, are currently being analysed. They will advance the understanding of:

- the effect of varying the transmission height above average terrain (HAAT) and the effective radiated power (ERP) on the coverage in various terrain topology;

- the feasibility of wide area and rural area coverage over the above horizon propagation measurements as well as long term fading measurements;

- propogation characteristics required to develop a computerized propagation model and planning criteria for Digital Radio as well as interference criteria and frequency coordination procedures for Fixed and Mobile Services.

Digital radio transmitters are now being established in Montreal and Toronto for experimentation and demonstration which should start in March 1994.

- 30 -

This information comes from The Task Force on the Introduction of Digital Radio, an industry-government body which is coordinating the various steps required for the transition to digital radio service in Canada.

447. Rush Limbaugh on AFN (Europe)

Newsgroup: rec.radio.broadcasting
Date: 1994-02-09 00:29:24 UTC
From: juergenb@ecs.comm.mot.com
Message-ID: <2j9ap4$230@vixen.cso.uiuc.edu>
Source record: 41202
Cross-posted to: rec.radio.broadcasting,rec.radio.shortwave,rec.radio.shortwavezz

It seems, my first try to post it went wrong.

Well, Rush Limbaugh has made it even to Europe. AFN has him from
21:00-22:00 UTC on the Power Network
(mostly MW stations: 873, 1013, 1042 KHz)

I listened for about 30 minutes. There were lots of comercial breaks,
where the AFN guys had a tough time to insert their own stuff.
Then Rush held his long monologues. And just a bit of phone-in, looked
kind of an alibi to me.

Conclusion: What a waste of airtime. I would not want to listen to
the opinion of an conservative guy and just waste my own time.
By that I could just listen to the rubbish of anybody else. I wonder
why this catches on in the US. People can't be that stupid?

I wonder why AFN relays it at all? There most be much more
interesting stuff in the US radio market to bring over to here.

Source record: 41203

Greetings from Quito. This is my first check-in, so I hope I'm doing it correctly. Several comments on a recent Airwaves issue.
In response to Stephen Cohen: You can often tell the age of a vintage radio (or anything for that matter) by checking the latest patent date, and then finding in what year patents with that number were issued. That will put you pretty close. I have such a list, if you send me the latest patent date in your phonograph, I will look it up.
As to station ID's, I thought I heard somewhere that legal ID's now are required only once every three hours. Is that true?

449. Radio Watchers -- Kansas City

Newsgroup: rec.radio.broadcasting
Date: 1994-02-09 19:59:33 UTC
From: Mark Roberts <transvox@TYRELL.NET>
Message-ID: <2jbfb5$bes@vixen.cso.uiuc.edu>
Source record: 41204

Excerpted from "Waves of trivia, memories," by James J. Fisher, Kansas City Star, February 8, 1994:

BOONVILLE, Mo. -- This part of mid-Missouri is where you start fiddling with the car radio.

By here, all but the strongest KC stations are scratchy. Clear reception from St. Louis is down the interstate. Here you get country music, commodity markets, maybe a nice lady wanting to sell a set of 15-inch Chevy wheels.

Which is fine. And if you want more, you can punch in 1370 AM. And get this:

"When I was a kid our car was just a two-seater," said a woman calling in to KWRT, Boonville. "That's all we could afford."

. . . Or this from another caller:

"When somebody'd die back then, neighbors would ring the bells they called the cows with. Usually they'd ring them once for every year somebody lived. That always seemed kind of nice."

Slick KWRT ain't. No way it's one of those big-city stations with lead-in music, rapid-fire news readers, vacuous patter, brief weather forecasts, or non-stop commercials.

Oh, there're commercials on KWRT. The station is comfortably in the black, said owner Dick Billings, mainly because it concentrates on *local* news and weather, obituaries . . . ag markets, plus an eclectic programming mix of country music and big bands.

And from 9 to 10 a.m., it has what's become a wildly popular show called "Reminiscing," where people, well, just remember. . . . Billings got the idea reading one of those "good old days" magazines at the barbershop.

What happens, apparently, is one memory triggers others. Before you know it, the station's switchboard is jammed.

The first caller the other morning brought up Packard cars. That led to other calls noting:

Who and where the Packard dealer in Boonville was.

The appearance of all-steel car roofs in 1935.

How 1937 Fords came in 60- and 90-horsepower versions.

On the surface, those are just faces. But the voices bring a poignancy, something most of the so-called media now lack. After awhile <sic>, spousal mutilation and fratricide get old.

. . . To handle the calls, Billings has installed three 800 numbers. They're for the convenience of people outside the Boonville exchange and for handling the volume of calls.

"We've been doing the show 19 weeks," Billings said. "Right after we started, the phone company demanded to know what we were doing out here -- we were tying up the rest of the system.

"I told them I was sorry. But I was also tickled pink."

Boonville is about 30 miles west of Columbia. KWRT is a daytimer. It
sold its FM to Zimmer Broadcasting of Cape Girardeau in 1990 (if memory
serves me correctly), which upgraded the 99.3 class A facility to a C2
serving Columbia and Jefferson City.
<climbing on soapbox>
I can't say much for Fisher's writing style (sounds like Garrison
Keillor on acid) but he makes a good point: sometimes NOT being slick is
what sells. And the stations that serve their communities thrive best
over the long haul. That applies to big markets, too, although
consultants and program directors seem to have forgotten that.

450. Radio Watch-Buffalo/Toronto

Newsgroup: rec.radio.broadcasting
Date: 1994-02-09 20:00:02 UTC
From: ag365@freenet.buffalo.edu
Message-ID: <2jbfc2$bfk@vixen.cso.uiuc.edu>
Source record: 41205

Some items of note:

1.Some staff changes at WRQI-FM(S.Bristol/Rochester;95.1/95.5; Rock-It 95):Operations mgr.Orest Hrywnak adds program director duties as well,replacing PD/MD Bob Payne-who exits. The weekday lineup looks like this:

6am-? Howard Stern
?-3pm Gene Fillaci(who joins from crosstown WPXY(CHR;98PXY)
3-7pm Mara Davis(was doing nights;also new MD)
7-?pm Greg Allen(who was doing middays)

BTW,I added a ? for Stern's endtime because-as a fan will tell you-the show is like the Energizer bunny:it keeps going & going & going...until he shuts up. :-)(at least about the show)

2.Speaking of Stern,today's(2/8)Alan Pergament column in the Buffalo News has a small blurb about him. Apparently,his ratings dropped in the fall book. Yeah,Alan,nice that you FINALLY mentioned the ratings-nearly 3 WEEKS after I posted them to this group! (Granted,they're only 12+,but I was still first.) Jeez,it's like we can't enough columns about TV,but try finding one on radio...(Flame off..That felt good!)

3.My K.C.counterpart,Mark Roberts(BTW,thanx for the help on Bonneville)mentioned John Bobbitt's appearance on KYYS-FM. I believe he also popped up on WGRF-FM(classic rock;97 Rock) a few weeks prior. While I'm on 97,they recently announced a new contest for their morning show:get a divorce for Valentine's Day(yes,you read right;no,I'm not making this up). Sure,that's JUST what I want to get my intended for the 14th.:-) Anyone heard some stupid contest for this year or for all time,post it here and e-mail it to me as well.(One last thought:this is the station that once offered $1,000 for a woman to sleep w/morning sportsman/sidekick Marc Stout and offered breast enlargement as a Father's Day gift.)

Until next whenever..peace out.

Message-ID: <2jbfdg$bhq@vixen.cso.uiuc.edu>
Source record: 41207
Cross-posted to: alt.radio.digital,rec.radio.broadcasting

I am considering doing my thesis on an aspect of digital audio broadcasing (DAB)AB)
, but my field does not apply to the Eureka 147 system. I am having trouble
finding info on other systems, specifically the "Project Acorn" system, which
I believe is being funded by CBS, Ganett, and Group W radio. Can anyone
point me in the right direction for technical literature on these systems
(esp. Acorn)? Does anyone know whether there is a lack of info on Acorn
because it is proprietary, or because it has proven inferior to Eureka (please,
only solid info here. Keep opinions to a minimum. I know I am opening up
a bag of worms here if I don't state this outright).

Thank you in advance for any information or advice.

Regards,
Jeff

/* ---------- "RadioAction Network" ---------- */
RadioActive Solidarity
======================
When word of the firebomb attack on Argentina's Radio La
Tribu FM reached the Montreal office in September, AMARC's
Solidarity Network was quick to respond.

A two-page RadioAction Alert was drafted in English, French and
Spanish, complete with details about the attack and suggested
action to be taken in support of the community radio station. The
Alert was then sent by fax and e-mail to the over a dozen
regional coordinators of the Solidarity Network who in turn
copied and forwarded the message by e-mail, fax and post to
hundreds of community broadcasters on every continent.

The message was also sent by e-mail to dozens of individuals and
to networks such as the International Freedom of Expression
Clearing House (IFEX) and the Internet Radio Journal which
forwarded it to their own networks.

Within a few days thousands of people had received the Alert and
a number of community radio stations and anti-censorship
organizations had already sent messages of support to La Tribu FM
and of protest to Argentina's president.

The Network's first RadioAction Alert, calling for support for a
German community radio journalist unjustly sentenced to three
years in a Turkish prison, was issued in February. Since then
Alerts have also called for support for stations in South Africa,
El Salvador, and ex-Yugoslavia.
------------------
If you are interested in receiving the RadioAction Alerts,
contact AMARC's Montreal office and we will put you in touch with
the coordinator in your area. There is still a need for more
coordinators in certain regions so please contact us if you can
help distribute Alerts in your area. Electronic mail users can
send a message to amarc@web.apc.org and receive the Alerts as
well as other information from AMARC.

A report on the Network's first year of operation is available.
Contact AMARC if you would like a copy.

455. Most interesting BCB QSL

Newsgroup: rec.radio.broadcasting
Date: 1994-02-09 20:01:12 UTC
From: martin@cod.nosc.mil
Message-ID: <2jbfe8$bjj@vixen.cso.uiuc.edu>
Source record: 41210

This happened over ten years ago, and I recalled it to a friend
last weekend; thought it might be of interest.

In October, 1983, while living in Hawaii, I would often wake up
around 4:30 am to dx Alaskan and Asian stations prior to local sunrise.
When I tuned to 560 kHz, I heard KVOK, Kodiak Ak, and they were having a contest.
The first caller to identify the following song would win a
dozen doughnuts from xxx doughnut shop in downtown Kodiak, and
they gave the number. It was easy; the song was "Young Love" by
Sonny James. Of course, I preseeded the number with the area code 907, and
wass put on the air as the first caller. After identifying the song, I was
asked for my name and adress over the air. I was quite proud to give my address as:
......., Kamehemeha Highway, Kaneohe, Hawaii. I think that Kodiak sation was
putting out 250 watts at the time. They sent me the certificate
from the doughnut shop, containing their address and mine (not spelled correctly, of
course),
but it remains my most interesting qsl.

Message-ID: <2jbfea$bk5@vixen.cso.uiuc.edu>
Source record: 41211

I must refute the recent posting regarding the tendency of 'BCN to drift towards a more Classic Rock format. I've heard from someone inside, that station PD Oedipus "snapped" recently...He cancelled ALL specialty programming. Including the very popular "Heavy Metal From Hell" hosted by Mike Colucci....He pulled all Billy Joel out of format, cut out most Bob Seger, limited the amount of Beatles stuff to be played. I believe that this is an attempt to make a transition to a more "Modern Rock" format. Alternative Rocker WFNX-FM has that market cornered in Boston, and with the recent industry concentration on younger audiences, coupled with Boston's huge college population, and Infinity owning crosstown Classic Rocker WZLX-FM, This could be a move to skew younger. Also notable are some changes in station on-air sound: lame duck morning man Charles Laquidara going on at 5:30 AM, as opposed to the usual six AM...No female voices are to be used in on-air phone bits....Mishegas, the popular morning show trivia game will now be played only by males over the age of 18...And most notably the amount of forward promo-ing of Stern's show has now been reduced dramatically, This alledgedly due to the fact that Stern's show, although regularly pulling 15's, is not translating into a bigger overall for the station. This reportedly is agitating station management. Also disturbing those at "The Rock", the irregular timing of Stern's show. Recently, Stern's show clocked in from 7PM-1AM......This disregard for timing on the part of Howard's show has apparently caused some problems with programming the overnights. With the inevitable switch of Howard's show to morning drive, this could turn out to be a major problem.

457. KKUP Bluegrass, Country, and Folk Marathon

KKUP-FM, 91.5, noncommercial radio from Cupertino, California will be hosting a Bluegrass, Country, and Folk music marathon this weekend. The event gets under way at 3pm Friday, 2/11, and ends at midnight on Sunday. A great selection of premiums will be available for subscribers. There will be a KKUP/KFAT "alumni" show Saturday evening, a Sunday morning gospel show, a KCSM Bluegrass DJ reunion Sunday afternoon, lots of recorded music, and many live performers including: Niki Leeman, Steve Kritzer, Margaret and Christoff, Tom Payne, Lisa Atkinson and George Kinchlow, Jason Gervich, Banjo Dave Douglas w/ Stan Moser, Harmony Grits, High Tide, I'll Be Right Home Honey, Lynn Hill, BurnsBorough/Green, Kari Larson and Carolyn Ciramelli, Pete Pierce Band, Slippery Clyde, Hot Pursuit, Gold Coast, Tarnation Band, The All Girl Boys, Suzanna and the Golden West Playboys, Stardusters, Johnny Cuviello (former Bob Wills drummer), and others. For more information call (408)253-6000. Tune in!

458. Ron Cuzner?

Newsgroup: rec.radio.broadcasting
Date: 1994-02-09 20:01:22 UTC
From: jtl@genesis.MCS.COM
Message-ID: <2jbfei$bkm@vixen.cso.uiuc.edu>
Source record: 41213

This inquiry goes out to Milwaukee/Northern Illinois listeners:

A few years ago (okay, maybe 10 or more), there was a guy named Ron Cuzner who did a jazz show at midnights on WFMR (a Milwaukee FM classical-music station). The program was called "The Dark Side."

Cuzner was a bit of a character on air (and off-air, I believe), and his selection of music was varied and interesting enough to get me interested in jazz. His typical playlist featured traditional (Ellington, Parker) to more modern artists, but he leaned heavily towards the traditional.

When the wind was right, WFMR would come in (albeit a bit static-y) at my home in the northwest suburbs of Chicago. I taped a few of Cuzner's shows, and I've still got a couple that I drag out when the mood hits me.

My question is this: whatever happened to this guy? I know that somewhere around 1984 WFMR was sold and became either a rock or urban-contemporary station, but there was such an outcry for a classical station that another outlet changed their format (and call) to WFMR, but didn't pick up Cuzner. I'm very hazy on all the details.

Does anyone here know the real story?

In article <2j3lg0$k5o@vixen.cso.uiuc.edu>, ao730@FreeNet.Carleton.CA (Ralph Buttrum) writes:
|>A television program on CBC, Friday 4 Feb.'94 Newsday displayed the
|>ability to access a BBS and select from a menu of a wide variety of
|>CBC radio programs a sound file which could be downloaded and then
|>replayed through the computers sound system. It was useful for both
|>Macs and intel based machines.
|>The programs included Quirks and Quarks, As IT Happens, Sunday
|>Morning. In short, some very excellent programming. The idea
|>has excellent merit, (may well stimulate the sale of higher capacity
|>hard drives)
|>The only important piece of factual information that was NO
|>included in the show was the bleeding phone number of the BBS.
|>If anyone is privy to this information please send me an e-mail
|>either here on Freenet or rbuttrum@aol.com.
|>I would also like to learn more about Digital radio transmission.

This technology is not for the faint-hearted. These shows are not like the dirty picture GIFS on dial-up BBS services, they are HUGE. And, also available through WWW, although, I have to admit, the URL (universal resource locator) for them escapes me at the moment.

Carl Malamud's "Internet Talk Radio" is also available on the internet backbone, as well as off of the O'Reilly gopher server. This weekly "radio" show is distributed solely by the net, and has such features as "geek of the week" and other network-oriented topics.

(BTW, the malamud show, in compressed form, is 10MB of data. Try downloading that at 9600 BPS...:))

Okay, after being out of radio for some 4 or 5 years now I've had too many people tell me they like my voice and that I should be working in radio (I've been spending the last 5 years in the music business and started my own independent label as well as doing concert promotions). Anyway, being that I haven't worked in radio for so long, I don't have a current skimmer to be shopping around. Heck, for that matter, I don't even have an old skimmer anymore either. What should I do to get back into radio? I'm 27 now so a college internship is probably not something I could go for. Any help greatly appreciated. I'm looking at possibly marketing myself in the San Francisco Bay Area. But by no means do I NEED to work in radio. Just figure I would like to get back into it for my own personal pleasure (but I hate dealing with the politics involved). Thanks in advance.

Nels.

465. Radio Watchers -- Kansas City

Newsgroup: rec.radio.broadcasting
Date: 1994-02-10 04:54:54 UTC
From: Mark Roberts <transvox@TYRELL.NET>
Message-ID: <2jcemu$8cp@vixen.cso.uiuc.edu>
Source record: 41220

The following excerpted from "Traffic info service expanding into news," Kansas City Business Journal, February 4, 1994:

The largest provider of traffic information to area radio and television stations is planning to introduce news, weather, and sports reports to the Kansas City market.

Metro Traffic Control Inc. is talking with managers of area radio stations about providing the additional services beginning later this year. The Houston-based company provides traffic reports and information to 15 radio stations and two television stations in the Kansas City market and operates in 51 U.S. cities and three foreign countries. . . .

Mike Haake, director of Metro Traffic's Kansas City operations, said . . . [t]he structure and content of the reports will be tailored to what a particular station desires.

"Basically the way it works out is the general listening public doesn't know. Not to do anything deceitful, but just to let people think that people at the radio station are putting together the news reports," Haake said.

Haake and Johnny Rowlands, the founder of Airborne Traffic [which provides service to 13 radio and 1 TV station], said the idea of providing news reports to radio stations is getting the attention of money-conscious station managers.

"I think it's a budget consideration that a lot of the stations that aren't news-oriented have been cutting down on their news departments," said Rowlands.

. . . Stations generally won't pay cash for the information, but will provide the services with blocks of air time that can be sold to advertisers.

. . . Metro Traffic has rolled out its news service in 11 cities and recently announced an agreement with Broadcast Equities, Inc., parent company of StandardNews, that calls for StandardNews to provide news and information to be included in news and sports reports produced by Metro Traffic . . . .

} From: fybush@world.std.com (Scott D Fybush)

} one of the very last rooftop AM transmitters in the country! (videos on
} request...).

In Chicago, we have WSBC AM (1240) and WSCR AM (820) from a rooftop tower, and we have WSBC (1240) and WCRW (1240) from another rooftop. Until recently WCRW was atop a hotel, but then consolidated with WEDC, and uses their tower. WEDC, WSBC and WCRW all share time on 1240.

WPNA 1490 in Oak Park Il (a Chicago Suburb) is roof mounted on the Oak Park Arms hotel.

WJPC-AM 950's daytime site is rooftop mounted, although they use a 6 tower in-line array at night. Interesting thing is that WJPC is 1kw days omni, and 5kw nights directional.

These are the only ones I know of.

> From: Paul_Munafo.LOTUS@CRD.lotus.com
> Organization: NONE
>
> I must refute the recent posting regarding the tendency of 'BCN to drift
> towards a more Classic Rock format. I've heard from someone inside, that
> station PD Oedipus "snapped" recently...He cancelled ALL specialty programming.

He had good reasons to 'snap'. Eddie is reacting again. Makes for bizzare
listening. The dinosaur of Boston radio -- WBCN is finally waking up and
smelling the coffee.
The station is going downhill...fast. Look at the numbers. They tell the story.

>He pulled all Billy Joel out of format, cut out most Bob Seger, limited the amount
> of Beatles stuff to be played.

About time. 'Crazy Little Called Love' by Queen was still heard last Friday
morning.
There is no justification for that kind seasoned soft pop-rock to be
heard on a 'modern' rock station 'BCN thinks it is...If a listener wants
to hear a mix of Joel, Queen, Elton John,Clapton, Beatles, he/she should
tune to 'BOS or 'ZLX to get the their 'classic rock' fix...
'ZLX's main objective is to compete with Granum's 'BOS. 'ZLX(living upto
its copycat image :-) has even adopted the same 'no talking over songs'
line as 'BOS has had since its inception 2 years ago...

> I believe that this is an attempt to make a transition to a more
> "Modern Rock" format. Alternative Rocker WFNX-FM has that
> market cornered in Boston, and with the recent industry concentration on
> younger audiences, coupled with Boston's huge college population, and Infinity
> owning crosstown Classic Rocker WZLX-FM, This could be a move to skew younger.

Very good point about 'FNX but I still can't see how Laquidara, Parentau
or even Bradley Jay can be experts with the music(Blind Melon,Red Hot
Chili Peppers,etc)listened/bought by most college kids in Boston...
Personally, I think the reason 'BCNs former midday man Ken Shelton
was shipped over to 'ZLX was probably because of his lack of interest in
today's rock.(his knowledge of classic rock is pretty amazing, to say the
least).

Also, if WBCN is so into 'modern' rock when will they start promoting 'modern'
rock bands playing at local clubs and arenas?...With an exception of "Rock
of Boston" show at the Boston Garden, WBCN hasn't bothered to promote/sponsor
a single national/local rock act this last fall...That tells you something
about how this station is being run...Larry 'ChaChi" LaPrette's(WBCN
promotions director) good idea of a station's promotion is to have
'rock babes' giving away calendars at local auto parts stores(oooh,fun).

> Also notable are some changes in station on-air sound: lame duck morning man
> Charles Laquidara going on at 5:30 AM, as opposed to the usual six AM.

No biggie. Obviously they want him to be the first FM DJ to be heard in the morning(actually, Loren and Wally start at 5:30 on 105.7 but who listens to country music at that hour :-). Chuck is just keeping the seat warm for someone else, so to speak...

>No female voices are to be used in on-air phone bits....

As a side note : Since the departure of a weekend voice Carolyn Fox last year, 'BCN is now the only major FM station in the Boston market without on-air female talent...

>And most notably the amount of forward promo-ing of Stern's show has now
> been reduced dramatically....

Correct. Also, during Stern's show all 'BCN intros/promos are now done by Infinity's main voice-over man Paul Turner as opposed to Charles Laquidara (he made some really lame quality promos for Howard) or 'BCN's in-house production staff.

> although regularly pulling 15's, is not translating into a bigger overall for
> the station. This reportedly is agitating station management.

I'm not sure about the agitation part but the number of ads in the 7-11pm has now reached a staggering level. The breaks are now around 5 minutes long at the minimum. I'm sure they had to slash some rates to get so many ads in the evening block...

468. Re: Cleveland Radio (was: Re: 80's Music - New Format?)

Newsgroup: rec.radio.broadcasting
Date: 1994-02-10 04:55:02 UTC
From: eb795@cleveland.Freenet.Edu
Message-ID: <2jcen6$8d9@vixen.cso.uiuc.edu>
Source record: 41223

I also agree Cleveland radio stinks.
The only Cleveland station I enjoy is WENZ, 107.9-The End. They
play good modern/alternative music.
All the other stations say "variety". I have found the term "veri
rty" has become a codeword for "we suck".
To hear any other decent stations, I have to resort to exotic an
tenna/receivers to listen to WZOO 102.5-"102 Zoo" in Ashtabula,
a good Top 40/rock station. Another good one is WHOT,101.1-"Hot
101" in Youngstown, a mostly Top 40 station.

Well, all I can say is, until people here in Cleveland stop pat
ronizing the businesses advertised on stations such as WMJI, WQ
AL, WKDD, WQMX, WGAR, WJMO, WLTF, WNWV, WDOK, and WZAK, we will
continue to be the radio laughing stock of the entire country.

And this is supposed to be the rock and roll hall of fame city-
better start proving it "programers".

I've been follwoling the discussion in regards to Dancin'
Danny Wright. To answer Steve Sobol's question in a previous
issue of ARJ(forgot which one),he was wondering if he was still
working at a station in Akron. He isn't. He left when it swiched
from AC to country.
There is a Danny Wright who does the 9am-2pm shift at
WKSE-FM(Kiss 98.5,dance-based CHR). I have a question for Steve:
did Dancin' Danny ever say where he was a native of? This Danny
Wright mentioned he was a native of Wisconsin.

470. Dancin Danny

Source record: 41225

Years ago, when he was working in Cleveland radio, I
met Dancin' Danny while I was teaching a class at a
local broadcasting school. At the time he was pretty
big and yet he was the nicest guy. As you know, there
are a lot of jerks in this business -- Danny really
was great, he talked to the kids and the staff and
was willing to spend time giving good advice.

As to now. I saw him the other day in a local bookstore
here in Cleveland. I go there often to study. The guy
behind the counter had told me that he comes in
from time to time... for DD's privacy I won't say where...
actually I left him alone too.

>
> Thank you.

Arrakis console, eh? My condolences. Anyway, here's a suggestion.

1. Think of the 8 track as 4 2-track recorders operating in tandem. Hook the output of the console to the recorder as follows: Left to 1,3,5,7; Right to 2,4,6,8. Hook the outputs from the recorder (in stereo pairs) to the 'B' inputs on the console. i.e.: Ch 1 & 2 to console input 3B; Ch. 3 & 4 to console input 4B, etc. (this is assuming that inputs 1 & 2 are dedicated mic inputs you don't want to share).

2. This arrangement has a lot of advantages - primarily ease of use by those with no multitrack production experience. It also has a number of disadvantages - primarily the lack of any pan function, and the need to tie up 2 channels for purposes such as voice-overs & sound effects that could easily be recorded on 1 channel. However, think about what the unit will be used for: producing promos & IDs, possibly simple music recording projects, etc. These really don't require the efficent use of all 8 tracks.

Just a starting point. Good luck. Call me if you want. I'm pretty good at the efficent use of marginal resources & the Arrakis console is as marginal a resource as you're likely to find. I know - I deal with 2 of them every day...

>symphonies, church services, and other complex programming that spanned
>three or four hours that had no "natural break," and therefore no station
>rare (depending upon your format), but they do occur.

Quite true. However, the original assertion by (whomever) ... he never
responded to my reply ... was that a rock station could use segued cuts to
create a mucis sweep with no natural break. That is specious argumentation, and
anyone submitting a detailed description of a station doing an ID at :45,
in the middle of a newscast, then playing a series of rock cuts to cover the
hour, will find that station will be contacted by the Commission and perhaps
issued an NOV.

>The real answer is if you're a mature adult, capable of making decisions on
>your own, you decide for yourself. If programming management is not
>comfortable with "creating" breaks within complex programming, then you don't.
>It's that simple.

It should be ... if there weren't so many children in program director seats.
Your statement is correct in the last paragraph, but, again, the original
poster wasn't talking about complex programming, unless you consider
potty talking morning DJs to be complex. <W G>

From: WEOS-FM <BLACK%HWS1@HWS.bitnet>
Message-ID: <2jceng$8di@vixen.cso.uiuc.edu>
Source record: 41228

I have to disagree with previous posts on Legal Id's of late.
First, the ONLY thing LEGALLY allowed between the Call sign and the City of License, is the frequency. KRTH, Infinity 106, in Los Angeles is not legal or WKBW, a friendly place, Buffalo also is not.

2nd, the FCC rules make exceptions for long form programs, ie classical music, live concerts, speeches, sports, etc. The legal ID must be given at the top of the hour or as close as possible, at a Natural break in programming. This is the FCC's way of making sure we all don't have to fade down on top of the 2nd movement of a symphony or a State of the Union address to do an ID. TV stations can lower 3rd and ID visually, but radio does not currently have that ability (perhaps the FCC will let RDS take care of it?!?). A Natural break means end of a song, spot, promo, program, inning, time out, etc. PD's & MD's can be creative and still get the id's in near the top of the hour. What is Top of the hour? I believe it is a real stretch to slip in an ID at 15 til or even 10 til. It goes back to the idea of the need to sweep the quarter hours at all cost, even breaking FCC rules. FCC staffers, like those at the IRS, can and do make mistakes, but not this time. If the FCC felt it was a priority and had the staff, they would go after it.

You really want to work in radio? You sure? You realize you are talking about about an addictive, shrinking, low paying industry constantly under the threat of economic collapse and technological annilation? do you really want to work in a place where compliments are a real good idea(in theory) while egos rule in practice. Do you want to work in an industry where there is no difference between doing it well and simply doing it?

if you answered yes to these questions there is one key to getting a job in radio(this of course supposes you have no connections):

NAG! NAG! NAG!

Really thats it. Just keep bugging who ever you have to bug until they give you a shot.

most major stations in most major markets do have internships. Just call and ask.

GOOD LUCK

[Moderator's Note: Great Article. You forgot, though, in addition to NAG NAG NAG, be ready to sleep in your car, eat beans and rice, and play any and every sort of music imaginable, and be willing to do WHATEVER needs doing in the station. Including wastebaskets. I agree, though, GOOD LUCK! Bill]

477. Buying record jackets and sleeves bulk

Newsgroup: rec.radio.broadcasting
Date: 1994-02-11 01:31:25 UTC
From: qchorn@mtu.edu
Message-ID: <2jen5d$i6s@vixen.cso.uiuc.edu>
Source record: 41232

I just started working at a radio station that has neglected their vinyl records since they started using CD's. After four years, the condition of their collection is very bad. About one out of ten need new jackets and sleeves. That means we need probably a minimum of 750 generic jackets and sleeves. Does anyone out there know where we could buy these in bulk. Most of the people at the station don't consider the records as an important source of music and therefore probably won't allocate much money for supplies so the cheaper the better.

I'm not looking for "audiophile" type stuff here. We don't need antistatic

jackets and rice paper sleeves. The cheap, generic stuff will do just fine.

I would appreciate it if you would e-mail me any responses as I don't normally read this newsgroup.

Thanks for all your help,

478. Theory of Controlled Unpredictability (Re-Sent)

Newsgroup: rec.radio.broadcasting
Date: 1994-02-11 01:31:26 UTC
From: Mark Roberts <transvox@TYRELL.NET>
Message-ID: <2jen5e$i6u@vixen.cso.uiuc.edu>
Source record: 41233

The following re-sent because no autoreply received the first time and because the other one I sent *did* make it to the newsgroup.....

Stuck home with a sinus infection for two days in cold, snowy weather, I listened to a lot of KLZR, the modern rock station from Lawrence, Kansas.
And found I was totally bored with a format I really do like.
Part of the problem is the station's presentation, which is kind of a throwback to the "Mister FM" days of the 70s, best satirized by a Saturday Night Live sketch in which Dan Ackroyd satirized radio style by simultaneously playing a hyper AM DJ and a mellow FM announcer.
But part of the problem is another one of those entries in the What Else Ails Radio department.
I have a theory, maybe accentuated by all the prescriptions I am taking at the moment, called the "Theory of Controlled Unpredictability."
What KLZR plays is utterly predictable: what you would find in the "Alternative" or "Modern" (non-import!) section of your local mass-oriented CD store.
And it's all guitar-based stuff, quite a bit of grunge. Nothing with a beat. Heaven forbid we should hear a synthesizer-based piece of music on KLZR.
I think for a station to attract listeners -- and *keep* them -- it should be consistent yet offer up a surprise every once in a while. In other words, it should do things that are juuuuuust outside the boundaries of its format.
Talk radio stations inherently have this quality. You know people are going to be calling in and talking about *something* -- but you never know *what* they're going to be talking about, or how vehement they'll be, or how colorfully they'll state their opinions.
I think that may be why talk radio is increasingly popular. You never know quite what you're going to hear, but what *is* predictable is that you will hear a host and/or guests and/or callers talk about some issue.
Music radio stations emphasize consistency, but I've heard a few use the Theory of Controlled Unprectability to their advantage.
The old KXXR in Kansas City, one of the pioneer Rock 40 stations at 106.5, stuck pretty much with a standard AOR playlist later on before it went CHR. Except for listener requests. How else does one explain a station that would break format to play Frankie Goes to Hollywood? At 4 pm? On a weekday?
KITS in San Francisco *most* of the time sticks with a standard modern-rock playlist. But it will play new music, and imports, and dance mixes. In some cases, such as the "Screamer of the Week," you're alerted ahead of time that something different is coming up.

Both KITS and KXXR have had air personalities who were just slightly
off the wall. You never knew quite what they were going to say next.
I think program directors overemphasize consistency at the expense of
a little controlled unpredictability. Their stations are lifeless and
promote passive listening and deliver at best an indifferent audience to
their advertisers as a result.
Consistency and knowing what to expect *most* of the time is
important; also important is to keep the listener sharp and alert so he or
she will be listening when it comes time to peddle the advertisers' goods.
I now return to my regular sneeze, already in progress . . . .

479. 80's Formats Re-visited..

Newsgroup: rec.radio.broadcasting
Date: 1994-02-11 01:31:27 UTC
From: lancebkost@aol.com
Message-ID: <2jen5f$i75@vixen.cso.uiuc.edu>
Source record: 41234

Forever and a day, I have had the idea that when I finally decide to buy or program a station, it would be different. Now it seems that it's not such a lark, after all. Music of the 80's has been kicking around in different incarnations for quite a while. KIIS-FM Los Angeles for a long while had "The Banana Joe Flashback Show" on Sunday Nights. This was a good idea, but somewhere along the line too much 70's disco and "Old School" music got in the way. Now, station not wanting Kids or geezers are playing more 70's hits. (ie: The ARROW format) But, If you are looking at 18-34 year olds, The music from their youth that appeals to them was from 1980-1988. If you centered on 1983-1986, while only occasionally venturing into the fringes, you would probably do very well. No Recurrents, Nothing from the 90's, just 1983-86 jammed at the listeners. And none of the wierd stuuf either, "Come On Eileen" by Dexy's Midnight Runners would be Okay, while "Elvira" or "Freak-A-Zoid" would maybe be pushing it. It's time for Hot AC's to rethink what gets the listeners, Phil Collins new record, or a Phil Collins record that they remember and love, like "Don't Lose My Number" or "Against All Odds".....

'til next time.... Lance Ballance, Overnight Personality, KOST 103.5, Los Angeles

>
>--

There's one other thing you're allowed to use in an ID...Owner. So, "KROQ,
Infinity Broadcasting, Pasadena and Los Angeles" is OK (You can put any city
you like after the city of license). In the old days ('78) when the FCC ran
around writing up stations like a storm, my station did both...we got written
up for improper commercial logging (:60s logged as :30s), and the like, but
never that.

>The inspector was *wrong*. He doesn't determine where the
>"natural break" in programming is, YOU do. I've run recorded and live
>rare (depending upon your format), but they do occur.

THE TRUTH IS, IF THE F-C-C HAD ENFORCEMENT ABILITIES, YOU PROBABLY WOULD BE FINED A TON OF MONEY. The FCC decides how to interpret its rules, NOT you. Symphonies in particular are spelled out in FCC rule as not requiring id's in the middle of them. Church services are not so clear...if there's a pause in the service, you may be required to ID.

Truth is, in this Arbitron-oriented world, why in heaven's name WOULDN'T you want to get your call letters and city out on the air? Why should someone go to the great lengths many programmers do to avoid top of the hour ID ...I don't know.

>
>The real answer is if you're a mature adult,
> and capable of making decisions on your own, you decide for yourself.

The real answer is if you're a mature adult and you are really looking out for the best interests of your station and its continued audience growth, you won't play games with the ID. You live with the rule, abide by it and make your station the best station you can in spite of it. Is that too hard?

>Pds and consultants can't abide by these brutally simple rules.
>

I have long wondered just what the deal was that made programmers hate top
of the hour ID's. If you're a music station, an ID doesn't interrupt a music
"sweep" any more than a jingle, a liner, or the other stuff that gets inserted
in between songs that the listener thinks is a commercial..but we in the industry
don't consider to be "commercials" (promos, etc.).

Besides, most people have grown up looking for that top of the hour id
as a sure way to 1)know the time 2)know what station they've got-especially if
they're travelling.

The only stations that have ANY justification in fearing top-hour ID's are
those that are suburban signals trying to beam into big city markets. Even
then, the FCC allows the other cities to follow city of license so it can be
a positive if done right.

I really think the only reason that programmers try to cram the ID in the
strange places they do is just some bizarre authority complex. Just as we
rebelled against our parents if we could get away with it, PDs tend to
want to do the same thing with this issue. I think programmers and consultants
would change their mind if compliance officers starting writing a ton of
warning notices

> Nels.

Nels. You haven't provided us enough information about you. Are you looking for primarily a board shift?...Promotions job?...Do you work best as an independent contractor...a team player.... what format? DJ? Personality? Who is your perceived target audience? Why does broadcasting NEED you? Define what niche' you fill and persue marketing yourself to a station that serves that niche'. Make a pest of yourself until they say yes....a voice is great, but chemistry and personality is better.

According to my CPB Public Broadcasting Guide, you might try WNYC-AM @ 820 KHz. Their programming is somewhat different from WNYC-FM but they might carry "Morning Edition" or "All Things Considered." I'll defer to your New York neighbors as to what is typically programmed on the station. Of course, you could always give them a call...

Hello!

Just a note in case anyone is interested....I have noted that WMXO-FM Olean has changes frequency from 100.9 to 101.5. The power seems to be about the same. On 100.9 the had 1,450 watts and no big improvement here in suburban Buffalo, still very weak. (I have a rooftop FM antenna) This is a satellite delivered adult contemporary station: "The Mix 101.5". They have been that since I believe 1990 or so, previous to that they were WBJZ, "Z101" and top 40 ish, and country at one time I believe. I have not seen their CP so I don't know what their power is now, or if they will be increasing it soon.

Sedge Thomson's West Coast Live
San Francisco's Live Radio Show to the World

February 09, 1994

How to hear the show:

West Coast Live is uplinked to the National Public Radio (NPR) satellite, so all NPR stations have an opportunity to broadcast the show. Here is a list of our known affiliates;

Station Area Served Live Taped
Broadcast Broadcast

KALW 91.7 FM San Francisco Saturday, Saturday,
Bay Area 10:00 a.m. 8:00 p.m.

KRCB 91.1 FM Rohnert Park n/a Saturday,
10:00 a.m.
(1 week delay)

Call your local NPR station for more information.

Here (hear) is the upcoming schedule as we see it now:

Our producers work overtime booking talent onto the show. Sometimes they're so busy on the phone, they don't have time to keep the rest of us up to date. I arrived at last week's show and was pleasantly surprised to find that Wavy Gravy, Country Joe McDonald, and Pulp Playhouse were added to the bill. So, join our audience at a live show. You too may be pleasantly surprised.

February 12th;

The Mermen, San Francisco's premiere surf band.

Danny Ferrington, Guitar maker to the stars.

David Cale, performance artist.

February 19th;

Zydeco Flames, Cajun roots music.

Nikki Govanni, poet and author or "Racism 101".

Ethan Canin, author.

Nancy DeRoss, singer/guitarist/songwriter.

Guitarists Henry Kaiser and Knut Reiersrud.

February 26th;

San Francisco Symphony Chorus, This Grammy award winning group, with West Coast Live's own Cynthia Hobgood, will feature music from Carmina Burana.

Francis Wong and the Great Wall, music group.

Where to find us on the Internet:

West Coast Live Mail List Subscriptions:

You (the audience) are now empowered to subscribe or

unsubscribe to our list any time you wish. To receive complete instructions for modifying your subscription, send a dummy email message to;

West_Coast_Live-Request@netcom.com

Whole Earth 'Lectronic Link Conference:

For those of you on The WELL (well.sf.ca.us), we welcome your participation in the West Coast Live topic (#362) in the Radio conference (g radio).

Airwaves Radio Journal:

The Airwaves Radio Journal has been very kind by including our weekly bulletins in their Internet email digest. This publication is a digested version of the rec.radio.broadcasting USENET group. It's devoted to local broadcast radio from all over the nation. Their subscription desk can be reached at;

Subscribe@airwaves.chi.il.us

>Organization: AT&T

I was just wondering if anyone knows what the following people, all Chicago
Radio stars of the past, are doing now. Some are obvious, but some of the
others, well, nobody might know. Anyway, here is the list with stations
they worked at in the past in ():

Art Roberts (WCFL)
Kris Erik Stevens (WCFL)
Tom Murphy, aka World Famous Tom Murphy (WCFL)
John Landecker (WLS) Now on WJMK
JJ Jeffries (WLS)
Dick Sainte (WLS and CFL)
Doug Dahlgren (WCFL)
Connie Szerszen, aka Your Top Rock Female Jock (WIND)
Bob Del Giorno (WIND)
Penny Lane (WSDM)
Larry O'Brian (WCFL)
Ron O'Brian, aka Big Ron O'Brian - BROB, (WCFL)
Bob Dearborn (WCFL)
Larry Lujack (WLS and WCFL) Now retired and play golf in Chicago area
Dick Biondi (WLS, WCFL) Now on WJMK
Mitch Michaels (WBBM-FM)
Bob Sirott (BBM-FM and WLS) Now does morning news on WMAQ
Tony Phillips (BBM-FM)
Tommy Edwards (WLS) Is Tommy still the Bulls PA announcer?
Bill Bailey, of the Sunday, Sunday at US 30 Raceway fame (WLS)
Yvonne Daniels (WSDM and WLS) past away
Dave Baum (WIND)
Clark Weber (WLS, WCFL) now on WJJD
Bill Taylor (WCFL)
Stu Collins (WIND)
Jerry Kay (WCFL)
Don Gerardeaux (WCFL)
Jeff Davis (WLS)
Fred Winston (WLS)
Steve King (BBM-FM and WLS)

Bill Price (WLS)
Gary Gears (LS and CFL)
Johnny Driscoll (WCFL)
Dick Shannon (WCFL)
Chuck Knapp (WCFL)
Dr. Brock (WCFL)

>Subject: Re: Where are They Now - Chicago Radio People
>Organization: Macro Computer Solutions, Inc.

Eugene Foster asked 'where are they now':

>Kris Erik Stevens (WCFL)
Currently works for one of the satellite-fed programming services.

>Bob Dearborn (WCFL)
I think he's also doing a satellit-fed oldies thing.

>Mitch Michaels (WBBM-FM)
Was on WCKG for a while, I believe he's just laying low.

>Bob Sirott (BBM-FM and WLS) Now does morning news on WMAQ
Will be doing morning news show on WFLD-TV.

>Tommy Edwards (WLS) Is Tommy still the Bulls PA announcer?
Runs a radio consulting service out west somewhere (Phoenix?).

>Dave Baum (WIND)
I believe Dave's also doing consulting.

>Fred Winston (WLS)
Runs a radio consulting service in Chicago (I am sure of this one).

>Steve King (BBM-FM and WLS)
Was on WGN for a while. Is he gone from there?

In 1985, WLS-TV aired a half-hour show celebrating WLS-AM's 25th anniversary
as a rock-n-roll station. Many of the former DJs were interviewed,
and their current (at that time) gigs were given. I'll have to check
the tape to see what some of the others on (and not on) Eugene's list
were up to in '85.

As a side note, this 25th Anniversary program is pretty (albeit
unintentionally) funny: here you have Lujack hosting the thing,
complete with his "get me the hell outta here" attitude, Steve and
Garry complaining that the whole "anniversary" thing is stupid, manufactured

sentiment, the young jocks (e.g. Brant Miller) showing their youthful, hooray-for-the-company ambition, and then you see all the old jocks talking about their glory days. It didn't exactly make me want to tune into WLS, although it wasn't too far off from being like a good episode of SCTV.

remember back in the '60s and early '70s, some AM stations would broadcast a short BEEP indicating the top of the hour. Sounded like a 1kHz tone, lasting about a second. Like on WWV (a shortwave time standard reference station). What sort of equipment was used to insert this BEEP? I had assumed that it was an accurate timing of the top of the hour. Haven't heard any stations do this anymore. Maybe PDs decided that the BEEP was more annoying than useful to the audience?

I have imagined that the equipment used for the above beep might have been just a filtered and gated WWV reciever (filter the audio to a very narrow passband around 1kHz, have a local timing system mute the output of this filter to create a small time window of plus or minus, say, 1/4 minute to allow the beep to go thru when WWV does transmit it, mute for the rest of the 59 1/2 munutes to keep any possible noise from leaking thru the filter and messing up the radio station's programming.)

I remember WKBW Buffalo, NY used to do this BEEP back around 1970. Think some of the NYC news stations had it too.

492. Call letters: There use and listing

Newsgroup: rec.radio.broadcasting
Date: 1994-02-13 18:05:03 UTC
From: cheevrsp@acf2.NYU.EDU
Message-ID: <2jlq4f$s18@vixen.cso.uiuc.edu>
Source record: 41247

Hello folks.

I have a couple of questions and I trust someone can help me.

First off does anyone know for certain whether there has ever been a case of the FCC or perhaps a station with the same _call letters_ strenuously (legally?) objecting to the simulated broadcast use of call letters? For example if someone was to record and make publicly available said recording of a person speaking as though he was broadcasting from WKWK New Know where would this be a legal violation of any sort. Be mindful that this recording was never broadcast prior to recording it was simply recorded and distributed.

I know there have been records of announcerly voices speaking call letters as though they were _real_ DJ's etc. but I do not know if they where real announcers from real stations who were given the go ahead to do their bit on record...I think the first Meat Loaf record has an example of this (?) in the song Paradise by the Dashboard Lights...

I believe that it is legally permissible to do this (free speech as it relates to satire etc.) but I am curious if anyone has any knowledge of such an issue and or some thoughts on this.

Secondly where can one find a complete up-to-date listing of all of the frequency allocations of the US and the world? I imagine the FCC has such a listing but is it accessible and if so how. Paper and snail mail is....well, slow. Has anyone seen such a listing?

The reason I am querying these points is because I may be involved with a project that would intersect these issues...

Thanks in advance for your time and thoughts.

Keywords: radio Internet
Sender: news@dgbt.doc.ca (News user)
Organization: Communications Research Centre, Ottawa, Canada
Date: Wed, 15 Dec 93 19:20:22 GMT
Lines: 52

The Canadian Broadcasting Corporation (CBC) is exploring additional means of distributing its programming. Working with the New Broadcast Services Laboratory of the Communications Research Centre and the Communications Development and Planning Branch of Industry Canada, CBC is starting a trial where some radio programs will be available over the Internet. These programs are available "on-demand" from a server located at CRC, and can be accessed via WWW, Gopher, and FTP:

WWW: http://debra.dgbt.doc.ca/cbc/cbc.html

Gopher: debra.dgbt.doc.ca (select "CBC Radio Trial")

FTP (anonymous): debra.dgbt.doc.ca:/pub/cbc

NOTE: the preferred method of access is via WWW using the NCSA Mosaic client.

The Radio programs are stored as 8-bit, 8 KHz "au" files as recorded on a Sun SPARCstation. A tools area currently contains the DOS "sox" program to convert these files into WAV or VOC files for PC sound cards.

The special radio programs that are currently available include:

Stories for Christmas with Fireside Al
The Idea of Canada

and samples of the following popular weekly programs:

Quirks & Quarks
Sunday Morning
Basic Black

More programs will be added in the future.

The programs have been broken into segments so only small portions have to be downloaded at a time.

In addition to the audio files, a list of CBC Radio products is available, and the complete catalog of "Ideas" transcripts.

The CBC is interested in receiving feedback about this trial. If you find this information interesting or valuable, or wish to provide any comments, please send your messages to:

cbc@debra.dgbt.doc.ca

>been reduced dramatically, This alledgedly due to the fact that Stern's show,
>although regularly pulling 15's, is not translating into a bigger overall for
>the station. This reportedly is agitating station management. Also disturbing

I find this to be consistent with Stern's show in other markets, and would like to know if it generalizes to other shows. Now, i know the general wisdom
is that a strong morning show leads in to programming for the rest of the day.
However, Stern seems to have a small but not overwhelming benefit to his affiliates. I wish i had current numbers, but what i seem to recall is that his show
in New York regularly gets an 8-9 rating (12+; probably higher 18+ males) yet
WXRK can do no better than a 3... my take on this is that despite the 'congruence' of Stern's show to his mostly classic rock affiliates, most folks don't hang around for the rest of the day.

>those at "The Rock", the irregular timing of Stern's show. Recently, Stern's
>show clocked in from 7PM-1AM......This disregard for timing on the part of
>Howard's show has apparently caused some problems with programming the
>overnights. With the inevitable switch of Howard's show to morning drive, this
>could turn out to be a major problem.

Well, most of the other stations seem to put up with it... or do they? Do
any of the Stern affilates edit/ shorten the show to fit a four hour block?

> THE TRUTH IS, IF THE F-C-C HAD ENFORCEMENT ABILITIES, YOU PROBABLY WOULD BE
> FINED A TON OF MONEY. The FCC decides how to interpret its rules, NOT you.

That's a non-issue. The IRS decides how to interpret THEIR regulations and they lose a lot of cases, too. Just because a staff person decides to make an off-balance interpretation doesn't mean that you have to live with it.

> Symphonies in particular are spelled out in FCC rule as not requiring id's in
> the middle of them. Church services are not so clear...if there's a pause
> in the service, you may be required to ID.

FCC rules do not even attempt to cover definitions of different types of programming. What applies to symphonies can also apply to extend King Biscuit Flower Hour concerts.

> Truth is, in this Arbitron-oriented world, why in heaven's name WOULDN'T
> you want to get your call letters and city out on the air? Why should someon
> go to the great lengths many programmers do to avoid top of the hour ID
> ...I don't know.

Well, some day when you've had sufficient experience in the field, the answer to that question will come to you naturally. ;) Some kinds of programming simply doesn't lend itself to regular breaks. That's the way it is.

> >The real answer is if you're a mature adult,
> > and capable of making decisions on your own, you decide for yourself.
>
> The real answer is if you're a mature adult and you are really looking out fo
> the best interests of your station and its continued audience growth, you won
> play games with the ID.

What makes you think that a mere board op has the authority to overrule his company's management? If the decision is left up to you, then you do what you think best (whether in poor taste or not). If the decision is NOT left up to you, you follow orders...or end up on the street.

> You live with the rule, abide by it and make your
> station the best station you can in spite of it. Is that too hard?

Is that what they tought you at broadcasting school? ;) Holding off station-id's until natural breaks in programming is perfectly consistent with

current FCC rules.

As someone who teaches electronic media to college students, I've answered
the "how do I get a job" question hundreds of times, BUT... I will give a
nonstandard answer specific to YOUR situation.

I haave worked part-time at a couple of different radio stations while
working full time as a faculty member. The stations (small market in MO
and MN) were both thrilled to have someone who was willing to fill in
the odd shifts (mostly weekends). They knew I wasn't available during the
day because of my "real" job. If you're not looking for full time, willing
to work odd shifts, already have proven yourself in radio (even if a few
years ago) and don't mind the low wages/no benefits associated with part
time, you may be amazed at their interest in you. My experience was with
small market, full service stations, but my guess would be the same would
apply to others.

Here is a press release from the White House.
I downloaded the press release from the PR On-Line BBS
in Maryland at 410-363-0834. I do not work for the
U.S. government.

President Names Lobo to Cuba Broadcasting Office
To: National Desk
Contact: White House Press Office, 202-456-2100

WASHINGTON, Feb. 9 -- President Clinton today
announced the appointment of Richard M. Lobo to be Director
of the U.S. Information Agency's Office of Cuba Broadcasting,
which manages Radio and TV Marti. The two services provide
a mix of Spanish-language news, feature, cultural, and entertainment
programming to the people of Cuba.

"Richard Lobo's 35 years of experience in journalism, broadcast
management, and community affairs make him very well suited for this
job," said the President. "Our Administration honors the memory of
Jose Marti, whose birthday we marked last week, and will continue our
efforts in support of freedom and democracy for the Cuban people.
Radio and TV Marti are an integral part of those efforts."

Lobo, a recently retired media executive, was president and
general manager of WTVJ, the NBC-owned television station in Miami.
He had spent the previous five years as vice president and general
manager of NBC stations in Cleveland and Chicago. During a
twenty-three year career with the network, he had also served as
station manager of its flagship station in New York, as well as in a
wide variety of other positions.

The bilingual grandson of Cuban immigrants, Lobo is a native of
Ybor City in Tampa, Florida. He received his bachelor's degree in
Radio/TV/Film and Journalism from the University of Miami.

I have a McKay-Dymek AM Tuner and preamp/antenna that I purchased used. They're in need of repair. I've not been able to track down the manufacturer; my guess is that they're out of business. These products were used by many AM stations for off-the-air monitoring, so I hope someone may have the maintenace manuals for them. Here's what I have:

DA5 Antenna/preamp. Serial # DA5000354.
AM5 Tuner. Serial # AM5000329.

I'd be happy to pay reasonable copying and postage costs to get copies of the maintenance/alignment manuals. Thanks in advance...

When did they start simulcasting? When I lived in the NYC area only a year ago, WNYC-AM was talk all day, while WNYC-FM, with the exception of ATC and (I think) Morning Edition, was all classical music. With these exceptions, the programming was quite distinct, with WNYC-AM carrying, for example, a local talk show and NPR's "Talk of the Nation" on weekdays, and APR's "Whadd'ya Know" on Saturdays, none of which were simulcast, or even programmed at all (to the best of my knowledge) on WNYC-FM.

Source record: 41107

Howdy Folks,

I hope that my newsreader does not belch too terribly in getting this message up!

In 1989, my wife and I were vacationing in the Canadian Maritime Provinces. It was early July and we had just taken the ferry from Nova Scotia to Prince Edward Island. It was about 6 pm or so and a thundershower had just rolled through the area (it was sunny again, but big cluds loomed about) and we were driving to our next Bed & Breakfast place. Her car (a Honda Accord) has a normal AM/FM stereo w/ a tape deck, nothing fancy or high-tech. We were driving along and a pressed the 'auto program' button which finds the 6 strongest signals in a given area and temporarily asigns them to the program button. This was on FM. One of the stations we got was from *Virginia Beach*, Virginia. Now, I know that AM stations can propagate great distances *at Night*, but FM during the late afternoon. This was so wierd that I figured it to be some sort of atmospheric fluke and have not given it any thought since.

Is there some sort of explanation as to whythis may occur on FM??

Ditto for Kansas City, not only the two stations owned by Bonneville, but for the locally-owned KNHN and the nighttime programming on KBEA (which is Music of Your Life <not mine!> during the day).

If I want fresh (not canned) talk at night, I have to go out of town -- like KMOX, the CBS O&O at 1120 from St. Louis. But now that KMOX has broken with tradition by plugging into Rush Limbaugh, can the CBS CPAs and their red pencils be far behind?

Too bad...when the big floods hit St. Louis, I was listening to KMOX as people called in on their car phones (even as the host, Jim White, was telling people not to drive into the areas about to be inundated because of the levee breaks). It was compelling radio.

Try to find *that* on any satellite.

It's too bad that, just as technology makes it easier and cheaper for radio to *be* *there* *now*, the will to *use* that technology is ever weakening.

Here in Michigan, I really liked John Keller on WBZ Sunday evenings (I think
it was just Sunday). I think he covered politics very well, national and local.
The way he covered state & locall politics was interesting even though I
am not a boston resident. does he still have a gig on the public TV
station. Was he shafted from the radio gig (it was just a few months away from
the '92 presidential election that he left.)
If someone has a minute can they drop me a line on this? Thanks.
Here in Detroit we have an awesome talk lineup on 1270-AM WXYT.

505. Major Consolidation Of Wichita Broadcast Properties

Newsgroup: rec.radio.broadcasting
Date: 1994-02-13 18:05:31 UTC
From: Lionel B Barley <73321.571@CompuServe.COM>
Message-ID: <2jlq5b$s28@vixen.cso.uiuc.edu>
Source record: 41110

Four Wichita broadcast properties will fall under the umbrella of Radio Management, Inc. of Colorado Springs, Colorado if regulatory approval is granted to a series of recent signings. Letters of intent were singed for radio statons KXLK-FM and KFH-AM (owners: Midcontinent Media, Inc. - Minneapolis, Minn) and KEYN-FM and KQAM-AM (owners: Clear Channel Communications Inc. - San Antonio, Texas). Officers of Radio Management way that theses stations are well positioned to fit within the existing area of geographic preference and is a desirable size market. Presently, officers of Radio Management, Inc. have interests in radio stations in Lincoln, Nebraska, Colorado Springs, Colorado, Walla Walla, Washington, and Mobile, Alabama. Latest Wichita ARBITRON ratings give the four Wichita stations under condideration a combined share of 11 percent. Two AM and two FM stations may be owned in a single market by a single owner under 1992 FCC rulemaking. An additional consideration is that the combined audience share of the stations does not exceed 25 percent. The sale of the KEYN/KQAM pair ($2 MM unconfirmed) is part of larger deal-making for Clear Channel Communications. Clear Channel is undertaking the purchase of seven radio stations (call letters/locs ?) from Metroplex Communications of Cleveland, Ohio for $54 MM. The fly in the ointment is that Clear Channel already is at the 25 station ownership maximum set by the FCC. The Wichita pair and two stations in Texas (call letters/locs ?) are being spun off to permit completion of the Metroplex deal. Three Clear Channel stations in Conneticut (call letters/locs ?) are being transferred to Snowden Broadcasting - controlled by a minority broadcaster (name ?) who is a former Clear Channel employee. As well, Clear Channel has a majority equity interest in Snowden, but exercises no programming control. The FCC has received a protest concerning the transfer of the Conneticut stations which can cause a delay of up to a year in license transfer. A review by the FCC of Clear Channel's transactions is pending.

506. Wichita Local Radio Ownership Consolidation - continuing...

Source record: 41111

I wish I could put my hands on the quote - that in the future, only a few companies will control access to the mass media. Believe it! Here in Wichita, the most recent ARBS give a stark testament to the effects of local radio station ownership consolidation. THREE companies now control programming for 60.8 percent of the audience (12+) in Sedgwick, Harvey, and Butler counties - the Wichita SMSA. Great Empire Broadcasting - owners of regional country powerhouse KFDI AM/FM and KICT-FM (AOR) claims a 25.1 market share. Prism Radio Parnters have a 22.6 share with their three stations : KNSS-AM (news/talk) ,KKRD-FM and KRZZ-FM (both oldies rock of varying flavors). Finally, Southern Skies Corporation has a 13.1 share with country leader (for the third consecutive book) KZSN-FM while simulcasting most of the day on KZSN-AM (ex KLEO for you old timers). If the proposed plan for Radio Management, Inc. of Colorado Springs, Colorado to acquire 4 Wichita radio stations (KXLK-FM, KEYN-FM, KFH-AM, and KQAM-AM) goes through, this will result in a whopping 71.8 percent of the Wichita audience receiving their radio programming from JUST FOUR companies. Is the future today?

507. BEEP TONE AT THE

N> remember back in the '60s and early '70s, some AM stations would
N> broadcast a short BEEP indicating the top of the hour. Sounded like
N> a 1kHz tone, lasting about a second. Like on WWV (a shortwave time
N> standard reference station). What sort of equipment was used to
N> insert this BEEP? I had assumed that it was an accurate timing of
N> the top of the hour. Haven't heard any stations do this anymore.
N> Maybe PDs decided that the BEEP was more annoying than useful to the
N> audience?

Here in Los Angeles, the two all-news stations (KFWB-980 and KNX-1070)
insert a "tone" at the top of each hour. KMPC-710 does it too.

I would imagine WWV or some other reference is used to time, if not
actually generate the beep for KFWB and KNX (The beep on KNX, which sounds
more like a piano note at A-440 Hz, is actually used network-wide on CBS
stations)

KMPC's beep (a telephone touchtone sound) is probably timed and generated
locally. Sometimes the on-air personalities joke about it being early or
late . . .

WBBM-AM, NewsRadio 78 (AM 780 clear channel), a CBS affiliate, still uses the beep at the top and BOTTOM of every hour.

The networks use a beep tone (CBS uses a cricket click) to signal their affiliates that a newscast will begin in one second. Most stations listen to that tone in cue, then key into Program to air the news but not the cue tone. Used to be that most stations aired that cue tone, too.

>was more annoying than useful to the audience?

I still hear the hourly beep on WMAQ-AM and WBBM-AM in Chicago. The beep (actually more of a "ping") before the top-of-the-hour CBS newscast broadcast by our local CBS affilate (WDWS-AM) isn't as useful for setting your watch, however, as they're often running on a 7-second delay.

> remember back in the '60s and early '70s, some AM stations would broadcast
>a short BEEP indicating the top of the hour. Sounded like a 1kHz tone,

Time check hacks at the top of the hour haven't entirely disappeared. CBS Radio still uses one that sounds like a "ping" of a sort of electronic tuning fork being struck. The same device is used by the VOA in Washington and by a public station here, WOI-AM. If anybody wants the circuit diagram and parts list, I have them. WGN is Chicago uses a system that develops a pleasant "chime-like" sound through the combination of the outputs of three oscillators. This system is also used by KOA in Denver.

A common triggering device is made by the ESE Company and is called the NBS Master Clock. One of the features of the unit is a diversity receiver which listens to WWV at 5mHz, 10mHz and 15Mhz and locks on the strngest signal and then fires the local time tone device when WWV beeps the top of each hour.

I have details on this unit, if anybody wants them

Cheers.

In the Chicago area, tones are being used on WBBM-AM (Newsradio 78), WMAQ-AM (All-News 67), WGN-AM (AM 720), WLS-AM/FM (Talk Radio 890/94.7) {WLS' signal is on a cart though}.

I'm not sure who else would count in that total -- but I do know of those.

Western Union Telegraph Company offered their clock service until the middle 1960's and this service included a clock setting circuit from the master clock at the Naval Observatory in Washington, DC.

Every hour on the hour, the master clock sent a pulse out which syncronized the local clocks and in most cases what this pulse did was briefly light (for a half to three-quarters of a second) a small red light bulb on the clock dial as the sweep second hand was yanked forward or backward the number of seconds required (usually ten or less) to bring the clock into synch with the master clock. The pulse was sent over telephone/telegraph lines. The Great-Grand Master clock in Washington DC sent a pulse once a day to the various Grand Master Clocks which were located in Western Union main offices offices around the USA such as St. Louis and Chicago. I think this went out at about 3:30 AM. It was on a half hour mark, I do recall that. In turn, the Grand-Master Clocks sent out a pulse every hour to the master clocks located in local telegraph offices all over the USA, and these in turn pulsed once an hour to calibrate:

1. The sub-master clocks in places where there were several clocks under one jurisdiction such as a factory time-keeper's office (which in turn set the local clocks under him);

2. The local clocks wherever they were.

In the case of (1) above, many business places and factories where exmployees were expected to 'punch the clock' when they came to work or left work had WUTCO time-clocks. The phone companies also used little clocks with imprinters in them to stamp the time on long distance toll-tickets. These were calibrated by the clock service.

In the case of WGN Radio in Chicago (720 AM) -- and perhaps other radio stations -- was that they wired from the little red light bulb into a relay which when triggered would make the tone which was sent over the air. Through the 1940-50 period (maybe from an earlier time to a later time) the Federal Communications Commission had a rule that all radio stations had to have Western Union Clock Service in order that the station would be on accurate time for the purpose of station identification and programs, etc.

WUTCO started their clock service sometime around the turn of the century and operated it for over sixty years. *Everywhere* where accurate time was important had one or more WUTCO clocks, i.e. bus stations, train stations, etc. All watch and clock shops had them, as did many schools, government agencies, etc. It was common in downtown Chicago to see WUTCO clocks in many places of business.

The cost of the clock service was about $2 per month and that included a free clock of the standard variety with a nine inch dial (no sweep second hand). Users could lease larger, more elaborate clocks with extra features and fancier designs if they desired, with the more expensive clocks leasing for $5 per month plus the cost of time service. One variety of clock had a sweep second hand; another had a larger, 16 inch dial. Another variety came in a wooden case (as opposed to the standard brown metal case) and the most elaborate was a large grandfather style clock with Western Union works inside it. I think I only saw two of these grandfather clocks, as they were quite expensive to lease and had very nice ornate woodcarved cases and glass doors where one could see the pendulum as it swung back and forth.

They had one in the front office of the old Telegraph Federal Savings and Loan Association (formerly the Western Union Employees Credit Union) on Jackson Boulevard at LaSalle Street downtown, and the other one I know of was in the Chicago Temple Building on the third floor in the library/lounge area for members of the Chicago Temple where coffee and refreshments were served following guest speakers, etc.

When WUTCO announced that the clock service was being discontinued they sent a notice out to all subscribers telling them the time signal would not be sent any longer but allowing the subscribers to simply keep the clocks for free if they wanted them. That would have been about 1965 or so. People who expected the clocks might have some value at a later time began getting them wherever they could, cutting deals with their owners.

At the Western Union headquarters building in Chicago there must have been at least one hundred such clocks alone (this is a ten story building downtown) and within a day or two of the time service being dropped, every single clock was gone from the walls, with electric clocks put in their place. Obviously a few WUTCO executives made off with them.

513. What Else Ails Radio

Newsgroup: rec.radio.broadcasting
Date: 1994-02-14 04:04:37 UTC
From: Mark Roberts <transvox@TYRELL.NET>
Message-ID: <2jmt8l$i25@vixen.cso.uiuc.edu>
Source record: 41118

In the "Music of the 80s" thread, our honorable moderator took the opportunity to let it rip at program directors, placing upon them much of the blame for the increasingly fractionalized yet uncreative state of radio programming in the United States today.

Bill makes a lot of good points. And, it should be noted, I fared so badly at the hands of program directors over the years that it drove me from radio.

So we'll stipulate that program directors are part of the problem, 'cause they *are*. But I think it's a lot more complex than that.

One of my best friends owns a small chain in the Midwest and, knowing that I like numbers, lets me look at the books every once in a while. For all I know, he could be showing me the output of a random number generator, but I don't think so :-).

Anyway, based on what I knew when I was in the business and what I pick up from this and other friends still involved, here's my take at what ails radio today:

* Debt service. Since so many stations bought during the 80s (why buy pork bellies when you can buy a radio station?) have run into trouble, financing is a *lot* harder to obtain...and a lot more expensive when it *is* obtained. It's the same reason the federal deficit keeps growing. Interest payments consume so much of the budget that you can't do other things.

In the case of radio, this means that owners have a strong disincentive against trying anything that isn't a proven audience-grabber. Instead, the incentive is toward maximizing revenues, to make the interest payments and keep the lender happy.

* Ad agencies. They hire people who don't understand radio's intangibles. Most of them prefer TV or newspaper and think radio is that poor relative whom we really don't want to have anything to do with because he's just not elegant enough for us. So, when they *can* be bothered with radio, they just look at the latest book and buy by the numbers.

* Ratings. One of the great things about going from a career in broadcasting to a computer science graduate program is that you get to understand things like probability and statistics and survey methods--and relate them to how statistically corrupt the present ratings process really seems to be.

It's too bad Birch couldn't make a go of it. Its methodology of using random telephone calls was superior to the diary-based methodology of Arbitron. Between a methodology based on diaries and the sample sizes Arbitron uses, I estimate margins of error of anywhere up to 30%, depending on the market. Yet these rankings are what ad agencies use to

determine radio buys and what program directors use to evaluate the performance of their stations' announcers, newscasters, and programming in general. And they're what some of us use to track general station performance. (Some people follow the stock market; I follow the Arbitrons.)

* Quality of people. For the most part, the best and the brightest don't go into broadcasting any more. (I hear this from another friend of mine, a professor at a prestigious school of journalism in the Midwest.) Hell, I'm making twice as much as a computer analyst as I did as a major-market reporter and anchor (KTRH in Houston) nine years ago Friday. The kids pick that up. And go into engineering, or computer science, or, if they still want to go to J-school, advertising or PR. That's *not* to say there are *no* good people in radio; there just seem to be many fewer than there used to be.

* Public and college radio. WHAT?????, you're probably asking/yelling/gasping, all at the same time. Hear me out.
More educated (and presumably affluent) listeners are attracted to the discernibly higher-quality programming on NPR stations. Avant-garde types are attracted to the cutting-edge music played on college stations. Burnt-out hippies from the 60s (some of whom aren't so burned-out and have kids and spend money on 'em) are attracted to "community" stations for their diversity in programs and for the Sixties feel that some of them still have.
So the audience that's looking for diversity and quality doesn't even bother looking for it in commercial radio any more.

An anecdote probably best summarizes all this:
Just before I "left" KTRH, the news and program director (who had replaced the news director who had hired me) severely criticized me for two things:
-- "You're not appealing to Joe Six-Pack," and
-- "You should stop doing news the way Edward R. Murrow did it."

Since when did Edward R. Murrow become an example of how *not* to do radio?
For what it may be worth....

514. Old Chicago Radio Friends

Newsgroup: rec.radio.broadcasting
Date: 1994-02-14 04:04:38 UTC
From: forsling@iastate.edu
Message-ID: <2jmt8m$i2g@vixen.cso.uiuc.edu>
Source record: 41119

Friends, I ask you to indulge and old man and update me on a couple of things that no doubt have been covered here many times. My Chicago station listening goes back to the 40's when we used to listen to WLS/WENR when they shared the frequency and when WBBM was the "WBBM Air Theater, Wrigley Building, Chicago." Later, while in college at Iowa City, we listened to the likes of Jack Eigen from the Chez Paree(?) on WMAQ and Wally Phillips on WGN (at night, he'd just arrived from Cincinnati). In the mid-60's, I worked for a few years at the Leo Burnett Agency and bought a lot of radio time while my wife worked at WGN scheduling a lot of radio time and hobnobbed a bit with the likes of Franklyn McCormick, John Mallow, Carl Greyson, Jack Taylor and so on. In 1966, I think, Roy Leonard arrived at WGN.

Well, you get the idea. Now, the questions: What's Roy Leonard doing at night? Is he semi-retired. Did he get bumped from daytime because of bad demographics. Does anybody know? Is Wally completely retired? I know that Franklyn and Carl are dead...but what about John. And what about Jack (and Virginia Gayle, for that matter)?

An inquiring boondocks mind needs to know. Anybody?

Thanks so much.

I left opne thing out. You can place the LICENSEE between the call sign
and City, AS IT APPEARS ON THE LICENSE, in addition to the frequency. That
is the only thing the FCC will allow. THe examples I cited were not legal
ID's as they contained slogans or abreviated company names, which I pointed out.
While I have heard many stations slap the group name or owner at the end of
an ID (KYW Philadelphia, A Westinghouse Station) I don't beleive I have
heard as of late something like KYW, A Westinghouse Station, Philadelphia.

From: Joe Walker <jmw9m@fulton.seas.virginia.edu>
Message-ID: <2jmt8t$i52@vixen.cso.uiuc.edu>
Source record: 41122

Could somebody out there in radio land explain the pros and/or cons of using a composite STL versus a left and right channel setup? It seems to me that having a composite STL lets you keep all of your processing equipment, including the stereo generator itself, at the studio instead of the transmitter, but clearly there must be some good reasons to send each channel separately and create the composite signal at the transmitter. Any insight?

> transactions is pending.
>

Clear Channel's KTAM-1240 and KORA-98.3 Bryan/College Station TX will go
to Springer Broadcasting. KTAM/KORA will sell for $2.25 million while
KQAM/KEYN goes to Radio Management for $2 million, according to the
1/19/94 M STREET JOURNAL. Hmmm, Wichita is a top 100 market, and
B/CS, at last count, was Arbitron-rated #229 and KORA/KTAM will go
for a higher price. I wondered how long Clear Channel was going to
keep KORA/KTAM now that they have grown in to a large TV/radio company.

Among those going to Snowden: WELI-960 New Haven, WAVZ-1300 New Haven,
WKCI-101.3 Hamden CT, and WQUE-93.3/1280 New Orleans. WQUE-FM/AM

will form a duopoly with Snowden's WYLD-98.5/940, which WQUE was
LMA-ing.

The Clear Channel deal will give Clear Channel a Miami station (WHYI-100.7),
a duopoly in Tampa Bay (gets WMTX-95.7/1040 to go with WRBQ-104.7/1380),
and a combo in Buffalo NY (WWWS-1400/WUFX-103.3). I don't remember what
else Metroplex owns ....

Cross-posted to: rec.radio.broadcasting,rec.radio.info

A poster has sent in three 900 line files consisting of media fax
numbers. They are too big to realistically post to the entire world,
so they are being added directly to the FTP and GOPHER archives for
AIRWAVES RADIO JOURNAL, which as most of you know is the email digest
reflector for rec.radio.broadcasting.

To access the archives via FTP...

ftp radio.aiss.uiuc.edu /misc/rec.radio.b-cast/FAX

They, like the rest of the archive, are in compressed form and must be
transfered using FTP's binary mode. (Type binary at the ftp prompt).

To use gopher, ...

gopher radio.aiss.uiuc.edu 7070

Then follow the prompts. Use ? for help in gopher.

To get them via email, send mail to rrb@radio.aiss.uiuc.edu with ...

Subject: FAXDIR-1 -- -- (for letters A-H)
Subject: FAXDIR-2 -- -- (for letters I-M)
Subject: FAXDIR-3 -- -- (for letters N-Y) <No 'Z' lists>

NOTE: ONE FILE REQUEST PER LETTER PLEASE. If you want them all you
must send three letters. YOU MUST PLACE THE ABOVE IN THE SUBJECT OF
YOUR EMAIL.

You should get them back in return mail.

Also note that I make no claims as to the accuracy of these lists.

Has anyone mentioned the old KSL and KSL-FM? Back in the late sixties when I made my treks to Provo, Utah, I would drive all night arriving early in the morning. The night drive gave me access to a treasure trove of radio such as KNX, where "Music 'Till Dawn" could be heard all the way to Salt Lake City. But what I remember most was the Nauvoo bell, which clanged "religiously" as it were at the top of the hour on both KSL and KSL-FM. The AM would actually acknowledge it by saying something to the effect of "At the sound of the Nauvoo bell, it will be 2 PM" or some such. The FM, an easy-listening station, simply "clanged" dutifully on the hour regardless of what was transpiring.

I was told that there was a microphone affixed to the bell assembly and opened automatically at the appropriate moment. And as I recall, it was always right on time. KSL was a CBS affiliate, and you could hear the bell and the CBS chime sound off simultaneously at the beginning of the hourly newscast.

I don't know the tech side of it, but I do know that KYW-AM (1060) in Phila.
still beeps at the hour and half-hour. I am pretty sure it's timed as opposed
to the announcer pushing buttons to make it beep, as I have heard it interrupt
commercials, weather, and other programming. (Incidentally, KYW is all news).

KMPC, 710 AM, Los Angeles still does this at the top of the hour, even during
live broadcasts.

: WBBM-AM, NewsRadio 78 (AM 780 clear channel), a CBS affiliate, still uses
: the beep at the top and BOTTOM of every hour.

And WSB-AM 750 (clear channel) in Atlanta uses a long, loud beep at the top of every hour.

: The networks use a beep tone (CBS uses a cricket click) to signal their
: affiliates that a newscast will begin in one second. Most stations
: listen to that tone in cue, then key into Program to air the news but not
: the cue tone. Used to be that most stations aired that cue tone, too.

Over 20 years ago, when I worked at WUNR-AM/WBOS-FM in Brookline, MA, the AM station was affiliated with the Mutual Broadcasting System. We carried MBS news at the bottom of the hour. Although nobody ever told me one way or the other (!), I let the MBS whistle at the bottom of the hour go out over the air, because I used to hear the old KWK-AM in St. Louis do it in the '60's. I also thought it made the segue from our musical programming into the MBS news theme (dah tata dah tata de dah!) sound pleasingly tight, especially if I could get a taped station ID on over the music just before the tweet.

MBS also put out an annoying time signal between programs -- something like one of the more annoying of the signals WWV used to broadcast, but without any discernable function other than to let you know that the network was still there. This time signal was supposed to go away after the 10-second cue before each program, but sometimes they brought it back up by mistake. Thus, if you listened to WUNR-AM on my shift, you would sometimes get a "bonus bleep" or two before the tweet on the half-hour.

Top of the hour beep fans, beware!

A stationin Portland Maine runs CBS at the top of the hour. THe only problem with this is that they run a full time 7 second delay on their entire broadcast day. This, as you would suspect, would make everything seven seconds late.

Watch out for all those talk stations with delay. What you may be hearing may have already gone by a few seconds ago.

WIBC/Indianapolis still does this. They're at 1070 AM. They have all
locally produced news, so no backtiming for the satellite feed... usually
what happens at this news/talk station is that the beep goes off under
the chatter, which is usually the host wrapping up the hour, and then the
news theme swells.

WBEN Buffalo has a beep at the top of each hour, and they have been doing it for years. They also used to use a double beep at the half hour. WKBW took the beep idea long after WBEN ran it, and frequently KB's time tone was inaccurate. I used to think they kept it on a cart, and that it wasn't automatically generated! :-)

>
>I have imagined that the equipment used for the above beep might have
>been just a filtered and gated WWV reciever

There's two answers to your question:
1. Most stations used to air the top-of-the-hour "beep" that
the radio networks (ABC/NBC/CBS/MUTUAL) used to start their
newscasts. Usually that "beep" was driven by a WWV receiver
or in the method I'll describe in #2 below:
2. Back in the "early days of radio" (1960-1974), most of the
major radio stations used a master clock system provided by
Western Union to synchronize their times and make sure they
got their station ID's on at exactly the top and bottom of
the hour as was required then. These clocks were tied in by
a telephone line to the Western Union system, which used the
US Naval Observatory clock to ensure their accuracy. At
exactly the top of the hour, the clock would receive a pulse
equivalent to the beep you hear on WWV, and it would reset the
sweep-second hand to the top of the minute position if it
wasn't already there. Stations then used that clock's pulse
to trigger a 1khz tone, or "beep" (some used it to sound a gong)
as an indicator of the exact time.

As far as the demise of the "beep"...it died when the FCC no longer required
ID's at exactly the top of the hour...eliminating the need for Western Union's
clock service (and it folded)...and when music stations dropped network news
at :00. There still are stations which use it...among them, WLS in Chicago
triggers a tone and others as well. I like the ability to set my digital
watch...and I'm surprised some PDs haven't figured that others like it as well.

Ahh, nostalgia.

In Boston, WBZ AM 1030 still has the top-of-the-hour beep. They've had it as long as I can remember. Back in the 60s, I think every major Boston AM radio station had a beep -- certainly WEEI (590, CBS back then), WRKO (680), WHDH (850), and WBZ did.

When WHDH uses CBS news for the top of the hour (usually evenings/nights), the CBS chime will be heard, often along with the CBS click 1 second before it.

:in New York regularly gets an 8-9 rating (12+; probably higher 18+
males) yet :WXRK can do no better than a 3... my take on this is
that despite the 'congruence' of Stern's show to his mostly classic rock
affiliates, most folks don't hang around for the rest of the day.

It doesn't help that Stern historically has cannibalized his colleagues at whichever station he is using as home base.

By contrast, the Loop (WLUP-FM) in Chicago has cross-promoted its talent for years, leading fans of one personality to naturally accept and eventually embrace other personalities. Danny Bonaduce has become an instant celebrity here by virtue of that programming philosophy.

I called in sick today because of another round of the sinuses.
But I still had things to do. So I was out and about and listening to
the radio, one hand on the wheel, the other honking my nose.
(I won't bore you with the details about the sinuses except to
say that the word "culture" is now involved, and I don't mean NPR.)
Once again, I'm focusing on the AM band since that's where you
have to go these days to be off the beaten radio-frequency path.
*** *** *** *** *** *** *** *** *** *** ***
KSD (550, 5 kW, St Louis) dumps its CNN Headline News programming from
9 am to 2 pm on weekdays in favor of a local talk and music show, hosted
by long-time St. Louis rock jock Mark Klose.
Klose was a fixture at KSHE-95 in the Seventies, eventually as the
station's morning host. He later went to work for Gannett's
KSD-FM, a classic rock station.
Late last year, Gannett sold KUSA(AM) and KSD-FM to EZ Communications,
forming a duopoly with EZ's KYKY(FM). EZ restored the old KSD call letters
to the AM.
Klose's show on Friday featured classic rock tracks from artists
such as the Steve Miller Band and Jesse Colin Young (a particular St.
Louis favorite), and had a long interview with a comedian who happened
to grow up in St. Louis. There were a couple of other talk segments as
well, but I missed most of those, in part because KSD faces interference
here from KFRM (5 kW daytimer from Salina, KS).
There were half-hourly news and traffic updates from a local reporter
as well.
I don't know whether the station is still in stereo; it installed
C-QUAM back in 1984 when it was a country music station.
It was hard to figure out quite what it *was* I was listening to
at first, in part because of the interference. But KSD deserves a round
of applause for trying something different.
Judging by promos heard during the show, KSD jumps out of Headline
News at other times of the day for syndicated talk shows.
*** *** *** *** *** *** *** *** *** *** ***
WHB now appears to be locally programmed.
The long-time rock-and-roll giant was bought last year by a Carrollton-
based farm broadcaster, who began simulcasting KMZU(FM) on WHB September 26.
The station still calls itself "Missourah's Farm Voice" but now
frequently IDs with its call letters.
Farm programming is still featured, and the station still is not in
stereo (it was in stereo under its former owner).
WHB is at 710, 10 kW days, 5 kW nights, DA-2.
*** *** *** *** *** *** *** *** *** *** ***
I listened to a Christian talk show from KOWH, Omaha (660) that
admonished its callers not to refer to Hillary Clinton as "Jezebel."

I believe the name of the show's host is Marlin Mattox; he apparently has some connection to Charles Colson, the Watergate participant turned evangelist.

While the host definitely had a conservative point of view, he also made an effort to provide reasonable, issues-based arguments for his assertions. He asked his listeners to remember that "you can criticize without being critical," and to show respect for President and Mrs. Clinton even while disagreeing with the Clinton administration's policies. (Actually, Marlin, you have to be critical to criticize by definition; what you mean is that you can criticize without being nasty, and I agree with you there, though I hardly agree with any of your positions.)

He told his listeners it was unfortunate that some of his callers had been especially nasty toward Mrs. Clinton when they called her "Jezebel," a biblical reference to a prostitute.

About the only name-calling I heard was a reference to the Clinton health-care plan as "socialist."

One caller from Texas started to refer to himself and his friends as "good old b--" but stopped at the last word ("boys") when he wanted to make the point that he and other opponents of Clinton "aren't a bunch of rednecks from the hills."

This particular show was a hell of a lot (pardon the expression) more intelligent and reasoned than Rush Limbaugh, who was yacking away simultaneously on an appalling number of transmitters.

Eric Matthews stated in a recent article:

"

Subject: Re: Cleveland Radio (was: Re: 80's Music - New Format?)
From: eb795@cleveland.Freenet.Edu (Eric Matthews)
Organization: Case Western Reserve University, Cleveland, Ohio (USA)

I also agree Cleveland radio stinks.
The only Cleveland station I enjoy is WENZ, 107.9-The End. They
play good modern/alternative music.
All the other stations say "variety". I have found the term "veri
rty" has become a codeword for "we suck".
To hear any other decent stations, I have to resort to exotic an
tenna/receivers to listen to WZOO 102.5-"102 Zoo" in Ashtabula,
a good Top 40/rock station. Another good one is WHOT,101.1-"Hot
101" in Youngstown, a mostly Top 40 station.

Well, all I can say is, until people here in Cleveland stop pat
ronizing the businesses advertised on stations such as WMJI, WQ
AL, WKDD, WQMX, WGAR, WJMO, WLTF, WNWV, WDOK, and WZAK, we will
continue to be the radio laughing stock of the entire country.

And this is supposed to be the rock and roll hall of fame city-
better start proving it "programers".
--
Eric Matthews
eb795@cleveland.freenet.edu

"

Eric -

First of all, it's the owners of these stations who won't let
their programmers play that "modern/alternative" music because
people in your age demo won't spend money with the advertisers
who make such radio stations possible.

Second of all, Cleveland is an older demographic market with
more than 50% of the population age 50+.

The age group that modern/alternative music attracts is at best
the 18-34 year olds, who are a very small minority - too small
to pull any ratings.

In summary - as with all radio stations that operate as a business

No Age Demo + No Advertisers = No Profit For Owners & No Format.

Those stations that you listen all are trying to stay alive by attracting the advertising dollars from those 25-54 year olds who will patronize the advertisers and who do have the money to spend.

It's VERY costly to operate a radio station.

Just my $.02

Frank Macek
Ass't Program Director
WDOK/WRMR - Cleveland #1 FM/AM Combo

536. WNYC-AM

Newsgroup: rec.radio.broadcasting
Date: 1994-02-16 02:50:34 UTC
From: ck20@bonjour.cc.columbia.edu
Message-ID: <2js1lq$sgm@vixen.cso.uiuc.edu>
Source record: 41141

This is just to clear up some of the recent
postings on WNYC-AM in New York City. Here's a quick
rundown of their weekday schedule:

7-10am Morning Edition
10-12 On The Line, with Brian Lehrer
-emphasizes local politics, also discusses national issues
12-2p New York and Company, with Leonard Lopate
-same, but emphasizes local cultural affairs
2-4pm Talk of the Nation
4-5pm Fresh Air
5-8pm All Things Considered
Marketplace
8-11pm repeats of the 2nd hour of On the Line and
all of New York and Company
11-12 MacNeil-Lehrer
12-1am repeat of Fresh Air
1-2am BBC World News
2-2:30 BBC News Desk
2:30-3 repeat of Marketplace
3-5am repeat of Talk of the Nation

There is no simulcast of WNYC-FM since the AM station
went to 24 hours, although some AM programs are simulcast
or repeated on FM. The FM station will be broadcasting
the NPR fare from 2-5pm very soon once Curtis Sliwa's
program begins.
Sliwa's program will be call "New York Beat" and will
include a co-host. He was hired by WNYC recently at
the suggestion of New York Mayor Rudolph Giuliani; WNYC
is owned by the city. Sliwa, the founder of the Guardian
Angels who recently admitted that he faked his own kidnapping
in order gain publicity, was a vocal supporter
of the Mayor in the recent election, giving frequent
speeches on his behalf, at least once asserting that
his predecessor David N. Dinkins was only elected due
to voter fraud. Station manager Tom Morgan denies
that Sliwa was hired due to political patronage, although
he does admit that he wants to be considered for
re-appointment to his job; his position is Mayoral-appointed.
There have been staff and public protests.
Among the locally originating programs on WNYC-AM
on the weekends is "On the Media," a 2-hour program
discussing critically the role of media in society,
methods of reporting, how specific stories were covered,

and the like. It is on Sunday 11am-1pm, and is rebroadcast
in the late evening 10pm-12mid.
Hope this clears things up a bit. In my view,
WNYC is one America's great radio stations.

Regards,
Curtis Kueker

539. Veteran Wichita Area Broadcast Entrepreneur Starting New FM

Newsgroup: rec.radio.broadcasting
Date: 1994-02-16 02:50:38 UTC
From: Lionel B Barley <73321.571@CompuServe.COM>
Message-ID: <2js1lu$sgr@vixen.cso.uiuc.edu>
Source record: 41144

Broadcast entrepreneur Gary Violet is returning to the Wichita market after an absence of 2 years. A former owner of urban oriented KBUZ-FM, having sold it in 1992, Violet is taking bids on towers, transmitting equipment, and antenna for a 50,000-watt station to be licensed in ex-urb Clearwater, Kansas. Violet says he has no plans to operate the station himself, but will be selling or leasing the property once it is on the air. The signal from the new station (no call letters yet), will be at 98.7 Mhz, and will reach parts of the Wichita market. So far Violet has not determined a format for the proposed radio station. Presently, Violet makes his home in Hot Springs, Arkansas.

540. Boston RadioWatcher - 2-15-94

Coming and Goings.(mostly goings)

- Pyramid announced yesterday(2/14/94) that GM John Madison at its Boston's CHR powerhouse WXKS-107.9FM will leave in about 1 month to join Polygram Records(Philips-owned, world's #1 record company outside US) in NYC. Madison was with WXKS-FM for the last 7 years. He was highly respected and well-liked guy. He was expected to run Pyramid's new acquistion in Boston, WJMN-94.5FM.(FCC should give its OK on the deal around first of April).
The search is underway for a new GM to head both, WXKS-WJMN combo. Two names have been mentioned : current 'JMN GM, Alan Chartrand; current GM at Pyramid's Chicago outlet WUNA-FM and former GM of Boston's oldies WODS-103.3FM(CBS Inc).

Pyramid is doing a market study in order to find a brand new format for WJMN. Urban/dance, which has been a hit in the ratings since May '93, hasn't brought any serious advertiesing dollars to WJMN. Also 'JMN plays a lot of the same music as 'XKS -- why compete against each other? A change of formats for 'JMN is simply inevitable.

- On Friday, alternative/modern rocker WFNX-101.7FM let go its midday jock Joanne Doody. She was replaced by a local club DJ with little radio experience Boy Toy.

- It appears that Westinghouse's deal to acquire WEEI-590AM from the Boston Celtics appears to be dead or on life-suport. The major sticking point seems to be the Celtics' desire to raise the sale price due to 'EEIs recent upward surge in the ratings(thanks to Imus). 'EEI brought back its former GM Aaron Daniels to run the station on interim basis until GroupW deal is completed/dissolved or a new buyer is found.

The Bruins games conflicting with the Celtics on 'EEI had started airing on 'BZ as of last night(2/14/94). The Bruins have indicated that they might move over to a new station(WHDH?) starting next season if WBZ-WEEI deal is not finalized.

- Infinity's classic rocker WZLX 100.7FM is still looking for a newsperson for Ken Shelton's Show(6am-10am). Laurie Kellman was let go last month after 6 months on the job....

- Last week's heavy rumors that Fairbanks' WCLB-105.7 will dump country after 1 year took a lot of print space in the local papers. A potential new format was mentioned -- ARROW, hottest new format launched at CBS' station in LA a couple years back...

- Infinity's AOR WBCN-104.1FM still can't seem to settle on its playlist.
During some parts of this past weekend "Classic Rock" completed dominated
"Modern Rock" and vice versa...Let there be "The Rock", guys! :-)
MY feeling is that 'BCN is waiting out to see which station will
make a change to ARROW and then react accordingly....

- American Radio System's WHDH 850-AM is very serious about challenging
WBZ's morning news supremacy. 'HDH has just shot a bunch of TV spots to
promote its new "News All Morning" with Rod Fritz and Pat Carrol.
'HDH now rebroadcats very popular Rush Limbaugh at 12midnight thinking that
people will leave their radios on 850 when they wake up in the morning...
We'll see if 'HDH is able to take a slice out of 'BZ's morning pie...

Status: RO

541. WCBS and the beep tone

Newsgroup: rec.radio.broadcasting
Date: 1994-02-16 06:43:10 UTC
From: shoshani@gagme.wwa.com
Message-ID: <2jsf9u$h8p@vixen.cso.uiuc.edu>
Source record: 41146

An aside note on the beep tone at the top of the hour: When I was in my early teens growing up in rural Indiana (and with more DX opportunities than I'll ever have here in Metro Chicago!) I used to get WCBS 880-New York regularly in the evening. They used to have not only the CBS "piano note" hour-cue, but also a three second "count-down". Sort of like "doong......doong.....doong.....PING!" Ath the time I figured this was a network cue sent out by WCBS but not generally broadcast by affiliates.

They don't do this anymore at WCBS. Any New Yorkers remember when they stopped?

```
: Last time I was in listening distance of WLS, the morning show
: featured an intelligent, articulate conservative named Don Wade.
: Unfortunately, his show was marred by having a liberal broad
: known only as "Roma". The show would have been much better
: without her. If that makes me a "right wing moron", I'm proud to
: claim the title.

Don Wade is a knee-jerk reactionary. Roma is the only caricature
of a liberal WLS will allow. They had a good articulate liberal
in the afternoon (Bob Lassiter) but they fired him. They have a
definite station stance, and it is far right and far from right.
```

>Sorry, we cannot separate the two...Don Wade and Roma (Wade) are man and wife.

And as nutty as she may be, I love the two of them. I haven't listen to them for years, since moving to Maine. Fred Winston and his Chili also make the grade. WLS was a good station. (sigh) I guess the only thing it has going for it now is Wade and Roma. To bad.

It has been happening for a while to get more publicity for thejock.

I remember Dan Neaverth, WKBW-Buffalo fame, doing started doing weather
for sister WKBW-TV. He made a big deal about going to weather school.
He did his morning show, then drove over to TV to do the news at noon
forcast. Have no idea what he is doing now. Last I heard, had moved
over to WGRZ-tv after ABC-Cap Cities sold both KB's.

Here in Portland, Steve Kelly, WOCS-FM (Ocean 98) does entertainment
reports during the local news on a fox affiliate and Willie Ritch
WMGX-FM has done some things for Entertainment Tonight. Nice ego
boosts for the station and the jock

545. Commercial Radio Exam Opportunity ** 12 March ** Cambridge MA

Newsgroup: rec.radio.broadcasting
Date: 1994-02-16 06:43:18 UTC
From: w1gsl@ATHENA.MIT.EDU
Message-ID: <2jsfa6$h9m@vixen.cso.uiuc.edu>
Source record: 41050

** MROP and GROL exams in Cambridge MA ** Sat. March 12th 1994 **

The MIT Radio Exam Team will conduct exams for the General
Radiotelephone Operators License and the Marine Radio Operators
Permit. The exams will be held at 10AM Saturday March 12th
in Cambridge MA at 77 Mass Ave in MIT Room 1-150.

A regular schedule of exams is planned for Cambridge MA. on the
second Saturday of odd numbered months. For more information call
Nick at 617 253 3776 (9-5).

There is a $35 examination fee. Bring the ** original ** and a
copy of any commercial license or proof of passing certificates
you want to claim credit for. Also bring 2 forms of picture
ID, a black pen and a pencil.

Copies of the question pool are available from the Government
Printing office or from W5YI at 1 800 669 9594.
This is probably the best study guide available for the moment.
A few copies are available for pickup in Cambridge.

The General Radio Telephone Operators License is required to
service transmitters in the aviation, maritime and international
radio services. A Maritime Radio Operators Permit is required to
operate radiotelephone stations aboard large ships and certain
aviation and coast stations.

At a later date exams will be available for the Commercial Radio
Telegraph operators licenses and the Global Maritime Distress and
Safety Systems (GMDSS) licenses. Amateur Extra Class operators may
be particularly interested in obtaining a commercial telegraph
license as they will receive credit for the 20 WPM 2nd class code exam.

The MIT Radio Exam Team operates under the auspices of the
National Radio Examiners COLEM, part of the W5YI group.

546. chicago radio

I was just wondering if anyone knows what the following people, all Chicago

Radio stars of the past, are doing now. Some are obvious, but some of the

others, well, nobody might know. Anyway, here is the list with stations

they worked at in the past in ():

Art Roberts (WCFL)- I remember growing up as a kid, listening to this guy on WLS. On Sunday evenings, he had a show called "Hey Baby They're Playing Our Song", which I dearly loved. He even had a jingle of Little Anthony and the I's, or a close sound alike singing the aforementioned title. In those days I thought WLS was the greatest station in the world. I believe thaty Dick Bionde was there at the same time, as was Larry Lujack. The rumor that floated around for years was that Bionde was fired for an off-color joke. This rumor was still alive when I was working Top 40 in the late 60's. I guess the upshot of this posting is that I DO hope somebody can fill in some of these blanks.

:Friends, I ask you to indulge and old man and update me on a couple of
:things that no doubt have been covered here many times. My Chicago station
:listening goes back to the 40's when we used to listen to WLS/WENR when they
:shared the frequency and when WBBM was the "WBBM Air Theater, Wrigley
:Building, Chicago." Later, while in college at Iowa City, we listened to
:the likes of Jack Eigen from the Chez Paree(?) on WMAQ and Wally Phillips on
:WGN (at night, he'd just arrived from Cincinnati). In the mid-60's, I
:worked for a few years at the Leo Burnett Agency and bought a lot of radio
:time while my wife worked at WGN scheduling a lot of radio time and
:hobnobbed a bit with the likes of Franklyn McCormick, John Mallow, Carl
:Greyson, Jack Taylor and so on. In 1966, I think, Roy Leonard arrived at WGN.
:
:Well, you get the idea. Now, the questions: What's Roy Leonard doing at
:night? Is he semi-retired. Did he get bumped from daytime because of bad
:demographics. Does anybody know? Is Wally completely retired? I know that
:Franklyn and Carl are dead...but what about John. And what about Jack (and
:Virginia Gayle, for that matter)?
:
:An inquiring boondocks mind needs to know. Anybody?
:
:Thanks so much.
:
:

Jack did beautiful music on FM-100 for a while, I believe he is doing
the stock market report show on channel 26 (which runs during the business
day) wciu in chicago. FM-100 is now ac, there is no beautiful music
station in the chicago market as far as i know (the last one to bite the
dust was WAIT, which is NOT the original WAIT which used to be 820 a.m.
but a station in Crystal Lake which coopted the call letters at 850 a.m.
and is now a satellite fed (i think) mor format)

548. Re: Old Chicago Radio Friends

Source record: 41053

WGN shifted several of their air personalities around late last year -- Spike O'Dell ("Now.....you know") moved from afternoon drive to mid-mornings (9-12 Noon); Roy Leonard moved from mid-mornings to early evenings (7P-9P); and newcomer Ian Case Punnett joined WGN from a station in Nashville for afternoon drive (3P-7P).

Part of the reason for Roy's moving to the evening slot was noted to be the opportunity to have longer interviews than he could in the daytime slot. Roy also does some weekend work there as well.

Wally Phillips retired a number of years ago, although he does come out to do special occasions. He has a radio-thon in the latter part of the year where he fills for Bob Collins in AM drive; late last year, he filled in for Bob for an entire week, while Bob was on vacation (or was he out with the flu?).

550. Long Distance FM Reception

Newsgroup: rec.radio.broadcasting
Date: 1994-02-16 06:43:27 UTC
From: Robert Carpenter <rc@cmr.ncsl.nist.gov>
Message-ID: <2jsfaf$hav@vixen.cso.uiuc.edu>
Source record: 41055

Yet Another report of 1000-km reception of 100 MHz FM broadcast stations has appeared on rrb. Let me explain.

This long-distance propagation is almost surely due to "reflection" from the E layer of the ionosphere. Occasionally the ion density of the E layer, some 100 km above the Earth's surface, becomes high enough to deflect VHF signals back to Earth at large distances. You all know of long-distance signals being seen on TV channel 2 (54-60 MHz), chan 3 (60-66 MHz), etc. If the ionization density become even greater, similar propagation can occur in the 100 MHz FM band, the 144 MHz amateur radio band, and has been observed a very few times in the 222 MHz ham band.

The reflection occurs half-way between the transmitter and receiver, the path mid-point. As ionization density increases, the path of the signals is bent further and further, until finally the density is high enough so they come down to the Earth's surface at a distant point. Because of the 100-km E-layer height and the Earth's curvature, the maximum distance at which transmiter and receiver can see the same E-layer midpoint is about 2500 km (1500 mi). With even higher ionization density shorter distances are possible, though perhaps 400 km might be a reasonable lower limit for Es at 100 MHz. There is another factor, though. The attenuation is higher for the very long distances, so the optimum distance for the strongest signals - when they occur - is roughly 1000 km.

When does E-layer propagation occur at VHF? It is basically unpredictable; it is sporadic - thus the name Sporadic E (Es). It can occur any day of the year, but is most common in late Spring, early summer, and with a smaller peak 6 months away.

There can be Es at 88 MHz while nothing gets through at 100 MHz. The cutoff is VERY abrupt. By the same token, there may be good Es at channel 2 but nothing on channel 6. Note that it is the path MIDPOINT that counts, hearing a channel 2 stating strongly from 300 km away doesn't tell you ANYTHING about the path midpoint from which you are likely to hear the 1000-km-away FM station. The Es "clouds" are quite small many times.

For a MUCH better discussion of Es on the FM broadcast band, I commend to you an article "Eleven Years of Sporadic-E" in the March 1992 issue of QST (pp 23-28, published by the ARRL, Newington, CT). This reports the FM broadcast band loggings by Pat Dyer WA5IYX over an 11-year period. Pat has logged roughly 25% of all the FM stations in the USA from his location in San Antonio, TX, by one propagation mechanism or another.

Hope this helps.
Bob Carpenter w3otc@amsat.org

551. Re: translators using parents calls?

In article <2ikt62$76p@vixen.cso.uiuc.edu> jbillma@opie.bgsu.edu (Jeff Billman) writes:
>Can translators identify themselves with the call letters of the
>parent station? If so, do any ID with their own call letters?

I remember listening to KYA 93.3 FM in San Francisco, and several times a day you could hear "K228AK Pleasonton, K228CI Walnut Creek," the call letters of their translator stations on 93.5 FM. They got a new transmitter a few years ago (which BTW makes reception in some parts of the Oakland hills lousy), and they dropped their translators. It's also common to see a still of the various UHF translator call letters on some TV stations covering rural and mountanous areas. So, there's obviously a requirement to state the translator call letters at certain intervals.

552. SRF-42 AM Stereo Walkman

Message-ID: <2juuba$s9v@vixen.cso.uiuc.edu>
Source record: 41058

Radio news February 6-16, 1994.

More on ratings! Here are the afternoon drive leaders in the 25-54 category. These numbers were in last Monday's WASHINGTON TIMES (2/7/94). Don't ask me why only the top four was listed. It's rare for the papers to publish *any* numbers so, I'm passing them on for your information.

ADULTS 25-54
1-WPGC FM 95.5 URBAN 7.0
2-WJFK FM 106.7 TALK/DON & MIKE 6.6
3-WRQX FM 107.3 AC/MIX 5.8
4-WBIG FM 100.3 OLDIES 5.7

WOMEN 25-54
1-WMMJ FM 102.3 AC/SOUL 7.7
2-WRQX FM 107.3 AC/MIX 7.1
3-WPGC FM 95.5 URBAN 6.6
4-WBIG FM 100.3 OLDIES 6.4

MEN 25-54
1-WJFK FM 106.7 TALK/DON & MIKE 8.4
2-WPGC FM 95.5 URBAN 7.4
3-WMZQ FM 98.7 COUNTRY 5.3
4-WMAL AM 630 TALK/TRUMBULL & CORE 5.2

In the last Washington, D.C., Radio Watch, I mentioned oldies station X-tra 104's struggle to survive WBIG's big push. Well, Program Director Bob Duckman was fired by X-tra 104 last week after a 10 year stint. In addition to Duckman, General Manager Bob Longwell left the station a few weeks ago. With the purchase of X-tra 104 by Liberty Broadcasting just around the corner, don't be surprised to see more staff changes...voluntary and mandatory.

Former Washington Redskin Rick "Doc" Walker has been hired by sports station WTEM AM 570. Doc will be hosting the noon-2 p.m. shift discussing the latest in sports and fielding calls from listeners.

A few weeks ago someone posted a question asking what happened to the WWRC morning team of Brian & Bob. The station let the two go in late December for reasons unknown. I'm guessing it was poor ratings, though. Although the station wouldn't volunteer any numbers, the station as a whole has really been suffering. The only numbers I have are for total listeners age 12 & up. For WWRC they are:

Winter '92 1.9
Spring '93 1.6
Summer '93 1.1
Fall '93 1.1 (24th place)

The station now has Mike Cuthbert and Pat Korlen doing the morning show. Cuthbert worked mornings at the station in the mid 80's when it was owned by NBC and was know a WRC. Station management is hoping Cuthbert is able to bring back the respectable numbers he enjoyed there before.

Hey BUD-BUD-BUDDY! WJFK's night time voice (and former WWDC FM 101.1 morning man) "the Greaseman" is going to be in PENTHOUSE magazine soon. Rumor has it he'll be telling us about the joys of being syndicated, his former WWDC days and his college days in New York. Watch for it!

Former WCXR FM 105.9 afternoon man Mark Kessler has found a new job. He's working mornings at classic rocker KZFX FM in Houston, TX. Kessler and everyone else at WCXR lost their jobs in the fall when Westinghouse gave the classic rocker to Viacom in exchange for a Viacom property in Texas.

Federal workers in this area were about ready to lynch ABC's Paul Harvey last Friday. Mr. Harvey made some sort of sarcastic remark about the Federal Government being closed during Friday's ice storm while ABC staff and others in the area were able to make it in to work. Angry callers let local affiliate WMAL AM 630 know they weren't too pleased with his comments. Many listeners asked, "When was the last time Mr. Harvey drove in 8 inches of sleet?" Good question. Since he lives in and broadcasts from Arizona, my guess is probably never. Maybe 8 inches of snow but, not 8 inches of sleet. Station management says Mr. Harvey was just airing his opinion, not the stations.

554. Western Union Standard Time Clocks

Newsgroup: rec.radio.broadcasting
Date: 1994-02-17 05:12:11 UTC
From: kramer@sosc1.sosc.osshe.edu
Message-ID: <2juubb$sa2@vixen.cso.uiuc.edu>
Source record: 41059

In the course of the recent discussion about "top of the hour" network radio "beeps," reference was made on several occasions to the old Western Union standard time clocks. Since I was working for ABC Radio at the time we replaced those beasts, I thought it might be useful to add a few thoughts.

I believe the death of the Western Union self-correcting clock system had less to do with the FCC relaxation of ID rules than with the march of technology. The Western Union clocks could be fairly high maintenance items since they were essentially large mechanical devices and received their self-correcting "pulse" from Western Union about 10 seconds before the hour. The rest of the hour they relied upon the accuracy of their internal mechanical clock system. Like a lot of clocks and watches designed to 1930's and 1940's standards, they didn't begin to approach the accuracy of the inexpensive timepieces which we now take for granted. As a result, a station which didn't really work at keeping up maintenance on their clocks would suffer with a system which could easily be seven or ten seconds behind and which would, in a most aggravating fashion, then "reset" to the top seven or ten seconds before the hour was appearing to end. If you were trying to back time to a network feed the correction feature was nearly useless under these circumstances because you would effectively "lose" that time when the second hand just jumped ahead to the top of the hour.

Unfortunately, Western Union never really updated the basic technology around which these clocks were originally created in the 1930's. By the 1960's far more sophisticated clock systems were coming into existence. A local station's system could, with an internal clock system tied to an internal WWV monitor, maintain clock accuracy throughout the hour, and reset on the hour, all without the expense of a line and service cost from Western Union for their traditional system.

In short the Western Union system just withered away as better and less expensive technology became available.

dhughes@prairienet.org (Dan Hughes) writes:

> The networks use a beep tone (CBS uses a cricket click) to signal their
> affiliates that a newscast will begin in one second.

Not exactly. ABC doesn't do that for all their networks. CBS doesn't use a "cricket" sound, that's a sequential tone signal that can be decoded with an optional box (to trip relays or just display the code). Mutual also uses a sequential tone system, but it's much more obnoxious and you have to build the decoder yourself.

> Most stations
> listen to that tone in cue, then key into Program to air the news but not
> the cue tone. Used to be that most stations aired that cue tone, too.

No, most stations DON'T do that. Not all stations have the luxury of having a board op for their talent. I've talked-up newscasts and feeds with at least a dozen networks and I *never* listened to anything in cue to meet the net. If the net has pro ops people they'll be where they're supposed to be at the right time.

In response to some recent topics:
1. WHAS in Louisville also has a time tone on the hour--separate from the network tone since although an ABC Information affiliate they never use the network news except overnight.

2. Marlin Maddoux who was mentioned in one comment hosts the daily "Point of View" program on the USA Radio Network. He has been doing that for a number of years, long prior to Rush Limbaugh. In fact, Maddoux owns USA Radio Network with is a for-profit organization. The network carries Point of View which itself is a non-profit entity. I provide USA Radio Network with a number of reports from here in South America.

I used to hear that countdown on WTOP-AM (1500 AM) in
Washington, DC when I lived there as recently as 5 years
ago.

Can't recall ever hearing it on WBBM or clear channel WWL (New
Orleans) (the two CBS stations I listen to regularly) though.

We were using WU clocks at WMNI/WRMZ-FM, in Columbus, Ohio, back in 1979 and only began to hear a rumor that the service was to be discontinued. The most aggravating thing about using a WU clock at a radio station is that it was most inaccurate when you needed it the most, like within 5 minutes of the top of the hour.

> People who expected the clocks might have some value
> at a later time began getting them wherever they could, cutting deals
> with their owners.

I later found a couple of them in storage at WFEC, in Harrisburg. By that time I was so disgusted with WU clocks that I tossed them either in the garbage or DEEP storage. If the WU clocks had any value, it certainly wasn't for time-keeping. ;)

I'll make this brief as I can:WNUC(107.7,new country)has
signed to carry Gerry House's syndicated country show(as of what
date I don't know;for those of you who don't know who House is,I
can assure you he does NOT look like Buffalo Bills OT Howard
"The House" Ballard :-). Seriously,he's a morning man out of
Nashville(where his show is based)and did a comedy release called
"The Cheater's Telethon". This makes WNUC fully delivered by
satellite,it had Dan Kelley as its morning man in the only locally
done segment of the day(aside from simulcasting WKBW-TV's
"11 at 11" segment of Eyewitness News Nightcast). And to think that

Biondi was a guest on the 25th Reunion of WLS Jocks several years ago, and he discussed the story of his firing. He never told that joke on the air. His temper got him canned. The program director announced in a DJ meeting that he was adding more minutes of commercials to each hour. Biondi was enraged--that meant less talking time--and he whizzed a heavy glass ashtray at the PD's head. Missed him barely and shattered against the wall behind him. End of job, end of story.

>Just my $.02

Hmm...this makes WMMS' recent strategy even more interesting. Recently they have tried to stray away from competing with classic rock WNCX and move their programming more towards modern rock wike WENZ. It has gotten to a point that from 7-midnight, the only real way I can tell which station I'm listening to is to check to see if my dial is at 100.7 or 107.9. Now, why would MMS pull this strategy, when clearly there should be more people in the upper part of the demographic.....could WONE be hurting them that much out of Akron?

Just my observations...

Hello out there in net land...
I have recently been hearing a lot of talk concerning the possibility of a new station going on air in the greater Cincinnati area. Rumer has it that the station will be opperating on 97.1MHZ, and that broadcasts will be transmited from Mason OH. (Mason is a cummunity located aproximately 25-30 miles from Cincinnati to the north northwest.) The only additional information I have is that station X will be either owned or manager by local talk radio personality Mike McMurrey. This information would tend to fit because McMurrey is leaving WcKY (50KW on 1530KHZ) at the end of February. I am looking McMurrey is leaving WcKY (50KW on 1530KHZ) at the end of February. I am looking for information regarding the power, licens class, tower height, or format of this possible new station. Thanks in advance for anything You've got to say. please post your responces to RRB.

Hey Lance, greetings from chicago, I work for the newest cox station
here Y-107.9, we're looking for 25-45, so the music from the 70's is perfect,
we're doing "the greatest hits of the 70's all the time". My sat. nite disco
show has a huge following, 400+ calls this past saturday night. Music of the
80's would be cool if the audience wasn't primarily Xers, but alas they are.

Perhaps we need to establish credentials here, Alan...
I am a veteran of 24 years experience in radio. I have programmed several small and medium market radio stations in the past...taking one station to number one in its Arbitron for the only time in the station's history during my tenure.

Presently, I am a broadcast political reporter...covering government and that includes the FCC. I have worked on the EBS committee in our state. I think I can speak from experience on the topic of ID's, since I've worked in a station where the FCC has come in an put the hammer down on rules (which happened with the PD prior to me). Where are you coming from?

>> >The real answer is if you're a mature adult,
>> > and capable of making decisions on your own, you decide for yourself.
>>
>> The real answer is if you're a mature adult and you are really looking out fo
>> the best interests of your station and its continued audience growth, you won
>> play games with the ID.
>
>What makes you think that a mere board op has the authority to overrule his
>company's management? If the decision is left up to you, then you do what you
>think best (whether in poor taste or not). If the decision is NOT left up to
>you, you follow orders...or end up on the street.
>
The real answer is: If you are a board op signed on the transmitter and programming logs, and the station violates FCC
station ID rules...both the station AND YOU can be fined. When they write citations, the FCC these days is citing both, since the operator on duty must certify the authenticity and correctness of the logs. If you're the chief engineer of the station and you certify the logs as correct and the log times are wrong, you are also subject to FCC action. See what I mean.

...Oh, and cut the crap about "is that what they taught you in broadcast school". I've learned it the HARD way, by doing it. What's your excuse?

Eric,

I hope this is helpful, the following is from the radio guide published in
the Sunday paper in Phoenix. We now have 20 AM and 25 FM stations serving
the Valley.

AM: KOY 550 Nostolgia
KTAR 620 News/Talk
KIDR 740 Children's
KVVA 860 Spanish
KFYI 910 Talk/News
KOOL 960 Oldies
KXEG 1010 Gospel
KUKQ 1060 Talk
KCKY 1150 Sports/Talk
KRDS 1190 Christian
KYOT 1230 Urban Contemporary
KHEP 1280 Inspiration
KXAM 1310 Vocal Standards
KNNS 1360 Sports
KSUN 1400 Spanish
KOPA 1440 Classic Rock
KPHX 1480 Spanish
KFNN 1510 Business Radio Network
KASA 1540 Christian
KCWW 1580 Country

FM: KNAI 88.3 Spanish
KBAQ 89.5 Classical
KFLR 90.3 Christian
KJZZ 91.5 Jazz/NPR
KKFR 92.3 Top 40
KDKB 93.3 Album Rock
KFMA 93.7 Adult Comtemporary
KOOL 94.5 Oldies

KYOT 95.5 Rock/Rhythm
KPSN 96.9 Oldies
KUPD 97.9 Rock
KKLT 98.7 Adult Contemporary
KESZ 99.9 Adult Contemporary
KZRX 100.3 Metal Rock
KSLX 100.7 Classic Rock
KZON 101.5 Adult Rock
KNIX 102.5 Country
KQEZ 103.9 Country
KRIM 104.3 Country
KVRY 104.7 Adult Contemporary
KRDS 105.3 Christian
KEDJ 106.3 Modern Rock
KMJK 106.9 Urban
KVVA 107.1 Bilingual Contemporary
KMLE 107.9 Country

In recent Arbitrons, leading stations have been KNIX (country) and KTAR (news/talk) for morning drive. The 25+ demo is rather split among the A/C and oldies stations . . . I don't have the exact figures.

About Tommy Edwards... I have not heard about the consulting thing, but I did read somewhere that he is programming a station out West, I believe... darned though if I can put my hand on the article(Ibelieve it might have been in one of Dan Koeing's "Radio" columns in the Chicago Trib last week).

And yes, how 'bout that Brant Miller? I thought he had dropped off the face of the earth a few years ago, then what, 2-3 mos. ago he pops up doing weather at WMAQ-TV (ch. 5) in Chicago. Now not only does he do weather for them BUT also does AM drive for WTMX-FM(101.9) What a lucky guy... Seriously though, I always did like Brant's style- he's one of those guys who you can listen to for a long time(as in years) and not get tired of it. Kinda like Greg Brown, who was with WKQX 101.1 FM for what, 10 years...? before he was the casulty of a bad format change(my opinion) he's got to rank up there in the records for staying at one station for so long, for Chicago FM...sorry for digressing-hope this has helped.

Jb> station. Question for all you fans of Cleveland radio: Do you think
Jb> the radio stations in Cleveland serve the needs of the listeners with
Jb> their current format? I've been hearing a lot of gripes lately about
Jb> how Cleveland doesn't have any stations that fit people's tastes. Some

When WMJI plays oldies, it's not bad at all. Unfortunately, in
morning drive when I'd like to hear some good oldies, WMJI
doesn't play any at all. The morning hours belong to a talk show
featuring John Lanigan, John Webster, and Jimmy Malone. It's a
wide-ranging mixture of comedy, call-ins, interviews, and lots of
other stuff. But what's it doing on a station that is supposed
be "Cleveland's favorite oldies"?

Does it reflect the taste of the listeners? Obviously it does,
because it is consistently number one in the ratings.

Personally, I don't find much in Cleveland radio that suits my
taste. But maybe that's because I'm in a minority, taste-wise.
I'd like to hear lots of 50's and early 60's Rock & Roll. In
Philadelphia there are 2 1/2 stations that specialize in that,
but here it's rare. I like country oldies. I want to hear
George Jones, Tammy Wynette, Loretta Lynn, Merle Haggard, Ernest
Tubb, Charlie Pride--but where are they? WGAR condescends to
play a couple of hours on Sunday nights, but otherwise it is
strictly "today's country"--and usually one of the top three
stations in the local ratings.

Say, I wonder if anyone knows the current location of Dave Anthony. Lately, he's been programming oldies radio but has moved around so much I've lost track. Dave used to program KDWB-FM/Minneapolis, then moved to KOOL/Minneapolis then to KCBS-FM/Los Angeles then an oldies outlet in San Francisco then to an oldies outlet in Ann Arbor, MI.

If you have access to the 1970s series of LPs called "Cruisin'", check out the 1960 issue. It features Dick Biondi when he was at WKBW in Buffalo, and apparently it's a tape of his last show on KB. I don't know if the Cruisin' series were made from actual aircheck tapes, or fabricated, but there's a bit on the record where Biondi tells people to throw a rock at his PD's car. He proceeds to describe the car, and he tells listeners that his boss (that "ding-dong") is driving down Main Street. Apparently the PD at the time (I don't remember who) wasn't very pleased, and Biondi was canned, arriving in Chicago two years later.

In a recent post, Robert A. Sobczak <SOBCZAK@MAINE.MAINE.EDU> writes about Dan Neaverth in Buffalo, who was morning man on the (late and great) WKBW radio. He also worked as noontime weatherman on WKBW-TV, but after Capital Cities sold the stations when it bought ABC, he switched his TV gig to WGRZ-TV. He's been off TV for a while, and is currently the morning man on WHTT-FM, Oldies 104 in Buffalo. THe station is promoting his 35th year on Buffalo airwaves, and he works with his two sons, Dan Jr. who is sports director, and Darren, sales manager, who both provide character voices and bits for the show. In addition, mid-morning personality P. J. Foxx, who follows Dan on the air at 10, is his daughter-in-law...she married Dan Jr. a few years ago.

Sedge Thomson's West Coast Live
San Francisco's Live Radio Show to the World

February 16, 1994

Overview:

Where to Find the Live Show:

The live show takes place on Saturday morning 10:00 a.m. to Noon, at Fort Mason in the Cowell Theater, which seats approximately 400 people. There's plenty of free parking, free samples of Stan's Cheesecake, and moderately priced coffee. We occasionally sell every seat, so we encourage you to reserve your seat in advance.

How to hear the show:

West Coast Live is uplinked to the National Public Radio (NPR) satellite, so all NPR stations have an opportunity to broadcast the show. If you have your own satellite receiver, look for us on the Galaxy IV satellite, transponder III, C-Band, down link 3700 MHz - 4200 MHz. Here is a list of our known affiliates;

Station Area Served Live Taped
Broadcast Broadcast

KALW 91.7 FM San Francisco Saturday, Saturday,
Bay Area 10:00 a.m. 8:00 p.m.

KRCB 91.1 FM Rohnert Park n/a Saturday,
Noon
(1 week delay)

Call your local NPR station for more information.

Here (hear) is the upcoming schedule as we see it now:

Our producers work overtime booking talent onto the show. Sometimes they're so busy on the phone, they don't have time to keep the rest of us up to date. Last week, Danny Ferrington had the flu, so he couldn't make the show. In Danny's place, we had urban geographer Bonnie Loyd, monologist Josh Kornbluth, surf painter Jessica Dunne, and singer Lady Bianca. So join our audience at a live show. You too may be pleasantly surprised.

February 19th;

Zydeco Flames, Cajun roots music.

Ethan Canin, physician and short story writer.

Nikki Govanni, poet and author of "Racism 101".

Guitarists Henry Kaiser and Knut Reiersrud.

Nancy DeRoss, singer/guitarist/songwriter.

February 26th;

San Francisco Symphony Chorus, This Grammy award winning group, with West Coast Live's own Cynthia Hobgood, will feature music from Carmina Burana.

Francis Wong and the Great Wall, music group.

Mendocino county soul music group Zensnap.

March 5th

Charlie Hunter Trio, Jazz with a groove.

William Dement, founder of sleep research.

Le Ly Hayslip. author "When Heaven and Earth Changed Places", the basis of the film "Heaven & Earth".

March 12th

Chanticleer, accapella men's chorus.

Aquavelvets, surf music extraordinaire.

March 19th

Chis Williamson & Tret Fure, singer & songwriters.

Hot Club of San Francisco, Django Reinhardt inspired sound.

Where to find us on the Internet:

West Coast Live Mail List Subscriptions:

You (the audience) are now empowered to subscribe or unsubscribe to our list any time you wish. To receive complete instructions for modifying your subscription, send a dummy email message to;

West_Coast_Live-Request@netcom.com

Whole Earth 'Lectronic Link Conference:

For those of you on The W.E.L.L. (well.sf.ca.us), we welcome your participation in the West Coast Live topics in the

Radio conference (g radio).

Airwaves Radio Journal:

The Airwaves Radio Journal has been very kind by including our weekly bulletins in their Internet email digest. This publication is a digested version of the rec.radio.broadcasting USENET group. It's devoted to local broadcast radio from all over the nation. Their subscription desk can be reached at;

Message-ID: <2k1kl1$9m1@vixen.cso.uiuc.edu>
Source record: 41081

>In article <2ikt62$76p@vixen.cso.uiuc.edu> jbillma@opie.bgsu.edu (Jeff Billman) writes:
>>Can translators identify themselves with the call letters of the
>>parent station? If so, do any ID with their own call letters?

The rules say...

74.1283 Station identification.
(a) The call sign of an FM broadcast translator station will consist of the initial letter K or W followed by the channel number assigned to the translator and two letters. The use of the initial letter will generally conform to the pattern used in the broadcast service. The two letter combinations following the channel number will be assigned in order and requests for the assignment of particular combinations will not be considered.
(b) The call sign of an FM booster station will consist of the call sign of the primary station followed by the letters "FM" and the number of the booster station being authorized, e.g., WFCCFM-1.
(c) A translator station authorized under this subpart shall be identified by one of the following methods.
(1) By arranging for the primary station whose station is being rebroadcast to identify the translator station by call sign and location. Three such identifications shall be made during each day: once between 7 a.m. and 9 a.m., once between 12:55 p.m. and 1:05 p.m. and once between 4 p.m. and 6 p.m. Stations which do not begin their broadcast before 9 a.m. shall make their first identification at the beginning of their broadcast days. The licensee of an FM translator whose station identification is made by the primary station must arrange for the primary station licensee to keep in its file, and to make available to FCC personnel, the translator's call letters and location, giving the name, address and telephone number of the licensee or his service representative to be contacted in the event of malfuction of the translator. It shall be the responsibility of the translator licensee to furnish current information to the primary station licensee for this purpose.
(2) By transmitting the call sign in International Morse Code at least once each hour. Transmitters of FM broadcast translator stations of more than 1 watt transmitter output power must be equipped with an automatic keying device that will transmit the call sign at least once each our, unless there is in effect a firm agreement with the translator's primary station as provided in 74.1283(c)(1) of this section. Transmission of the call sign can be accomplished by:
(i) Frequency shifting key; the carrier shift shall not be less than 5 KHz nor greater than 25 KHz.
(ii) Amplitude modulation of the FM carrier of at least 30 percent modulation. The audio frequency tone use shall not be within 200 Hertz of the Emergency Broadcast System Attention signal alerting

frequencies.
(d) FM broadcast booster stations shall be identified by their primary stations, by the broadcasting of the primary station's call signs and location, in accordance with the provisions of 73.1201 of this chapter.
(e) The Commission may, in its discretion, specify other methods of identification.

578. Sony SRF-42 AM Stereo Walkman

Newsgroup: rec.radio.broadcasting
Date: 1994-02-18 05:45:13 UTC
From: jtl@genesis.MCS.COM
Message-ID: <2k1kl9$9nh@vixen.cso.uiuc.edu>
Source record: 41083
Cross-posted to: rec.radio.broadcasting,rec.radio.shortwave

I went over to Chicago's Sony Gallery this afternoon and
picked up the new Sony AM Stereo/FM Stereo Walkman,
model SRF-42.

Thanks to Rob Schaller's posting in rec.radio.broadcasting
as well as the previous west-coast-US poster, whose name I've
forgotten-- (sorry), I was eager to get my hands on one of these
in spite of my previous experiences with Sony products.
Never say "never," I guess :-).

Anyway, the unit lists for $40, and the Sony store was selling
it for $30 (they will not quote prices over the phone, and I
do not know if they do mail order-- you can call them at 312 943-3334
if you're interested in dealing with them directly). The unit looks
like one of the regular, small, black AM/FM Walkmen.

As I work in downtown Chicago, where AM reception is not the best,
I won't get a real idea as to how well this unit performs until
I get it home tonight. I'll mess around with the radio (along
with my Select-A-Tenna) and I'll report my findings here.

C12019@email.mot.com (Rob Schaller) writes:

> I got a phone call from the Sony Gallery in Chicago announcing that they
> now have the SRF-42 in stock, about a week after I got mine through a mail
> order. BTW I am still working on my own review about the new SRF-42 and
> hope to post it by the end of the week.

Would you have any specs on the unit? I've got the SRF-A1 Walkman, and was never pleased with the sound quality. Sony (who used to be here in Mahwah) apparently didn't have the expertise to fix it.

My older Sony car am-stereo radio went away with my last car, however it used to pop when going in and out of stereo mode, and detector background noise was always high (even with the antenna retracted).

Does this new radio represent a substantial improvement, or is it crippled so it just demods the Motorola system?

In article <2jmt8t$i52@vixen.cso.uiuc.edu> jmw9m@fulton.seas.virginia.edu (Joe Walker) writes:
>Could somebody out there in radio land explain the pros and/or cons
>of using a composite STL versus a left and right channel setup? It
>seems to me that having a composite STL lets you keep all of your
>processing equipment, including the stereo generator itself, at the
>studio instead of the transmitter, but clearly there must be some good
>reasons to send each channel separately and create the composite
>signal at the transmitter. Any insight?

.....

I can give you four reasons. First, it is difficult to maintain good phase linearity in the STL channel. This would severely degrade the stereo separation in the composite signal. Remember, the composite signal has a bandwidth of over 53 kHz. For good phase linearity, the bandwidth of the channel would have to be even wider than this. Second, most STL's utilize FM modulation (I am assuming an analog channel). The noise power in wideband FM increases as the square of the frequency. If the composite signal were transmitted over the STL, excessive noise would be added to the L - R subcarrier in the band from 23 kHz to 53 kHz. This would severely decrease the signal-to-noise ratio. Pre-emphasis/de-emphasis is normally used to reduce the high-frequency noise in wideband FM and thus improve the signal-to-noise ratio. This would not be practical if it were applied to the composite signal because the amount of high-frequency pre-emphasis boost required in the L - R subcarrier band would be prohibitive. Third, the phase shifts in the STL channel cause a peak-limited signal at the STL transmitter input to no longer be peak limited at the STL receiver output. This makes it impractical to put all of the audio processing before the STL transmitter. Finally, when you have two STL channels, you can always broadcast in mono when one channel fails or when

For an excellent discussion of FM skip, see chapter 11 of THE COMPLETE SHORTWVAVE LISTENER'S HANDBOOK, Fourth Edition, by Bennett, Hardy, and Yoder. This chapter is written by Dr. Bruce Elving, who lives in Duluth, MN, and has logged over ONE THOUSAND FM stations from his home. He DXes FM like the rest of us DX ham or shortwave, and he presents his methods and explains several different phenomena that cause FM skip. According to him, picking up FM from nearly a thousand miles away is no big deal when you know what you're doing and atmospheric conditions are just right.

>hour-cue, but also a three second "count-down". Sort of like
>"doong......doong.....doong.....PING!" Ath the time I figured this was a
>network cue sent out by WCBS but not generally broadcast by affiliates.
>
>They don't do this anymore at WCBS. Any New Yorkers remember when they
>stopped?

Don't know exactly, but I've listened on & off in the evenings in my car,
especially when I get homesick (I grew up in Long Island); it seems to be
somewhat recent that they stopped it (maybe like 2-3 years?)

It was something like:

"This is WCBS New York. Four tones will follow. The fourth tone will be
exactly (x) o'clock...."

This was out here in Ohio I've heard this, so it can't be that long ago!

Cheers...

@nntpd.lkg.dec.com:francini@munch.dnet.dec.com (John Francini) writes:

>In Boston, WBZ AM 1030 still has the top-of-the-hour beep. They've had it
>as long as I can remember. Back in the 60s, I think every major Boston AM
...
>When WHDH uses CBS news for the top of the hour (usually evenings/nights),
>the CBS chime will be heard, often along with the CBS click 1 second before
>it.

Ahh...but WHDH puts a delay on everything, network news included. Thus
you hear the CBS network beep over WHDH at :00:07. At WBZ, our beep is
locally generated, from a NIST Time receiver linked to WWV. It's in the
audio chain *after* the delay unit, so no matter whether we're in delay
or not, the WBZ tone hits right at :00:00.

Of course there _was_ that time Christmas Eve when the NIST receiver
went nuts and inserted a top-hour beep every minute...but we won't
get into that, will we? ;-)

Just as a note, WHDH actually ran a promo once touting themselves
as offering "More Time Checks than Any Other Boston Radio Station."
The lengths stations will go to when they have nothing worthwhile
to promote... <sigh>

Jon ceased making regular appearances on BZ radio when he took a full-time job with WLVI-TV 56 as chief political reporter on their Ten O'Clock News. We still use him occasionally to offer analysis, but his committments to WLVI preclude him from pinch-hitting for Brudnoy as evening talk host these days.

>When did they start simulcasting?

They didn't. The poster was in error. But getting back to the
original question (are there any NPR affils that can make it
up to Maritime Canada), WNYC-820 is not the solution. I have
only heard them in Boston on rare occasions, only at sunset.
At night they drop power too far down to be of use, and during
the day 5kw on 820 just doesn't get out that far.

Now and then someone asks about availability of Old Time Radio shows.

I've just come across another source for them. The company that offers them is Satellite Broadcasting out of Frederick, MD and the proprietor is Fred Berney. His catalogue lists 333 reels of material and they seem to be reasonably priced (like $5.95 per tape) most reels are 2 hours, 2 tapes.

His address is 4580E Mack Ave, Frederick MD 21701 and there is a phone # 800 747 0856 and fax 301 662 4014.

592. Toledo (OH) radio

I just heard that WCWA (AM) and WIOT (FM) in Toledo were sold.
Unfortunately, I don't know who either the buyer or seller are,
so I'd appreciate anyone who could add that info. Also, some
in the industry around Toledo have speculated that this could
pave the way for Toledo's first duopoly. For those of you who
live in markets that have duopolies (sp?), what would this mean
for programming and other areas noticeable by the general public?

Archive-name: greaseman-faq

The Greaseman is a radio personality on the Infinity Broadcasting network. He broadcasts from Los Angeles to New York City, Washington, Atlanta, Philadelphia, and San Jose. He is known for his bits and song parodies. He also has his own vocabulary which he uses to avoid trouble with the FCC. Before, he broadcast out of DC on DC/101 where he competed and beat Howard Stern on a consistant basis. The Greaseman is on by himself most of the time, though sometimes you hear his producer, Bill Scanlan cackling in the background.

Q: What is the Greaseman's real name?

A: Doug Tracht. He prefers to keep his radio life and his personal life separate. His radio name is Nino Greasemaneli.

Q: Why does Howard Stern hate the Greaseman so much?

A: Howard worked for DC/101 until he got fired. When the Greaseman was hired to take Howie's place he not only held on to Howie's audience but increased it. Then when Howard syndicated in DC he competed with the Grease until the Grease moved to Infinity where they now are co-workers for the Broadcasting Giant. Now, mentions of the Greaseman on the Howard Stern show appears to be just an act in part of Stern.

Q: Which one was the Grease in the Village People?

A: He was not really in the Village People. But in the bit, he was the construction worker.

Q: What is this Bingo that the Grease dislikes so much?

A: The Greaseman's college nick name... Ask him about it.

Q: How can I get in touch with him?

A: Call him between 1730 and 2200 EST at 1-800-544-9294 and 1-213-850-0986 (FAX) and BTW do not address him as "dude".

Q: What bits does the Greaseman do?

A: Fudgeman- Fudgeman and his chicken assistant throbin
save the world from deviant behavior
Back in time with an uzi-
the Grease uses the equipment in the radio
studio to return to key moments in history

with his uzi
Carlos the International Terrorist-
Episodes of running into the famed and heavily
armed terrorist, Carlos
Medical Man- Stories about when Nino was the pompous

Watch out Alex Trebek, here comes the Greaseman
Hobo-doo-ga-ga Handbook-

Methods to which recieve ingus.
Damien- The Grease has occasion to run into the "dark master"
while he is trying to perform his duties.

Q: What is the alarm that is sometimes heard in the background when the
Greaseman talks?

A: The Geeze alarm. This goes off when the greaseman starts geezing.

Q: What other gigs did Grease do on the radio?

A: Like any other up-and-coming DJ, Grease worked at other stations in
other markets to develop his unique style. They include:

Washington DC (WRC-AM 980) 1974 - 1976
Jacksonville, Florida (WAPE) 1976 - 1981
Washington DC (WWDC-FM 101.1) 1981-1993

Q: Did he always leave on good terms?

In almost all cases, yes. The one notable exception was WRC, when
management decided his morning personality wasn't quite right, and gave
him a choice between dropping the "Greaseman" character and leaving.
Grease chose the latter. If you ask about it today, he will joke about
the time he was collecting unemployment insurance in DC and would "stay
up to watch the moon rise and CURSE THE NIGHT!" although I'm sure at the
time it was somewhat unsettling.

Although he left Florida voluntarily to take the better offer at DC-101,
he did offend some bible-belt types during his stay. The Florida gig
was important to developing the Grease as a "god-fearing, truck-driving
redneck," though. The Florida station has since gone to religious music
("From Grease to Grace" was their motto for a while). Their loss.

Q: Are there any good biographies or other comprehensive stories about
the Greaseman?

A: Grease is a very private person, and spent a number of years in DC
before finally consenting to an in-depth story about him in the
Washington Post Magazine Fall 1987. It's a good resource to summarize
his past gigs and overall life story. Also the Washingtonian Magazine
did an article on him in the January of 1993 in commemeration of his
departure from DC.

Grease also appeared on the Larry King Show (early to mid-80's) to talk
about morning radio in general. The only down side was that he was
teamed with a "Morning Zoo" DJ as a co-interviewee, a format that has
become annoyingly ubiquitous on the radio landscape. Transcripts may be
available (don't know how to get them, sorry). This is the old
Mutual show that ran all night (Grease probably got up early to do it :-),
and not the current CNN TV talk show.

Q: Are there any albums or compilations of Grease bits?

A: There was a 4-part "Best of Grease" compilation, available on cassettes. These became unavailable shortly before he left DC-101. They are now prized collectors items and can only be obtained from private owners. Part of Grease's popularity on a national basis before he went into syndication (and hence part of the motivation for this newsgroup) was the creation and exchange of bootleg tapes among an extended network of fans. Some of his best work has never been republished (although you can occasionally talk him into doing them again on his current show).

Q: Did Grease ever serve in the military?

A: Like John Wayne, Grease has a deep and abiding respect for everyone who serves in uniform, but never served himself. During the Vietnam war, he was attending Ithaca College in New York, and his draft number never came up.

Q: But Grease did serve as a policeman?

A: Yes, he did. While working at his gig in Florida, he worked as a reserve police officer on the night shift. Morning staffers would be jolted out of their bleary-eyed state by the sight of Grease doing his show in full uniform with a 44 Magnum strapped to his belt.

Q: Is Greaseman a bigot/homophobe?

A: Certainly not. Like the program "In Living Color" or even rec.humor.funny, Grease parodies what's funny in everyone, and winds up defusing hatred as a result. Grease respects all of his fans, and wishes well even those who don't like him.

Q: But there was that "Martin Luther King, Jr." incident in DC?

A: Yes, sometimes there's a fine line between parody and cruelty, and Grease crossed the line only once during his otherwise unmarred broadcasting career spanning over 2 decades.

Sometime in the late 80's, he was noting the passing of Martin Luther King Jr.'s birthday (which had then only recently become a national holiday). Grease said something about "killing 4 more and getting rest of the week off." Grease was suspended, and apologized for the incident on an "Editorial Rebuttal" on WRC-TV in DC.

Haven't the rest of you made mistakes or are you all perfect?

Q: What does AMF mean?

A: Adios my friend.

Q: What is the "Bit without an Ending?"

A: When Grease was working in Florida, he would be prevented from getting a good day's sleep after his morning gig by thoughtless model-airplane enthusiasts who would buzz their models outside his window.

Grease came up with a revenge skit with a model plane of his own that would shoot the others out of the sky. The plane became posessed by Damien and started chasing after him. Grease then got too deep into this bit without a way out (and tried to incorporate this into the bit). After fumbling with the sound-effects, and trying a foray South of the Border, and then calling in Big-Dick Brannigan, he finally gave up groping for a punch line. Grease can usually be counted on to do some of the most impressive ad-libbing and improvisation on the radio today, but at that time his talents failed him. The bit originally aired in the Fall of 1982 from WWDC FM Washington, DC/101.

It's considered a classic, and is on Vol. 1 of the "Best of Grease" tapes. He owns the rights to all his bits, and may rerun it on his current show from time to time.

Q: What stations carry the Greaseman?

A: City Station Time

TO: INTERNET: articles@airwaves.chi.il.us

(The following appeared in the ARIZONA REPUBLIC this week)
. . . by Julie Newburg, the ARIZONA REPUBLIC, Feb. 16, 1994
Don't be surprised if longtime radio rivals Dave Pratt of KUPD and Tim Scott and Mark Derringer of KDKB are bosom buddies before long.
KDKB's owners - Sundusky Radio - agreed last week to buy KUPD and sister station KUKQ from G&C Broadcasting for $20 million, nearly three times the tab for an earlier Phoenix radio consolidation.
No format changes are planned for rock outlets KDKB-FM (93.3) and KUPD-FM (97.9), nor for talk station KUKQ-AM (1060), said KDKB General Manager Chuck Atrigue, who also will head KUPD and KUKQ.
The deal creates the second multiple station group in the Valley since the FCC relaxed ownership rules in 1992, in an attempt to boost the radio industry through consolidation.
In 1992, Sundance Broadcasting bought Edens Broadcasting's Valley stations for $7 million, making Sundance one of the state's largest radio forces with four stations under one roof - KZON-FM, KYOT-FM and -AM, and KOY-AM.
Sandusky Radio's purchase of a station with a similar rock format gives the KDKB owners a firm stronghold in the markey with listeners 18 to 54.
That should make the station attractive to advertisers, Artigue said, since they can reach a broad base of listeners by airing spots on the stations.
"You're looking at a rock powerhouse," agreed Bob Fish, current KUPD and KUKQ general manager and president of G&C Broadcasting. Fish said he plans to invest in other radio properties once Sandusky Radio takes over.
Both rock stations pull a decent portion of the Valley radio audience, KUPD ranking sixth and KDKB eighth in the market for people 12 and older in Arbitron's fall 1993 ratings, its most recent.
"I've got to be an idiot not to do very well with that," Artigue said.
"The combination of the two should be sort of like Batman and Robin."
KUKQ is still evolving after switching from alternative rock to talk in October.
The deal is expected to win approval from the Federal Communications Commission in two to four months.
This will be the second ownership change at KUPD and KUKQ in the past two years.
G&C Broadcasting took control in September 1992, after lengthy FCC battles over ownership.
The former owner, Tri-State Broadcasting, had been embroiled with the FCC since 1983, when its application for renewal was challenged by G&C.
In a 1988 decision, the FCC agreed with the challenge and denied Tri-State's operating license, citing technical violations and log falsification dating to the early '70s.
Final sales papers were signed in September 1992.

Fish expressed little regret over the sale of the stations. "This is a business," he said.

>
>Try to find *that* on any satellite.

I have! When stations on satellite are not carrying games for college/pro
teams, some of them leave up their signal.

My favorite one of those on satellite is WHO-AM, Des Moines. I can
remember one Sunday night back in 1993 during the floods when they
ran special coverage. People throughout Iowa and anywhere in the listening
area (quite large with a 50,000 watter) were encouraged to call in and
relate what the floods were doing or getting ready to do to them. Some
organizations called in and asked for sand-baggers. Many would show up
to help. Quite an interesting evening I spent sitting in my easy chair
listening to WHO on my dish.

Interesting to note, KMOX is usually on the bird as well, so I'm sure
I would have heard them with this flood story if I had happened to be
listening to them on the bird.

That is one thing I love about satellite -- I can listen to local radio
from all over the country. I like the local flavor but even on satellite
with these stations, the trend appears to be progressing toward nat'l
talk.

Digital Audio Symposium
Toronto, Canada
March 14-17, 1994

Professionals with an interest in digital radio will assemble in
Toronto from March 14 to 17 for the Second International
Symposium on Digital Audio Broadcasting. Already, registrations are from
23 countries, and the list continues to grow.

With the theme 'The Sound of 2000', symposium highlights include:
- plenary sessions with world leaders in digital radio on
global issues and plans
- more than 70 presentations by international experts
- non-technical sessions on key policy, transition and
business issues
- public demonstrations of digital radio
- digital radio trade show

For more information and registration, contact Golden Planners,
telephone (613) 241-9333; fax (613) 565-2173.

600. KMOX and Rush Limbaugh perspective

Newsgroup: rec.radio.broadcasting
Date: 1994-02-19 06:18:50 UTC
From: Mark Roberts <transvox@TYRELL.NET>
Message-ID: <2k4b0a$iv4@vixen.cso.uiuc.edu>
Source record: 41155

Some insight into the Rush Limbaugh controversy (he's now on CBS O&O clear-channel KMOX) in St. Louis is found in this letter in the newest issue of the St. Louis Journalism Review. It is long, and I haven't cut out very much.

So if you object to long posts, don't read it.

(Disclaimer: I'm just a subscriber to the SJR. If *you* want to be a subscriber...($2.50/copy, $25/year)...the address is 8380 Olive Blvd., St. Louis, MO 63132. It's much broader-based than just a St. Louis publication.)

*** *** *** *** *** *** *** *** *** *** *** *** *** *** *** ***

Well, that's it for KMOX, no question about it. Today, Rush Limbaugh, tomorrow who knows what? Extinction, probably. Okay, that's a bit strong, but I'm guessing that over the long haul, this move will have the opposite of the financial effect KMOX intends, and will ultimately have a strongly negative effect on its ability to contribute to the life of the community in the way it has for as far back as most people around here can remember.

In the 1970s, I was a member of a news staff at KMOX radio that was a swell mix of young and talented writer/reporters. Bill Wilkerson, still at the station, was among them, as was Ellen Sherberg, Steve Trenkmann, Sally Fitz and many others--and older more seasoned vets--Bob Hardy, Jim White, Anne Keefe, Jim Brady, Rex Davis, John Sabin.

All of us, on and off the air, took the work pretty seriously and thought journalism and important undertaking. Women and minorities were beginning to get a decent break in broadcast journalism then, so they were part of the mix, and the station's management, having hired during that time the market's only--to my knowledge--full-time, off-the-air news director, John Angelides, was committed to a strong local and regional news presence. So, it was (and still is) a solid news operation and that showed, I think, in the product.

(It goes without saying that there weren't any flies on the station's non-news side, with, among a great many extraordinary talents, Jack Buck in the forefront of the station's formidable sports presence, and the inestimable Jack Carney in full command of the department of silly.)

Put all that together, and you could certainly argue that those were among the best days of an institution that has seen many good days indeed.

One result was that KMOX had what most business people would kill for; what they call a "unique selling proposition." It, and it alone in St. Louis radio, was in a position to offer a commodity that quite a lot of people wanted. And that commodity was stature.

Then (as now), when there was a tornado or a flood or an assassination or an election, people didn't go to their radios and tune in a top-40 station, or easy listening, or acide rock. They turned, immediately and inevitably, to KMOX. It was almost as if there was a kind of collective understanding that KMOX was the only station in town run by grown-ups; the

only station in town that could be counted on to be both balanced and thorough in its coverage, discussion, and delivery of the news. The New York TImes of St. Louis broadcasting. The station of record. Never was the phrase "in a class by itself" more appropriate.

As a consequence, the station was quite prosperous. I don't believe there was a single other market in the country then with a ratings profile like St. Louis. [In smaller markets, maybe, but not in a market the size of STL--MR.] One station with something like half the area's listeners, and two dozen or so other stations squabbling over the rest. KMOX sales people didn't peddle the station's product; they accepted (and sometimes turned away) orders for it.

Time passes and things change. The station is still a ratings leader and it still has an unusually strong local/regional news operation, but little by little the chemistry it had back then has mutated, slipped away, and because of that and other things, the gap has closed in the '80s and '90s. And KMOX, like the rest of the industry, faced with times that are not as flush as they once were, is now more than ever on the lookout for ways to improve its revenue picture.

And so, pops up the devic in the devil in the person of Rush Limbaugh. My guess is that Limbaugh will have an immediate and significant impact on KMOX's bottom line. THe question, though, is what he will for (or to) KMOX in the long run.

It doesn't make any difference whether you generally agree or disagree with, like or dislike, Rush Limbaugh. The problem with him, for KMOX, is that his presence there, high profile and prominent, will inevitably alter the way people perceive the station; it will chip away at that unique sellling proposition, the bedrock of credibility and trustability [sic], of objectivity and balance, on which KMOX had built its empire.

For a station that sells stature and respectability by way of news sophistication, Limbaugh is a double whammy. He has an agenda--that is, his "coverage" is clearly and unabashedly to one side of the political spectrum. And he is, basically, a sideshow; he doesn't have an audience in the sense of a broad spectrum of inquisitive people who find him interesting or provocative. What he has is a following. He's a preacher to the converted, and his show consists of repeatedly pushing the hot buttons that make his acolytes stomp and whistle. . . .

Over time, though, my guess is that this will have the ironic effect of moving KMOX farther backward toward the pack, the station having squandered its unique selling proposition by putting in the heart of its lineup, where news and intelligent discourse used to be, a syndicated tent revival of the fervid right. . . .

If things continue this way, KMOX will just fade into the wallpaper, after a while becoming but another contender in the radio wars, breathlessly awaiting each quarter's ratings news to see if it finished a tenth of a point ahead of its nearest competitor . . . .

John Terry

St. Louis, Missouri

*** *** *** *** *** *** *** *** *** *** *** *** *** *** *** ***

Comment: Terry makes good points. What he doesn't mention is that KMOX has been on a gradual decline for about 15 years as its audience became

increasingly older and just died off. KMOX had to do something. It waited too long to adopt modern programming techniques for all-news and news/talk stations, in part because its general manager, Bob Hyland, had been such a strong presence in the community for nearly 30 years until he died of cancer in March 1992, and had resisted most of the calls for change from within his own staff.

Again, though, I agree with Terry that putting on Rush Limbaugh was exactly the wrong move for the station. Far better would it have been to grow some exciting, controversial locally-based talk show hosts.

In fact, one tiny station in St. Louis has been doing that for years...little 500-watt WGNU(AM) at 920. My favorite was Richard "Onion" Horton, the controversial black newspaper columnist. (Among other factors in Horton's favor, he would have given KMOX a minority talk-show voice in a market that has a signficant African-American population. While Bill Wilkerson, the present morning news anchor, is African-American, he is strictly a newscaster.)

KMOX needed to reach out to other, younger constituencies--such as those of us who went to high school in the St. Louis area and thought all the station was good for was broadcasting school closings during icy weather.

And now CBS has installed some guy who rose up through the sales ranks and who doesn't know a thing about the St. Louis community, and so actions like this are not surprising.

Terry's letter has broader meaning for me, which I why I reposted most of it. Although his writing could stand some tightening, he's provided a reasonably concise summary of what's wrong with a lot of talk radio stations these days, and why their short-term gains will be just that...short-term.

Recently whilst at home recovering from back spasms I was treated to an episode of "Animaniacs" that featured a take-off on an old "in joke": the (in-)famous Orson Welles studio outtakes from a commercial recording session wherein he hounds the producers relentlessly about such things as the inflection of the phrase "in July," and winds up walking out.

The original is old, and used to be a party reel staple at production houses and radio stations. I went searching for my old copy but alas, the ages had claimed it.

If anyone has a copy of that tape, I'd gladly pay the expenses of duplication to get a good copy (which I'll commit to DAT for posterity).

Please reply by email to me: aj@aj.com, or p00445@psilink.com.

thanks ...

>ratio. Pre-emphasis/de-emphasis is normally used to reduce the high-
>frequency noise in wideband FM and thus improve the signal-to-noise
>ratio. This would not be practical if it were applied to the composite
>signal because the amount of high-frequency pre-emphasis boost required
>in the L - R subcarrier band would be prohibitive. Third, the phase
>shifts in the STL channel cause a peak-limited signal at the STL
>transmitter input to no longer be peak limited at the STL receiver
>output. This makes it impractical to put all of the audio processing
>before the STL transmitter. Finally, when you have two STL channels,
>you can always broadcast in mono when one channel fails or when

Most of the broadcasters of whose STL facilities I am aware are in fact using composite STLs. While your statements are theoretically true, in practice, discrete STLs apparently have more problems and are used, at least out here, only for multiple-hop relays or relays with long hops. Broadcasters (again, referring to those I know about) prefer keeping the processing at the studio. And that includes peak limiting. I know that's been the case for two of my former employers as well as others.

I'm not an engineer so I'm sorry I can't be more specific about "more problems." Regards (and hope this posts despite a system with a full disk)...

Greetings from Quito.

In response to the "Where are they now" question about Chicago radio personalities. Bill "The Duke of Chicago", "The Duke of Louisville", etc. Bailey is now at WVLK in Lexington, Kentucky where he is none other than "The Duke of Lexington". Bailey spent many years at WAKY and WKLO in Louisville during their heydays. He went to WLS for a stint, but felt limited by management so went back to Louisville. A year or two ago WVLK had a WAKY reunion, liked Bailey and gave him an air shift. His program is really a P.M.. drive time information show, but he is still is old obnoxious/lovable self. (By the way, watch for a History of Kentucky broadcasting book scheduled for publication this summer. It was my privilege to write the 1945-1970 chapters)
Gary Gears died a few years ago. At the time he was doing some production work (had his own company) and was doing a weekly Rock show for Radio Moscow and a shortwave feature for the DX Party Line here on HCJB.

About time tones, WHAS in Louisville carries an on-the-hour tone separate from the ABC Information network which they seldom carry except over night.

604. NEW LOW POWER LICENSING POLICY IN CANADA

Newsgroup: rec.radio.broadcasting
Date: 1994-02-19 06:28:55 UTC
From: resystom@web.apc.org
Message-ID: <2k4bj7$ji9@vixen.cso.uiuc.edu>
Source record: 41159
Cross-posted to: rec.radio.broadcasting,rec.radio.info,rec.radio.shortwave,rec.radio.noncomm

Non-profit broadcasters have gained an advantage when applying for Low Power radio allotments in congested areas with a new CRTC Policy announced last summer.

Public Notice 1993-95, entitled "A Licensing Policy for Low Power Radio Broadcasting" establishes guidelines for the allotment of unprotected allotments of less than 50 watts ERP. This policy does not affect licensees or applications for protected class allotments of greater than 50 watts.

The Comission initiated a review of Low Power policies in 1991 in response to the growing requests for LP frequencies, especially for non-conventional services in congested areas. The NCRA's comments to the Commission calling for preferential treatment for conventional non-profit services and severe limits on non-conventional services was well reflected in the new policies.

The notice establishes two tiers of priority services for low power frequncies in congested areas. This means that some types of services will have priority over others when the commission makes licensing decisions. The Commission notes congested areas to currently include the Montreal area, Southern Ontario and the lower mainland / Island of British Columbia.

The new heirarchy of service places conventional not for profit radio services (community, campus, native, etc.) at the top of the first tier, followed by originating private broadcasters, local private rebroadcasters and distant rebroadcasters (including CBC rebroads). The second tier will include non-profit public information services (i.e. traffic/weather info services) and commercial announcement services (real estate / talking billboards).

The Commission also established a policy of issuing a call for competiting applications upon receipt of any application for a low power drop in allotment in areas where frequencies are scarce. This will include applications from non-profit broadcasters. The commission noted that, in addition to the priority heirarchy, the duration of the proposed service, the proposed power and the availability of alternate delivery means may be used in assessing competing applications.

The new policy also places a general requirement on all LP licensees to adhere to all existing policies for other services. However, the Commission notes that individual applications for exemptions from specific policies will be dealt with on a case by case basis.

605. Radio Watch-Buffalo/Toronto

Newsgroup: rec.radio.broadcasting
Date: 1994-02-20 08:12:37 UTC
From: ag365@freenet.buffalo.edu
Message-ID: <2k761l$d09@vixen.cso.uiuc.edu>
Source record: 41160

Some new stuff in-here it is:

1.WBLK-FM(urban contemp.;Power 94)is one of the organizers of a gun buyback program here in Buffalo. Plans call for food vouchers between $50-100 to be given for each gun turned in. GM Mark Plimpton said that "people are getting killed over sneakers. There's a potential for bad things to happen." WKBW-TV's managing news editor,Joe Rohm,is also said to be working on the plan. It's to be administered by private sponsorship.

2.WGR-AM(N/T;NewsRadio 55)and WGRF-FM(classic rock,97 Rock) OM Chuck Finney is leaving the station in about a month to become the national PD of Secret Communications,a Cincinnati-based radio company. Finney-at the stations since 1991-will oversee 10 stations in 7 markets. Craig Edwards is the interim PD,adding that to his duties as News Dir.& Sports Dir.(Thought:Will this change WGR's image for the better? Hopefully,but I have my doubts-and I'll expound on that later...)

3.Across the border,Billboard's "Vox Jox" column reports that a series of ads promoting CFNY in Toronto(modern rock,The Leading Edge)have been banned by the Telecaster Committee of Canada,which approves all TV spots aired in Canada. The ads were evaluated after the CBC(the government-owned network)rejected them due to its "aggresive treatment of sensitive matter,such as religion,lesbianism, and assassins." After the committee labeled the ads "too sensitive", three local stations,CITY-TV(ch.57),CFMT-TV(ch.47)and CTV affiliate CFTO-TV(ch.9)also pulled them.
The ads rejected include:the duo of Howard Glassman and Fred Patterson(AKA Humble & Fred)talksing about injecting oranges with vodka and Patterson saying that he wrote the Lord's Prayer on an Etch-a-Sketch.
My thoughts:This is what got everyone so worked up? Please! And,this isn't the first time a radio ad stirred the pot of public opinion. CFTR-AM produced a spot for Jesse & Gene(now at CHOG-AM; top 40;AM 640)that showed a man in an elevator losing control of his bodily function(labled "Lose Control w/Jesse & Gene" and CHUM-FM(contemporary,104.5chumfm)had a spot with a man naked except for a strategically-placed briefcase,and a woman also naked save for a boombox(called "It's all you need to put on"). For the record,I saw both ads and saw nothing wrong with them.

BTW,in regards to my post of Gerry House now airing his syndicated morning show at WNUC,what I tried to say is that the station was owned by my former dentist. Whether it can compete with

WYRK is another matter,due to:the fact that's it's all satellite-driven and that it's only listed at 11,500 W. And,BTW,I had it first. The score in being first:C.K.G. 2,Alan Pergament(Buffalo News media writer)1.

All this talk of some stations being better than others...
....surely this is all down to personal preference?

Here in the UK we have the BBC and the independants. Independant from what I ask as they are all owned by a handful of people?

Most of these stations have similar sounds to each other and have massive area overlaps. What is the purpose of all of them.

Classic FM surely serves an excellent purpose as the first national commercial station and the first station outside of the BBC to offer that sort of entertainment.

Then I ask the question is Classic FM good?
Well I don't choose to listen to it so therefore it can't be.

NOT true. Of course it's good - the three or so million people that listen to it every week would certainly think so.

Why is it that BBC Radio One FM has so few listeners in the south (particularly Kent and London) but so many in the midlands? I have listened to some of the midlands stations and I can't see that they are THAT much different to the Kent station, Invicta FM, which I listen to. Yet for some reason Invicta has attracted a higher audience than any other local station over its region. As may may suggest, this is not due to having no competition, because in all parts of Kent you can receive Radio One and at least one other local commercial station as well as local BBC. I can think of no reason for such a difference, although I do believe the current format of Invicta beats anything I have ever heard elsewhere.
That is just my opinion.

Has anyone ever considered that people's tastes are different?
It would seem not.

Perhaps people would like to start.

In a previous article, neil.parks@pcohio.com (Neil Parks) says:
>When WMJI plays oldies, it's not bad at all. Unfortunately, in
>morning drive when I'd like to hear some good oldies, WMJI
>doesn't play any at all. The morning hours belong to a talk show
>featuring John Lanigan, John Webster, and Jimmy Malone. It's a
>wide-ranging mixture of comedy, call-ins, interviews, and lots of
>other stuff. But what's it doing on a station that is supposed
>be "Cleveland's favorite oldies"?
>
>Does it reflect the taste of the listeners? Obviously it does,
>because it is consistently number one in the ratings

I listen to Lanigan et. al., every morning and find them very entertaining (much more so than Stern, of which enuf already...) Even WNCX doesn't play their "classic rock" in the mornings to present Stern, at least Lanigan etc. play a tune once in a while...(just wish they'd do away with 95% of the Motown...)

It's the rest of the day that bothers me (and I should point out that WMJI is my favorite station here simply because they have an oldies format. I just feel there could be (here we go...) MORE VARIETY! LESS REPETITION! Example: in alt.rock-n-roll.oldies we are having a discussion on what made "hit" status in the 60's...The book we are referring to is Joel Whitburn's compilation of Billboard's Top100 records from 1955-1986. Certainly programmers could search this tome for examples of forgotten records that were hits in their day but seem to be overlooked today...

During a home project I had them on from late morning til 530 the next morning. I heard the same songs in almost (practically!) the same order as in the early afternoon, at 3AM or so. This is ridiculous, I'd hear the same tune driving to my 2nd-shift job, and hear it on the way home at 1230AM! A backlog of30 years of music, there must certainly be more of a selection than they are willing to program. Re-formatting inside a format?!?!?! "We'll only play...THESE oldies this month, then next month..." Come on!

OK, just my 50th of a dollar. Cheers...

My guess would be one of two things. Early July can be the waning of the
"sporatic-E season" (skywave propagation) which can affect VHF frequencies.
Also, temperature ducting can affect the lower VHF frequency range (weather
fronts and temperature inversions go together). I've observed temperature
ducting on VHF and UHF ham freqs that have lasted several hours with the
strongest effects being along the coast. The signal can reflect off the
temperature inversion once or get caught between two or more inversions
and travel further. The FM broadcast band may have many occurrances like
this, but they go unnoticed due to the large number of stations on-the-air
simultaneously.
Other ways are possible, but the two I mentioned seem to be the most
common I've observed.
Jim Wood

615. Re: Unusual Occurrence on FM....

Newsgroup: rec.radio.broadcasting

Could be sproadic E or F layer propagation. Was is choppy, flutterly sounding? How long did it last?

Mike Miles

616. Welcome to AIRWAVES RADIO JOURNAL/rec.radio.broadcasting (2-20-94)

Newsgroup: rec.radio.broadcasting

Hello:

Here is the most recent help/introduction file for AIRWAVES Radio
Journal and the Usenet newsgroup, rec.radio.broadcasting.

Comments are welcomed. Send them to...

wdp@airwaves.chi.il.us - wdp@uiuc.edu - wdp@gagme.wwa.com

This document was last updated on 2-20-94

Read rec.radio.info and rec.radio.broadcasting for further updates on
this file. This file will automatically be updated as news warrants.

Greetings:

The AIRWAVES Radio Journal (Formerly published as the Internet
Radio Journal) is a periodic email digest dedicated to
discussions about all facets of domestic broadcast radio.

Subscriptions to Airwaves are free, and available to anyone who wants
one, and who is equipped with Internet (or Internet gatewayed)
email service. While the subscription is free, some commercial
systems may charge a small fee for reading Internet email.
Currently all major email providers have Internet access to one
degree or another. Check with your local provider for details.

To subscribe to AIRWAVES, send mail to the Internet mail address of
- subscribe@airwaves.chi.il.us -

In addition, all articles in AIRWAVES are ported to and from the
Usenet newsgroup rec.radio.broadcasting (r.r.b) which was founded
in April of 1992, as a means to further discussion of topics
pertaining to 'domestic broadcast radio'.

By domestic, we mean broadcasts which are intended, primarily,for
reception in the same country/nation in which they originate. AIRWAVES
and rrb, are international in their scope, and the term 'domestic' should

not be taken to imply 'USA' or even North American. Readers in other
nations are encouraged to participate.

```
____ _ _ _

\___ \| | | | '_ \| |/ _ \/ __| __/ __|
___) | |_| | |_) | | __/ (__| |_\__ \
|____/ \__,_|_.__// |\___|\___|\__|___/
|__/
```

If it has to do with broadcast radio, and not _specifically_ international
shortwave, it is welcome here. Occasionally an article which IS
primarily about shortwave will be posted if the subject seems broad
enough that the readership of AIRWAVES/rrb might be interested, or be able
to assist the poster in some way.

Generally, if a subject 'seems' like it would be of interest to the
broadcasting community (which includes those involved in creating,
transmitting or listening to broadcast radio) will be published.
These subjects include (but are not limited to)..

1) Formats and programming.
2) Engineering & technical matters and interests.
3) DXing (long distance reception) on the standard broadcast bands.
4) Community broadcasting.
5) Pirate broadcasting (especially non-shortwave, domestic pirates).
6) Legislation affecting the industry, and its 'offspring' industries.
7) Technologies affecting the industry, and its 'offspring' industries.
8) General station information. Who is going on and off the air, and why.
9) Radio's historical and cultural significance.
10) Radio's current and future trends.
11) Political and news coverage and its impact.
12) Job openings and help to those seeking work in the industry.
13) Information on equipment and techniques involved in transmission and
reception of broadcast radio signals.
14) The International Scene and how broadcast radio is shaping up in the
various nations of the world.
15) Gabfesting and all matters of general interest to those involved
in, or interested in, the general subject of domestic radio broadcasting.

```
_ _ _____ ____ _
| | | | _____ __ |_ _|__ | _ \ ___ ___| |_
| |_| |/ _ \ \ /\ / / | |/ _ \ | |_) / _ \/ __| __|
| _ | (_) \ V V / | | (_) | | __/ (_) \__ \ |_
|_| |_|\___/ \_/\_/ |_|\___/ |_| \___/|___/\__|
```

1) Post via rec.radio.broadcasting as you would any other Usenet
group. Your articles will find their way to AIRWAVES as well.

2) Email your article directly to articles@airwaves.chi.il.us. Using other
addresses to post will needlessly delay your article. You might
consider installing an alias in your mailer for emailed articles,

especially if you post a lot of stuff. See the end of this file
for all applicable addresses.

```
____ _ _ _ _
/ ___|_ _(_) __| | ___| (_)_ __ ___ ___
| | _| | | | |/ _` |/ _ \ | | '_ \ / _ \/ __|
| |_| | |_| | | (_| | __/ | | | | | __/\__ \
\____|\__,_|_|\__,_|\___|_|_|_| |_|\___||___/
```

* If you post a question that is of potential interest to others in
the group, ask that replies be posted, instead of emailed to you.
We all would like access to the answers. If you do receive email
replies, post a summary to the group. This forum is only as good as
it's posters and readers. Keep the info flowing.

* If you email an answer to a question, send a Cc: to the group's
submission address, articles@airwaves.chi.il.us, so we can all learn
from your knowledge. When id doubt... POST POST POST! :-).

* PLEASE edit quoted text to a minimum! Most users of this
group are fairly regular readers and do not need, or want, to read the
entire text of a recent article in every reply. Of course, if the
thread is not current, more quoted text may be appropriate. Use
your brain (and your editor :->).

* If your message is basically a one or two line "Me Too" or "I disagree"
post, consider emailing it to the poster. However if you go into
some details as to WHY you agree or disagree, then please post it.

* If you are replying to an article in the Airwaves Radio Journal,
simply use your mailer's reply feature, and again, edit the text to
ONLY the article you are replying to, and include the article's name
in the Subject field. Subjects of "Re: Airwaves Radio Journal" are
confusing and may result in needless delays.

* If you post about a local radio station or personality, realize that
most of the readers will know little or nothing about it.
Offer a little background, like location, station format, type of
music played etc.

* Last but not least, avoid flames and personal insults. AIRWAVES/rrb has
a high percentage of broadcast professionals among it's readers. We
try to maintain a reasonably high brain to B.S ratio here.
It is fine to disagree, but please stick to the issues and avoid
personal flames. If you *must* make personal attacks, do it in email.

```
_____ _ _ _ _ _ ____ _ _
| ____|__| (_) |_ ___ _ __(_) __ _| | | _ \ ___ | (_) ___ _ _
| _| / _` | | __/ _ \| '__| |/ _` | | | |_) / _ \| | |/ __| | | |
| |__| (_| | | || (_) | | | | (_| | | | __/ (_) | | | (__| |_| |
|_____\__,_|_|\__\___/|_| |_|\__,_|_|_| |_| \___/|_|_|\___|\__, |
|___/
```

AIRWAVES and rec.radio.broadcasting, are _very_ loosely moderated. Normally, all legitimate articles will be posted to the group. However, the moderator/editor reserves the right to edit or refuse any copy for any reason. Please note that it is not routine practice to edit or to otherwise modify articles. Usually such editing is limited to excessive .signatures and in some cases overly quoted text. On rare occasions, a brief (less than 6 lines) "Moderator's Note" may be appended to an article for clarification or other reasons. These appends are kept to an absolute minimum and are always placed after the poster's signature or (*very* rarely) at the beginning of a post. Spell checking is often done, when time permits.

Matters that may cause an article to be rejected, include...

* Articles which are not on (or reasonably near) the stated charter and scope of the group (domestic radio broadcasting) or pertain to 'non-broadcast' radio services, such as cellular, two-way, ham, citizens-band, and such.

* Articles that are too long for submission as-is. If your article is longer than 10k (10,000 bytes), consider splitting it into two parts, or better yet, edit it down to a more reasonable size. Check to see if you can eliminate any quoted text. If you believe that your article is of an especially urgent or informative nature, and you also feel that you cannot reduce the size without damaging the content, let me know and I will try to work with you.

* Articles which are merely multiple repetitions of an identical answer which has already been offered several times. Often these will be bundled together into a single article to conserve bandwidth and increase readability.

* Articles which contain 'miles' of quoted and multiple quoted text followed by a few lines or less of original text. Please edit quoted text to a minimum and try to adhere to the *50% rule*, that is 51 (or more) percent of original text to 49 (or less) of quoted text. If the thread is not current, more quoted text is appropriate. Only the worst offenders are omitted, usually I will edit quoted text myself, when I have time.

* Articles that solicit for funds or contain blatant commercial content. (see next section on this)

* Articles which are unwarrantedly offensive, abusive or contentious for the sake of contention. Personal attacks and ridicule are considered such. Discussion, even argument, of issues and opinions are welcomed and encouraged. However, we have discussions here, not shouting matches.

Note: All articles are auto-replied to as they arrive, to indicate that we have received them. Each piece of mail to the submission address(es) will generate a separate auto-reply message. Most articles which appear reasonable and on topic are published in the Journal/newsgroup. However the Editor/Moderator reserves final judgment on matters of acceptance or rejection of submitted material. When possible, rejected submissions will be returned with a note

explaining why the submission was rejected.

* * * * * * *

Articles which appear to blatantly solicit funds from readers
for a 'cause' or a 'project' are generally rejected.

I generally * DO * accept..

o Product reviews: ... provided they are objective and informative and contain
little or no 'motivational' language. Prices should be reduced to a
price 'range' and all inquiries must be directed to the poster -or- an
address of the manufacturer/distributor.

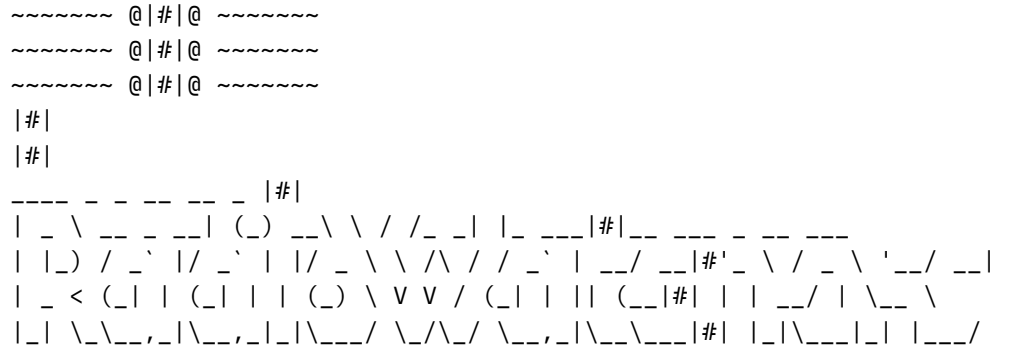
o Personal items: Such as old time radio tapes, a specific piece or two of
equipment etc. sold at a low, hobbiest price.

o Radio-related items for barter/trade: Self explanatory.

o Announcements for non-commercial workshops, conventions, radio related
flea-markets, etc. Pricing <other than small admission charge> and other
specifics (like 'we take your credit card') are considered commercial
content. If you want to publicize here, then you must deal with the
followup mail/calls yourself.

o Personal recommendations of a product/company that appear legitimate.
Especially when it is in response to another poster's inquiry.

In general I will take an 'err on the side of permissiveness' approach to
this. In other words, if your article is credible, informative, reasonably
intelligent, broadcast related, and has something to offer, I will do what
I can to pass it along to the readers. I will only reject the worst of the
lot. the rest I'll try to edit as necessary.



AIRWAVES has a program called RadioWatchers, which is open to any
readers who are interested. Basically RadioWatchers are volunteer
staff reporters who write about the goings-on in their market or area.
RadioWatchers differ from regular posters in that they are considered
part of the AIRWAVES organization, are given priority placement in
the AIRWAVES Journal.

RadioWatchers are expected to maintain at least one posting per month,
more as news warrants. For a complete file on the RadioWatcher
program, send email to radiowatcher@airwaves.chi.il.us and tell us
about yourself.

|_|
```

Archives of past Airwaves Radio Journals are kept for anonymous FTP at
the Internet site radio.aiss.uiuc.edu . They can be found in the
directory /misc/rec.radio.b-cast. In that directory you will find several
sub-directories. They are plainly labeled INTERNET_RADIO_JOURNALS
(which contains most issues through 399) and AIRWAVES_RADIO_JOURNAL
which contains issues 400 to present. The Journals are arranged in
sub-directories of about 100 issues each. In each main sub-directory
is a file called 00-INDEX, which contains the issue numbers of all
Journals, and the title of each article contained within. The
dated every week or so. To determine when the last update was, look
at the date on the file called "<-Archive Last Updated At".

If you need help with FTP, write me.

Journals are in Unix compress (.Z) format. The Unix compress
utilities are available free from many FTP sites for Unix, DOS and
Macintosh platforms. Remember that compressed files should
always be sent using the "binary" mode. If you have trouble accessing
anything, or if you have any questions about the archives, send email
to rrb@radio.aiss.uiuc.edu. If you appreciate the archives, send
your notes of appreciation to the site admin, C. Lance Moxley
<lance@radio.aiss.uiuc.edu>. He has been very gracious in his
willingness to store our archives on his machine.

```
____ _
/ ___| ___ _ __ | |__ ___ _ __
| | _ / _ \| '_ \| '_ \ / _ \ '__|
| |_| | (_) | |_) | | | | __/ |
\____|\___/| .__/|_| |_|\___|_|
|_|
```

You may access the archives via gopher, if your site is so equipped.
Gopher is a very fast, easy, menu-driven system requiring no remote
logging in, and which will deliver the issues in uncompressed form, as
well as permitting you to read or scan the files before downloading

them to your host system

To use the gopher system, type the following at your shell prompt...

gopher radio.aiss.uiuc.edu 7070 <return>

... then follow the simple menus. It is really easy. If you can use
a mailer or news reader, you can easily use gopher.

```
_____ _ _
| ____|_ __ ___ __ _(_) |
| _| | '_ ` _ \ / _` | | |
| |___| | | | | | (_| | | |
|_____|_| |_| |_|\__,_|_|_|
```

We are in the first stages of building an email archive server for
AIRWAVES. Currently you may obtain this help file and the INDEX files
for either the Internet Radio Journal, -or- the AIRWAVES RADIO JOURNAL.
You can also send for the file -COMMANDS-, which is updated as new
features are added. To access these servers, send email ti the
archive site address <rrb@deja-vu.aiss.uiuc.edu> with one of the
following commands as the SUBJECT of your message. The body of the
letter is ignored by the server but is scanned by me periodically.

** COMMANDS **

HELP - - - - - - - - Sends the latest version of the file you are reading now.
INDEX IRJ - - - - - Sends the 00-INDEX file for the Internet Radio Journal.
INDEX AIRWAVES - - - Sends the 00-INDEX file for the AIRWAVES Radio Journal.

```
__ __ _ _ ___ _ _ _
| \/ |___ __| (_)__ _ | __|_ ___ __ | \| |_ _ _ __ | |__ ___ _ _ ___
| |\/| / -_) _` | / _` | | _/ _` \ \/ / | .` | || | ' \| '_ \/ -_) '_(_-<
|_| |_\___\__,_|_\__,_| |_|\__,_/_/\_\ |_|\_|\_,_|_|_|_|_|_.__/\___|_| /__/
```

Send ALL requests to rrb@radio.aiss.uiuc.edu

A poster has supplied us with a three part file of media fax numbers.
You may obtain them via the usual FTP or Gopher means, or via the
email server. Follow above directions, but put one of the following
commands in the Subject of your mail. We take no responsibility for
the accuracy or currency of the information. One file request
per letter. If you want all three, send three pieces of mail.

FAXDIR-1 - - - - - - Organizations beginning with letters A - H
FAXDIR-2 - - - - - - Organizations beginning with letters I - M
FAXDIR-3 - - - - - - Organizations beginning with letters N - Y

Soon we will be expanding this service to permit email access to the
entire archive site. Stay tuned for further developments.
Remember that only mail addressed to the archive
address will be processed by the server.
- rrb@radio.aiss.uiuc.edu
-

-=*=- ENJOY THE GROUP! -=*=-

I hope you enjoy the group. Remember, it is only as good as it's contributors. So don't be shy :-). If you have a question, or answer, even if you are not sure, post - post - post.

I am open to suggestions on how to improve this group. Send them via e-mail to wdp@airwaves.chi.il.us -or- rrb@radio.aiss.uiuc.edu.

Thanks to all who have, and continue to, participate.

We now return you to your regularly scheduled newsgroup :-).

1
I doubt that it will come as any surprise to anyone that the time tone signal broadcast over the CBS radio network is simultaneous with that of WVV. I'm quite sure CBS calibrates with the time standard station (or is it the other way around? :}

Years ago, I was the manager for a small ed FM in the midwest. I always required the airing of the time tone because a) I was raised on WBBM-AM 2) I thought it made us sound like we knew what we were doing (a good ruse when we could do it) and 3) I liked it. When the new manager (a nice fellow - but of dubious tastes) took over, he ended an era...he ended my beep.

It is of such transgressions that lifelong animosities are built.

In article <2jmt8j$i1a@vixen.cso.uiuc.edu> an904@cleveland.Freenet.Edu (Michael King) writes:
>
>In the Chicago area, tones are being used on WBBM-AM (Newsradio
>78), WMAQ-AM (All-News 67), WGN-AM (AM 720), WLS-AM/FM (Talk
>Radio 890/94.7) {WLS' signal is on a cart though}.

WLS uses a tone most of the year. During Christmastime they use sleigh bells and during New Year's they use a champagne cork.

"At the sound of the champage cork, it's 8 o'clock."

619. John Landecker wants to *pay* me to listen

Newsgroup: rec.radio.broadcasting
Date: 1994-02-20 08:32:08 UTC
From: wdp@uiuc.edu
Message-ID: <2k7768$e8g@vixen.cso.uiuc.edu>
Source record: 41174

Well isn't this special???

John Records Landecker (WJMK) wrote me a 'personal' letter. Yes I (and a *few* others, he told me this himself) received a letter saying that he wants ME to listen to his morning show on WJMK and to show his appreciation he will enter me in a contest to win $1000.00 (if and when My name is called out on the air).

To add even more warmth and sweetness, he *promises* me that he will only call out my name during the times when I say I will be listening.

Wow, imagine that. A personal form letter from JR Landecker and I dont even have to listen all day to win the grand in cash!.

Super.

Think WJMK might be a tad desperate for listeners? Think maybe the dismal showing in the last book has someting to do with JR sending me this wonderful 'personal' appeal?

Best part is that if I DO hear my name, I get to call within 10 minutes at the station's '591' number and claim my prize. That is the best part because as most Chicago radio callers know, the 591 exchange is a 'choker' exchange. This means that if a certain number of calls (like 100 at a time, from any given exchange) are using *any* 591 number, the trunk to *all* 591 numbers busy's out and you cannot get through. Even if the station you are calling has open lines, the phone company will *not* allow the call to complete because, say, the local talk station is interviewing a celebrity, the local CHR is offering free tickets to a rap concert or what-have-you.

So even if I did hear my name, it is likely that I could not get through anyway.

Hey WJMK! If you want listeners, get rid of the playlist of "The 200 most worn-out oldies in the Universe" and produce a product that listeners want to hear. They have the talent at WJMK, some of the best and most well known 60's and 70's talent in the business. But they muzzle them and force them into a box so tight that it is a waste of that talent.

Even the Unistar-fed (gakkk!) AM oldies station WAUR (930-Sandwich/Aurora) sounds better. <Did I just say that? Oh god...>.

Sorry Mr Landecker (or whoever *really* wrote that letter) but unless your station gets its head out of it's consultant's pocket and starts programming an exciting oldies format (it can be done, I have heard it

done) I would not bother listening even if I was guaranteed athe
thousand (well maybe then).

Bill

>pave the way for Toledo's first duopoly. For those of you who
>live in markets that have duopolies (sp?), what would this mean
>for programming and other areas noticeable by the general public?

WIOT(FM-104) and WCWA(Which way) were owned at one time by Reams broadcasting
Fraser Reams Jr.(I think) had or has declared bankruptcy(?) not to long ago.
I know the company had been in the family for a long time. Reams was the
Chairman of the Board of Trustees of Bowling Green State University in
1982 when I started here. At the time he seemed like a humorless man that
was all business. But I saw him a few months ago at a University function
after not seeing him for several years and he was joking around and having
a good time.

FM-104 at one time hired alot of BGSU radio graduates but I don't think Ream's
was an Alum.

Kim Sebert

In a previous post Chris M. writes:
During a home project I had them on from late morning til 530 the next morning. I heard the same songs in almost (practically!) the same order as in the early afternoon, at 3AM or so.

It's been about 7 years since I worked for Majic, but we used to repeat the 10a-3p shift (minus the noon hour) overnight. The reason was actually to avoid repetition. At the time Majic was AC not oldies, but if you have a fixed library then songs come up again every xxx hours. The idea was that very few people who listen from 10a-3p are listening overnight so if you repeat the same songs then that is 40 songs you haven't had to play that day and you actually extend your rotation for your average listener. Although there are many things about music scheduling that doesn't necessarily make sense to me, this practice seems to be a good one. I assume from your experience that they are still doing the same thing -- hope I've given a reasonable explanation of it. [actually the first station I worked at, in the days before computer scheduling, we each had color coded pens so that music didn't repeat too much in daypart]

The same ad (and motto) is used by CKLC-1380 in Kingston, Ontario. I saw nothing wrong with the ad either; in fact, it is one of the best ads I have seen.

I am surprised to hear this ad was used by both CHUM-FM and CKLC (and probably other stations). Is CKLC owned by CHUM Ltd? If not, I guess they both use the same ad agency.

I have also seen ads similar to those of a local station, Majic 100, used for at least two other radio stations in other markets (I think one of them was Boston). The ads were apparently produced by a Nashville company.

I wonder how many of these ads that give the impression of being locally-made are actually made far away.

Should I be impressed? I've been in the business for 22 years, spanning radio, television, and the public-sector.

> I have programmed several
> small and medium market radio stations in the past...taking one station to
> number one in its Arbitron...

...which has little to do with the subject being discussed.

> Presently, I am a broadcast political reporter...covering government and that
> includes the FCC. I have worked on the EBS committee in our state.

Wow, I was only the FCC liaison and keeper of the EBS and other disaster communications plans for the City of New York. But, of course, none of this has anything to do with the subject we were discussing.

> I think
> I can speak from experience on the topic of ID's, since I've worked in a
> station where the FCC has come in an put the hammer down on rules (which
> happened with the PD prior to me). Where are you coming from?

I've been inspected, at several stations, as an operator and as a Chief Engineer. Even was cited a few of times by one nasty sob inspector. I've also worked directly with the FCC as a fellow public-sector employee, and even got involved with rule-making. Oh, but this also has little to do with the subject being discussed, except that one inspector was monitoring before his inspection and audited my logs, and, yes the stations id's were just fine. ;)

> >What makes you think that a mere board op has the authority to overrule his

> >you, you follow orders...or end up on the street.

> The real answer is: If you are a board op signed on the transmitter and
> programming logs, and the station violates FCC
> station ID rules...both the station AND YOU can be fined.

So what? A board op (though there are few these days that are strictly operators) doesn't always have the authority to change management's

interpretation of the law. You can't always be a(n unemployed) hero EVERYWHERE you work. In the absence of management's interpretation, you have to use common sense and your best judgement.

> When they write
> citations, the FCC these days is citing both, since the operator on duty
> must certify the authenticity and correctness of the logs. If you're the
> chief engineer of the station and you certify the logs as correct and the
> log times are wrong, you are also subject to FCC action. See what I mean.

That's old news. They've been doing that for years, depending upon the severity of the violations. I know of one CE who was coerced into faking proofs-of-performance for a station that was in serious financial trouble. He was facing a lot more than just a fine, but successfully proved that he was blackmailed by his employer. You can read about it in the FCC Record, how WLIR-FM, formerly in Garden City, New York, lost their license.

> ...Oh, and cut the crap about "is that what they taught you in broadcast
> school".

It's a shame that in your travels, you didn't learn more about creativity.

> I've learned it the HARD way, by doing it.

So far, the only impression I get is that you wanted an excuse to boast about your credentials. This may come as a bit of a shock, but you don't have a monopoly on "hard" experience. But don't worry, some day you'll learn it RIGHT.

> What's your excuse?

I don't need one. Do you?

625. WKDK/1240/Newberry, SC

Newsgroup: rec.radio.broadcasting
Date: 1994-02-21 07:40:41 UTC
From: Powell Way <almira!scbear!powell@ncrcae.columbiasc.NCR.COM>
Message-ID: <2k9ohp$qof@vixen.cso.uiuc.edu>
Source record: 41180

Greetings,

I work part-time at WKDK radio in Newberry, SC. WKDK went on the
air in mid October 1946 (sometime around the 18th) a couple of weeks after
I was born. The station was originally put on the air by Chris Kaughmann and
John Clarkson. The original engineer was George Martin (now deceased) and the
current engineer Ray Gilliam was there from the beginning. The current owner,
James F. Coggins, joined the station in 1949 and purchased the station in 1951.
I remember many mornings as child being in that control room with the wood
console (Gates). I do (normally) a Sunday AM 6 AM until 3 PM shift, and the
very early hours are big band from my own collection. At 7:20 we have a
program by James King who has sung hymns since the station went on the air.
We have some other religious programs and after 12 we do basically AC/ and
oldies and then AT 40 at 1PM. During the week it's AC, some oldies and lots
of local news and especially sports, Newberry High School and Newberry College.
It sure is fun to beat the 25K FM station that has no clue what radio is about!
WKDK has operated 24 hours when tornadoes have been in the area and
WKDK is what service to the community should be.

Powell E. Way III

Coming up in March, WDJB, B-106, will have a new on-the-air attitude. They are going to drop some of the more juvenile items to attract an older audience. This change was aided by the announcement that their owners took the station off the sale block and would not switch to a satellite service. Also, the general and sales managers are gone. Thought this might be of interest. To ponder: What will Phlash do now that juvenile behavior has been eliminated?

Did anybody attend the recent RAB/MSC conference in Dallas? If so, I would appreciate any insight or tips picked up concerning duopolies and LMAs. RAB offered no academic discount for myself (a poor graduate student doing dissertation research on radio duopolies) to attend. Specifically, if anybody attended the workshops on SMALL and LARGE market duopolies I would appreciate any information from those as well.
For those following my research efforts: I've completed 66 interviews with owners and management staff of 16 duopolies. They are being transcribed now and analysis will begin in March. I hope to post some results in late spring or offer an executive summary of my findings to those interested.
More later. Responses to Airwaves or to me at:
HAGIN@utkvx.utk.edu
Thanks!

hello...

i'm a news editor/writer/ex-managing editor for a c-b-s affiliate newsradio operation in central california. our station is the first across the country with a state-of-the-art tapeless audio/prompter/touch screen system. no tapes, no paper, and 24 hours hours of news. our newsteam also produces a news program for our FOX affiliate tv station.

i'm moving to Southern California for grad school in the fall (USC Social Work) and am looking for full time work for the next three years. i'm open to non-newsradio possibilities.

If you can help, please e-mail me.

thanks,

paul chaderjian

Subject: OLD WLS JOCKS - J.J. Jeffrey

I have a very good friend who just became a subscriber who, along with myself, used to work for J.J. in Sacramento. He and "Doc" Fuller owned KPOP (93.5) J.J. also did middays for a while. My pal, Bud Kress, handled weekends and I basically hung around until they let me run Dr. Ruth. When last I saw J.J., He was just wrapping up a stint running the Fuller-Jeffrey station in Santa Cruz, CA KSCO-AM (1080). This was at least 2 years ago. Bud would probably know more.
By the way, In it's day, KPOP was the hippinest, baddest, CHR in the land. I only wish I had been old enough to pull just one shift there...Now it is known as KRXQ (93.7-93Rock). And I think that they were about to enter into a duopoly with KSEG (Eagle 96.9) The classic rock station in Sacto. Therefore selling off the station that got J.J. into ownership....

Til' next time......

I was home over Christmas and noticed that CIOO-FM (C-100) in
Halifax, NS also used the exact same ad as CHUM-FM. This is not surprising
as CHUM own that station had CJCH-AM (correct call letters?) in Halifax.
Incidently I saw the ad on ASN, also owned by CHUM.

All this talk of which station is better.

Surely the station you choose to listen to is entirely up to which one suits your personal choice?

For example, fans of pop / rock music, who want to hear as much music and as little DJ as possible might choose to listen to a station such as London's Capital FM and those that prefer radio to represent something different from pressing play on a tape might choose a station with more emphasis on talk.

Who would want to listen to Classic FM?
Well, perhaps people with an interest in classical music or features run on that station.
The fact that Radio One has more listeners does not necessarily mean that Radio One is a better station.

Personally, I think Radio One is very good, not that I choose to listen to it, although it is going down in the standard of programmes compared to what it used to be like.

The commercial stations vary widely although all follow certain themes, putting different weight on the music / talk relationship, playing different styles of music and with varying degrees of concern with local affairs.

Does this mean that one format is better than another. Where I used to live on the Kent / Surrey border, I used to listen to Kent based Invicta FM. This station has a limited amount of talk and plays mainly a cross section of recent rock or dance music (emphasis varies according to the time of day) and with the inclusion of almost all worthwhile new stuff. My parents, on the other hand preferred East Sussex based Radio Mercury, a station which concerns itself a lot more with news and current affairs and with a good mixture of 60s, 70s and 80s pop and light rock.

Who can say which of these stations is really better, although Invicta has proved to be one of the most successful formats on offer on the UK this does not make it better. It appeals to more people and is well suited to its area. That is the only difference.

So please, folks, let's stop all this pathetic arguing which goes on these news pages and in the outside world!

A radio station is only bad if it attracts almost no listeners. No station can be expected to please everyone so as long as it attracts something of an audience then it must be good. You can't please all of the people all of the time!

are there any Long John Nebel fans from the early 60's that have by chance taped any of his conversations with the late Rev. Pike, on the hereafter on WMCA<WNBC NYC.

HE was my favorite late night radio personality and had many famous interviews with the likes of Hugh Lynn Casey,Edgar Casey"s the famous clairvoyant's son. Attorney Mark Lane" Rush to Judgement " fame, as well as others.
His interviews were the best without doubt.
Especially the one with the Late Billy Rose....unbelievable person the greatest interview I ever heard!!!!!

I would love to hear his voice again via tapes. my collection was destroyed in a fire in the early seventies.

other notables thatI I am looking for is Brad Crandell the great voice of WNBC 66 50k clear channel bliss!!!. The last I heard Brad was up to after his departure from WNBC was doing Voice commercials and an outlandish UFO movie, the name of which escapes me.

would love to hear from 60-70 am radio fans.....oh! don't forget the Late and Great Big Wilson,,,Barry Farber (Still Strong in Syndication) and the Late Candy Jones.

I have Tom Snyders greatest interview with Charles Manson on the Tommorrow show but only on Beta...will have to convert it.

reply via airwaves or diamondles@aol.com

Repeating the daytime playlist during the overnight hours is nothing new, and probably done at a lot of stations...when I worked at 95.9 WAX-FM in Youngstown (WAXF/Sharpsville, PA, legally ;), we repeated our midday music rotation, song for song, during overnights. I was the overnight jock at the time, and realized that the time slot just wasn't important enough to have its own rotation. ;)

Mike / WQKT-WKVX (until 2/27...looking for a job in Sacramento after!)

>in the days before computer scheduling, we each had color coded pens so that
>music didn't repeat too much in daypart]

Reading the Whitburn/Hot100 book has been a real eyeopener for me.
Theoretically, taking into account only those records that got into the
Top40, covering the currently accepted "oldies" era (1958 or so - 1974 or
so...few good doo wop tunes included, saved it seems for Norm N Nite),
there must still be thousands of songs available that could preclude the
necessity to play "Bye Bye Love" twice a day for a month! If it's gonna be
oldies, make it *all* the oldies, not just a selection at the MD's whim! Go
by history; if a record was a regional hit but didn't necessarily make the
Top 40, include it (Cleveland example: "It's Cold Outside" - The Choir). If
it made the Top 40 at all, include it.

Guess I'm not your average listener, I'm definitely not a casual listener, I listen for the MUSIC, that is what
matters, and even tunes I LOVE can wear after a while. There are even
Beatles singles that made the Top40 but not the Top20, that I never hear
("Matchbox" for example, although I think that hit 17, regardless....) yet
strangely on the other hand, they've been "rotating" Paul's "Maybe I'm
Amazed", which wasn't even a single!!! It can't be that hard to extend the
playlist, especially since with "oldies" there are tons of pre-existing
styles presented anyway. "Format" shouldn't matter.

I still listen, but lately I am beginning to question the method of
selecting the tunes...a much more vast array of oldies should be available
to the listener than what is currently out there.

So much news-so little time.

1.Jim Berryman is now a weekend fill-in news anchor at WBEN-AM(news/talk;News 930). He's the third alum of WEBR-AM(now WNED-AM;news/talk/public affairs)to pop up at 'BEN. Dave Debo (who did "Weekend at Your Service" for 'EBR)also fills in from time to time,and George Richert handles morning news anchor duties as well as reporting. Berryman was one of the hosts for WEBR's "Jazz in the Nighttime",which left when the WNY Public Broadcasters Assoc.-holders of 'NED-AM's license-made the changes in August of last year.

2.Adrian Bell(former morning man at CHOG-AM(top 40;AM 640)) has joined CKFM-FM(contemp.mix;Mix 99.9)as weekend DJ.

3.WBLK-FM(urban contemporary;Power 94)will hold another community forum-on music and its influence on people-this Monday (2/28)at the McCoy Convention Center in Buffalo(not to be confused w/the Buffalo Convention Center :-)). The first forum they held this year-with new Mayor Anthony Masiello-had a very poor turnout, atttributed to the fact that it was held in the morning;only 2 dozen attended in an auditorium that can seat about 200.

4.Sad note to close this report out on. "Jungle Jay" Nelson, a DJ at WKBW-AM(now WWKB-AM;talk/sports-The Big 1520)in the late '50s-early '60s,died on Friday in Toronto;the death is attributed to natural causes. Nelson left KB in 1963 to jump to CHUM-AM in Toronto,where he was embraced just as warmly as he was at KB. Danny Neaverth(currently the morning man at WHTT-FM)mentioned taht when he and Jay were doing a reunion show with all the old KB'ers in 1988,that Jay seemed a bit sad about it all. Jay told him that this would be probably be the last time that the old staff would all be together.(BTW,for all you game-show buffs,another ex-KBer-Rod Roddy-currently is the announcer for "The Price is Right.)

642. Triple A(the format)in Buffalo?

Newsgroup: rec.radio.broadcasting
Date: 1994-02-23 05:45:10 UTC

Thought this might be of interest to y'all. This is from
Donn Esmonde's Feb.20 column in the Buffalo News titled "Fresh
sounds on the airwaves,but not in Buffalo"

Wanted:Local radio station manager willing to take a chance
on a ready-made,semi-progressive alternative rock format that has
found a niche in more than 130 other markets.
Reward:Limited prosperity,an upscale 25-45 audience to offer
advertisers,and the eternal thanks of local music listeners on an
aural-substance diet.
We start with a simple premise. Rock radio in Buffalo is a
gulag,a vast wasteland of Pink Floyd & Led Zeppelin endlessly
recycled by DJs enamored with junior high locker room humor.
It's obvious there's a place-sadly,a large place-for that in
Buffalo.
It's also obvious,by the small but devoted following for
Toronto's CFNY(102 FM)attracts,that there's room for something
else.
Something Else is what Buffalo-where radio ad dollars are
scarce and station managers' nerve limited-never seems to get.
Meanwhile,the Triple A(Adult Album Alternative-BTW,not how
D.E.wrote it)format is sweeping the nation. Or,at least,the
tiresomely familiar Nation Not Including Buffalo.
It's commercial radio that plays the alternative/progressive
rock bands previously heard only on college stations. It
includes a sprinkling of baby boomer favorites,to give
fortysomething fogies an anchor in the new,rougher seas.
Triple A is a nurturing place for those who thought rock
died when the Who broke up. It's a hallowed ground for boomers
who missed the '80s alternative scene beacuse classic rock had a
stranglehold on local airwaves.
It's a format so long in coming,so obvious(and so obviously
needed),the only surprise is it took ntil the '90s to get here.
Or,rather,to get elsewhere.
Audio enlightenment for Buffaloians is as near and as far as
WMAX in Rochester. The Triple A station's playlist runs from Tom
Petty to the Pogues,the Cranberries to the Crash Test Dummies,
Melissa Etheridge to Mae Moore.
It's not quite a return to the no-rules eclectism of late-'60s
FM. Triple A's 40-song playlist does not great radio make. It's a
bit lite,polite and precious. But compared to what we have now,it'd
sound like a call to revolution.
Until WMAX arrived a year ago(actually,about 1 1/2 years ago-
C.K.G.),Rochester was like Buffalo-the final resting place for tired

ears. Heavy on classic rock,light on music made by people under 30 as daring as a blue blazer,as invigorating as a supermarket checkout line.
"We've had to educate Rochester about this music,"said Lori Baister,WMAX's promotions director. "But people started turning each other onto the station by word-of-mouth. Now,when I'm out places,I have people ask me where we'd been and why it took so long."
Triple A targets an upscale,25-45 year old audience. At the high end are boomers ready for something new;at the low end are those weaned on '80s college darlings the Replacements and Pogues. The lack of even mildly adventurous radio here affects not just what we hear,but what we see.
Some alternative American bands would rather play a hotel lounge gig than Buffalo. There's little percentage in playing a city where you're not on the radio. Most people will be unfamiliar with the music,and the gig won't generate CD sales because no station is feedin the machine.
Current MTV(and WMAX)darlings the Cranberries recently sold out a 1,200-seat venue in Rochester. They had a layover in Buffalo but resisted efforts to get them a gig.
"The only reason we got(alternative rock hero)Paul Westerberg here last summer is because he has the same booking agent as the Goo Goo Dolls,"said promoter Artie Kwitchoff,who has brought numerous alternative bands to town.
Kwitchoff has had decent success getting alternative rock bands into town,but he says it's usually a battle.
Obviously,there's a potential Buffalo audience that's rested, ready and waiting for something different. Airplay on CFNY has amde cult favorites here of Canadian alternative bands Lowest of the Low (which recently sold out two Marquee(at the Tralf)shows),Blue Rodeo, and Moxy Fruvous.
Ms.Baister says Rochester's WMAX has about a 3% market share, decent for a nephoyte breaking ground with an unfamiliar format.
It's happening in Rochester. It's happening all over the nation.
Check that-all over the NNIB. The Nation Not Including Buffalo.

(Comments to come...)

643. More on WGR(Buffalo)

Newsgroup: rec.radio.broadcasting
Date: 1994-02-23 05:45:11 UTC
From: ag365@freenet.buffalo.edu
Message-ID: <2keqh7$2rh@vixen.cso.uiuc.edu>
Source record: 41198

Previously,I said that I'd continue my thoughts of whether WGR-AM(news/talk:NewsRadio 55)'s image would improve with the imminent departure of OM Chuck Finney.
First,I want to make it ABSOLUTELY clear that this is NOT targeted at the staff(I've worked with more than a few of them at WBNY-FM,also in Buffalo),nor is it an indictment of their work. It's just targeted at the station's philosophy.
Strap yourselves in,here we go....
What I find reprehensible is the station's attitude that the audience must have short memory spans. I mean,how else do you explain "weather on the 10s","sports at :15 & :45","traffic & weather on the 10s(in the AM & PM drive)",and news at the top & bottom of the hour? First,if I want the weather THAT much,I can watch the Weather Channel,thank you very much. The sports coverage, like its news coverage,seems like a headline service for all the depth it provides(NOT!). As far as the news goes,the announcers all seem to speed up their voices to get as much news as possible. (I'm not saying that all do this,but some do.) Frankly,if I want news,I can turn to either WBEN-AM or Toronto's CFTR-AM(news, 680 News);they give you the news straight-well,as straight as possible. It also seems-to me,at least-that they must be members of "the cult of you" :-). You can't get through 1 newscast without that word eeking out at least once. Folks,I'm not THAT stupid.
Another thing:They say that their talk is mostly local in nature. For that,I say:Bravo! That should be applauded-except if it's designed to push the listener's proverbial "hot buttons"-and THAT is what WGR seems to do more often than not.(I place talk radio hosts into two categories-brains & grandstanders. If you're a brain,you're good-but not many will listen. You can have elements of both-Dave May at 'BEN and the syndicated G.Gordon Liddy,i.e. They each have a tendency to grandstand-Liddy more so than May-but they can think on their feet. There are others,but that's an example.) 'GR,however,will bring up a subject and have it driven by gonads than brains. EVERY host that 'GR has had did this to some extent-Leslie Marshall,Paul Lyle,Jay R.Gach and now Rich Michaels(whom I affectionately refer to as "Rich the bitch" because of his whining).
As far as their sports talk goes,spare me. Art Wander(refered to as Artie-baby-makes-a-lot-of-booboos,or Art"my mind tends to" Wander)has no knowledge of sports. Period. The knowledge he has,any fan can get if he/she watches the games,etc. But,you have to know more than that. Fact is,if you can't even name the city's semipro football team,then you don't belong in a sports talk position.(BTW, the team is known as the Gladiators,whereas Art refered to it as the

Stallions-the city's first foray into indoor soccer.) On top of that, he has the worst attitude toward callers-constantly saying "Waitaminute" if he wants to get a word in edgewise.(To that,I say, "No,YOU wait a minute!".) Chuck Dickerson isn't much better. He knows football(he should-he was a coach),but that's it. The only way I can sum up Wander and Dickerson is "All show,no blow." If Art ever tried to pull the stunts he does on,for example,WFAN's Mike Francesa & Chris Russo,he'd get only about a few seconds before they'd rip him to shreds. "Mike & the Mad Dog" are showmen,but they have the sports knowledge to back up their mouths. Wander doesn't-it's as simple as that. (BTW,why are there so many Toronto-area callers? Don't you guys ever listen to CJCL(sports,The Fan 1430)? I can get more interesting stuff from you than I EVER could from Wander.
To sum it up,the philosophy at WGR SUCKS. I think I've found out what the initials stand for-We're Gross Radio or We're Grandstanding Radio. :-)

Comments welcome but no flames. As Dr.Bruce Banner said,"Don't make me angry. You wouldn't like me when I'm angry."

644. More radio news-Buffalo

Newsgroup: rec.radio.broadcasting

Message-ID: <2keqh8$2ro@vixen.cso.uiuc.edu>
Source record: 41199

It's official-WBEN-AM(N/T;News 930)and WMJQ-FM(hot A/C;Q102)
have new owners. Keymarket Communications' acqiuision of the 2
stations was OKed by the FCC on Jan.10.(By what margin,I don't
know.)
Also,Pyramid Broadcasting's purchase of WBUF-FM(soft A/C)
was reported in Radio Ink(a trade magazine)to be about $4 million.
Rumors have been swirling that 'BUF will have a format change.
(My thinking is that if it happens,it will be either ARROW-rock
n'roll oldies from '72-'85,or Adult Album Alternative,simply
because the market can't sustain three A/C's-WMJQ,WJYE(regular A/C)
and 'BUF. The latest Arbitrons proved it-''JYE was 3rd,'MJQ 9th
& 'BUF out of the top 10.)

Actually, if memory serves me well (and it seldom does anymore), the CRUISIN' series was originally put out by Audio Fidelity records and later sold to Increase/Watermark. Audio Fidelity did mostly sound effects albums, and their claim to fame was that they printed a strobe pattern around the circumference of their record label, so you could test the speed of your turntable whenever you played their records. If the pattern seemed to be standing still under a fluorescent light you were on speed.

647. "The Edge" Comes to Twin Cities

Newsgroup: rec.radio.broadcasting
Date: 1994-02-23 05:45:21 UTC
From: Chuck Tomlinson <toml0010@maroon.tc.umn.edu>
Message-ID: <2keqhh$2sg@vixen.cso.uiuc.edu>
Source record: 41002

93.7 FM,. KRXX, formerly called "93 X" in it's hard rock incarnation, is now 93.7 "The Edge, The Twin Cities New Music Alternative". They've been bought by ABC/Capital Cities, who also own the #1 classic rock station in town, KQRS 92.5.

Granted the Twin Cities is really unexciting market, but curiously, after a new country station boom last year and a half, it's now alternative fever. The Univ. of MN station, 770 AM, KUOM or "Radio K", is a daytimer (24 hr FM cable) that plays alternative, and now the "Edge" and now Cargill Communications is buying two FM frequencies, 105.1, 105.3 and will simulcast alternative rock to get better coverage.

My question is about the "Edge" format, which I understand can be found around the country. Who's concept is "The Edge", who's programming it, where else is it being used by stations in place of their own programming choices? As far as being alternative to anything, "The Edge" plays it so safe. (BTW, I'm not talking about a satellite or automated format, just the music programming and liners, etc. are coming from somewhere else.)

Disclaimer: I do volunteer at the above mentioned U of MN station.

Responses?

Chuck

648. Where is WGRE? Frequency? ()()()()

Former Buffalo and Toronto radio and TV personality Jay Nelson
died Friday (2/18) at his home in Toronto at the age of 58. Nelson
rose to prominence in the late 1950s and early 60s on WKBW in Buffalo,
and hosted an afternoon TV show for kids on WKBW-TV, Channel 7, called
the "Jungle Jay" Show. Exposure of the show in Toronto led to Nelson
taking a job in Canada, and he worked in Toronto for many years. He wasn't
on the air on a regular basis in recent years.

Bill Pfeiffer (wdp@uiuc.edu) wrote:
: Well isn't this special???

: John Records Landecker (WJMK) wrote me a 'personal' letter. Yes I
<...>
: Think WJMK might be a tad desperate for listeners? Think maybe the
: dismal showing in the last book has someting to do with JR sending me
: this wonderful 'personal' appeal?
<...>
: Hey WJMK! If you want listeners, get rid of the playlist of "The 200
: most worn-out oldies in the Universe" and produce a product that
: listeners want to hear. They have the talent at WJMK, some of the
: best and most well known 60's and 70's talent in the business.
: But they muzzle them and force them into a box so tight that it is a
: waste of that talent.

Arbitronic prostitution.

: Sorry Mr Landecker (or whoever *really* wrote that letter) but unless
: your station gets its head out of it's consultant's pocket and starts
: programming an exciting oldies format (it can be done, I have heard it
: done) I would not bother listening even if I was guaranteed athe
: thousand (well maybe then).

Or better yet. Cut out the middleman. Have the station install an ATM in your home that would receive signals from one of WJMK's subcarriers (if any). Have the station periodically "page" your personal ATM and have it give you cash. Right there.

Or *your* radio could have an autodialer set up to dial a pager number to page "Mr. Landecker" every time you listen and, a few days later, a check would arrive in the mail for each time you tuned in.

If program directors weren't such technophobes, you would be seeing silly things such as I have just described.

(i.e., why not turn the station into a money dispenser? Forget about programming. Just read off numbers, constantly, 24x7. Whenever you hear your number, call in and win some cash. Now *that's* modern radio stripped to its fundamentals -- buy an audience for your advertisers. Forget about that inconvenient phrase about "the public interest, convenience, and necessity" on your license.)

>
>(also sent to r.r.b but thought you'd like a copy...)

thanks. I don't think it's the politics. He is an entertainer first and foremost and a lot of people fail to realize that. I just object to 600+ news/talk signals running the same thing when there are lots of LOCAL things going on in lots of LOCAL communities. I firmly believe talk radio fails in its mission when it plugs into satellite networks.

That's the core of the objection to KMOX's carriage of Limbaugh. If you are from St. Louis, then you will know what a dominating presence KMOX had been over the years. There was nothing comparable to it in any other large market. It really was a full-service station, with the emphasis on SERVICE. So much so that its talk shows were named "At Your Service." If you don't know KMOX, you don't know what you missed -- even if, like me, you thought it stodgy, occasionally stuffy, and something your parents listened to. You sometimes don't know what you have 'til it's gone.
>
>And the Limbaugh formula -- no guests, except for callers. No topics,
>just commentary on the events of the day and how they relate to Rush's
>core values. Decency. Civility. Rock-and-roll. Irreverence.
>Production. Consistency. Energy. Credibility.

I'm not sure Limbaugh has any core values other than self-promotion, but I think you have hit the key to his success when you say "irreverence...production...consistency...energy." I would have to disagree with you regarding three items; the man is neither decent nor civil nor credible. (in my opinion, of course.)

It may also be that liberal listeners are instead tuning into "Talk of the Nation" on NPR. Hence, the Limbaugh listeners are counted in Arbitrons; the NPR listeners aren't, except for the special Arbitron books available only to NPR stations.

Thanks for the copy.

Do any of you know of the following:
Clint Beulman (sp?) who was the morning man on
WBEN, Buffalo, way back in the 40's?
And Brad Crandall who was on WNBC, also did some shows
on CBC in Canada about 20 yrs ago. I heard
that Brad had been injured in a swimming-
pool accident. Wonder if he's still in radio?
And where is Larry Glick of WBZ? I heard he is
still on the air in Boston. Haven't been able
to find him on the radio.

Source record: 41009

I guess I didn't make my point clearly about the repetition of daytime music overnight. Parth 2 and Chris M. both seemed to misunderstand my point.

To Chris, no matter how much music you decide to play at a station, no matter how many tunes you put into your rotation -- you will have a fixed amount (that I called xxx). You said, well you should add more songs. Great, add more. You still will end up with a fixed and finite amount, especially if you are playing songs from an era that has come to an end. Now that you have all the songs in place, how might you schedule them so that they don't come up quite as often? THAT is the thinking behind the overnight repetition. Since very few listeners listen to both of those dayparts, repeating the music stretches whatever playlist you have settled on.

To Parth 2, the point is not that overnights are not important enough to have music of its own, the point is that for most overnight listeners this would not be repetition. I am not advocating this practice in a blanket way -- it seems to me that there are songs that could be dayparted to overnights that won't get played using this scheme, but for a tightly regulated format (as Majic in the old days was and according to Chris still is) this is a useful tool. Also to Parth 2, I'm not suggesting the practice is new, or originated at Majic, I was responding to a specific observation about the station.

Hope I was more clear this time (us math guys try to be more precise). Daniel

Other observations from my trip to north Missouri...
*** *** *** *** *** *** *** *** *** *** *** *** *** *** ***
The most interesting station available in that area is KFMG(FM),
Pella, Iowa (Des Moines market).
This is an "adult album alternative" station, but it seems to have
a little more flair than most. (It certainly has more flair than my
hometown AAA station, KBXR(FM) in the Columbia (Mo.) market.)
Sunday night, the station showcases local artists on a show called
"Local Licks Tonight." This particular night, Rob Lombard, a blues
artist, was featured, and he performed live.
Later on that night, the station had a "progressive jazz" show. I
didn't catch the name; KFMG occasionally fades out and KPRS from Kansas
City replaces it briefly. Both stations are at 103.3.
Morning drive was suitably mellow. The calendar of events is
recast as "On the Streets of Des Moines," with citified traffic noises
underneath.
(Aside: One complaint about the M Street Directory. It lumps
both modern rock and AAA stations as "AP" -- when, in reality, modern
rock and AAA are very different formats. KFMG is listed as AP; I first
thought it would be modern rock, but it took me mere seconds to realize
that it was a AAA station instead.)
*** *** *** *** *** *** *** *** *** *** *** *** *** *** ***
Remember the sarcastic remark I made about KFDI, Wichita,
regarding its lost pet announcements and asking when I would hear the
recipes?
I now know the answer. I should instead tune to KIRK and KJEL
from Lebanon, Mo. The AM/FM combo proudly promotes its daily "Cookbook
Show" from 9:30 to 10 am. Yes...it's a call-in recipe show!
*** *** *** *** *** *** *** *** *** *** *** *** *** *** ***
I also got to hear some Omaha radio. KFAB(AM) should be a
candidate for sainthood. It was just about the ONLY wide-coverage
news/talk station NOT relaying Rush Limbaugh on Monday afternoon.
Instead, it had its own local talk show that was much more interesting
than Limbaugh's auditory ego trip.
KFAB is a consistent leader in the Omaha market, either ranking #1
or #2, depending on how the other market leader, KQKQ(FM), does.
KQKQ -- "Today's Best Music: Sweet 98" -- is one of the best CHR
stations I've heard. It is very aggressive at playing new music. It
also plays some classic alternative tracks from the Eighties; for
example, "True Faith" from New Order (which I have rarely heard on
commercial stations).
Sweet 98 also has a bit of an attitude. One promo says, "Today's
Best Music...live with it, Omaha!"

For the latest information on what the New World Order, UN, Secret Socities and Mrs Slick Willie's husband have in store for us, and how to become aware of what is really going on behind the scenes, tune in to the above Monday through Friday.... There is NO other radio program like this one in existence. If youre a commie or socialistic, we know all about your plans and are exposing them. We also know about those 'unmarked' black helicopters, UN troops, How the US is to be divided into 10 regions, patrolled by UN troops..

This is a personal message and appeal to all patriotic Americans who want to see our constituition , bill of rights , and monetary system restored to the way the founding fathers intended it to be. This message is in no way connected whatsoever with the facility used to transmit this message...

If you see a black unmarked chopper flying low , with no markings, and a dark green tinted window(s), then shoot it down , its the enemy...

[Moderator's Note: This is a joke, right? Bill]

658. Small-Town Radio in Trenton, Missouri

Newsgroup: rec.radio.broadcasting
Date: 1994-02-23 05:45:45 UTC
From: Mark Roberts <transvox@TYRELL.NET>
Message-ID: <2keqi9$2t5@vixen.cso.uiuc.edu>
Source record: 41013

Small-town radio is indeed different from big-city radio.
No doubt some graduate student will one day get a grant to write a thesis or dissertation to point out that obvious fact, just like I once got a grant to write a thesis pointing out some painfully obvious facts about mass storage and document retrieval. The important part was, I got the degree.
But, in the meantime, let's examine KTTN-AM/FM, Trenton, Missouri, at no additional charge.
Trenton is a city of 6,124 people, according to the city limits signs. It's located in northern Missouri about 35 miles south of the Iowa border. The FCC considers Trenton to be outside all TV markets; the cable system imports the St. Joseph TV station and all Kansas City TV stations. Still, Des Moines has some media influence there. A lot of people listen to WHO, and the Des Moines Register is readily available from newspaper vending machines.
A lot of people move away and come back only for funerals. That was the case with my mother's family. Agriculture is the area's main industry; it has not fared well in recent years. There was significant flooding last summer.
I had not been there for nearly 14 years. I was there for a few days to help arrange and attend my uncle's funeral. The best cared-for buildings in town are the funeral homes.
Otherwise, the place looks seedier and trashier than I remembered it. That could be a sign of my own snobbishness. Or it could be reality; some people have moved out and those who have stayed are poorer and don't have the wherewithal to keep up appearances. Probably all the above.
It may be important to understand the context in which KTTN operates when I begin describing what I heard.
KTTN simulcasts 100%. The AM is a 500-watt daytimer at 1600; the FM is a class A at 92.1. The FM station is in stereo (a couple of other FMs in the area are NOT, which is incredible to me). When the station plays music, it plays country-and-western.
But there's lots of other stuff. Farm markets, weather in five-minute wire-service summaries, local weather from KTTN's own weather station, weather forecasts on all newscasts, and local newscasts oriented toward agriculture and obituaries.
This should not be surprising when one realizes that what's considered the best local restaurant is named "The Branding Iron." This is a culture that takes its beef seriously.
As I related in another post, the funeral home submitted my uncle's obituary, KTTN put it on the next local newscast. This turned out to be an extremely efficient form of getting the news of my uncle's death out to our relatives; everyone whom my mother called had already

heard about it. (The local daily doesn't publish on Saturdays or holidays; the obit didn't appear there 'til Tuesday.)
KTTN runs local news every other hour at :15 past the hour. I don't know why :15 past the hour; that's just the way it's always been since KTTN(AM) went on the air in 1955. This includes Saturdays and Sundays; unlike most of the big-city stations for whom (1) the news director is the person with the scissors that morning and (2) weekend news can age for a couple of days, like either fine wine or dirty socks. (In Kansas City, this is even the case on all three of our news/talk stations, KCMO, KMBZ, and KNHN. Only WDAF staffs its news department on weekends.)
One newscast had an interview with the spokesman for the Missouri Future Farmers of America Association, Steve Brown. The FFA is an organization high-school students interested in agriculture can join. This week is National FFA week, and Brown was describing how FFA members promote agriculture to elementary school students.
In a tape cut, he said, "And we bring in actual agricultural animals to the elementary schools" to promote FFA membership.
As I drove out of Trenton, I looked at the KTTN building on Main Street. I saw a mailbox with the following sign written above it:
After Hours
NEWS DEPOSIT
Seeing that mailbox and hearing what KTTN does was for me a refreshing antidote to the hyper-researched, pre-digested pablum that passes for radio in Kansas City. No doubt KTTN is an important element in maintaining a strong sense of community in an otherwise distressed, isolated little city.
In Kansas City, if all the radio stations went away, I don't think anybody would really miss them. You can always get music from a tape deck or CD player. In fact, you can get *better* music from tapes or CDs than you can get on the radio here. (I wonder if "research" tells them that!) The service provided by most stations is easily replaceable.
In Trenton, if KTTN went away, I think people would miss it. Real fast. The service KTTN provides is difficult if not impossible to replace.

[Moderator's Note: Thank you Mark for this wonderful article. I, too, sorely miss local radio. With all it's glitches and 'un-slickness' rural and other local radio can never be replaced by SMN and Unistar. I urge everyone to call their local satellite repeater which passes for a radio station and tell them you miss them since they went off the air. When they tell you that they are 'on the

air' tell them 'no, some guy across the continent is on the air, you arn't'. One of my old sigs said "Satellite 106, "We're Not Here, but You are"... Bill]

Back before WEEI 590AM Boston went all-sports -- when it was the all-news station in town and was also a CBS affiliate -- it used to broadcast the CBS radio network bing-bing-bing-BONG! sequence as well. The WBZ 1030 AM beep is nice (and accurate, as Scott Fybush mentioned), but the CBS chime had more character...

I'd like to know what kind of training and/or education you engineers had before you got to where you are now.

Currently, I'm pursuing a BSEE, but I'm not sure what good it'll do for me to become an engineer.

For example, is SBE certification or a General Class License enough to get jobs?

Please respond via email at

bautista@icaen.uiowa.edu

Thanks in advance for your help!

662. FCC Explains Indecency Ban

Newsgroup: rec.radio.broadcasting
Date: 1994-02-25 03:09:49 UTC
From: jherman@uhunix3.uhcc.Hawaii.Edu
Message-ID: <2kjq5t$2q0@vixen.cso.uiuc.edu>
Source record: 41017

Thought some of you might be interested in this:

WASHINGTON (AP) -- The Federal Communications Commission will issue guidelines explaining the ban on indecency in broadcasts as part of a settlement with the owner of a Chicago radio station.
The FCC is dropping its claim of indecency and $39,750 in fines against the former WLUP-AM, now WMVP, in a case before a federal district judge in Chicago. The fines were for broadcasts in 1989, 1991 and 1992.
In return, station owner Evergreen Media Corp. is dismissing a counterclaim challenging the constitutionality of FCC enforcement of indecency standards, and paying $10,000 to the government, without admitting wrongdoing.
The deal, reached Tuesday, must be approved by U.S. District Judge John Nordberg, who is overseeing the case. Both sides hope to submit the settlement by week's end.
The agreement to explain how indecency laws are interpreted ``amounts to a major concession by the FCC'' -- something broadcasters confused by the FCC's enforcement have long sought, said Andrew Schwartzman, a Washington communications lawyer.
Jane Mago, the FCC's assistant general counsel, denied that the FCC's definition of indecency was vague, but said the guidelines would benefit broadcasters.
The agreement was in both sides' best interest, she said.

663. MSJ Formats (was RE: Radio Watchers -- On the Road -- Northern

> that it was a AAA station instead.)

I don't like that either. In Austin, KGSR and KNNC are both AP (album progressive). However, their formats are different. I list KNNC as modern rock and KGSR as adult progressive. Corpus Christi's KWVS likewise is an adult progressive station, too.

Where do you draw the line? WENZ "the End" Cleveland, WNNX "99X" Atlanta, and KDGE "the Edge" Dallas are almost "hit modern" stations, with a pretty "safe" music list (not that I'm complaining - I don't like most of the really off-beat alternative music anyway, and it makes KDGE a better listening choice than Dallas' only CHR since I don't have to put up with Whitney Houston, rap music, Michael Bolton, or Mariah Carey). Other modern rockers like KNNC Austin and most college modern rockers are much more daring. Should they have the same format code even though they are all "modern rock," but have very different playlists?

The M STREET folks do revise format codes. The next book will now include a hot AC designation to lump those hot ACs and adult CHRs into their own format and out of the AC and CH categories. However, there are a lot of these today, and not a lot of adult alternative stations (of more than 800 stations in Texas, only 2 are formatted that way), which is probably why hot AC gets its own format designation.

I do wonder if there will be changes to the modern rock format. In the most recent weekly editions, they've listed stations changing to modern rock as "new rock" instead of "modern rock" as they had been.

Of course, if you want to talk about a directory that needs clearer format listings, we could talk about the FM ATLAS (r = "rock" = AC, top 40, hot AC, adult rock, top 40/rock, ...).

Gee, that brings back memories - of hearing "KMOX, The Voice of St. Louis"
in my grandparents' home in southwest Arkansas. I think in those days it was
Roger Babson rather than Rush Limbaugh.

665. Next week-end on IRRS-Shortwave

Newsgroup: rec.radio.broadcasting
Date: 1994-02-25 03:09:56 UTC
From: "Alfredo E. Cotroneo" <100020.1013@CompuServe.COM>
Message-ID: <2kjq64$2q9@vixen.cso.uiuc.edu>
Source record: 41020

We have just completed a series of maintenance operations last week-end, which should help us in giving you a brighter and louder signal despite the bad propagation conditions lately.

Here is an update on what is coming next on the week-end of the 26-27 of February, 1994, on IRRS-Shortwave on 7,125 kHz (41 metre) to Europe:

On Saturday Feb. 26th, SWR Switzerland will be on air at 12 UTC with a new programme called "Calypso Radio", with a relay from ... the Caribean Island of Calypso. Plenty of reggae, sunshine, and "calipso" music from this new free-radio relay. A one hour broadcast repeated next Saturday March 5, at the same time.

(SWR Switzerland : each Saturday 12 UTC / 13 CET on 7,125 kHz).

As a reminder, SWR Switzerland has just recently started relaying programs over IRRS-Shortwave on behalf of a number of "free-radio" program producers. Copy of our latest press release on the subject is available on request.

Plenty of Italian and AC music will follow each Saturday afternoon, with the latest news on Yugoslavia, Somalia, and other activities at the United Nations from New York.

(Saturday afternoon: from 13-18:15 UTC; religious programs start at 18:15)

Being the last week-end in the month, there will be no "fresh" edition of the Hello There programme - our DX and listeners' mailbag program - on the 26-27th. As usual we shall relay the usual monthly program from UNESCO in English and French starting at 08:30 UTC on Sunday.

(UNESCO Radio: The Mapping of Science at 08:30UTC / 09:30 CET on 7,125 kHz)

Our religious broadcaster Universal Life has just recently started new transmissions in different languages from Wurtzburg, Germany, and exactly: each Sat at 08:30 UTC in Czech, at 10:30 in German (effective March 5), and every Sunday at 07 UTC in Russian, 10:30 in German, 15 UTC in English.

And this is all for this week from Milano, Italy.

For more information or a copy of our latest program/frequency or language schedule - or just to send your comments - send us a message.
And do not forget that we are now on the air DAILY (and not just on the week-end) from 06-21 UTC on 7,125 kHz to Europe. Stay tuned!

Best 73,

Alfredo

The Late Big Wilson is *still* doing the announcing for Jack Horkheimer,
Star Hustler (5-minute astronomy filler on PBS), thru the miracle of
recording tape. How 'bout the rest of the WNBC lineup: Joe O'Brien, Ted
Brown, and, like you say, Brad Crandall thru the night? They had some
powerhouse MOR format back then.

Trivia question: Ted Brown, when he was doing afternoon drive on WNBC, had
a 30-second-or-so theme song. Lyrics anyone?

Mark,
Thank you for that wonderful report on Trenton radio. I'm originally from md-Missouri myself, and I remember with great elation the news, weather, hospital reports, and agricultural reports from KXEO in Mexico. I assume they still broadcast within that context, for it worked for them then. My grandparents listen to it religiously, for as you said, it IS the way people receive their news before the afternoon paper comes.

Now I live in the Dallas/Ft. Worth Metroplex. Radio is not the same. Most people, with the exception of the drive-timers, have a "take it or leave it" attitude to the media. Radio has little of an informational market now, but an entertainment one instead. [not that I mind the entertainment value, but it app-ears to be too important for many stations]. Two stations are an exception to that rule: WBAP in Ft. Worth and KRLD in Dallas. They remind me somewhat of KMOX [but that is another story that you've already covered].

Many thanks for your postings.

Ken

The only specs that came with the unit are THD and battery life, which
incidently is 6hrs less when listening to AM as opposed to 46hrs for FM.
Hmm the AM stereo circuitry must be more elaborate than the FM side.

670. Theory of Controlled Unpredictability

Newsgroup: rec.radio.broadcasting
Date: 1994-02-25 03:10:07 UTC
From: Mark Roberts <transvox@TYRELL.NET>
Message-ID: <2kjq6f$2r3@vixen.cso.uiuc.edu>
Source record: 41025

Stuck home with a sinus infection for two days in cold, snowy weather, I listened to a lot of KLZR, the modern rock station from Lawrence, Kansas.

And found I was totally bored with a format I really do like.

Part of the problem is the station's presentation, which is kind of a throwback to the "Mister FM" days of the 70s, best satirized by a Saturday Night Live sketch in which Dan Ackroyd satirized radio style by simultaneously playing a hyper AM DJ and a mellow FM announcer.

But part of the problem is another one of those entries in the What Else Ails Radio department.

I have a theory, maybe accentuated by all the prescriptions I am taking at the moment, called the "Theory of Controlled Unpredictability." What KLZR plays is utterly predictable: what you would find in the "Alternative" or "Modern" (non-import!) section of your local mass-oriented CD store.

And it's all guitar-based stuff, quite a bit of grunge. Nothing with a beat. Heaven forbid we should hear a synthesizer-based piece of music on KLZR.

I think for a station to attract listeners -- and *keep* them -- it should be consistent yet offer up a surprise every once in a while. In other words, it should do things that are juuuuuust outside the boundaries of its format.

Talk radio stations inherently have this quality. You know people are going to be calling in and talking about *something* -- but you never know *what* they're going to be talking about, or how vehement they'll be, or how colorfully they'll state their opinions.

I think that may be why talk radio is increasingly popular. You never know quite what you're going to hear, but what *is* predictable is that you will hear a host and/or guests and/or callers talk about some issue.

Music radio stations emphasize consistency, but I've heard a few use the Theory of Controlled Unprectability to their advantage.

The old KXXR in Kansas City, one of the pioneer Rock 40 stations at 106.5, stuck pretty much with a standard AOR playlist later on before it went CHR. Except for listener requests. How else does one explain a station that would break format to play Frankie Goes to Hollywood? At 4 pm? On a weekday?

KITS in San Francisco *most* of the time sticks with a standard modern-rock playlist. But it will play new music, and imports, and dance mixes. In some cases, such as the "Screamer of the Week," you're alerted ahead of time that something different is coming up.

Both KITS and KXXR have had air personalities who were just slightly off the wall. You never knew quite what they were going to say next.

I think program directors overemphasize consistency at the expense of a little controlled unpredictability. Their stations are lifeless and

promote passive listening and deliver at best an indifferent audience to
their advertisers as a result.
Consistency and knowing what to expect *most* of the time is
important; also important is to keep the listener sharp and alert so he or
she will be listening when it comes time to peddle the advertisers' goods.
I now return to my regular sneeze, already in progress . . . .

Radio news week of 2/20/94

WARW FM 94.7 has added more news to it's weekend shifts. Lee Curtis has been hired to do the news. The station recently cut back it's weekday reports from 2 to 1 per hour. Apparently WARW's owners, CBS, is requiring the station add the weekend newscasts.

AFTRA and WASH FM 97.1 have a meeting scheduled for next week with an arbitrator. Former morning team (Jeff) BAKER and (David) BURD filed a grievance after they were let go recently. In October, 1993, Burd was fired. And in December, Baker was told to not bother coming back from vacation. Both are due 3 months salary, accrued and unused vacation, and in Jeff Baker's case, 4 weeks "notice pay". In the summer of '93, the last complete book when the team was together, they had a 5.8. In the fall, when the changes were just beginning, the share fell to a 2.8. Should they win, BAKER and BURD could each receive over $30,000.

Happy 1st Birthday to WKDL AM 1050. RADIO ZONE, THE KIDS' STATION might even get the best present of all, money! The investors expect to begin showing a profit this year. Last year the radio zone expanded and began simulcasting on WKDB AM 1570 in Baltimore and WKDV AM 1460 in Manassas/Northern Virginia. Selling the station is still tough for the sales staff. On one hand, they have great clients like THE ORIOLES baseball team, SPORTS ILLUSTRATED FOR KIDS and AMERICAN EXPRESS. On the other hand, companies like SAFEWAY and WILD WORLD (a local amusement park) are missing a great opportunity to buy quality time at a low price. They are slaves to the Arbitron which ignores these young listeners.

Local wacky promo of the week: Classic rocker WCXR FM 105.9, is giving away THE CLUB to the 10th caller when the station plays a sound bites featuring Tonya Harding!

=> First of all, it's the owners of these stations who won't let
=> their programmers play that "modern/alternative" music because
=> people in your age demo won't spend money with the advertisers
=> who make such radio stations possible.
=>
=> Second of all, Cleveland is an older demographic market with
=> more than 50% of the population age 50+.
=>
=> The age group that modern/alternative music attracts is at best
=> the 18-34 year olds, who are a very small minority - too small
=> to pull any ratings.
=>
=> In summary - as with all radio stations that operate as a business
=>
=> No Age Demo + No Advertisers = No Profit For Owners & No Format.
=>
=>
=> Those stations that you listen all are trying to stay alive by
=> attracting the advertising dollars from those 25-54 year olds who
=> will patronize the advertisers and who do have the money to spend.
=>
=> It's VERY costly to operate a radio station.
=>
=> Just my $.02
=>
=> Frank Macek
=> Ass't Program Director
=> WDOK/WRMR - Cleveland #1 FM/AM Combo

Well said, Frank...as a product of Cleveland radio (growing up with Imus, Lanigan, Emperor Joe Mayer, Jay Lawrence, Jeff and Flash, Mike Raneiri, Uncle Vic, The Real Bob James, Fig Newton (yes, still a fan despite what that idiot on TV did to him) and others) and later a talent there (WGAR when it was the Big 1220, WDMT when it was Disco 108 and G-98...anybody know where Dennis Day is today?), I still have a fondness for Cleveland radio and what it's meant to the entire country.

As long as PDs and GMs *have* to play the Arb game, they're going to do it with programming that forces admitted recall. Eric...I know you think it sucks, but with everybody bunched in the 4's, 5's and 6's, the scrapping is intense. I'd hate to be a PD in Cleveland right now, having to play it safe. And you should also know that those programmers are much more concerned with what my mom in Bay Village likes than what you in University Circle are interested in. She's probably got a lot more money to spend on stuff than you do. And she's not going to stop going to the advertisers she hears on WGAR, because she loves

country and she believes what she hears on the radio. Them's the facts.

Even with my computer show, Online Tonight, I have to be very careful to appeal to a *very* broad range of listeners...that's why I always think to myself, "What would my mom do if she didn't know me and heard this on the radio?" If the answer isn't "Enjoy it," I don't do it.

You should take a stroll through this neck of the woods (DC) and listen to WHFS. It's Modern Rock, prgrammed by people who *care*. You'd love it.

Don Imus of NY's WFAN (and syndicated in other markets) announced
he is marrying a Deidre Coleman on Dec 17th. Ms Coleman is believed
to be from the Waterbury CT area. Don is a parttime resident of
Southport CT, some 20-30 miles away from there - Don Imus' primary
residence is in NYC.

Ms Coleman is approximately 30 years old and educated at Villanova
(track scholarship) and also studied at the Sorbonne (Paris).

This will be the second marriage for Don Imus. He has four daughters
from his first marriage. Its rumored they will marry in the southwest,
perhaps the general area of Santa Fe. Mr. Imus is from Kingman, Arizona.
Mr Imus is rumored to earn $3 million per year in a multi-year contract
with Infinity Broadcasting.

Regarding age, Mr Imus is approximately 53 years old and his four children
are said to be older than Deidre Coleman. Ms Colemans father is 50 years old.

Don Imus is the butt of many jokes regarding the age gap on his program.
Bernie (his producer) said the wedding date was picked as Dec 17th since she
will be off from school then.

Anybody have the latest station list of where Imus is syndicated?

Joe

Mark Roberts (transvox@TYRELL.NET) wrote:

: That's the core of the objection to KMOX's carriage of Limbaugh. If you
: are from St. Louis, then you will know what a dominating presence KMOX had
: been over the years. There was nothing comparable to it in any other
: large market. It really was a full-service station, with the emphasis on
: SERVICE. So much so that its talk shows were named "At Your Service."
: If you don't know KMOX, you don't know what you missed -- even if, like me,
: you thought it stodgy, occasionally stuffy, and something your parents
: listened to. You sometimes don't know what you have 'til it's gone.

You aren't kidding. When I lived in St. Louis in the '60's, KMOX used to identify as "America's Most Listened-To Radio Station." At the time, I thought that such a slogan would belong not to a radio station in St. Louis, but to a station in New York, Chicago, or Los Angeles, which had much bigger populations. But KMOX had such a dominating presence in St. Louis that it apparently outrated, in sheer numbers of listeners, every other radio station in the country. They must have been doing *something* right. And, as others have noted, they have attracted the best on-air talent from all over the country because of their dominant position -- not just in St. Louis, but nationwide.

Although I no longer live in St. Louis, I still flip the dial to 1120 during the early morning and late evening to see what KMOX has on. Their distinctive style of programming certainly beats the trivial sensationalism and absurd editorializing that passes for journalism on Atlanta radio, and the rebroadcast of Atlanta's recorded shock-jock call-in shows at night, the latter, in my opinion, being a total outrage. (Stations that rebroadcast call-in shows at night ought to go off the air to reduce the nation-wide AM interference level. That way, local stations that want to do something useful during those times, but can't afford to do so because of a limited nighttime service area, can better serve the public interest.)

However, I suppose the new people CBS brought in have their own agenda for KMOX -- for all I know, this may include recorded shows at night and more syndicated shows during the daytime. Destroying a local treasure like KMOX may seem sensible to people unfamiliar with St. Louis radio, if they believe that the inevitable loss of listeners and advertising revenue can be fully compensated by a reduction in the need for, and cost of local talent. I suspect that's why they put on Rush Limbaugh, because, from what I have seen, it appears that KMOX was beating him in the ratings when he was on WIBV. Unfortunately, putting Rush Limbaugh on KMOX turns it into a qualitatively different kind of radio station -- which, unfortunatly, is no longer distinctive.

> they are all "modern rock," but have very different playlists?

Dare I try to argue with someone whose name is on the acknowledgments page
of the M Street Directory <big grin>? I won't argue the point, except
to say that the term "modern rock" itself indicates there is a problem
with the rock format as it has de-evolved.

If I were forced to categorize them, I would in this way:

* adult alternative: laid-back presentation, appeals to "baby boom",
music from the late 60s onward, diverse playlist, inclusive of "safe"
blues music, feels a lot like mid-70s "progressive rock"

* modern rock: sarcastic style, appeals to "generation X," music from
early 80s new wave onward, fairly strict playlist but opens up at night
or for special programs, tends to ignore synth-based rock, sounds
like AOR before it became a parody of itself

That's my opinion, based on what I've heard, in a part of the country
where you can get five or six variants of country and western no matter
where you turn because everybody's playing it safe.

> I do wonder if there will be changes to the modern rock format. In the
> most recent weekly editions, they've listed stations changing to modern rock
> as "new rock" instead of "modern rock" as they had been.

That's interesting! Can "PoMo rock" (PoMo == "postmodern") be far behind?
>
> Of course, if you want to talk about a directory that needs clearer
> format listings, we could talk about the FM ATLAS (r = "rock" = AC,
> top 40, hot AC, adult rock, top 40/rock, ...).

Well, what Elving really needs to discover is a laser printer. Then he
wouldn't have to go through all the handwork he goes through now and
could revise things like that more easily. On a broader scale, I think
the FM Atlas is aimed at people who want to listen to signals (i.e., DXers);
the M Street directory is aimed more at people in the business, plus the

oddballs like me who listen fairly intensively to programming. They're
both good resources.

I would be interested in receiving information on radio-broadcasting
schools/Universities around the world, and particularly establish contacts
with people involved in teaching radio broadcasting (DJ, announcers, etc.).

Our non-profit association has just launched an educational activity which
consists in having un-professional (otherwise called free-radio) producers
on the air on Shortwave to Europe via a licenced station, and try to teach
them how to improve their talents.

If you are interested, or need more information, please send e-mail or
write/fax to the address below.

Thank You.

>Reading the Whitburn/Hot100 book has been a real eyeopener for me.
>there must still be thousands of songs available that could preclude the
>necessity to play "Bye Bye Love" twice a day for a month! If it's gonna be

The problem here is that most stations use computers to work out their rotation.

Selector for instance will hold more records but each week/monthe you tell the system which records to pick from. Then you add and subtract tracks. So a record may be in the "pick from" list for some time.

Also Bye Bye Love is a nice convenient length (2 mins??) so gets picked to balance "music in hour" times.

The other big problem is what is in the stations library.

When stations change format the tend to "throw away" their old library and so may not have all the great records they played in the 60's as they went AOR in the 70's and Country in the 80's. Now they have to find the hits again on CD. And you know as well as I that you keep finding the same tracks, over and over again, on those compalation CD sets.

Oh to find Dancing in the Moonlight by King Harvest or Lovers Question. (I have tried here in the UK)

KXEO is still there; it now runs oldies off a satellite service,
but with frequent breaks for news, weather, ag, etc. Most of the
focus has shifted to co-owned KWWR(FM) at 95.7, which has
a full class-C signal and shows up in the Columbia Arbitrons
(usually with a 3 or 4 share). KWWR plays country music with
lots of news, weather, market reports, and the like.

There is a big rivalry between KWWR and KRES (104.7) out of Moberly
for the farm/small-town/country & western audience. For a while,
it seemed they were competing to see who could rack up the greatest
number of high-school basketball games and FFA banquets to cover
live.

680. Re: SRF-42 AM Stereo Walkman

Newsgroup: rec.radio.broadcasting
Date: 1994-02-26 08:23:23 UTC
From: schuster@panix.com
Message-ID: <2kn0tr$s92@vixen.cso.uiuc.edu>
Source record: 41035

Some comments on the Sony SRF-42 AM Stereo Walkman, which I just picked up for $30 at Topp's Appliance City in Union NJ. I am comparing it to the previous SONY offering (the SRF-A1), and with a current Japanese domestic model, the digital AIWA CR-D60.

The box bore a large black sticker which covered a Spanish message saying that the box contains a Spanish language instruction sheet. Applying these black stickers could very well be responsible for the 2 month delay in getting this radio out.

The SRF-42 is larger than its predecessor, manufactured in Malaysia, and has construction quality typical of ultra low end SONY stuff (i.e. pretty chintzy, especially compared with the model of a decade ago). For instance, the tuning and volume control knobs can fall off it you're not careful.

The AMAX compliance means very wide audio bandwidth on AM; far better than either the older SONY or the current AIWA. However it tends to be a little "hissy" when the stereo demodulator kicks in. Which is hard to determine, since there is neither an indicator for AM or for FM stereo, just the usual "tune" idiot light. In fact, it is rather difficult to tell when a station is transmiting in stereo or not, until you reach one that is transmitting music in stereo and it becomes very obvious. Between stereo and AMAX, a good station can sound truly amazing for medium wave AM.

The slide rule dial was so miscalibrated that you would have to go past the stop to tune some stations. I had mine open four times before I got a reasonable semblence of accurate dial calibration, during which time the entire gear-driven pointer came apart twice.

The volume control is situated in the worst possible position, on the left edge, along the back, right in the middle. Exactly where you would grip the radio while tuning. Which means the volume control is almost never where you want it, because it is always getting inadvertently moved.

Sensitivity is on par with the older SONY ... adequate; not outstanding. The AIWA wins hands down in this parameter. Selectivity seems much better than the AIWA, but this is offset by the very clumsy gear-driven tuning mechanism which makes it very hard to fine tune. This is not a rig for DXing or separating closely spaced stations. Sigh.

The FM section ROTS!!! Just like its predecessor. Sensitivity is better than the SRF-A1, but just barely so. Worse, the bandwidth is unexplainably limited; the frequency response (especially treble) is as limited on FM as it is expanded on AM. Why? By comparison, the FM performance on the AIWA is at least equal in overall quality to the AM performance. It is useable,

therefore, as an all-around AM/FM radio.

Summary: it's worth $30. If not for the AMAX compliance I'd probably write it off as an interesting curiosity, and go back to the digitally tuned AIWA.

681. SRF-42 AM Stereo Walkman Review

Newsgroup: rec.radio.broadcasting
Date: 1994-02-26 08:23:24 UTC
From: /G=Schaller-C12019/S=Rob/OU2=PHXGW/OU=AZBH/P=MOT/A=MOT/C=US/@amail.mot.com
Message-ID: <2kn0ts$s94@vixen.cso.uiuc.edu>
Source record: 41036

Disclaimer: All the performance evaluations I made on the SRF-42 are strictly my own ear testing. I have nothing to do with Sony or Consumer Reports Magazine.

Over the past few weeks I have been comparing its performance to the last AM stereo walkman Sony made over 10 years ago, SRF-A1. The biggest difference in features between the two models is that the SRF-42 is only capable of receiving AM stereo transmitted in the Motorola C-QUAM system where as the SRF-A1 had an A B selector switch to receive the Motorola, Harris, and Magnavox AM stereo techniques in position A and the Independent Sideband Modulation technique (Kahn-Hazeltine) in position B. C-QUAM has become the defacto AM stereo standard in the US and in many foreign countries it is the AM stereo broadcast standard. Another noteworthy point is that the SRF-42 has the extended AM band.

STEREO SEPERATION(AM&FM))- Both units offer good stereo separation.

AUDIO QUALITY(AM)- The SRF-42 offers the finest audio frequency response I've heard in any AM radio. In fact, its a shame that many of the AM stereo stations in my part of the world are all talk and only some of the commercials really exploit the stereo effect. Those stations that play music in AM stereo are worth "cranking" the volume through the headphones. The SRF-A1 model wasn't far behind in audio quality but then again it was made long before the new AMAX specifications were implemented in receiver designs.

AM STEREO DETECTION OPERATION- On the side of the SRF-42 there is a AM stereo/mono selector that basically put the receiver into a phase/non phase sensitive AM tuner, like in the SRF-A1. There doesn't appear to be any true C-QUAM pilot tone detection that would switch the radio into a phase sensitive detector.

AM SENSITIVITY- The SRF-42 fell short of receiver sensitivity when compared to the SRF-A1. Weaker stations in the AM stereo switch position had quite a bit of phase noise reguardless if they were transmitting in C-QUAM or not. Incorporating some type of AM stereo blend would reduce the noise on weaker stations.

AUDIO QUALITY(FM)- Amazingly the SRF-42 had disappointing performance in this area compared to other walkmans I've listened to, but then AM stereo is the main selling point of the SRF-42.

EASE OF USE

The volume control was moved to the side of the unit on the SRF-42 as opposed to top of the unit located next to the tuning knob on the SRF-A1. The new location makes it vulnerable to accidental increases in listening volume. The analog tuning scale is microscopic in comparison to that of its predecessor making it even more difficult to reference the dial position of desired radio stations. A Synthesized digital tuner would be much better for the AM stereo feature since

tuning is much more critical for good stereo separation. The supplied belt clip for the new model appears to be much more secure in holding the radio than in the SRF-A1.

SUMMARY

The long awaited Sony SRF-42 AM stereo walkman offers the finest sound quality I've heard in any AM receiver to date. The AMAX receiver certification and its AM wide band capability are the two outstanding features of the SRF-42. A digital tuner would make it easier for the user to obtain the best AM stereo separation and also make it easier to select stations. Sony has already incorporated wide band AM coverage on most of their walkman models so lets hope they will do the same for AM stereo and AMAX. An AM stereo indicator light would also heighten consumer awareness of AM Stereo.

682. Weird Little Newspaper Ad

Newsgroup: rec.radio.broadcasting
Date: 1994-02-26 08:23:30 UTC
From: transvox@tyrell.net
Message-ID: <2kn0u2$s9u@vixen.cso.uiuc.edu>
Source record: 41037

The following ad appeared in the Personals section of the Sunday Columbia Daily Tribune (Columbia, Mo.) classifieds on February 20:

Coming Soon to Columbia & Jefferson City 93.9 digital stereo radio.
All hits light and easy music.

This was nestled between the ads for massage parlors out on Route VV in Boone County and the legal notices.

What could this be?

The M Street directory lists a 3,000-watt class A for Columbia at 93.9 with the call letters KNCD.

But the M Street directory *also* lists a 6,000-watt class A for Boonville at 93.9 (KACJ), licensed to the owner of KWRT(AM), Dick Billings.

Boonville and Columbia are no more than 30 miles apart, so one listing or the other is not correct.

Bruce Elving's FM Atlas lists KACJ at 93.9 and KNCD at 102.3.

I believe Elving is correct.

When Billings owned the license for the Boonville frequency at 99.3, he made a big deal of programming easy listening music for the Columbia market, but his only form of promotion was small newspaper ads. So this is consistent with past practice.

If the ad is any indication, we'll soon find out....

684. Radio Watchers -- Kansas City -- No Changes This Month

Newsgroup: rec.radio.broadcasting
Date: 1994-02-27 06:06:36 UTC
From: transvox@tyrell.net
Message-ID: <CLvCz2.o54@gagme.wwa.com>
Source record: 41039

Time to eat my words.
In January, I had posted an article that asked which Kansas City
station would change format for the spring Arbitrons. Here, such changes
often happen in the middle of the winter book in February.
I pointed out the following
-----<begin words to eat>-----
* One of the weaker stations in the market could go to an "Arrow"
style 70s-oldies format. There is only one oldies station in the market
now, and this market is crazy about living in the past.
* There is no AAA (Adult Album Alternative) station here. But
would the demos work?
<...>
* We now have *five* country stations, splitting up more than a
quarter of the market. Someone's going to give that fight up sooner or
later.
-----<end words to eat>-------
Guess what?
NOTHING HAPPENED.
It's the last weekend of the month. And everybody is doing the same
old things.
What about the FM stations I listed as "losers" in the article on the
Fall book?
> * KQRC: Why did "The Rock" suddenly sink? Grinding guitar metal
> usually goes over well in this city. It must have been out-Foxed.
I didn't expect KQRC to change from its heavy-metal format. They
probably think the Fall book was just a blip, and I think they may be
right, because of the Chiefs football games aired on KCFX "The Fox."
> * KYYS: Please put this station out of its misery. Once dominant,
> KYYS just can't cut it with a format that sounds like it belongs to the
> later years of the Carter Administration.
Let's put it this way. On KY-102's show for new rock, "Route 102,"
Friday night they played Alice in Chains preceded by Led Zeppelin's "Dazed and
Confused." I guess KY-102 thinks they can make it with morning bathroom
"humor" and a playlist handed down from the Phoenicians.
(Aside: I work with a lot of people in their 20s. Guess what tune is
GUARANTEED to evoke from them a reaction similar to that of an unneutered
tomcat who backs up to an electrified fence?
(Answer: "Stairway to Heaven.")
> * KKCJ: "CJ 106.5" was misconceived from the start as an effort by
> KFKF to scare off any other station from thinking about doing country.
> KBEQ proved that premise false. This station is a waste of bandwidth.
And it still is. It's not plugged into a satellite dish any more, but,
otherwise, it remains a weak competitor to KBEQ, "Young Country 104." Sconnix
is a successful, apparently well-run chain. What *are* they doing with

this LMA? Could it be a tax write-off of some kind?
So nothing's changed.
Major Armstrong's invention still has little to offer the Generation X-er,
the nonstereotypical baby boomer (me), or the mature adult. It's almost all Beatles,
Stones, Led Zeppelin, or country.
Means I spend lots of my money on CDs. And then I don't hear what the
radio stations' advertisers want to tell me.
Should *I* be the one eating my words after all?

: => First of all, it's the owners of these stations who won't let
: => their programmers play that "modern/alternative" music because
: => people in your age demo won't spend money with the advertisers
: => who make such radio stations possible.
: =>
<...>

: As long as PDs and GMs *have* to play the Arb game, they're going to do it with
: programming that forces admitted recall. Eric...I know you think it sucks, but
: with everybody bunched in the 4's, 5's and 6's, the scrapping is intense. I'd
: hate to be a PD in Cleveland right now, having to play it safe. And you should
: also know that those programmers are much more concerned with what my mom in
: Bay Village likes than what you in University Circle are interested in. She's
: probably got a lot more money to spend on stuff than you do. And she's not
: going to stop going to the advertisers she hears on WGAR, because she loves
: country and she believes what she hears on the radio. Them's the facts.

Why do you think Generation X isn't listening, *dudes*?

It's the first generation (since radio existed) whose musical tastes
were not served by most radio stations while the people in that generation
were growing up.

So, naturally, they don't expect you to do anything for them. Y'all were
off chasing the main game: the Baby Boom (R?). Instead they turned to
their college radio stations or MTV or they got interested in other things
(like video games or, hey, maybe computers).

Now y'all are complaining that you've got to fight and scrap for every
tenth of a rating point (in a ratings system with margins of error that
I estimate at around 30% if not worse) because y'all are going after the
same 25-54 cohort *or* because you each are going after specific niches in
that cohort, and so your audience base becomes narrower and narrower.

And what we end up with are "Lite Mix Hits 87.5" targeted at the
39-year-old spouses of proctologists.

Meantime, there's this audience of 46 million people that you've ignored,
and that you're now going to have a tough time winning because you didn't
get them in the habit of listening to the radio when they were young.

They spend money, all right. I work with a lot of them. Around here,
more than a few listen to...of all things...KXTR, the classical station...
because it's the antithesis of the stuff y'all put out.

: Even with my computer show, Online Tonight, I have to be very careful to appeal
: to a *very* broad range of listeners...that's why I always think to myself,
: "What would my mom do if she didn't know me and heard this on the radio?" If
: the answer isn't "Enjoy it," I don't do it.

With all due respect, that's an apples and oranges argument. What you're fighting there is the easy tendency to get too "techie." That's a different question from simply outright ignoring a demographic because of not knowing anything about the people who belong to that demo.

(By the way, is your show on anywhere in Kansas City? With three fulltime [and one parttime] talk station, I'd imagine it would be. I'd like to hear it....)

>My question is about the "Edge" format, which I understand can be found
>around the country. Who's concept is "The Edge", who's programming it,
>where else is it being used by stations in place of their own programming
>choices? As far as being alternative to anything, "The Edge" plays it so
>safe. (BTW, I'm not talking about a satellite or automated format, just
>the music programming and liners, etc. are coming from somewhere else.)

I first heard this tiresome bit of marketing speak when Gene Autrey's FM station in LA decided to call itself "The Edge". They never explained which edge. I assumed the edge of a yuppy toilet seat. It was allegedly the idea of an ex MTV talking head, er.. VJ. Like most formats on that frequency KUTE 102 et al, it lasted no time at all. This station is the station they don't know what to do with. For some reason they haven't figured out that rather than "programming", just playing decent music might work.

Of course "The Edge" appeared after KMET became "The Wave" playing forgettable Yuppie Musak.

I am not sure who or what currently owns the 102 Mhz slot, the AM sister station KMPC used to play geezer music (Sinatra the original Gangster Rap) it has since moved to "Sports". Recently it was purchased by Capital Cities. Cap Cities of course have the flagship KABC in LA. KABC is a 5KW wimp, KMPC is a 50KW monster. Interesting times are ahead.

[Moderator's Note: Here starts a (hopefully) regular feature in AIRWAVES/rrb. Barry Mishkind has agreed to forward some of his recent articles from Radio World, to AIRWAVES (Thanks Barry). I hope these articles are of interest to you. These articles are printed just as they are received from Barry. Bill]

"Keyboard Connection" - FOR FEBRUARY 1994

FINANCIAL PROGRAMS GET TO THE BOTTOM LINE

by Barry Mishkind

TUCSON, Arizona] You can tell the new year is now well underway because those W-2s and 1099s have arrived. Next stop: the accountant's office to learn about this year's financial surprises.

So perhaps this is a good time to look forward to next year. We'll check out some financial software available to make it easier to keep track of your personal and business finances, and yes, to avoid those surprises next year.

Large or Small

To be sure, no one really needs a computer to balance their checkbook. A cheap pocket calculator will do. What the computer does is focus on your income sources and expense categories. You can track expenses against income, noting potential tax liabilities ahead of time. More business oriented programs will automate your invoices and accounts receivable.

The big name in personal accounting is Intuit's Quicken (tm), (DOS version 7, Windows version 3). Intuit has been successful in responding to the desires of it's many users for an easy to use interface, as well as providing the necessary tools to analyze finances. Another Windows entry is Microsoft Money (tm). They are about $27-40 on the street, with Quicken a tad higher, although with more features, as you'll see.

Both have an interface that looks a lot like your checkbook. Income is entered as a deposit, and expenses written just as with a real check, with several improvements. For instance, you can manipulate multiple sources of income and checking and credit card accounts.

As you type, the computer "guesses" the entry from previous entries. For example, after you enter the name of your phone company, future entries take only a couple of keystokes. As you enter the transaction amount, the computer even fills in the words for you. Then the check can be printed. Typos are a thing of the past!

However, the real financial benefit is in what happens after item entry. Quicken and Money take those entries and automatically file them in different categories you designate. Reports allow you to see or print any part or all of your income and expenses. Built-in modules help calculate mortgage and investment accounts.

Over time, the data entered provides a picture of your finances. Displayed in text or graphs, you can quickly see if you're ahead of or behind your financial goals. The programs are even smart enough to remind you of pending bills.

Quicken has two other capabilities appealing to those that hate licking stamps and tracking credit card purchase slips. Quicken links to CheckFree(tm). This electronic service make all your payments via computer, without any envelopes or stamps. The Intellicharge (tm) credit card account compiles your Quicken Visa (tm) card purchases and sends them to you via modem or diskette. The program then automatically sorts your purchases, categorizes them, and pays the bill. It's almost painless!

Contract Engineering

For some, such as contract engineers, something more than Quicken and Money may be needed. While both will handle two checking accounts, for example, they're just not designed to handle all aspects of business needs such as invoicing, inventory and sales tax accounts.

Still, you probably don't need a full size accounting package. After all, your personal business is small and reams of reports are unnecessary. Good options are QuickBooks (tm) from Intuit, Profit(tm) from Microsoft, or Instant Accounting (tm) from DacEasy. All are currently at Version 2.

Would you like to invoice a client for several hours of work, and include the ICs and caps you used? Do you need to know what inventory is in the shop? Or, how about figuring how much to send to the IRS and state tax departments each month? These reports, as well as accounts receivable, customer histories, even listings for mailing labels are available. Instant Accounting even features a FAX interface so you can send an invoice to a client, instantly.

Like the personal packages, you can use various preset default categories for income, expense and inventory items, as well as pre-printed checks and forms, although you can customize various features yourself.

Since each business is unique in its requirements, the best advice is to note the features you want, and spend a few minutes at your local software dealer to determine the look and feel you prefer. Profit comes with more extensive tutorials, and templates Microsoft calls "Wizards," although this comes at the price of more disk space consumed: 12-15 mB. QuickBooks and Instant Accounting require less, the latter being recommended for use on laptops.

You'll find these products from about $32 to $125 on the street, with DacEasy Instant Accounting the cheapest, MS Profit the highest. By the way, Instant Accounting links to Instant Rolodex (tm) and the forthcoming

Instant Payroll.

Free Software!

We have had a great deal of response to the infobase of pioneer radio stations offered in the 9/22/93 RW. OLDRADIO has grown, and we've begun adding many historic details about the stations on the air in 1928, tracing them from their origins to the present.

You can help. If your station has a printed history, especially anniversary books or records, interesting facts, or anecdotes about personalities over the years, please send them to me at 2033 S. Augusta Place, Tucson, AZ 85710. We'll add them to the infobase. But there's more.

Dorsey Jennings of DacEasy has kindly offered to help with the project. She has provided a number of copies of DacEasy Instant Accounting and Instant Rolodex. I'll be selecting from among those that send in material for OLDRADIO. The best submissions will receive a copy of one of these fine programs free!

Of course, OLDRADIO is still available on IBM compatible 3.5" or 5.25" diskettes for $7.50 to cover the cost of diskette, shipping and handling.

Barry Mishkind, aka RW's "Eclectic Engineer," can be reached at barry@coyote.datalog.com

Source record: 41045

I am a free-lance entertainment reporter for KSFO Radio (560 AM) in San Francisco. That is why I subscribed to your service.

Last year, during National Accordion Awareness Month (June),
I received a phone call from a DJ at some station saying that he read on some DJ bulletin board that my band, Those Darn Accordions, had a release out that contained the rock classic Stairway to Heaven. (I should mention that Those Darn Accordions are a 10-piece band consisting of 8 accordions, bass, drums). I asked some people at KSFO if they knew about this Bulleting Board and they said no.

Do you know about this bulletin board? If so, do you know where it is or how I access it? The new CD by Those Darn Accordions comes out in a couple of weeks and contains more "classic rock" that might be of interest to some DJs.

Also, the other day I typed a message to ad58@dayton.wright.edu to get a copy of Digest tips. The message was returned to me as undeliverable mail. What did I do incorrectly.

Thank you for your help.

Tom Torriglia

I am looking for some people who remember Beeker Street on KAAY
in Little Rock. This was a late night program that aired during
the mid-70's. I am specifically interested in obtaining air tapes
or information on the backround music used for a bed during the
spoken segments of the program....this was "underground" radio
at it's finest, if my memory hasn't embelished too much.

Also I'm interested in who bought WCWA in Toledo.....I was a part
timer during their oldies format in the late 80's.

Thanks for the read.......Rusty Irons

The CBS chime is set for CNYT (CBS New York Time). CNYT probably does
not vary from WWV time by more than a couple of milliseconds.

Haven't listened to WCBS in years, but many CBS all-news O&Os have
updated their sounders and theme music, see KCBS (740) and KNX (1070)
where the music is a natural leadin to the CBS hourly chime. Others
still have dorky sounding news-y music from the early sixties (e.g. WTOP
(1500)).

I'm an experienced drive-time host with extensive commercial, news and sports writing and production experience. Looking for a position as a dj or program director. I could be your next sports talk show host, with great knowledge of all sports and an opinion on everything. All of my experience is in Christian radio and I would like to stay in that field, but would jump at the opportunity to do talk radio, too. Also experienced play-by-play announcer (basketball/football). Check out my resume below.
!!!!!!!Available immediately!!!!!!!

Somewhere I picked up the idea that short term, low power licenses were
available for special events (conventions, etc) Two quick questions:

Was I hallucinating? If not, any details, suggestions, references, comments?

The idea was a wireless PA, to cover a largish site, for a one week convention.

Please Post.

Anyone using the PhoneByte digital telephone computer system in their control room? We're using it here in Orlando - the system records your phone bits on the computer's hard drive, then you can edit calls. Pretty handy, but there a re a few bugs, and I was wondering what other people's experiences were with it.

5.1. Public Transportation from the Peninsula:
6. Downloading Additional Information:
7. How to Reach Us:

Overview:

This is the weekly news digest for West Coast Live, San Francisco's Live Radio Show to the World (actually just NPR).

Here (hear) is the upcoming schedule as we see it now:

Our producers work overtime booking talent onto the show. Sometimes they're so busy on the phone, they don't have time to keep the rest of us up to date. So join our audience at a live show. You too may be pleasantly surprised.

February 26th;

San Francisco Symphony Chorus, This Grammy award winning group, with West Coast Live's own Cynthia Hobgood, will feature music from Carmina Burana.

Mendocino county soul music group Zensnap.

Josh Kornbluth, monologist.

Urban Geographer, Bonnie Loyd, with the continuation of her piece on concrete.

March 5th:

Charlie Hunter Trio, Jazz with a groove.

William Dement, sleep researcher.

Le Ly Hayslip. author "When Heaven and Earth Changed Places", the basis of the film "Heaven & Earth".

Improvisation by Pulp Playhouse.

March 12th:

Chanticleer, acapella men's chorus.

Aquavelvets, surf music extraordinaire.

March 19th:

Chis Williamson & Tret Fure, singer & songwriters.

Hot Club of San Francisco, Django Reinhardt inspired sound.

March 26th:

Country group, The Doubters.

Food scientist, Harold McGee.

Special Offers:

Drawing for Free Tickets!:

This week marks our 8th West Coast Live show. Be the 8th person to email (see rules, below) the moderator at;

Owner-West_Coast_Live@netcom.com

and you will win two (2) free tickets to this week's live show.

Rules:

The contest begins as soon as the moderator sends this notice to the West Coast Live email subscription list.

The winner will be selected based on the time the entry was sent (as opposed to the time the entry was received), no sooner than 1 hour after the moderator receives the minimum number of entries (8), and no later than 48 hours prior to the live show.

The email must be addressed to;

Owner-West_Coast_Live@netcom.com

The email's header subject must contain the phrase; "Win Ticket Drawing".

The winner will be notified by email.

If the winner can't attend this week's show, the winner may assign the tickets to a couple of friends.

The moderator's selection is final.

Free Coffee:

Wear an official West Coast Live shirt at the show, and you are entitled to free coffee.

Rules:

Official West Coast Live T-shirts or sweat shirts only.

For a limited time, this offer is extended to shirts from that old radio show, that are upgraded with an official West Coast Live Shirt Upgrade Kit.

This offer is good for free coffee only from the West Coast Live snack bar. If anyone else offers you free coffee for wearing a West Coast Live shirt, let us know.

T-shirt Drawing:

On the last live show of each month, we give away an official West Coast Live T-shirt.

Rules:

To enter this drawing, you must drop a business card into our fish bowl. Any scrap of paper with your name, address, and phone number may be substituted for a business card.

One entry per person. You must be present to enter.

The drawing is held following the last live show of each month. You need not be present to win.

Tip of the Week:

Public Transportation from the Peninsula:

Take CalTrain #133, which arrives at 4th & Townsend at 8:01 am. Hop onto MUNI 30 Stockton (Jefferson Loop), and take it to Laguna Street. From there it's a 3 block walk to Fort Mason.

You'll have time to stop for a quick breakfast in the area, or just relax in the theater lobby. We have Peet's coffee, Just Dessert's pastries, and Stan's cheesecake.

Downloading Additional Information:

You may download an information document giving background information on the show and the show's Internet service, by sending the following email message to;

LISTSERV@netcom.com

WGRE is, I believe, a college alternative, "play it if you got it", radio station in Greencastle, IN. It belongs to DePauw University. Yes, that's the place where Dan Quayle, our fearless and former VP went to school (and was rumored to have a C average). It's been a few years, but I believe they transmitted on 91.5. If you're really interested, they're on the BITNET... try to locate someone at @depauw.bitnet , and see what happens. However, this information is a few years old. I went to college at a rival school (Wabash College)[note to sports trivia nuts: what trophy does Wabash and DePauw fight for in football, and why is it historically important?], where I was the Technical Director at WNDY 106.3FM. WGRE's staff used to come up and drool over our equipment every once in a while. We weren't exactly state of the art, but I guess a 3000 watt x-mitter must have looked good to them.
Later,

Todd Perry

703. Radio Watchers -- Kansas City, Drive-Time in the Snow

Newsgroup: rec.radio.broadcasting
Date: 1994-03-01 07:38:49 UTC
From: Mark Roberts <transvox@TYRELL.NET>
Message-ID: <2kure9$3vl@vixen.cso.uiuc.edu>
Source record: 40958

This afternoon's rain and snow mix forecast for Kansas City turned out *not* to be a mix. It was all snow, and accidents, and icy bridges, and slow traffic.

And some of the afternoon drive-time coverage provided by Kansas City's news/talk stations left me with the impression that most are trying to give the listening public a snow job when it comes to their images as news and information stations.

I used to be a radio news director--and during a snowstorm like this one, I would expect to break format, extend newscasts, provide additional traffic information, provide frequent reports of cancellations--in short, make a big deal of the snowstorm. Because, after all, if you're stuck in traffic, it *is* a big deal.

Well, I *was* stuck in traffic, even though I left work an hour early. So I sampled Kansas City's news-oriented and news/talk stations:

* WDAF (610). Only "61 Country" deserves an "A". This is *not* a news/talk station; it is a full-service country station. But it outperformed the three news/talk stations in the depth of its coverage. Five-minute newscasts were stretched out to 10 minutes or more. Traffic reporter Christie Russell was allowed as much time as she needed to list intersections and freeways where accidents blocked traffic. The weather forecast, provided by WDAF-TV's friendly if somewhat inaccurate meterologist Mike Thompson, was repeated frequently. Newscasters Frank Haines and Caroline Rooney did not ignore the other news of the day, but they made sure the weather story got top priority. WDAF was the only station to explain what "Phase Two" of the snow ordinance meant (don't park on snow routes). The only slip I heard was during one report of cancellations, where the Nazarene Theological Seminary was referred to as the "Nazarene Theological Cemetery." As hectic as the afternoon must have been, that was understandable.

* KCMO (810). This is Kansas City's only 50,000-watt AM signal, and it went to waste. Only the usual one-minute Metro Traffic reports and canned weather forecasts from the Weather Channel were provided. There were no local newscasts during drive-time at all. Talk show host Freddie Merz instead seemed preoccupied with decrying dirty tricks in ice skating and conducting a phone interview with a topless dancer from the "Shady Lady Lounge." The latter is especially surprising, considering the fact that Bonneville Broadcasting (a subsidiary of the Mormon church) now owns the station. Give KCMO a big "F" because it failed to serve the public with its superior signal even while pretending to be an information-oriented station.

* KMBZ (980). This is Bonneville's other news/talk station in Kansas City, and it performed somewhat better. Sports talk show host

Don Fortune frequently read lists of cancellations, and allotted extra time to the traffic report (whose name I forgot) for additional detail on accident and slowdown locations. However, there was not as much detail as on WDAF. The usual weather forecasts from the station's staff meterologists were provided, but nothing exceptional. There were no local afternoon drive-time newscasts. Give KMBZ, "News/Talk 980," a C+ and a tour of the WDAF newsroom during the next snowstorm.
* KNHN (1340). At least "CNN 1340" had local afternoon newscasts, but it did not provide much additional detail. The usual one-minute Metro Traffic reports were provided, but I did not hear any extra reports or any lengthening of the reports. Weather forecasts were provided with routine detail. Lists of cancellations were provided and the station did seem to add a minute or two to its 'casts to provide time for the cancellations. But it seemed preoccupied with returning to its sports talk show. At best, an average job, meriting a "C" at best.
I'm not picking on stations that *don't* pretend to be news/talk stations. But if you want the news image, you've got to be there for your audience at times like this in order to back up that image with reality. Only WDAF really did that. It's not really a news and talk station, but it performed far better (and was far more useful to me as a driver stuck in traffic peering through a snow-laden windshield) than any of our so-called news/talk stations.

Source record: 40959

jbillma@andy.bgsu.edu (Jeff Billman) writes:

>What is the difference between the two formats? This is an honest
>question; I'm not meaning to sound snide.

most modern rockers aim for young audiences, and especially now are
tending to play hits a la top 40. Prototypes are KROQ/LA, "The Edge"
format, and WDRE/NY.

AAA tends to lean older, and perhaps folkier. Aside: Right now, i'm listening
to AAA on the DMX system (Digital Music Express = digital cable radio).
In the last half hour, I've heard The Band, CSN, Christine Lavin, and Ashley
Cleveland. I don't know of any broadcast AAA stations (I haven't heard of
any in LA; I hear that Billy Joel's station in East Hampton, NY might be AAA...)
What AAA and Modern have in common is playing "unfamiliar" music, I guess.

Now that I think about it, KTCZ/Minneapolis might be AAA...?

What we have here is simple supply-and-demand at work. Basic economics.

Just for the record, re. WENZ-FM... when I talked to former PD Lyndon Abell, back a few months after they changed format, he made it very clear that they were not going to go too far out as far as programming. The station's programming is very definitely designed to stick to the "safe" stuff, and leave everything else to college radio. Fortunately, there are several good college radio stations in Cleveland.... 88.7, 89.3, 91.1, 91.5, and whatever Baldwin Wallace is...

What really irritates *me* is the lack of creativity going on here. The End shows up and suddenly 92 starts programming modern rock at night, WMMS goes real heavy on the modern rock, and even classic rock WNCX starts pushing "the best classic rock... and the best new rock & roll" from 6-10. Yuck.

Of course, WMMS hasn't had any real creative programming for years....

>Why do you think Generation X isn't listening, *dudes*?

>It's the first generation (since radio existed) whose musical tastes
>were not served by most radio stations while the people in that generation
>were growing up.

Are you sure about that? You may be right, but my peers and I got a lot of enjoyment from "Classic Rock" and AOR's while growing up. Radio served us well until about 1989, when Hip-hop and Modern Rock/Alternative/ ^%^&% the Establishment music became popular. Despite what the news media may say, there are still many of us in "Generation X" who don't spend our entire lives griping about society (though I personally seem to spend quite a bit on that :-)). "Our" music, however, seems to reflect that myth nowadays, and that's why many of us are turned off.

>And what we end up with are "Lite Mix Hits 87.5" targeted at the
>39-year-old spouses of proctologists.

Ahh, I see it's also non-commercial (freq. below 92 FM). Is that so the advertisements don't offend? (grin)

>Meantime, there's this audience of 46 million people that you've ignored,
>and that you're now going to have a tough time winning because you didn't
>get them in the habit of listening to the radio when they were young.

I guess it all depends on which market you're in. There are some stations in some markets that did well serving the tastes of people my age, just as there are some that reach teenie boppers well today (assuming, of course, the kids like Hip-hop and Rap).

From: hunder@ct.picker.com
Message-ID: <2kurei$3vq@vixen.cso.uiuc.edu>
Source record: 40962

SInce I just got hooked into this newsgroup, I'm not sure what the original post said. But in my opinion, and many others who have left Cleveland, we have some of the best radio in the country here. That is, if you can zip down to the non-commercial end of the FM dial. As an assistant PD for WRUW-FM 91.1 for the past 5 years and a lifelong Clevelander, I speak from experience.

Cleveland is very fortunate to have not 1, but 3 non-commercial, community radio stations broadcasting ALL types of music, 24 hrs. a day. No commercials, no Arbitron ratings worries, just music. Music that individuals, some with 20 yrs of radio experience, pick and play for no other reason than its good music - African, reggae, jazz, classical, rock, punk, folk, etc.

Please check us out before bemoaning Cleveland radio - its very fine indeed.

I saw the following billboard this afternoon, going northbound on
the Southwest Trafficway in Kansas City:

KY-102
We draw listeners like flies

Impolite question:
Does this mean KY-102 should be dead meat?
Its album rock format certainly does sound like it. And flies don't stay
in one place for very long, either.
This is just about the dumbest billboard I have seen for a radio
station.

Anyone out there who was involved with WCWM-FM (89.1), student radio station of the College of William and Mary, Williamsburg, Va.? I was a student volunteer at the station in the late 60's. At the time it was a 10-watt station. They had plans to form a consortium, increase power, and serve the Virginia Tidewater area. Did this ever happen. Would appreciate hearing from anyone who knows about this station and what happened to it.

Respond to Jesse W. Hawk, Jr. @CIS 73612,2666.

I have really enjoyed the long posts regarding the past, present, and future of KMOX.

I simply would like to point out that "old Saint Louis," like many ethnic urban centers, is slowly dying away. WGN Radio in Chicago, for instance, while it never dominated the market the way KMOX did, has been as much a victim as KMOX of a larger movement in society than the fragmentation of radio audiences. In fact, America is fragmenting, and it's affecting everything from academic life to mass media such as radio. This medium we're using right now, the Internet, is another sign of people finding the means to continue the process of splitting up and isolating traditionally strong groupings of people.

KMOX could have been staffed by the most talented media geniuses of our day and watched its share decline. Format specialization and increased competition have also played their roles. The 30-plus shares it used to pull in could not possibly have survived into the 1990s.

Ironically, and here I agree with the other posters, bringing in Limbaugh is the wrong move for exactly the reason it was the right move for most of stations in the EIB Network. Limbaugh has arguably saved AM radio, and kept up the healthy competition with FM in many markets, and honestly made radio a more interesting medium. But that's *not* what KMOX needs. WGN carries Paul Harvey, but does not promote him at all. For many years he was on WJJD, and before that WIND. He is not a priority because, although he originates his show just across the Chicago River from WGN, he is not part of that station's local-talent, local-coverage format. Nor should KMOX be ruining its reputation as a St. Louis icon carrying Limbaugh.

Does anyone know if KDKA in Pittsburgh carries Limbaugh? WOR in New York? KOA Denver? I'd be surprised if any of these did.

Aaron

Today's letter comes from diamondles@aol.com, who writes:

: other notables thatI I am looking for is Brad Crandell the great voice of
: WNBC 66 50k clear channel bliss!!!. The last I heard Brad was up to after
: his departure from WNBC was doing Voice commercials and an outlandish UFO
: movie, the name of which escapes me.

The movie I don't know about, but Brad passed away here in Los Angeles several years ago. When I was in HS and college, '68-'70, he used to let me hang out in the studio with him, both for his WNBC show and his NBC Monitor segments. He was a big influence in getting me going toward commercial radio, and also bought me my first beer, at Hurley's! <g>

Around 1984, I had the chance to hire him to work on several multimedia shows I was producing here in L.A....so in a way the circle was completed!

I'd love to find the source of the delay theme he used at WNBC - a kinda rhythmic pad with a sort-of-teletype effect.

: would love to hear from 60-70 am radio fans.....oh! don't forget the Late and
: Great Big Wilson,,,Barry Farber (Still Strong in Syndication) and the Late
: Candy Jones.

And Sterling Yates of WNBC's FortunePhone fame. You'll recall he suffered a stroke and was off the air for a year or so (staff announcer Wayne Howell took over). Sterling recovered and returned to WNBC hosting "Show 'N' Sell" (a "swap shop" type of thing that didn't last long).

WNBC was an interesting station to listen to in those days!

: ::laughing out loud:: Gee, we do a lot of ballgames (probably thousands per
: year, maybe tens of thousands?), but we've never done an FFA banquet, let alone
: live! :D

Did you ever do a high school graduation? KRES and KWIX (its AM) used to
do a lot of those, too.

And they sold the *crap* out of them.

We're not talking dinky coverage here, either. KRES is a full 100,000-watt
class C; KWIX is at 1230 but has tremendous coverage thanks to a 5/8 wave
antenna and excellent soil conductivity.

And, up til 1983 or so, they put reverb under *everything*.

Despite their quirks, they were well-funded, very professional operations.
They're still pretty clever. Whenever KRES broadcasts St. Louis Cardinals
baseball, it turns the stereo generator OFF so people in Columbia can get
it without any noise. (KFRU carries the games, too, but used to omit the
pre- and post-game shows. Plus its signal has problems even in Columbia
itself.)

716. Interesting receptions

Newsgroup: rec.radio.broadcasting
Date: 1994-03-01 07:39:15 UTC
From: WIDNER@LIBRI.EDINBORO.EDU
Message-ID: <2kurf3$408@vixen.cso.uiuc.edu>
Source record: 40971

Just notes on a couple of interesting receptions lately.

I've been hearing audio of "Global Television" from Canada on 87.85 in my area of late. I can hear it in my home or a few times in my car (in the few times I drive it!). I wonder if anyone knows where this might be located?

I also have one of these "Select-A-tenna" things that I found in a second-hand store (for $3...I received a catalog not long ago that was selling it for $50!) which I use occasionally. Coming home late last night, I tuned in to 1610AM jjust to see if I could hear anything unusual; last year around this time i heard a "Wisconsin Traveller's Network" station which welcomed drivers to Kenosha Wisconsin on this frequency. Sure enough, negotiating my way around Gene Scott from the Caribbean I heard an automated station from Chicago with weather and some road conditions. It was a bit muddled & I didn't hear an "exact" ID, but I think they said it was operated by the Illinois Department of Transportation.

Anyone know about this service for Chicago? Say, where do i write for a QSL?? c/o Milepost 66???

jack

[Moderator's Note: The Wisconsin station is 5 watts from a center loaded whip on a short telephone pole off I-94 and rt 158. Chicago IS indeed the Ill Dept of Transportation (IDOT) and runs 5 transmitters between 1 and 8 watts on 1610 and several on 530. IDOT is located in Shaumburg Il and they DO QSL. You probably heard the one on the Kennedy Expy, it is 8 watts with good grounding. There's a fellow with a list of all thses transmitters, on the net somewhere. Bill]

} transvox@tyrell.net (Mark Roberts) writes:
}
} We're not talking dinky coverage here, either. KRES is a full 100,000-watt
} class C;

Coverage? I'll say. While on a trip last summer to Branson Missori,
I was enjoying A progressive rock station (KTOZ) from Marshfield Mo., about
35 miles North/Northeast of Branson. It, too is on 104.7 with 35,000
watts at 600 feet.

I pulled into a parking lot of a store and the progressive disappeared
and country was playing. I sat around and waited for the top of the
hour only to find it was KRES on Moberly!!! I am not sure how far
that is, but I'd venture to say that it is a couple hundred miles the
other side of Marshfield. I found KRES to overcame KTOZ in a few
other places as well. That must be SOME antenna they are running!

} KWIX is at 1230 but has tremendous coverage thanks to a 5/8 wave
} antenna and excellent soil conductivity.

The problem with class-4's like 1230, 1240, 1340, 1400, 1450 and 1490,
is not power or antenna but interfernce from other co-cnhannels,
especially at night. Those frequencies are all but unusable at night.

Bill

Sometime last week, KRSO (590) San Bernardino began simulcasting with their FM sister station, KHTX (97.5 - KHITS). KRSO is the old KFXM (Tiger 59). They blew up Unistar's AM only format to simulcast Hot Country. San Bernardino had been without an AM country station since KCKC (1350) left the format after over 30 years to go talk a few months back. Incidentally, part of the reason for KRSO's format flip may be due to the fact that KLAC (570) Los Angeles has a pretty good signal in San Berdoo and went to the AM Only format 2 months ago. KLAC ALSO had spent 20+ years as a country outlet. So it was weird to hear the same stuff on both 570 and 590 AM and that might've been why 590 switched.

I've completely recovered from my Olympic fever, now back to work...

* Westinghouse's takeover of Celtics' SportsRadio WEEI AM-590 which
was taking more 3 months to finalize is not going to happen afterall..
The deal appears to be off the table...WBZ 1030AM, which originally agreed
to carry all Bruins games conflicting with Celtics' on 'EEI and did
carry one Bruins game(Feb. 14), has closed the door on that arrangement
and the Bruins' conflicts are back on Greater Media's WMEX 1150.

* Back on 'EEI : Aaron Daniels has returned to run the station while the
new buyers are sought. There's a talk that a group of religious broadcasters
will make a bid for 'EEI and would sell off the current syndicated programming
(including Imus' show which starts airing a half hour earlier on March 7
--5:30am) and the Bruins' and Celtics' rights to American Radio Systems(
WRKO-AM/WHDH-AM/WBMX-FM). There's another possibility that ARS will try
to buy 'EEI by setting up a completely separate company which would run
that station. It would unofficially give ARS 3 major AM sgnals in the city.
However, that move might somewhat upset the FCC...ARS, which has a brand
new deal to carry Red Sox games on WRKO, will try to outbid WBZ for
the new Patriots deal... ARS could potentially have Boston's all
4 pro sports teams on its 2 AM stations by September plus major
local talk-show personalities(Howie Carr,Jerry Williams,Tom Leykis) and
a syndicated powerhorses such as Rush, Gene Burns, Bruce Williams.

* Boston was the last Top 10 market to welcome the brand new ratings service --
AccuRatings, which has 'accurate' in its name...Unlike Arbitron,which
has 'arbitrary' in its name and relies on written diaries, Accuratings
goes only with telephone-driven results..The service has been around only
for 2 weeks and is already sending some shockwaves thru the Boston radio
scene...According to Accuratings, Granum's soft adult rocker WBOS-FM (
placed 7th in the most recent Arbitrons) was #1 station among the most
desirable advertising demo -- 25-54 -- from Feb.10 to Feb 23rd...Also,
alternative rocker WFNX-FM and NPR affil WBUR-FM which both have a younger
but very loyal following in the market never make into an Arbitron Top 10
It seems that Accuratings is getting a good sample of younger listeners who
are not into filling out diaries...One of the reasons why I think 'BOS
and 'FNX are successful with the younger crowd is because both stations are
on the forefront of interactive programming where listeners(not high-paid
consultants) have direct input on what's heard and not heard on both
stations. Generally, younger listeners like to get what they want, not what
they need...:-)
Here's a 25-54 comparison chart :

Accuratings(Feb.10-23) Arbitron(Fall Raings)

1. WBOS-92.9FM Soft Adult Rock 1. WMJX-106.7FM - AC
2. WBUR-90.9FM NPR/Classical/Jazz 2. WBCN-104.1FM - AOR
3. WBZ-1030AM News/Talk 3. WBMX-98.5FM - Hot AC
4. WMJX-106.7 AC 4. WODS-103.3FM - Oldies
5. WXKS-107.9 FM CHR/Dance 5. WZLX-100.7FM - Classic Rock
6. WBMX-98.5 FM Hot AC 6. WXKS-107.9FM - CHR/Dance
7. WBCN-104.1 AOR 7. WBOS-92.9FM - Soft Adult Rock
8. WODS-103.3 Oldies 8. WSSH-99.5FM - Soft AC
9. WZLX-100.7 CLassic ROck 9. WBZ-AM 1030 - News/Talk
10.WFNX-101.7 Progressive Rock 10.WEEI-590AM - SportsRadio

* Inifnity's classic rocker WZLX has finally found a permanent morning drive newsperson - Debbie Enblom. She was a former TV arts/entertainment reporter for a local CBS affil in Boston.

* Pyramid(WXKS) which is awaiting for the FCC's approval on its acquisition of a rival Churban WJMN-94.5 from Ardman Broadcasting seems to have its people in the house at the Waltham station who are slowly but surely deprogramming this up&coming 18-34 outlet,,,I'm not claiming to be an authority on that format but if you compare the station's summer upbeat playlist with its current snoozing ballad rap, the difference is quite obvious... No doubt that Pyramid will kill off the format as soon as the papers change hands...Something to look forward to this spring besides better weather..:-)

* Because of a really bad weather this winter 3 major AM stations -WRKO, WBZ and WHDH - are all expected to have sensational winter ratings books. Bostonians take their winter storms(14 so far and a couple more on the way) seriously. This winter should be no exception...SportsRadio WEEI should likely benefit from its Olympic coverage of figure skating and continued growth of Imus' show...Overall, this winter has been an amazing boost to AM radio in Boston...

* Howard Stern's Show will mark a full year on the Boston airwaves(WBCN 104.1) later this week...In that period, we were subjected to more merchandise selling than can be seen on a Home Shopping Channel :-):

- ButtBongoFiesta videotape
- The Book
- The PPV
- videotape of the PPV(Stern's limitted edition print comes with the order)

-Mark

720. Economics of Radio [Why it sounds like it does]

Newsgroup: rec.radio.broadcasting
Date: 1994-03-02 05:41:12 UTC
From: auron@netcom.com
Message-ID: <2l18to$sid@vixen.cso.uiuc.edu>
Source record: 40975

Since I 'subscribed' to Airwaves/rec.radio/broadcasting a few months ago, I have been impressed with the caliber of the discussions and the real love of radio that is evident in even the briefest of postings. In a personal communication with our Moderator, however, I expressed frustration with some of the comments I had read: namely, laments about the state of radio or the quality/accuracy of the rating books or the callousness of station owners, many of which seemed naive or misguided. Bill asked me to expand on my initial comments to him and submit them to the group in hopes of starting an interesting discussion.

I gave up my career in radio (as a jazz program director) a half decade ago because I came to understand that the physics (and therefore economics) of radio preclude the possibility of radio ever carrying the types of niche (i.e. elitist) programming that I personally most enjoy. Radio is a mass medium. My own tastes are not.

That's why I started Auron, a new mail-based CD Magazine. Each issue is a full length sampler CD featuring single tracks selected from 15 of the most interesting new releases beyond the mainstream, along with a 'pocket magazine' of profiles, interviews and pictures of the artists featured on the disc.

My intent in offering this description is not to shill my product but to explain by example why some programming simply cannot work on radio. Unlike radio, I can reach subscribers through the mail anywhere in the world, instead of being limited by the 75 mile or so radius of an FM signal. Therefore I can reach the relatively few folks in each market who have genuinely adventurous tastes in music, and profitably offer them a truly eclectic mix of music.

The difference between broadcast radio and Auron is like the difference between a metropolitan daily newspaper and a specialty magazine. The former must capture their audience from within their geographic region, while the latter seek the members of their niche audience anywhere in the country. Unlike the publications biz, physics limits the number of outlets (i.e. usable broadcast frequencies) in a single geographic area. Therefore economic realities inexorably pressure broadcast licensees to maximize market share or sell their license to someone who will. And when it comes to maximizing market share in a particular demographic, whether we want to acknowledge it or not, narrowcasting works!!

Complaining about radio is like complaining about gravity. We can sneer all we want at the nation's PDs, station managers and owners, and we can try to question the accuracy of the Arbitrons, but the biggest audiences want predictability when they turn on their radios. And predictability means both hearing new songs that aren't TOO different from the ones they

have heard recently, and being able to know what genre of music they will hear when they push 'button three' on the car radio. I'm willing to bitch louder than anyone about the quality of AUDIENCES, but not about the quality of station owners. I'd sooner plead guilty to the charge of being an elitist ass than to the charge of being ignorant of economics or mass market psychology.

While a few enlightened ones may long for the days of free form radio, when cool DJs showed off their eclectic tastes to the masses, the masses seem to prefer having their own chance to pick and choose the kind of music they want to hear at any one time by jumping to a particular spot on the dial. And frankly it's most democratic to give the average listener the opportunity to hear some classic rock or Top 40 hits or classical music WHEN HE OR SHE WANTS IT, by having each of these formats present at different locations on the dial all the time.

The DJ character on 'Northern Exposure' has great hair and all, but who gives a damn if HE'S in the mood for the Rolling Stones rather than R.E.M. And as much as it pains me to admit it, too few people to support a radio station will EVER want to hear Charlie Parker or John Cage, let alone David Murray or John Zorn.

The days are gone when a groovy individual station owner could decide to give up some potential earnings because he loved sponsoring an off-beat radio station. The economic blandishments are just too damn strong. (And radio ain't the only industry where increasing corporate ownership means a more rigorous attention to the bottom line. But that's a discussion for another time.)

Here in the Bay Area, the Coalition for Eclectic Radio forever tilts against the windmills of narrowcasting. They get lots of nice press from the local music and media critics and have absolutely no effect on the charming individuals or corporations who own the radio stations in the region.

I don't really have a conclusion because I wasn't really trying to make a coherent argument. I share the widespread frustration among the musical cogniscenti with the state of mainstream radio, but I also know that this middlebrow dreck is inevitable in a mass medium in the modern age. H. L. Mencken wrote that no one ever went broke underestimating the taste of the American people. THAT's the reason radio is so boring and unimaginative, not because station owners are stupid. Trust me, if there were a way to make more money with eclectic, adventurous programming, Infinity and the others would be doing it by now. But those corporations have a fiduciary responsibility to their shareholders (including pension funds like the one that supported my blue collar grandfather until his death) to maximize their profits. You'll be more likely to overthrow capitalism before you'll bring back free form radio.

Comments anyone?

> The WBZ 1030 AM beep is nice (and accurate, as Scott Fybush mentioned),
> but the CBS chime had more character...
>
> John

Actually, I think it was more complex than that on 'EEI:
The three "bings" were generated locally. Only the last "BONG"
came from the network. The reason I know this is a bit complex:

The night of the Blizzard of '78, the Prudential Center (where
the WEEI studios were) lost power for a time. It was a while before
WEEI got their emergency generator running. At least once that night,
at about :45, the three "bings" sounded off -- but _not_ the "hour
BONG". Obviously the timer that controlled the "bings" had gotten
out of sync due to the power failure. The fourth "BONG" was, apparently
separately generated at the network.

By the way, KCBS broadcasts the top of the hour tone from the network
and it is very accurate. I chsck it against WWV on occasion, just
to make sure!

Just my $0.02.

The big story(as Joe Piscopo would say when he was on SNL)...

The Buffalo Bills,as of next season,have a new radio home.
It will be..(drumroll,please....)WBEN-AM(news/talk/sports,News 930).
WGR(news/talk/sports,NewsRadio 55)had the rights to the games
since the 1990 season. Terms of the deal(i.e.years and cost/yr.)not
disclosed yet. I found about this while driving around in my car,
with the radio going. Besides WBEN,WGR and WHTT-FM were bidding for
the rights to the games. Details and thoughts forthcoming.
While I'm on the subject of news,the Feb.21 Radio Business Report
(a trade magazine for radio)reported that WYRK-FM(106.5,country)
will try to seek out a duopoly deal with another station in the
market. WYRK's owner,American Radio Systems(based in Boston),has
such deals in the majority of the markets where it operates-
Buffalo being one of the exceptions.
Score(for those that care):C.K.G. 5,Alan Pergament(News media
critic) 1.

723. Roger St. John dies

Epitaph for Roger St. John

Roger St. John, our midday jock, a guy I knew for 11 years, passed away suddenly very early this past Thursday morning. He died of a massive heart attack a few hours after getting home from a club night. Our General Manager called me 45 minutes before I went on the air to inform us of his death. Needless to say, it was a very sad, unfortunate morning. We shared our feelings on the air as other staff members came into the station and into the studio upon hearing the news. Listeners were just as distraught as we were. It was a morning of tears, shock and raw emotion.

Roger worked a string of major markets before coming to Q94 14 years ago. You might have heard him, you might not have. If you never did, let me say a few words on his behalf.

Roger was the smile and handshake of Q94. He was a jock, plain and simple. He cut his teeth on Rock and stayed in Top 40 his whole career. His whole purpose, his whole joy, his whole career was dedicated to enjoying just being a "jock".

Roger was everything that's still right with this business. Unfortunately, there seems to be less and less room for people like him anymore. Radio has become a conglomerate of ties and white shirts who trade radio stations and know little else of the joys of programming beyond an Arbitron.

Roger was just a jock. He loved the music, loved the jingles, loved the appearances, loved the remotes, loved the club nights, loved the listeners.

Roger St. John was only 47. I'll miss him.

Corey Deitz, Q94, Richmond

Actually, that should be 87.75...the audio carrier of TV channel
6, which in your case is the Global television transmitter in
Paris, Ontario, Canada.

You can QSL them by way of Global TV, 81 Barber Greene Rd, Don Mills ON
M3C 2A2...or call them at 416-446-5311.

The Paris transmitter uses 15kw audio at 1037 feet above average terrain.
It's the primary Global transmitter. Relays include 41 in Toronto,
22 Uxbridge (which I believe has actually moved since 41 came on),
27 in Peterborough, 6 in Ottawa, 29 in Sarnia, and 22 in Windsor.

Channel 6 audio is at 87.75 mHz more or less. TV audio is FM, just with a lower deviation in the L+R channel than audio-only FM radio (25 kHz vs. 75 kHz). So you're getting the audio of a Global station on Channel 6.

I don't have a listing of TV stations so I can't tell you where it is (sorry). I thought Global was in Ontario and Quebec only but my knowledge of Canadian TV is somewhat outdated, I'm afraid.

727. Sony SRF-42 Review (another one)

Newsgroup: rec.radio.broadcasting
Date: 1994-03-02 05:41:32 UTC
From: jtl@genesis.MCS.COM
Message-ID: <2l18uc$siv@vixen.cso.uiuc.edu>
Source record: 40982

Review: Sony SRF-42 AM/AM Stereo/FM Stereo Walkman

The SRF-42 is Sony's new entry into the walkabout-stereo
market. This unit is equipped with standard FM Stereo,
as well as AMAX and Motorola's C-QUAM AM-stereo circuitry.

Through the use of stereo and AMAX circuitry, the SRF-42
provides the AM broadcast listener with fuller-sounding reception.
Although it still falls short of what a good stereo FM signal
sounds like, this radio provides something unique.

The info below was collected over the space of a few days'
using this radio.

Specifications:

Frequency range: 87.6 - 108 MHz FM
530 - 1710 kHz AM

Power Output: 15 mW + 15 mW (10% harmonic distortion) with 24 ohm load

Output: Stereo minijack, 24 ohms

Controls: Power, analog tuning, volume, FM Stereo/AM Mono/AM Stereo selector
(there is no FM-Mono mode)

Indicators: Analog tuning scale, signal-received LED

Power Requirements: 3 VDC, 2 AA (R6) batteries

Battery Life: 48 hours (FM), 40 hours (AM) with alkaline batteries

Dimensions: 70 x 114 x 26.5 mm (2.875 x 4.5 x 1.125 inches)

Mass: 155g (5.47 oz) not including batteries or belt clip

Accessories: TPH-1 Stereo headphones (foam-padded, open-air type), belt clip

Color: Black

Design:

The unit is about the same size as other radio-only Walkman (and
Walkman-like) units (e.g., the SRF-39). Tuning is analog, and is about
as accurate as expected on units like these (very coarse, and
that's being kind). The tuning scale, headphone jack, and recessed
tuning knob are all along the top edge of the radio, along with the

tuning LED, which lights up when a strong (how they define "strong"
is a good question) signal is received: it has no relation to either
AM or FM stereo circuitry. The power switch is on the front of the unit,
and the volume control is recessed into the back, adjustable from
the left side.

Overall, it's the same design as most Walkman-type radios, although
I continually have a problem with the volume control: given the
placement of the knob, it's very easy to accidentally change the
volume of the unit. I seem to keep putting the radio at full volume
simply by holding it in my hand! The volume knob should either
(a) be a little harder to turn, or (b) be a little more recessed so
that picking the unit up couldn't potentially destroy your eardrums.
It would also be nice to have some sort of tone control on the unit.

Performance

For performance testing, I used the radio in my home, well removed
from fluorescent lights, televisions, and other possible sources
of RFI. I am located about 40 miles northwest of Chicago, and
am not within "splatter" distance of any large AM or FM station.

FM
--
The unit performs as expected on FM and FM Stereo broadcasts.
I compared this unit to another Sony product, the WMAF-44 cassette/radio
combination, and the performance was about the same (the '44 has
"Mega Bass" circuitry, which was switched off for this test).
When riding a train, however, the FM section of this unit performed
very poorly compared to the '44: many stations that came in very
well on the cassette unit did not come in at all on the SRF-42.

AM
--
This is what the radio is all about. To test the radio's performance,
I first ran across the dial in AM Mono mode: this should have
given me an idea of how the unit behaves on regular AM broadcasts.
I then put the unit in AM Stereo mode, and tuned across the dial
again, keeping a list nearby of stations in my area that are known
to use C-QUAM. At the end, I used a Select-A-Tenna to see how
the radio acts on DX.

In the AM Mono mode, the radio performed fairly well: it was actually
a little better than the WMAF-44. The only glitch I ran across
was a squeal that came across the entire signal for WLS (890 kHz);
no other station had this problem, and there are no major MW
outlets near this frequency that could be causing a heterodyne
effect. When I switched into AM Stereo mode, the squeal disappeared,
but the signal remained in mono. WLS may have been using a non-C-QUAM
stereo system (the NRC's _AM Radio Guide_ indicates the WLS uses both
Motorola and Harris methods), so one guess is that the SRF-42 could not
deal with a competing system elegantly. This is merely speculation, though.

In AM Stereo mode, the radio was put to the real test. According to the instruction sheet, the unit is capable of receiving only AM stereo broadcasts encoded using the C-QUAM method. All other transmissions are received in mono. Non-C-QUAM-encoded broadcasts are still "enhanced" with AMAX when the band-selector switch is in the "AM Stereo" mode.

Tuning the SRF-42 is a bit like cracking a safe: I had to hit the station just right in order to receive the optimal sound. The tuning knob is tight, so it takes a couple of attempts to land right on the station at the right spot. When I did land in the right place, however, the sound was great.

Listening to an AM stereo broadcast on this unit is interesting: the sound is not up to the standards of a decent FM stereo broadcast, but it is improved over regular AM. My only complaint is that many of the stations have an annoying high-pitched squeal behind them, even when tuning is centered on the station.

A quick run across the dial gave the following results:

WTMJ-Milwaukee 620 Milwaukee Bucs game: stereo, very good
WMAQ-Chicago 670 Chicago Bulls game: stereo, excellent
WGN-Chicago 720 News: no discernable stereo, NRC guide says (Motorola)
WBBM-Chicago 780 News: no discernable stereo, NRC guide says (Motorola)
WLS-Chicago 890 Talk: no discernable stereo, see above

When two stations were received on the same frequency, an interesting thing happened: rather than hearing both stations "talking over" each other, you would hear each station in alternating earpieces, fluttering back and forth. It was almost like listening to an old Pink Floyd album, with different sounds coming out of each channel, zipping back and forth. This happened only in "AM Stereo" mode.

Using a Select-A-Tenna gave slightly less-than-expected results: stations from other areas came in clearer, and in stereo when the signal was strong enough. This was rare, though. One easy catch for my other radios is Boston's WBZ: this station barely came in on the SRF-42, even while using the Select-A-Tenna. There was only one attempt at DXing, though, so these results are not conclusive.

Conclusion

To sum up, the SRF-42 is an interesting piece: it's not something I would use as my primary Walkman or for serious MW DXing, but it does give the listener an idea of how good AM radio can sound. Those who are looking for a quality AM/FM walkabout radio would probably do better with another unit, but at $30, the SRF-42 provides a glimpse into improved AM audio for fairly little money.

> Even with my computer show, Online Tonight, I have to be very careful
>to appeal to a *very* broad range of listeners...

> With all due respect, that's an apples and oranges argument. What

I respectfully disagree. I happen to be a avid listener of WHFS, one of the country's *first* Modern Rock stations, a station whose "Evolve" positioning statement is the perfect minimalist chant. It still boils down to audience targeting. If you're too narrow, then you don't have enoughaudience base to ultimately survive. If you're too broad, you face the real possibility of trying (and failing) to be everything to everyone. It works for Online Tonight, and it, unfortunately, works for mass appeal radio. Rarely does a format come along (disco was the last one aside from the Z-100-started Zoo craze) that takes a station from a 0.4 to a 14 share in one book (as happened to WKTU in New York when they went disco)

And please note that I'm not one of those programmers whose purveying what you refer to as pablum. I do, however, appreciate the appelation "dude" from earlier in your message, :) Here's a sample of the bumper music I used on last night's Online Tonight show (which isn't available in KC yet...sorry! We're working on it!):

Lemonheads/Mrs. Robinson
Social Distortion/Ring Of Fire
U2/Mysterious Ways
Peter Gabriel/Sledgehammer
Tori Amos/Cornflake Girl
Faith No More/From Out Of Nowhere
Phil Collins/In The Air Tonight (the 80's remix, thank you)
Ace of Bass/All That She Wants

and our hour opening theme is (and will *always* be) Art of Noise/Peter Gunn. This from a 35 year old who's been a country, Top-40, MOR and AOR morning man, as well as a talk morning and midday dude.

Todd Perry will be disappointed to hear that WNDY is being sold.
Apparently Xavier Univeristy in Cincinnatti is buying it. It comes at
no suprise since the station has been dark for the past year or so, as
far as I can tell. I've tried to catch it the past few times I've been
through Crawfordsville on I-74.

It looks like west-central Indiana will get to hear WXVU. Satellite-fed
public radio is preferrable to satellite-fed religion.

From: leaman@strauss.udel.edu
Message-ID: <2l18ul$sj7@vixen.cso.uiuc.edu>
Source record: 40985

I'm trying to find out if WUSL in Philadeplhia (Urban programming) is uplinked to any satellites. For a number of years, I knew of two different cable companies in my area (south-central PA) that offered this station over cable-FM, but have now taken it (along with most stations) off the cable. Since my college currently carries WUSL on our cable service, I am assuming it is received via a satellite downlink.

Can anyone tell me more about this station (i.e. whether it is available via satellite, which satellite, any costs of services required, etc).

Please e-mail to: leaman@strauss.udel.edu

Thanks!

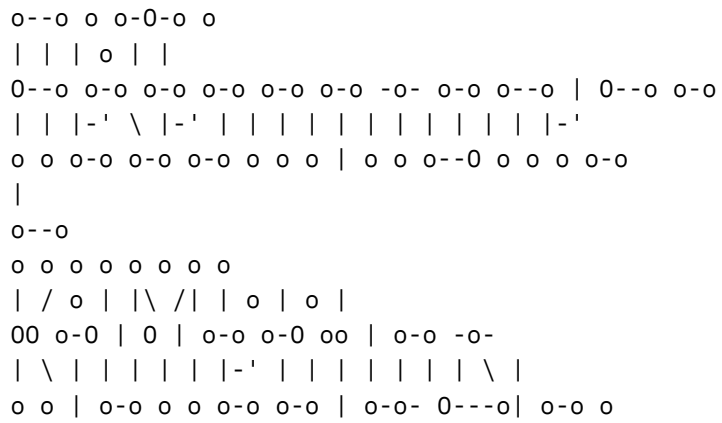
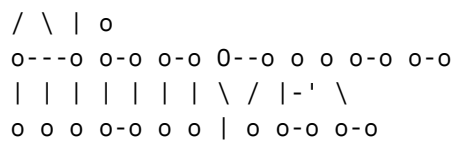
732. -=*=- -=*=- ANNOUNCING KID MEDIA MAILING LIST -=*=- -=*=-

Newsgroup: rec.radio.broadcasting
Date: 1994-03-03 07:03:13 UTC
From: wdp@uiuc.edu
Message-ID: <2l423h$kfn@vixen.cso.uiuc.edu>
Source record: 40987
Cross-posted to: misc.kids,misc.kids.computer,rec.radio.broadcasting,rec.radio.noncomm,rec.arts.tv,rec.radio.info,uiuc.general,rec.video.production,rec.video,comp.multimedia,schl.sig.telemedia



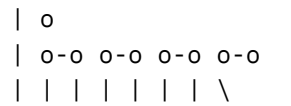
This is a note announcing the ongoing discussions underway on the
Internet Mailing List called Kidmedia (reflected) and Kidmedia-d
(Daily Digest). Kidmedia is dedicated to discussions between
people interested in, or involved in, the creation, production,
distribution and/or consumption of media who's primary target audience
is children. For the sake of inclusiveness, the list is defining
'children' and anyone under the age of 18 years, although most of the
media to which this list is targeted would be aimed primarily at those
under 12.

The kidmedia list is a medium volume list. Expect an average
of 2 - 10 messages a day, some days have none, occasionally
you will receive more. The load is seldom over 10 articles
per day. If mail volume is an issue, consider the digest format.



If you'd like to see what we are about,
you may visit our archives via FTP or Gopher.

FTP to radio.aiss.uiuc.edu in /misc/rec.radio.b-cast/kid.media
Gopher to radio.aiss.uiuc.edu 7070. Follow the prompts.



```
o o-o O-o | o-o o-o
|
o
```

Some of the topics suggested for discussion are (but not limited to)..

Children's Public Television programs and their impact
Commercial Children's Television and its impact
The rising trend of "Children's Radio" Such as 'Radio AAHS" and how
that is impacting the overall Children's Media situation.
Kid's Music and Musicians.
Producing Children's media.
Cartoons Today and Yesterday.
Separating Fiction and Illusion from Reality in Kids Media.
The role of computers and computer animation in Kids Media.
How Kids Media deals with Societal Issues like AIDS, Sexuality
Family problems, Abuse, Racism, Drugs, Self-Esteem, etc.
How do Families view the role of Kids Media?
How so-called 'adult' or mainstream media affects kids.
The Selling of our Children.. Commercials aimed at selling
products to kids and to parents via the influence of their kids.
Education via media.
Kids movies and videos. How and why are they made?
Contemporary re-makes of classic fairy tales (like Aladdin, etc).
How media does (or does not) effect children and what is
being done in that arena?
Current and future trends in the industry.

These are just some concepts off the top of my head and from those
sent in by interested parties. The scope and direction of this list
is still mostly un-formed and (as I said) is up to the participants
to determine by their posts.

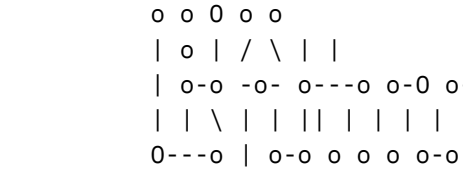
```
o--o o-o o
| | / |
O--o o-o O o-o o-o |
| | |-' \ | | | | |
o--o o-o o-o o-o o-o o
```

This list was originally designed to offer those involved in the
creation of kids media an opportunity to talk among themselves about
matters pertaining to their craft(s). Later it seemed appropriate to
not limit or restrict the membership to just kid media professionals,
but to open it to the public at large. None the less, it is our
intent to keep the list from becoming a flame-fest or a place to air
"I Hate Barney" types of messages, or other non-constructive traffic.

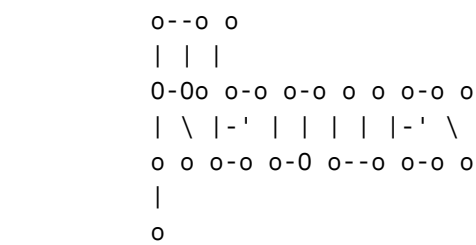
Since we have quite a few media professionals, who have chosen to be
on the list already and hope to attract more, we do not wish to take
up bandwidth on personal holy-wars and irreconcilable arguments. In
short we would like to keep the brain-to-balone ratio as high as we
can :-).

Other than that, the podium is yours.

Also, spread the word. there is no reasonable limit to the number of
list members and the more the merrier. We all look forward to a
spirited and educational time here. If you know of any
'lists of lists', let us know.



Here are the addresses for the kid media list. Please keep
these handy or assign them to aliases in elm or whatever
mailer you use.

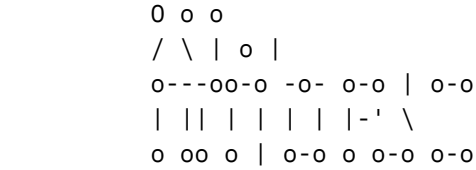


DIGESTED LIST: (Daily digests): kidmedia-d-request@airwaves.chi.il.us
REFLECTED LIST: (Individual articles): kidmedia-request@airwaves.chi.il.us

If you receive a lot of email, the digested list is recommended
Both lists contain the same articles. Form is the only difference.
Unless you have *need* of the reflected list, use the digest.
It is easy to handle and keeps mailboxes uncluttered. Plus,
the reflected list may be discontinued at some point.

Place one of these commands in the SUBJECT of your request mail.

1) Subscribe
2) Unsubscribe
3) Help



To send articles to BOTH lists, send to: kidmedia@airwaves.chi.il.us

If you are interested in a more generalized treatment of radio media,
join the AIRWAVES radio journal list, which I moderate. The addresses
are below. You may also access AIRWAVES via Usenet newsgroup
rec.radio.broadcasting. To subscribe to AIRWAVES, send email to...

Radio news week of 2/28/94

Some more ratings details. Here are Don & Mike's PM drive Arbitron ratings from WJFK FM 106.7. [POSTER'S NOTE: Yes, I'm a Don & Mike fan. And I'd gladly list other stations numbers but, it is EXTREMELY rare to see them in the local papers. If you work at a competing station and want your numbers mentioned, by all means post 'em!] The following numbers were announced on their afternoon show on Thursday, February 24, 1994.

Listeners 12 & up: 5.7 +.5 from previous month. #2 overall
Men 18+: 8.3 #1 overall
Men & Women 18-34: 9.4 #1 overall
Men & Women 25-54: 6.4 #1 overall

WJFK's G. Gordon Liddy was in the news last week. He apparently upset officials at St. Jude Children's Research Hospital. He recently made an on air request for women to send in photos of themselves in their underwear bearing arms. Mr. Liddy wants to make 1995 calendars, sell them and give some of the money to St. Jude's. The hospital wasn't consulted about this little contest in advance. Some have a problem with the G-man glamorizing the one thing that sends so many youngsters to the hospital.

WTOP AM 1500 is celebrating it's 25th anniversary as an all news outlet. Charles Osgood, Walter Cronkite, Jim Bohannon, Connie Chung, Sam Donaldson and other former staffers will be in town this week to help the station celebrate. It was back in 1969 when the station switched to the All-News format. The station went on the air back in 1943 and was named after the Tiffen, Ohio, Police force. (I wish I knew exactly WHY the station was named after that police department. Any netters know why?)

Former WASH morning team Baker & Burd met with their arbitrator on February 28 to discuss severance compensation for the two. Their next meeting won't be until late March. Baker and Burd were both let go on separate dates by WASH FM 97.1 in late 1993. Neither Baker, Burd, or WASH officials have any comments on how their meeting went.

734. Aircheck collectors

Newsgroup: rec.radio.broadcasting
Date: 1994-03-03 07:36:32 UTC
From: STEVEORD@delphi.com
Message-ID: <2l4420$mmg@vixen.cso.uiuc.edu>
Source record: 40989

Are there any aircheck collectors who read this group? I'd be interested in possibly doing some swapping. I'm mainly interested in AC and Top 40 from the early '60s thru the late '80s. Specific stations I'd loooove to have more of in my collection include...

WKBW/Buffalo....'62 thru their demise as a Top 40 in the early '80s
WPTR/Albany, N.Y....'62 thru mid '70s
WTRY/Troy, N.Y..... " " "
WBZ/Boston.....'62 thru '68
KIMN/Denver.....anything
KJR, KING, KTAC/Seattle-Tacoma....mid (ish) '70s

Thanks...
Steve (steveord@delphi.com)

Soniflex DX30 and DX300 Digital Cart Machines
==========

We at Southampton hospital radio have just moved into new studios and have upgraded from our old NAB cart machines to the Soniflex range of discart machines, utilising 3.5 inch floppy discs.

This review is not written by an engineer (but I have some technical knowledge),
but from a presentation and production view point.

The machines come in 4 versions. Single play, single play/record, triple stack
play and triple stack play/record. We have the triple stack versions and so this
article is based on them. The single versions work in the same basic way, but without the multi-play facilities & problems.

The discs can be commanded to play singly (single play), one disc after another
(sequence play), one disc after another over and over again (sequence loop) and
several other modes. The sequence operation is useful for playing breaks.

In appearance the machines look like a small version of the old ITC triple stack
NAB machines. But they have 3 computer disc drives instead of the NAB cart slots. Under the disc drives is a small LCD display that tells you either what
is in the drives or information when recording.

You may use 2mb (HD) or 4mb (ED) 3.5 inch computer discs. 1mb (DD 720K) discs will not work. This is a great pity as we use a lot of 7 or 8 second items and a
720K disc would do for these. A HD disc will set you back 85p (+VAT) but an ED
retails for ten times that. But I have seen them for 3.50 each. In any case they are cheaper than NAB carts, you have a wider choice of suppliers and they
are a lot smaller to store. A 2mb disc can hold up to 2:28 of sound and a 4mb holds 5:20. The amount you can record depends on the sampling rate you use and
if you record in mono or stereo. The system supports 4 sampling rates. 22K, 32K
44.1K and 48K. At 48K stereo a 2mb disc will last 32 seconds and at 22K mono 2:28. In theory a 22K sampling rate should give a band width of 11K (AM Radio

quality) but in practise 22K stereo gives very good reproduction and most people
cannot tell the difference. The 1:14 running time in this mode let's you put
down a 60 second promo or music bed. A disc may hold up to 8 items, as long as
the disc space it there. Eight 2 second shouts will not fill a disc but will hit
the item limit. In most cases you trade quality, duration and number of items
on a disc.

2:28 will, of course, hold most 60's records. With 22K sampling you also have a
scratch filter. So you can keep standby material in a fast access medium and it
will not take up a great deal of space. I personal keep 6 or 7 tracks on floppy
in case I need something fast. If your station has some tracks only on tape you
may considare copying them to discart.

On the back of the machine is a connector that will take in digital information
direct from a CD player. The recorder will then switch to the CD standard 44.1K
and "copy" the data from the CD to your floppy disc.

If you have a 30 second item to put onto a disc and therefore opt for the 48K
rate, in some circumstances there may be problems with playback. The faster the
sample, the more date the player needs to keep the sounds coming out. This means
that the drives are constantly in action reading data into memory. If you try to
change discs in another drive, that will also require the machine to access the
drive and so you may get a DISC ERROR on the playing disc, or the new disc will
not be ready to play when the one you are playing finishes. This can result in
squeaks being played on-air. So it is wise not to over sample. We have only
recorded the jingle package at 48K. After some accidents with promos at 48K now
everything else is at 22K or 32K.

When recording material onto a disc you first have to format the disc. This is
not the same as a MS-DOS format and is far less tolerant of disc errors. A DOS
format will complete and let you use the disc, if it finds bad sectors. If the
digital cart format finds disc faults, it will not allow you to use the disc

at
all. You get all or nothing. But, as with a PC, if you try again it may
format
on the second attempt. If not you can always use the disc in your PC.

In addition to choosing mono/stereo and sampling rate you may also determine
the
dates between which the item may be played. No playing the christmas jingles
after January 5th and no playing promos for next saturday's football game too
soon so that it can refer to the wrong saturday.

Once the recording is made you can move the start and finish points of
playback.
This means that you just slap it onto the disc and get the cues right
afterwards. No more playing chicken with the record button. You can get the
sound to start as soon as you press the play button everytime. The end can be
moved too. You have to make a judgement about fades and echo at the end of an
item. If the items are to be played in sequence mode you will want to have
the
end cue tight, but for station jingles you may want to leave the decay there.
But you can always start the next cart in a sequence manually to get over any
gaps. The Start time is about 10ms if the system has had a chance to pre-load
the start of the item. (see 48K sampling above)

The DX300 Record machine comes with a small keyboard to control and edit
recordings, but recordings can be made using just the buttons on the machine
itself. You will need the keyboard however to clone discs. Yes once you have
make up a set of discs, you can clone them. You do not need to re-record them
when you need another copy. And the copy is digital, just like copying a
computer disc. You can also copy individual tracks from one disc to another.

In playback the LCD display will give you the name of the item ready to play
in
each slot. The duration is also shown and this counts down as the item plays.
The screen also tells you the sampling rate and if the item is mono or
stereo.
It is also advisable to check here to see which playback mode you are in in
case
someone has left it in Sequence Loop and it will play the next disc when you
do
not want it to. To access the subsequent cuts on a disc, simply press the
little orange button next to the play button. This will tab you trough the
disc
to the cut you want. The machine only plays one disc at a time. If you have a
disc playing and press the start button of another disc the system will cut
to
the new disc, and the previous one will reset to the start. Pressing the
start
button of a playing disc will pause it. Press start again and it will
continue.

We have found the DX300 and DX30 to be well engineered and well thought out. The
recording operation appears to be more complicated but in practise is easy to learn and offers greater flexibility over NAB carts. The sound quality is greatly improved. There are no clungs from starting carts. We have no ED discs
so I have no experience of their operation. At 3000 for a record machine and 2000 for a playback unit these are not cheap toys. The advantages for production and transmission are great. On a Hospital station, like ours, the presenters can supply their own discs. There is expansion possible with the addition of a hard disc over an ethernet connection.

The system is now in use at Virgin 1215 and a growing number of other station as
they re-equip.

Though few of us like to admit it, this is all too true of radio - on this side of the Pond as well. And although everyone likes to spout on about how bad all this is, well that's life, I'm afraid.

In the UK our fairly small student radio stations (very different to the American ones) are pretty much the only place left now where "adventurous programming" can take place, since we are not within the commercial sector.

But the days of such radio operating outside student radio, in the UK at least, seem to be well and trully over.

Paul Hillyard.

Anyone remember KQV Pittsburgh, PA., (AM 1410) during their rock/pop days back in the early 70's? I remember the following DJs:

Chuck Brinkman 6a-10a
Fred Winston 10a-2p
Jay Davis 6p-10p

I've drawn a blank on the others who used to work there. As soon as I see/hear their names it will ring a bell! If you remember others from the lineup, even part-timers, please post them. I used to love listening to that station back in my teens. They were *THE* station until WKTQ, 13Q, came on the scene and kicked their butts. I remember them paying $13,000 dollars to listeners who answered their phone saying, "I LISTEN TO THE NEW SOUND OF 13Q". I can't remember any jocks from 13Q, just all that money!

I do. And it's constantly changing.

We went on the air Sunday night, and it didn't suck. A few carts misfired, we found out at the last minute that we were going to have to settle for an 8k land line connection to ABC because the *stupid* CDQ1000 ISDN front end didn't get shipped from CCS on time (but it's in as of noon Tuesday and we'll be totally digital as of this Sunday's show), we completely missed a stopset during the second hour (causing our automated Jacksonville affiliate to have a microchip coronary), the phone system sounded like we were in a wind tunnel, and I didn't even get a chance to grab a sandwich.

On the plus side, we had a great conversation with John "I predict you guys will kick my old show's butt" Dvorak, we have a brand new Telos 1+1 integrated phone system being installed on Thursday, we'll be talking with the Sony guy responsible for the MiniDisc, Bob Sherwood. Yeah, that Bob Sherwood...he got out of radio and into personal entertainment. And we have a new affiliate joining on Sunday. Life is good. Maybe I'll even be able to get a sandwich this week.

Here's the lineup:

Jacksonville FL WQIK
Green Bay WI WNFL
Sparta WI WKLJ

and joining us this weekend:

Panama City FL WYOO

So we're big in Florida and Wisconsin. :) I know it's small, but it's a big start. If you have any questions, please let me know.

In a previous article, WIDNER@LIBRI.EDINBORO.EDU () says:

>I've been hearing audio of "Global Television" from Canada on 87.85 in my area
>of late. I can hear it in my home or a few times in my car (in the
>few times I drive it!). I wonder if anyone knows where this might
>be located?

Global Television operates throughout the province of Ontario using over-the-air transmitters. Two of these transmitters operate on channel 6, which is the audio carrier which you picked up. The most likely transmitter for such distant reception is their high-power (100,000 w ERP video, 15,000 w ERP audio) transmitter located at Paris, Ontario (about 90 km. west of Toronto). Its call letters are CIII-TV. The other Global channel 6 transmitter is of relatively low power (510 w ERP audio), and is located at Ottawa, Ontario.

Their address:
Global Television Network
81 Barber Greene Road
Don Mills, Ontario
Canada M3C 2A2

Hope this helps.

741. THE ROOSTER and other tales from the frontier

Newsgroup: rec.radio.broadcasting
Date: 1994-03-03 07:36:48 UTC
From: Orv Lyttle <orvl@twu.ca>
Message-ID: <2l442g$mn7@vixen.cso.uiuc.edu>
Source record: 40996

It was in the golden 50's, 1952 to be exact when I was
called into the station manager's office to give account.
Account of what ? The manager peered over his desk at
me with sterness in his eyes. Then he shouted:
"What's this about the ROOSTER ? "

What rooster, sir ?

Then he produced a letter from Ohio, some 450 miles away.
It was from an avid radio listener looking for a QSL.
And he meticulously listed the details of programming;
--at midnight EST a news broadcast, then a commercial for
Sol Waiser's Clothing store, then sports---Toronto 3
Detroit 2, Chicago 4 Montreal 4, etc. Then two national
anthems: O Canada followed by God Save the King and THEN
A ROOSTER CROWED before you went off the air.

Wow. We got caught. Darn it anyhow. We thought it was
a great joke. Oh, well...the manager screamed--"From
now on NO more roosters."

The station was CFCH North Bay, Ontario at 600 KCS , as
we called them in those days and we were running at
1,000 watts. A nice catch for the spy down in Ohio.

Time for one more yarn. We added an FM transmitter
(1,000 watts) called CFCH-FM which relayed the AM
programming. It was one of Lord Thompson's stations
and they added the FM channel to get a corner on the
market and beat the competition. The antenna was
less than 20 feet above the studio roof. FM was so
new in Canada that to even buy a radio with FM on the
dial it was necessary to buy in Toronto or Montreal.

A local businessman bought a HI-FI (to-day known as
a stereo) which played 78's and came equipped with
BOTH AM and FM. It was shipped from Toronto and may
have been the first FM receiver (outside of HAMS) in the city.

Well he called CFCH and complained that he couldn't
hear our FM channel. Was there something wrong with
his new radio ? I said, "Hold the line a minute" and I
ran to this closet that housed the FM transmitter.
Sure enough, the morning operator hadn't turn it on.
I flipped the switch and the big red light glowed.

Then I dashed to the telephone..."Hello, sir...
try your FM now....is it ok...? " "Yep " he said.

Now ratings for our FM channel suddenly went from
zero to one !

++

QUESTION

Does anyone know the identity of the AM station
on 1550 that constantly broadcasts classical
music ? We can hear it daily on the Pacific
west coast.

HAPPY LISTENING

742. Radio & Sales

Newsgroup: rec.radio.broadcasting
Date: 1994-03-03 07:36:48 UTC
From: madison@wam.umd.edu
Message-ID: <2l442g$mna@vixen.cso.uiuc.edu>
Source record: 40997

Question to the general net public.

As a budding hopeful jock or producer, I've sent out quite a handful of resumes to various DC/Baltimore area stations detailing my experience, including a ton of college work (DJ, production, music director, sports engineer, etc.) and some recent part-time pro sports engineering.

I got a message on my machine the other day from a GM (curiously, of a station I didn't send a resume to ::smile::) who offered me a job in sales, despite the fact that he "didn't see any mention of a background in sales on my resume." (And to be fair, he said to call him if I was "interested in sales", I'm not 100% sure that he was or is going to offer me a job.)

I've done some retail at a sporting goods store, and I did pretty well. But those customers are the kind that walk in with, usually, a good idea of both what they want and what they intend to spend on it.

I tried direct sales for a short time, selling (or attempting to sell) "Cutco" cutlery, and found out very quickly that it wasn't my cup of tea.

My question is... should I try radio sales? Will I succeed at it?

My gut instinct is "no", which is why by the time you read this I will have likely talked to the guy, describing my background, and left it up to him whether or not he cares to seek someone more qualified. I'd really like to be able to take *any* job connected with radio, but not one that I am destined to fail at.

(Plus, I don't think I'd actually *like* doing it, but I guess I better add that the reason I am even considering taking it is because I am on the verge of bankruptcy. ::smile::)

What'ya's think?

Source record: 40998

The program referred to is "The Hour of the Time" with William Cooper, heard on WWCR, Nashville, TN (5810 kHz) at 0100 and 0500 UTC, and the Omega Radio Network (G3/17, 5.8 MHz audio) at 00:00 EST.

The program is Mr. Cooper's view of what he passionately believes is a world-wide conspiracy to set up a one world government. He is sure that anti-American and anti-Christian forces are out to make the USA just one of a number provinces in the New World Order. He supports his views rationally (albeit passionately) using documents available to anyone at their local library, the Library of Congress, and through various governments agencies under FOIA.

>
Your description of AAA fits a couple of stations that I'm aware of. WYEP
91.3 FM has gradually transformed from folk/singer-songwriter to more of
a mix of alternative/folk/world/zydeco/singer-songwriter. It is a
community supported station.

WXPN in Philadelphia went through a simular transformation a few years ago
and has probably continued to redifine itself. They put out a sindicated(sp?)
show called 'World Cafe" via APR. From what I heard they were a combination
of modern and AAA but have dropped some of the Modern since WDRE showed up.
(By the way, WYEP is in Pittsburgh)

Both stations are non-commercial. Has anyone come across a commercial
AAA station?

Perry

746. Buffalo Bills broadcasts back on WBEN Buffalo!

Newsgroup: rec.radio.broadcasting
Date: 1994-03-03 07:54:36 UTC
From: bfowoz@ubvms.cc.buffalo.edu
Message-ID: <2l453s$nvl@vixen.cso.uiuc.edu>
Source record: 40901

Of interest to Buffalo Bills fans, especially listeners to the radio broadcasts:

Today (Tue 3/1), WBEN radio announced it has regained the broadcast rights to the Buffalo Bills for the next four seasons. WBEN had the rights from the late 1970s through the 1989 season, before the broadcasts went to WGR. So the Bills, IMHO, are now back to a class act on the airwaves. WBEN has always seemed to show class on their radio broadcasts, and they had a great sports tradition going back several years. I, for one, won't miss the ranting and raving of WGR, especially on their sports "talk" shows. Van Miller will again do the play by play ("Do You Believe It?!"), and I would hope that John Murphy or Howard Simon will do color commentary.

Now tele-radio really means something good again!! I hope WBEN can get the Sabres radio rights too!

Mark Wozniak

751. Re: KMOX and Rush Limbaugh perspective

Newsgroup: rec.radio.broadcasting
Date: 1994-03-03 07:54:45 UTC
From: tedb@nexus.msfc.nasa.gov
Message-ID: <2l4545$nvq@vixen.cso.uiuc.edu>
Source record: 40906

In <2kureq$3vv@vixen.cso.uiuc.edu>, Aaron Barnhart asked:

<Stuff Deleted>

>Does anyone know if KDKA in Pittsburgh carries Limbaugh? WOR in New
>York? KOA Denver? I'd be surprised if any of these did.

Well, then, surprise. KDKA in Pittsburgh does carry Rush. Obviously,
WOR in New York does not because WABC is the flagship. I am not sure
about Denver.

One aspect of this string is interesting. Rush himself admits the biggest
obstacle he faced starting up the show was that those in the business thought
that an issue-oriented talk show in the middle of the day would work only if
it dealt with local issues. An undercurrent of this present string is that
Rush will undermine these particular stations in the long run because
he removes the focus from local phenomena and replaces it with a sort
of homogenous, national flavor. I will not try to speak to this
because all I know about radio is that I enjoy listening to it. I am
sort of curious though, how has Rush affected the loyalty to stations
in their local markets? I know he is on many of the clear-channel
stations that I can receive (e.g. WWL, WWWE, WBAP, WLS, KMOX, KDKA,
WCKY) as well as some of the powerful (but I believe not
clear-channel) stations (e.g. WLAC, WABC) that cover large parts of
the country, which are the stations that sort of define many of these
cities for me. I know in our mid-sized market, Rush has helped
define the identity of our local station; I have no idea about its
numbers, but the station seems to have loyal listeners who didn't even
know it existed before Rush.

While reading article <2kureq$3vv@vixen.cso.uiuc.edu>, I noticed that
barnhart@MCS.COM (Aaron Barnhart) said the following:
>Does anyone know if KDKA in Pittsburgh carries Limbaugh? WOR in New
>York? KOA Denver? I'd be surprised if any of these did.

Both KDKA and KOA carry Rush. I believe KDKA has for quite some time, and KOA
just picked up Rush in January.

Rob:

My personal opinion is that if this fellow cold-called you, when you were not applying to him, and you were not applying for sales to begin with, he is obviously willing to work with a beginner.

The only down side of this is that he will probably pay you less than you are worth, However, a lot of stations need people to sell their satellite feed or what-have-you.

But consider all of this.....

1) First, realize that it is *murder* to break into 'on-the-air' radio work with little or no experience. It is murder *with* experience.

2) Next there is an old adage which says that "it is easier to get a job in radio, when you have got a job in radio" Many PD's (etc) value someone who stayed in a related field.

3) Every station needs someone to sell time, they dont *all* need on-air people. Also, a DJ who can sell is a better hire than one who doesn't.

4) You will be *at a station*, talking to people, meeting people, doing things related to the industry, and probably earning more than the air talent :-\.

5) You should always be willing to do virtually anything moral and legal in your first few jobs. This is one thing today's stations on a bare-bones-broadcasting-budget, really need. If that is you, you stand a much better shot at work, if not, the next guy will work. After all, a talent might be asked to sell time on the side. Or you may find yourself in a position where you have to sell your own program.

Rob, you are one in 10,000 who are vying for a spot in an ever shrinking pool of viable stations. Satellites, Desk top automation, Duopolies and bad economy, are eating up station positions faster than a DEA dog at a Grateful Dead concert. If I were you I'd go for it. You can always quit, but I would not. Unless you have better offers, Id definitely check it out.

Bill

transvox@tyrell.net (Mark Roberts) writes:

> Did you ever do a high school graduation? KRES and KWIX (its AM) used to
> do a lot of those, too.

Nope. The only thing we really ever did besides the usual remote sponsored broadcasts (car dealers, local businesses, etc.) was a Meet the Candidates Night or two. Last time we did one of those, I was the studio board op and the broadcast originated from Orrville, a small town just northeast of our home base in Wooster. Our Marti unit has problems getting back from there, probably the terrain...so we were only getting about a 20 percent (!) signal. Our Mike Breckenridge was there, and when he slammed the door of the remote van in disgust when learning of the small signal strength, the signal went up to 40 percent. ;D

755. Radio Watchers -- Kansas City AM

Newsgroup: rec.radio.broadcasting
Date: 1994-03-04 06:59:11 UTC
From: Mark Roberts <transvox@TYRELL.NET>
Message-ID: <2l6m7v$2lj@vixen.cso.uiuc.edu>
Source record: 40910

Thursday morning, KBEQ (1030) switched from simulcasting KBEQ-FM to relaying programming from the "People's Radio Network," best known for its "For the People" program hosted by Chuck Harder.

KBEQ has not changed its call letters, at least not yet. It is using the slogan "Talk 1030." For the past 13 months, it has been simulcasting "Young Country 104," before that, it broadcast Satellite Music Network's Z-Rock format (as KBZR).

At present, "Talk 1030" appears to be relaying the talk network in its entirety, with no local content.

The Harder program had been broadcast on KCMO (810), but was cancelled when Bonneville Broadcasting bought the station.

KBEQ joins KCMO, KMBZ, and KNHN in the Kansas City talk-radio marketplace. Its signal strength (1,000 watts at 1030) is pretty competitive in most of the Kansas City area.

(Thanks to a reader of Airwaves, who shall remain anonymous, for bringing my attention to KBEQ's change!)

***

Tuesday evening at 7 o'clock, the newscaster on WHB was Wayne Combs.

This must be full circle for him. I can remember listening to him 23 years ago on WHB, which puts a strong signal into southern Iowa, where I lived at the time. In the early 70s, WHB was still *the* dominant Kansas City station with its Top 40 format and popular personalities. The station's decline began when KBEQ-FM went on the air in 1973 with *its* high-energy Top 40 format. KBEQ switched to a young country format last year after several years of gradual ratings declines.

Since August, 1993, WHB has been programmed by KMZU(FM) Carrollton, with a farm-oriented, country/western format. Earlier this year, WHB resumed its own programming after four months of relaying KMZU's signal.

The other famous (well, at least to me) WHB newscaster of the early 70s, Bob Mead, has since worked at KBEQ and most recently at KCMO.

Robert, the first point to consider is: Is the station doing well? If they are desperate enough for salespeople to contact people out of the blue, with no experience, there must be a reason. Trying to sell an unsellable station is a frustrating impossibility even for a seasoned pro. Listen to the station; see how heavy their LOCAL spot load is. In radio sales, you HAVE to be working for a winner or you won't survive. We have a station here in town that has been through 70 salespeople in the last two years. 67 of them have nothing to show from their stop at this station except a black mark on their resume. (The current 3 probably soon to follow). If I were in your position, I'd probably be brash enough to contact a few salespeople from rival stations and ask their frank opinion of making a living by selling Station X.

If it passes this test (and odds are it won't), ask them if they use the NAB training course for new salespeople. I've seen stations hand their new salespeople a rate card and put them on the street. The NAB course is invaluable. And ask if you'll be given a chunk of sponsors already on the station, or if you start from scratch. If you're inheriting a list you'll have a much smoother start.

[stuff deleted about some AAAs]

> Both stations are non-commercial. Has anyone come across a commercial
> AAA station?
>
> Perry

Here in eastern Iowa, KFMH in Muscatine was a commercial AAA.
Wide -- very wide -- mix of
music, similar to the artists mentioned earlier.

KFMH just got bought by the owner of an AOR in Moline, Illinois (WXLP-97X).
97X, along with KRNA in Iowa City, consistently kicked KFMH's ass in the books.
I would guess that KFMH's wide playlist was too much of a turn-off for Iowans.

Plus, KFMH was cocky as all hell on the air, making fun of competitors, but no
ratings to back them up.

There may be a few KFMH fans in the market who are dissappointed that the
station is going Country. But, quite frankly, there are so few of them, that
97X and KRNA will see only a small increase in ratings due to new listeners.

The point: AAA, even without KFMH's cockiness, has too-large a playlist to
allow for consistent listenership from quarter-hour to quarter-hour. I just
can't imagine AAA lasting too long.

IMHO,

-ajb

758. ARS buys WCGY-FM Lawrence-Boston

Newsgroup: rec.radio.broadcasting
Date: 1994-03-04 06:59:13 UTC
From: fybush@world.std.com
Message-ID: <2l6m81$2mj@vixen.cso.uiuc.edu>
Source record: 40913

The duopoly juggernaut has rolled over another stand-alone FM in the Greater Boston market. American Radio Systems, which already owns WRKO-680 (50kw, talk), WHDH-850 (50kw, talk/news), and WBMX-98.5 (full B, "Mix 98.5") in Boston, is buying WCGY-FM 93.7 Lawrence from longtime owner Curt Gowdy.

WCGY will fill the final open space at ARS's new 116 Huntington Avenue studio complex in Boston.

'CGY is an also-ran in the Boston market, with a 50kw signal from a 430 foot AAT tower in a marsh in Andover, some 20 miles north of downtown Boston. The WCGY signal is flakey in the suburbs, and often fails to trip the scan function on my car radio as I drive around Boston.

The current WCGY format is album rock, with a strong overlap with Infinity's WBCN and WZLX, and with Knight's WGIR-FM and WHEB in New Hampshire. It will be interesting to see what ARS does with its latest acquisition. There's probably room to move the WCGY transmitter a little to the south without interfering with WSNE-93.3 Taunton, WFXR-93.5 Harwich Port, or WHJY-94.1 Providence. It's possible that WCGY could move its antenna to the WRKO site at routes 3 and 128 in Burlington, about 12 miles south of the present site.

It will also be interesting to see what becomes of Gowdy's WCCM-800 in Lawrence (1000w/244w ND). CCM could be sold to the Spanish broadcasters who lease much of their evening and weekend airtime already...or it could be an ideal duopoly property for nearby WLLH Lowell, WCAP Lowell, or WHAV Haverhill.

-=Scott Fybush - fybush@world.std.com=-
And so what if I've actually been to the WCGY transmitter? :-)

>economics) of radio preclude the possibility of radio ever carrying the
>types of niche (i.e. elitist) programming that I personally most enjoy.
>Radio is a mass medium. My own tastes are not.

[...]

Although you didn't intend it to be, your thought indeed seemed very "coherent." It comes down to this--everybody is fed up with something about radio, and we feel it's our duty to the free world to offer large visions for change. Change is good, but it has to be "external." By external, I mean change has to be audience-driven, not PD-driven. Generally speaking, radio people get all worked up, and think they're in bondage to the 25-54 demo, and consequently long to "break free." However, I was preached to by many a broadcasting professor that "radio relevance" is centered on the not-too-profound word: audience. Generation X (by the way, with the movie "Reality Bites" and hot-shot commercials, they're getting way too much attention...they say they loathe attention...YEAH!) may continue to say radio sucks donkeys, but they haven't been indoctrinated into the finer points of audience-based radio. They say they are an audience that is not "getting their radio needs met." That is simple overinfatuation with themselves and the Generation X thing. (I supposedly belong to this group, and I laugh at how radio is supposed to cater to them...i.e. witness Bono saying, "F--- the mainstream.")

I share your longing for radio bringing the variety package to the masses, but I also share your frustration for realizing the situation is out of radio's hands--it's in the audience's hands. (I hope I didn't read into your comments...those are just my perceptions/opinions.)

It's way too late........

In article <2krnbi$494@vixen.cso.uiuc.edu> perryrt@aol.com writes:
WGRE is, I believe, a college alternative, "play it if you got it", radio station in Greencastle, IN. It belongs to DePauw University. <snip> I believe they transmitted on 91.5

Right-o. Their slogan is "The Sound Alternative". They have an actual, fairly serious news department.

However, this information is a few years old. I went to college at a rival school (Wabash College)[note to sports trivia nuts: what trophy does Wabash and DePauw fight for in football, and why is it historically important?],

The Monon Bell; although I don't know the story. Dated a DePauw grad for a while, so I remember the big deal. Also, I'm a Rose-Hulman grad, so I'm from that neck of the woods.

I was the Technical Director at WNDY 106.3FM. WGRE's staff used to come up and drool over our equipment every once in a while. We weren't exactly state of the art, but I guess a 3000 watt x-mitter must have looked good to them.

WGRE was, during my time managing Rose-Hulman's WMHD, always very well organized. Whenever Rose would play DePauw here, WGRE would send us a letter saying they wanted to broadcast the game, telling us all they needed from us to do so (usually, just a phone line).

I got to see the WGRE studios once. They're VERY nice. They're nicer than most of the PROFESSIONAL stations here in Terre Haute. These facilities are only a few years old; I guess their older facilities were junque.

Here's a small question to get you thinking....

What can we call our radio station?? We have just got a broadcast licence and broadcast on 88FM Stereo in a town called Grahamstown, South Africa. We currently call ourselves "Rhodes Music Radio" (RMR) after our University which is called Rhodes, funnily enough, but we want a new name that's catchy, exciting and young.

Any ideas based on radio station names in the USA or elsewhere would be much appreciated. Our station format is basically a cross-section of music from thrash metal to reggae to techno. We are run completely by volunteer students from the University. Hit me with your best ideas folks....
(either post them or mail them direct to me)

There are two AM NPR stations that I am personally aware of.
WNYC 820am in New York City...not very powerful, especially at night. They run mostly news and talk programming throughout the day and repeat at night.

WEBR in Buffalo (not sure of their frequency) is an NPR station that happens to be all news (Like WCBS or WINS in New York)

Source record: 40922

I'm a former WWDB loyal listener, a fan up until 1992 when I had to move. I've been back twice and I've listened. I don't know if I've ever heard a station with more small-town charm but big-city issues to discuss. My faves were Irv Homer (I'm a Libertarian, too) and Dom "The Man Who Never Sleeps" Giordano. Dom and I have talked extensively off-air and he is different than the man you hear. Not night and day but he is certainly a much more peaceful man than it sounds. How's Bernie Herman? He had me worried when I left that he would just keel over from a stroke while reeming some anti-Semite a new b-hole. Any updates (replied, please) are very welcome!

> air back in 1943 and was named after the Tiffen, Ohio, Police
^--------- WRONG WRONG WRONG ----^^^^^^^^^^^^^^^
> force. (I wish I knew exactly WHY the station was named after that
> police department. Any netters know why?)

The call letters were changed from WJSV to WTOP in 1943, but there was no change in format or ownership. Since at least 1930, WJSV was a 10 kW two-tower station on 1460 kHz, with transmitter just W of of the S end of Washington National Airport. When the airport was built they had to move, and went to the present transmitter site at Wheaton, MD. When the AM band was expanded in 1941?, WJSV became 50 kW, class 1B clear channel, 3-towers. CBS owned the station during this period. The call letter change was associated with a promo "the stop at the TOP of your dial". It had NOTHING to do with any police department (except they might have bought the call from one). The DC police dept's call was WPDW. CBS sold half interest to the Washington Post in the mid-40s, and the other half a little later. The Post brought their WINX-FM (classical) station with them. It became WTOP-FM and duplicated the AM until given to Howard Univ (WHUR) toward the end of the depths of the FM depression in about 1971. The Post sold the AM at that time and it has been a case of "musical owners" ever since.

Another famous name at WJSV/WTOP was Arthur Godfrey, who was morning man from the 30s into the 40s. He was grandmother's favorite, and she died in 1942. In the early days Godfrey ran combo from the xmtr and signed the station on each weekday morning. Can't remember the whole story of what happened the morning he had the very serious car crash on his way to work.

By the mid 1940s, WTOP was one of the CBS O & O stations which had "Amercian Airlines' Music 'til Dawn" as an overnight easy listening program. It was locally produced at each station. The CBS O&Os were 50 kW clear channel (WCBS, WBBM, WTOP, KMOX, KCBS, ...).

Don't know for sure, but when he started late last year there was a kind of "reunion" atmosphere, as though some of the principals had worked together before - perhaps there. There were some callers who expressed "Welcome back" messages.

What I'm wondering is what became of the old crew. Seagraves disappeared pronto. Ross was overheard in the back for a while, then went on "Vacation" and has not been heard from since. Bell did snow reports for a few weeks, and is now conspicuously absent.

I'd always thought Z-100 was at the top of the ratings; so why the massacre on the morning show?

METRO WASHINGTON AM CALL LETTER HISTORY Thomas H. White
February 22, 1992

This is a review of all the AM stations which have operated in the greater Washington, DC area, from 1921 to 1992. Hopefully I've included every single station -- I would appreciate information about any omissions or mistakes.

First off, an overview of broadcasting over the last eighty years, and how it relates to the Washington area:

1912 to 1926 -- Beginning in 1912, radio was regulated by the Bureau of Navigation of the Department of Commerce. In the Washington area a number of government stations, including the Navy's NSF-NOF in Anacostia, D.C. and the Post Office's WWX in Washington, were the first area stations to conduct pioneering experimental broadcasts.

In December, 1921 the Commerce Department formally established a broadcast service, with 360 meters (833 kilohertz) set aside for entertainment broadcasts, and 485 meters (619 khz) designated for official government market and weather reports. (In the Washington area only WQAW ever received an authorization for 485 meters). The single entertainment wavelength meant that stations were supposed to negotiate timesharing agreements, to keep from interfering with each other. On at least one occasion this failed. During December, 1922 WDM and WJH started transmitting simultaneously on 360 meters on Sunday evenings, drowning each other out. The stations eventually settled their dispute, after receiving bad publicity nationwide for their lack of civic-mindedness.

The first broadcast station authorized in the Washington area was WJH, the White & Boyer Company, on December 8, 1921. WJH tied with four other stations as the nation's 11th to receive a broadcast licence. Both WDM, the Church of the Covenant, and WDW, the Radio Construction and Electric Company, received licences on December 22, 1921, tying for 25th place nationwide. I'm not sure which of these three stations was first to actually go on the air, although it may have been WDM, which began broadcasting church services on January 1, 1922.

In late September of 1922 a second entertainment wavelength of 400 meters (750 khz) was assigned for better quality, higher powered stations. Stations on the new wavelength were designated "Class B" outlets, while those on 360 became known as "Class A" stations.

About thirty stations nationwide would eventually qualify to use 400 meters, although none was located in the Washington area.

On May 15, 1923 the broadcasting service was greatly expanded, with the designation of a band of frequencies, in 10 kilohertz steps, from 550 to 1350 kilohertz. 550 to 1040 were set aside for Class B stations. Under the initial allocation 640 and 690 khz were assigned for use by Washington area Class B stations. Class A stations were assigned to frequencies from 1050 to 1350 khz, although existing stations were permitted to stay at 360 meters, as "Class C" stations. In November, 1924 the upper end of the broadcast band was extended from 1350 to 1500 khz, providing 15 additional Class A frequencies.

Although Washington was a major early center for broadcasting, the first stations to go on the air were operated primarily for publicity purposes, and had relatively short lifespans. None of the first ten broadcast stations, licenced in 1921 and 1922, survived past 1925. However, four current Washington area stations can trace their origin back to the 1920s: WWRC-980 (established June, 1923 as WRC), WOL-1450 (December, 1924 as WRHF), WMAL-630 (October, 1925), and WTOP (September, 1926 as WTRC in Brooklyn, New York).

Until mid-1922 new broadcast stations received three-letter calls. After that, the Commerce Department generally assigned Eastern stations four-letter calls with first "A" and then "B" as the third letter. Later stations generally received specially requested calls, normally four-letter, although a few, including WRC and WOL, got three-letter ones.

1926 -- Commerce Secretary Herbert Hoover knew his authority to regulate broadcasting was shaky under the 1912 Act, but despite his pleas Congress never acted to strengthen his powers. Finally, adverse legal opinions stripped away his regulatory authority. Scores of new stations took to the airwaves or jumped to frequencies of their own choosing. Chaos was reported nationwide -- although not in Washington. In the D.C. area no new stations were started up during this period, and only WMAL appears to have changed its frequency.

APRIL 27, 1927 -- The Federal Radio Commission, newly created by Congress to straighten out the broadcasting mess, began a year-and-a-half long process to reassign stations to non-interfering dial positions. During this period the FRC made some frequency changes in the Washington area, but overall this period was fairly calm and no area stations were threatened with deletion, unlike the more congested regions of the country.

NOVEMBER 11, 1928 -- The FRC finally implemented a nationwide reassignment of station frequencies, with stations now classified as Local, Regional, and Clear Channel. All five stations in the

Washington area, except NAA, were assigned new frequencies. However, none was required to share its frequency, which was the practice in more congested areas.

MARCH 29, 1941 - In conjunction with the expansion of the broadcast band to 1600 khz, a major frequency reallocation was implemented nationwide. Four of the six Washington area stations were shifted up in frequency, by 30 and 40 kilohertz.

POST-WORLD WAR II -- The Federal Communications Commission greatly reduced interference and economic standards, which resulted in thousands of new stations nationwide, especially in suburban areas. This sparked a major increase in the number of Washington area stations.

The Washington Area charts which follow list a total of thirty area AM stations currently in the Washington area, including Annapolis, Maryland and Manassas and Leesburg, Virginia. However, there are now more stations than can be economically supported. Some of these stations are currently silent and unlikely ever to return to the air.

Following are the major sources used for compiling the charts:

o Radio Service Bulletin. Issued monthly, beginning in January, 1915 by the Bureau of Navigation, Department of Commerce.

o Commercial and Government Radio Stations of the United States. Annual list issued as of June 30th for 1920 through 1931 by the Department of Commerce.

o Broadcasting Stations of the United States. 2/2/31, 1/1/32, and 1/1/34 editions, issued by the Federal Radio Commission.

o Radex magazine. Station lists appearing in the summer 1931 to 1941 issues.

o Radio Daily's "Radio Annual". Various issues from 1938 to 1964.

o Broadcasting Yearbook. Various issues from 1940 to 1970.

o Department of Commerce card files, and station "History Cards" on microfiche, at the Federal Communications Commission, 1919 M Street, NW, Washington, DC

o Education's Own Stations, by S.E. Frost, Jr., The University of Chicago Press, 1937. (Bliss Electrical School-WBES, Catholic University-WQAW, and Young Men's Christian Association-WABE)

o Personal records and recollections, 1968 - 1992

The format used in this review was originally developed by Bob Harrison, for his "Metro New York Call Letter History".

NOTE: Below are notes for the three Metropolitan Washington charts. The charts are generally arranged in frequency order. Stations sharing time on a common frequency are listed with periods separating the columns.

CHART #1
========

Five stations, all located in Washington, spent their entire lives on 360 meters (833 kilohertz): WDW was owned by the Radio Construction and Electric Company. At best it had only a limited career, since its only licence was a 30-day authorization which was never renewed; WPM's owner was Thomas J. Williams, an electrical supplier, who had put WDM on the air, and was located at 1324 New York Avenue, NW; WIL was operated by the Continental Electrical Supply Company, at 808 Ninth Street, NW; WEAS was one of two Washington stations operated by a department store -- in this case the Hecht Company at Seventh and F Streets, NW; WHAQ was owned by the Semmes Motor Company -- its address, unfortunately, was not listed by the Radio Service Bulletin.

Other early stations reviewed include WABE, operated by the Young Men's Christian Association in Washington; WMAL, originally owned by the M. A. Leese Optical Company at 712 Eleventh Street, NW; and NAA. NAA was built in 1913 next to Fort Myer in Arlington, VA, and operated by the U.S. Navy. In the mid-twenties NAA started to transmit on the broadcast band. Although its broadcasts occasionally included band concerts and speeches, it was most famous for its nightly time signals.

Two Washington stations, WRC, owned by the Radio Corporation of America, and WCAP, owned by Chesapeake and Potomac Telephone Company, shared time on 640 khz, a Class B frequency. WRC was originally located atop the Riggs Building at 3308 Fourteenth Street, NW. WRC and WCAP represent a struggle for the domination of broadcasting which occurred between RCA and American Telephone and Telegraph. RCA kept finding itself playing catch-up in the first half of the twenties. First rival Westinghouse set up a series of stations which pioneered the broadcasting industry. Then AT&T invented network broadcasting, using its telephone lines to connect a "chain" of stations, including WCAP, carrying programs that originated at AT&T's WEAF in New York. RCA countered with a small chain of its own, including WRC, crudely connected by telegraph wires to RCA's New York station, WJZ. In 1926 RCA bought out all of AT&T's broadcasting interests. As a result the "WEAF Chain" became the "NBC Red Network", the "WJZ Chain" formed the core of the "NBC Blue Network" and WCAP was deleted, allowing WRC to became a fulltime station. In 1984 RCA sold WRC, and the station became WWRC, although it still calls itself "WRC" except for the hourly legal ID.

The other stations on this chart, and the source of some of their callsigns, include: WGMS-570 Bethesda, MD ("Good Music Station");

WCPT-730 Alexandria, VA, which for a period of time was WPKX ("Kix Country"), for a few months was WRMR ("Remember Radio"), and for an even briefer period was WCXR ("Classic Rock") simulcasting its FM sister station; WREH-740 is currently under construction in Reston, VA; WABS-780, Arlington, VA (both WARL and WAVA commemorate the station's city of licence), which is claimed to have originated the term "Country Music", growing out of WARL's "Town and Country" program; WYRE-810 Annapolis, MD; WILC-900 Laurel, MD; WCTN-950 Potomac, MD ("Christ To the Nation"); WNTL-1030 Indian Head, MD ("International"), originally was WBZE, honoring WBZ-Boston, which is on the same frequency (WBZE's sign-off message suggested staying tuned to the frequency and listening to WBZ overnight); and WNTR ("News Talk Radio"), which in an earlier incarnation was WQMR ("Quality Music Radio"). This station was originally WGAY, named for its light-music format. It was later bought by a local DJ, Connie Gay, who wanted to own the station that was his namesake.

CHART #2
========

Five Washington stations that began on 360 meters (833 kilohertz) in 1921 and 1922 later moved to Class A frequencies. WJH was owned by the White & Boyer Company at 812 Thirteenth Street, NW; WIAY was operated by the Woodward and Lothrop department store, which presumably was located in the downtown shopping district; WDM was owned by the Church of The Covenant, a Presbyterian church located at 18th and N streets, NW. In the sixties the church was torn down and replaced by an office building. This building's current occupants include the National Association of Broadcasters and the Broadcast Pioneers Library; WMU was owned by the Doubleday-Hill Electric Company at 715 Twelfth Street, NW (Doubleday-Hill also had a store in Pittsburgh, PA, which operated KQV); WQAW belonged to Catholic University in Northeast Washington.

Two stations with interesting histories began operating in the mid-twenties: WRHF and WBES. WRHF ("Washington Radio Hospital Fund") initially located at 525 Eleventh Street, NW, was set up to broadcast to hospitalized veterans. It later became WOL. In 1950 WOL swapped calls with WWDC, whose owners had bought out the WOL's facility. WBES ("Bliss Electrical School") was located in Takoma Park, MD, using equipment purchased from Woodward and Lothrop when the department store discontinued operation of WIAY. In the middle of 1928 WBES was sold and moved to Salisbury on Maryland's Eastern Shore, where it became WSMD, expiring the next year.

Later stations include: WUST-1120 in Washington, named for its studio on "U Street", which earlier was WBCC in "Bethesda-Chevy Chase"; WMET-1150 Gaithersburg, MD, ("Metro"), whose earlier WMTG call reflects its location in "Montgomery County", while WJOK ("Joke") commemorates an innovative but unsuccessful attempt at an

"all comedy" format; WANN-1190 Annapolis, MD; WAGE-1200 Leesburg, VA; WFAX-1220 Falls Church, VA; WDCT-1310 ("D.C. Talk"), Fairfax City, VA (WFCR probably comes from its city of licence); WYCB-1340 Washington ("Your Community Broadcaster") which took over after WFAN lost its licence; WMZQ-1390, Arlington, VA, named after its sister FM station -- "WMZQ" was the closest thing available phonetically for "Music"; WNAV-1430 Annapolis, MD, home of the "Naval Academy"; WRHX-1440 Herndon, VA, which has never used its current call because it has been off the air for the greater part of a decade and no longer has a studio or antenna site. WOHN refers to the "Radio One" slogan it used before going under.

CHART #3
========

All the stations on this chart are recent ones, although not all are currently on the air. WTOP-1500 has an unusual history -- it turns out to be a carpetbagging Northerner. During the breakdown in broadcasting regulation in 1926 the "Twentieth Assembly District Regular Republican Club, Incorporated" put 50-watt WTRC on the air in Brooklyn, New York. Someone may have felt they would have more political clout if the station increased power and was located closer to Washington, for in late 1927 the station moved to Mount Vernon Hills, VA, and was now rated at 10,000 watts. A few years later the station moved to Alexandria, VA and a couple of years after that it made it to Washington. The current call WTOP promotes the station location at the top of the radio dial.

The remaining stations have more conventional histories. WOL-1450, Washington originally was WWDC until its owners swapped facilities with WOL; WPRW-1460 Manassas, VA and WPWC-1480 Dumfries, VA both have calls that document their location in "Prince William County" (WQVA comes from WPWC's original city of licence of Quantico, VA); WDAW-1530 hopes to go on the air someday in Haymarket, VA; WMDO-1540 is "Radio Mundo" in Wheaton, MD; WPGC-1580 hails from Morningside, MD in "Prince Georges County", and WINX-1600 closes out the dial in Rockville, MD.

771. Radio Watch-Buffalo/Toronto

Newsgroup: rec.radio.broadcasting
Date: 1994-03-05 04:40:12 UTC
From: ag365@freenet.buffalo.edu
Message-ID: <2l92fc$p38@vixen.cso.uiuc.edu>
Source record: 40926

Some news for ya-if you're not trying to cope with another
Nor'easter:

1. WBEN(930 AM)has switched their positioner slightly-from
News 930 to NewsTalk 930. That change was made the same day the
Bills' radio rights jumped to them. Mark Wozniak(of WBFO-FM)
earlier noted that he hoped either John Murphy(SD at WKBW-TV)or
Howard Simon(same position at WBEN)would be color commentator for
the games. Looks like John will get the honors,as he's been
doing top-of-hour IDs for 'BEN(BTW,to clear up the top-of-hour
tone:'BEN also uses it at the bottom of the hour). I'm not sure
if 'BEN will get the Sabres rights as well,but-if Keymarket's
proposed purchase of WWKB-AM(talk/sports;The Big 1520)and
WKSE-FM(dance-based CHR;Kiss 98.5)goes through,it wouldn't
surprise me if they bid for the Sabres. KB has been sticking
it to 'GR in regards to them losing the Bills rights,having
started to get responses to what WGR should have on(some have
been nasty,i.e.executing Art Wander;while others have proposed
playing Elvis). Then again,they've been sticking it to 'GR for
over a year.

2. Darrian Chapman has been named the new color analyst for
the Buffalo Bisons broadcasts on WGR(news/talk/sports;
NewsRadio 55). Chapman will team up with Pete Weber,heading into
his 11th year as the Herd's voice.
Chapman has also handled the Buffalo Blizzard's games on
WWWS-AM(business/talk;Your Money 1400)as well as the Buffalo
Bandits and Univ.at Buffalo basketball games. The 29-year-old
has also worked in a variety of posistions,including PR,since
1988 in the Bison organization.

> to carry all Bruins games conflicting with Celtics' on 'EEI and did
> carry one Bruins game(Feb. 14), has closed the door on that arrangement
> and the Bruins' conflicts are back on Greater Media's WMEX 1150.

Damn. I've been waiting and waiting and waiting for that stupid sale to go through. Did the Celtics get too uppity in their price demands (as was initimated here earlier)? Once again the Bruins conflicts are on a station with a (seemingly) .5 watt of power that's bloody hard to get outside of Boston proper.

[This is a shame, y'see, as the Celtics are looking like NBA Draft-bait this year -- they'll barely be able to get over 30 wins -- while the Bruins are riding high in the top of the eastern division of the NHL...]

>

> 4 pro sports teams on its 2 AM stations by September plus major
> local talk-show personalities(Howie Carr,Jerry Williams,Tom Leykis) and
> a syndicated powerhorses such as Rush, Gene Burns, Bruce Williams.
>

And all 4 of those teams will be sentenced to stations that ALSO have extremely poor covereage to the west of Boston -- _precisely_ where a large swath of the potential (and affluent) market is. Sigh. Oh for the days when WBZ (50KW clear-channel) covered all four...

<set cynic mode on>
Maybe the time has come for talk/sports radio to move from static-infested, directional-and-low-wattage-at-night-limited AM stations like WEEI/WRKO/WHDH and move to a nice, strong FM signal that is otherwise

unable to find a niche...? Nahh, never happen...
<set cynic mode off>

>* Boston was the last Top 10 market to welcome the brand new ratings service --
> AccuRatings, which has 'accurate' in its name...Unlike Arbitron,which
> has 'arbitrary' in its name and relies on written diaries, Accuratings
> goes only with telephone-driven results..

If only some company could come up with a box that would work like the Nielsen recorders -- they would sit next to/under/on top of a radio and deduce the station being listened to by finding what frequency the radio's own IF oscillator is running at. Admittedly, this will only work if (a) the radio puts out enough IF leakage, and (b) it uses the "standard" IF differences of 10.7 MHz or 455 KHz.

Variants of the boxes could be developed for cars, as well. Unfortunately, this scheme wouldn't work for truly portable radios (headsets, walkpersons, etc., but it might be a start at trying to get a truly accurate picture of radio listening.

Subject: Classical 1550-AM
From: Lance Ballance (lancebkost@aol.com)

Orv Lyttle writes:
"Does anyone know the identity of the AM station
on 1550 that constantly broadcasts classical
music ? We can hear it daily on the Pacific
west coast."

According to my trusty M Street radio Directory,
That "should" be KKHI-AM, San Francisco.
It is a simulcast of KKHI-FM 95.7. I could be wrong but the AM
is a 50KW directional signal. Where it's directed, I know not
where.. I can pick them up at night sometimes in LA.

'Til next time...

Source record: 40930

One thing that Tom Lacko didn't mention in his comments about DC station news was the sacking of WPFW's new general mgr., Phil Watson.
Feb. 27, Pacifica (I assume the nat'l Pacifica board) decided that Mr. Watson did not pass his probationary period. He'd only become the new station mgr. back in Aug. or Sept., after the selection committee had spent many

months on the process.
The winter fundraising drive didn't raise much money, and, apparently WPFW's finances were in a bad way, so Pacifica (the nat'l board was mtg. in DC last week) decided to lay off Mr. Watson.

(Who sez non-profits can't be as turbulent as the commercial sector?)

: which is called Rhodes, funnily enough, but we want a new name that's
: catchy, exciting and young. Any ideas based on radio station names in
: the USA or elsewhere would be much

It seems that in the USA that adding "Q" or "X" to your frequency is
a popular (and idiotic) way to name a station. Various permutations
are also acceptable. For your station I suggest:

Q88 or X88 or QX88 or 88Q or 88QX or maybe Q88X. :-)

Thomas
(P.S. never use your *exact* frequency either. Any number in the
general vicinity will do, i.e *never* use 103.5 but use 104 instead,
or perhaps 103, e.g. use QX103 if your frequency is 103.5 Mhz)

WXXI-AM (1370(?) kHz) and WXXI-FM (91.5 MHz) in Rochester, NY are a public radio duopoly with almost all the NPR programming on WXXI-AM. Classical music, which is far more popular than NPR's liberal programming in Rochester, is on WXXI-FM, which has a much better signal and can even be heard across Lake Ontario.

Since WXXI-AM is in the graveyard portion of the AM band and has a relatively weak signal, I doubt that it can be received easily throughout the six-county Rochester metro area (Monroe, Wayne, Ontario, Livingston, Genesee, Orleans)... and I'm sure it can't be received easily anywhere else.

--
John R. Grout | INTERNET: j-grout@uiuc.edu

[Moderator's Note WXXI is listed in the M-street guide as 5000 watts full time Directional antenna at night. Bill]

781. New FCC Fines SChedule released (REPOST)

Newsgroup: rec.radio.broadcasting
Date: 1994-03-06 03:04:24 UTC
From: WEOS-FM <BLACK%HWS1%HWS.BITNET@VM1.NoDak.EDU>
Message-ID: <2lbh7o$pbc@vixen.cso.uiuc.edu>
Source record: 40936

[Moderator's Note: This was posted last fall, since we have so many
new readers, I thought it deserved another hearing. Bill]

Forwarded message:

The FCC released its updated fine schedule this week. In most cases, fines were
either lowered or unchanged, the remainder being New. The top base fine is now
$20,000 down from $25,000, but the FCC still has all the power to raise or
lower the base amount. Some highlights:

New Fines:

Violation of Alien Ownership Rule $20,000
Fraud $12,500
No licensed Operator on Duty $10,000
Failure to maintain a Dir. Pattern $10,000
Violation of Hoax rules $10,000
Violation of tower "fencing" rules $10,000
Failure to Monitor or Control XMTR $ 5,000

decreases of note:

Failure to Maintain REcords $ 1,250 Down 50%
Failure to ID station $ 1,250 -50%
Unauthorized discontinuence of
service $ 5,000 -50%
Improper EBS Equipment $ 8,000 -20%
EXCEEDING POWER LIMITS $10,000 -20%

No change in Indecency, $12,500, Unauthorized operation, $20,000, Malicious
interference, $17,500, Failure to coordinate frequencies (RPU,etc.) $10,000.
Violation of Underwriting Rules, $2500.

All these fines are base fines, per occurence. They can be upward or downward
adjusted up to 90%.

: WEEI/WRKO/WHDH and move to a nice, strong FM signal that is otherwise
: unable to find a niche...? Nahh, never happen...
: <set cynic mode off>

Huh??? I thought WEEI had a full 5 kW at night on a good, low frequency, and WRKO and WHDH ran their full 50 kW (possibly directional) at night. Beats the pants off the three stations in Atlanta that run 50 kW during the day, and then drop to 1-2 kW, 500 w, and 300 w, respectively, at night -- or the other one that drops to 10 kW but has to use an 8-tower directional array to protect stations from Cuba to Boston (including WRKO!) to San Francisco and to tolerate interference from a nighttime 50 kW signal on the same frequency about 400 miles to the north in North Carolina and beamed southward (!) in the general direction of Atlanta.

Yes, there's always WSB-AM 750. But at night, there are only 2 other stations (besides the 50/10 mentioned above that has a pencil-thin directional beam at night) that run as much as 5 kW; one on 590, the other on 1380. The latter covers the northern part of the city rather poorly. Everyone else is 1 kW or less -- several, the last time I checked, run less than 100 watts. Remember, too, that Atlanta has some of the worst ground conductivity of any place in the country -- which makes a tough situation even worse for the local AMs.

: If only some company could come up with a box that would work like the
: Nielsen recorders -- they would sit next to/under/on top of a radio and
: deduce the station being listened to by finding what frequency the radio's
: own IF oscillator is running at. Admittedly, this will only work if (a)
: the radio puts out enough IF leakage, and (b) it uses the "standard" IF
: differences of 10.7 MHz or 455 KHz.

: Variants of the boxes could be developed for cars, as well. Unfortunately,
: this scheme wouldn't work for truly portable radios (headsets, walkpersons,
: etc., but it might be a start at trying to get a truly accurate picture of
: radio listening.

Actually, AM car radios have used a 262 kHz IF frequency. And I believe that many FM radios have changed from a 10.7 MHz IF frequency to something *much* lower than that -- a result of the development of special ICs for portable stereo radios, if memory serves me correctly.

I would appreciate hearing from anyone who has correct, up-to-the-minute info on IFs if my assertions are wrong.

: radio's hands--it's in the audience's hands. (I hope I didn't read into
: your comments...those are just my perceptions/opinions.)

: It's way too late........

Naw, it ain't too late for anything. And smug, self-absorbed audiences aren't necessarily to be mocked. We're each a part of lots of different audiences. In the great Venn Diagram of life, my various tastes overlap with the tastes of many other people. Just maybe, there's a way to create my own 'programming' and get it to the other people who would enjoy it in some way that makes me a profit.

The point to my initial rant (and to my CD Magazine) is that if radio can't do what I want it to, we should each try to invent or co-opt some other medium. My Honda won't go off-road, but I don't curse it out. Instead I get a mountain bike or borrow my brother-in-law's Jeep. The kids in Santa Cruz who are loading sound and album-art files onto the i-net are trying to design their own 'off-road vehicle'. I just want to see more people acknowledge the realities of capitalism and physics and then create better, more economical machines to connect talented artists with appreciative audiences.

The key is the phrase 'appreciative audiences'. Sure most people have boring taste. Whitney Houston (and her equivalent in any generation) will always sell more albums than anything I want to listen to. But even if the number is RELATIVELY small, I KNOW there are more people out there who share my taste. The only relevant questions are:
1. How many of them are there?
2. How difficult (i.e. expensive) is it to reach them?
3. Is there some way to cover the costs of doing so?
And you can get a positive answer to question 3 either of two ways: by having the audience cover the cost of their own entertainment, or by

selling access to this audience to someone else (i.e. to advertisers).

'Nuff babbling. I'm glad you share my view that audience is everything. I'd just put a more positive spin on your comments because I believe there are small audiences who share my tastes or who would if I presented them with some of the stuff I like. It's just that radio ain't the medium in which to accomplish this.

>The call letters were changed from WJSV to WTOP in 1943, but there was no
>change in format or ownership. Since at least 1930, WJSV was a 10 kW
>two-tower station on 1460 kHz, with transmitter just W of of the S end of
....
>Another famous name at WJSV/WTOP was Arthur Godfrey, who was morning man from
>the 30s into the 40s. He was grandmother's favorite, and she died in 1942.
>In the early days Godfrey ran combo from the xmtr and signed the station on
>each weekday morning. Can't remember the whole story of what happened the
>morning he had the very serious car crash on his way to work.

As has previously been noted here, a 12-cassette set of the recording of an entire broadcast day at WJSV is out there. Has Godfrey's show, all the CBS network, and local stuff, an FDR speech (the reason it was recorded)...for those too young to remember classic radio (I'm 29) it's an invaluable aural experience. I enjoy it immensely. I think it's put out thru NPR's "Wireless" catalog. (No commercial plug here, just saying I dig it.)

Source record: 40942

In AIRWAVES #531, Bill Sobel writes:

BS>> There are two AM NPR stations that I am personally aware of.
BS>> WNYC 820am in New York City...not very powerful, especially at BS>>
night. They run mostly news and talk programming throughout the BS>> day
and repeat at night.

BS>> WEBR in Buffalo (not sure of their frequency) is an NPR station BS>>
that happens to be all news (Like WCBS or WINS in New York)

FYI, WEBR is on 970 kHz.

I also am "personally aware" of two other AM stations which carry NPR
programming the Midwest -- because I've worked for both of them. They are:

WKAR - East Lansing, MI (870 kHz, 10kw, directional, days)
KNOW - Saint Paul, MN (1330 kHz, 5kw, directional, fulltime)

Among the other AM'ers in public radio are some historic stations:

WOI - Ames, IA (640 kHz)
WHA - Madison, WI (970 kHz)
WILL - Urbana, IL (580 kHz)
WBAA - West Lafayette, IN (920 kHz)

And that's a *very* partial list (I don't have a directory handy that
breaks out public AM-vs.-FM).

Can't pick up WRQK, so I don't know what it's like. But WNCX the classic rock/Howard Stern station, wouldn't play Pearl jam, Nirvana, or Cracker yet...give em about 4 years. Hell if you want to hear more of that stuff you could listen to WENZ=107.9 ("The End") any time and hear that stuff too, _or_ you could listen to WJMO-92.3 and hear that kinda stuff intermixed with the latest rap and dance after 7 pm. Can you say oversaturation?

Further research indicates WIL, Washingotn, DC was deleted 9/13/24,
so that would have been the earliest the station in St. Louis could
have started using them.

The antecedent of today's WRTH is WEB, 4/5/22.

Thanks for the info. For a time, WIL-AM and WEW-AM in St. Louis both claimed to be the first radio stations in St. Louis. The dates mentioned in the news article for WIL/Washington, D.C. seemed to match my recollection of some important dates for WIL/St. Louis. But, maybe my memory is faulty. It wouldn't be the first time.

There is another call sign reuse story here, by the way. WIL-AM had been broadcasting country/western music for over 20 years when they changed formats, leaving country/western exclusively to their FM station. When WIL-AM switched to old MOR standards, they changed their call sign to WRTH-AM, which belonged to another old St. Louis station that made quite a name for itself during the '60's with a similar format at 590 AM. I don't know how long ago the station at 590 dropped the WRTH call sign, but it was probably several years ago, at least.

One possible source would be:

NETWORK MUSIC, Inc.
11021 Via Frontera
San Diego, CA 92127

I don't know what their rates or their international policy is, but they
have a library called "Shockwaves" that contains what you were looking for.

Disclaimer: I'm not affiliated with Network Music or any A/V organization;
the fact that I have a couple of their CDs just the same is somewhat
peculiar. :-o

PROFESSIONAL EXPERIENCE

Dec. 1990 - Feb. 1991 560/CHVO RADIO, Carbonear, Newfoundland
Evenings
Transferred from Gander Station
Duties: On-air, personal appearances, voicing commercials, and reading of news during shift.

May 1989 - Dec. 1990 650/VOCM RADIO, Gander, Newfoundland
AM and Mid-Mornings
Transferred from Grand Falls/Windsor Station
Duties: Responsible for day to day operational functions in co-operation with station manager. These included the calling of station clients for updating current commercial copy, making sure staff

are aware of upcoming functions and their roles, and maintaining contact with flagship station on a daily basis. On-Air, personal appearances, writing, producing, voicing and carting ofcommercials, collecting, transcribing and reading of news during Saturday on-air shift, collecting and scripting of sports.

April 1982 - May 1989 620/VOCM RADIO, Grand Falls/Windsor, Newfoundland
Saturday A.M. shows, mid-mornings, and P.M./Evening drive.
Music Director
Duties: On-air shifts, personal appearances, collecting and reading of news during Saturday on-air shift, responsible for music rotation, the preparing music and scripting of Sunday Gospel show, voicing-producing-and-carting of commercials. Limited working knowledge of computers. On the spot news reporting, driving company vehicle for on-air traffic watch.

May 1981 - Nov. 1981 CHSJ RADIO, Saint John, New Brunswick
Evenings and all nights

Sept. 1980 - May 1981 CFCB RADIO, Corner Brook, Newfoundland
Evenings and all nights

EXPERIENCE:

Have 11 years experience in radio. Prior to that, I had

1 year's experience in grocery store, stocking shelves produce and carrying groceries to vehicles.

Two years selling experience with Sears.
-Products such as: paints, hardware, toys, records and sporting goods.

Work experience also includes four years as a port worker (i.e., longshoreman).

Other areas of employment: Airport security.

VOLUNTEER EXPERIENCE:

During employment with VOCM, served as MC in raising money for various organizations including:

Children's Wish Foundation, Lions CLub, Kiwanis Club, McDonald's Family Restaurant, Tim Horton's Donuts, local Fire Departments, and the VOCM Cares Foundation.

Served as president of the Beothuck Housing Co-op in Grand Falls-Windsor for nine months.

Served as a facilitator in 1992 with "Rainbows for All God's Children", a support group helping children overcome the death of a

parent or separation of the family unit.

Was editor of the Diocese of Saint John newsletter, "Butterflies Are Free", responsible for putting together for publication every three to four months.

REFERENCES and Air Check:

Available upon request.

If anyone has any knowledge of any openings, a reply would certainly be appreciated by contacting me at the above address or at J5fg@acad1.unbSJ.CA

797. An NPR AM list addition

Newsgroup: rec.radio.broadcasting

Message-ID: <2lec3o$8ur@vixen.cso.uiuc.edu>
Source record: 40852

On the subject of AM NPR affiliates, I remember visiting the studios of KBBI in Homer, Alaska back in '89, and it was a fine little AM set-up. The PD back then was a woman whose name escapes me at the moment; we talked vaguely about swapping programming (I was working in Baltimore then), but it never went beyond the talk stage. I imagine outside of satellite broadcasts, AM and shortwave are about the only radio worth pursuing out there in all those mountains.

798. AM NPR stations in the NE

Newsgroup: rec.radio.broadcasting
Date: 1994-03-07 04:55:21 UTC
From: "Michael Black...WEOS-FM" <BLACK%HWS1%HWS.bitnet@CUNYVM.CUNY.EDU>
Message-ID: <2lec3p$8us@vixen.cso.uiuc.edu>
Source record: 40853

In reference to WXXI-AM (1370, 5000 watts, DA-N), the night siganl is very bad. In fact, people in the sharp null at night, relatively close to the transmitter site can pick up other 1370's better than WXXI. The station was bought in 1984 and used to be WSAY. The day non-DA is not bad, but night is bad. They are trying to relocate their towers south of the city of Rochester in Mendon, but nothing yet, other than studies. The 'burbs have closed in around the current site in Brighton and this makes the current site a valuable real estate commodity. The night pattern has two very sharp nulls and the patern look s like
a squashed clover leaf. The station runs NEWS/TALK to about 10PM and than Jazz t il
5AM M-F.

WXXI FM (91.5) is NOT NPR. They do have an APR(soon to be Public Radio International (PRI)) affiliation, and as mentioned, are 99% classical or so. They do air a Prairie Home Companion, and a new age program or two. However, no NPR programs. Their news effort is limited to AP radio and local inserts.

WEOS(FM) in Geneva is NPR & APR, and provides a fill in service between the Syracuse market and Rochester market, and a different music mix (modern, AAA, Jazz, etc). I am not sure about the Buffalo stations, but with the exception of WXXI AM & FM, WEOS(FM) is on 24 hours a day. WCNY Syracuse, WRVO Oswego, WSKG Binghamton (and its repeater in Ithaca WSQG) all sign off the air at midnight or 1AM. WAER in Syracuse, Jazz and NPR, I believe is also on all night. Our late night (2AM or so to 6AM is BBC World Service, except on Saturday Night /Sunday Morning, when we air Felix Hernandez's Rhythm Revue from NPR (WBGO Newark program).

: I also am "personally aware" of two other AM stations which carry NPR
: programming the Midwest -- because I've worked for both of them. They are:

: WKAR - East Lansing, MI (870 kHz, 10kw, directional, days)
: KNOW - Saint Paul, MN (1330 kHz, 5kw, directional, fulltime)

: Among the other AM'ers in public radio are some historic stations:

: WOI - Ames, IA (640 kHz)
: WHA - Madison, WI (970 kHz)
: WILL - Urbana, IL (580 kHz)
: WBAA - West Lafayette, IN (920 kHz)

: And that's a *very* partial list (I don't have a directory handy that
: breaks out public AM-vs.-FM).

None in Missouri, but a couple of public-radio licensees in Kansas should be noted:

KKSU - Manhattan, KS (580). This is actually a share-time arrangement with WIBW Topeka. WIBW signs off at 12.30 pm, turns off its transmitter, and KKSU turns on *its* transmitter. On it stays 'til 5.30 pm, and then the process is reversed. This is one of the few surviving share-time arrangements on AM, and the other one is for...

KFKU - Lawrence, KS (1250). This is a share-time *and* transmitter arrangement with WREN Topeka. However, WREN left the air in 1990, and that apparently put KFKU under, too. Even when the arrangement was active, it was for only one or two hours each evening. Both "stations" use the same transmitter. M Street Directory currently lists KFKU as off the air.

800. Radio Watchers -- Mid-Missouri

Newsgroup: rec.radio.broadcasting
Date: 1994-03-08 08:26:24 UTC
From: Mark Roberts <transvox@TYRELL.NET>
Message-ID: <2lhcrg$ifm@vixen.cso.uiuc.edu>
Source record: 40855

Scattered observations from a very brief trip (with relatively little radio listening) to central Missouri....

Columbia now offers four stations with some form of alternative programming.

KCOU (88.1, University of Missouri-Columbia Residence Halls Association) has changed its call letters to KEJJ. The change caught local commercial broadcasters off guard. Some of them have coveted the calls for years (COU is the FAA designation for Columbia Regional Airport).

More on the call letter change in a future posting.

KOPN (89.3, local open-access station) has implemented its planned change to a set playlist during morning and afternoon drive. The changes have elicited favorable comments in the local media. (More about that in a future posting. Sorry to be such a tease.) Saturday programming for Columbia's African-American community appeared to remain intact.

KWWC (90.5, Stephens College) offers a mix of retro (early 80s) rock, late 70s disco, and relatively up-to-date dance and techno during evening and weekend hours. It also features a LOUD 60 Hz hum in the main microphone channel.

KBXR (106.1, licensed to Ashland, commercial AAA) has reduced the amount of rhythm-and-blues music clogging its playlist and has instead added more modern-rock based tunes, including those from the Breeders, the Counting Crows, the Lemonheads and the Cure. The station also had quite a few more commercials (routinely three minutes at every break) than it did just before Christmas.

Formats NOT offered in Columbia or the surrounding vicinity include CHR/Top 40, adult standards, or adult contemporary (other than hot AC on KARO). It does seem to be an unusual market.

The St. Louis format swap between WKBQ and WKKX (now at 104.1 and 106.5, respectively) obviously has given WKBQ the short end of the coverage stick. Still, I heard numerous promotions for Steve and D.C. through the static *and* even part of a remote conducted by them at a car dealership. (Steve and D.C. were the morning hosts fired by the old Q-106.5 after uttering a racial slur to a black female caller on the air.)

Also jarring is to hear WKBQ identify as "Q-104"--the old slogan for Kansas City's KBEQ before it went to young country.

Despite indications in the St. Louis Journalism Review that KPNT (105.7) had made some programming changes, I heard little that was different this weekend. The top-of-the-hour IDs were the same, the people were the same, and the format and playlists for the modern rock station seemed pretty much the same. KPNT was heavily promoting its one-year

anniversary (in the format) on March 7.

The bizarre little ads for 93.9 placed in the Columbia Daily Tribune
(as reported here on 2/26/94) were indeed for KACJ, a new station soon to
open in Boonville. The station's transmitter site is near the
Boone-Howard county line, which should give its 6,000-watt signal
city-grade coverage in most of Columbia. No format has been announced.

I was suprised to see that the station where I spoke my first words was fined, for pre-approval of callers permission. I remeber being a 17 year old kid in my home town and told that Paul McCartney was "too heavy" to be played at 5:30 am. I also remeber Don Chaney trying to force this poor little boy to sign a no-compete to do overnights.....I guess there is some truth in long term karma......just the call letters brought back memories. Know the rules boys.

Peace
Dale Dudley

Since your's is a college station, I see no need to sound corperate unless you have to. Why not have fun with the name: The Rhoade Warrior. Yeah, cheesy. For some equally corny sloagans: On the Rhoad Again With 88fm, or Rhoad Trip. I dunno, just have some fun with it though.

805. Kansas City History

Newsgroup: rec.radio.broadcasting
Date: 1994-03-08 08:26:33 UTC
From: Mark Roberts <transvox@TYRELL.NET>
Message-ID: <2lhcrp$ifs@vixen.cso.uiuc.edu>
Source record: 40860

Barry Mishkind asked me for some information about early Kansas City radio, using 1928 as the baseline. The best I could do was a 1930 base date (using a photocopy of RaDex from 4/30). This is something I plan to refine as time permits. For the interim, I am sharing it with the universe in case anyone else might be interested:

Footnote Station Frequency Post-1941 Fq* Present Fq Other
(1) WIBW 580 580 580 Topeka, KS
Share-time w/ KKSU
(2) WDAF 610 610 610
(3) KFEQ 680 680 680 St. Joseph
(4) WHB 860 880 710
(5) KMBC 950 980 980 Now KMBZ
(6) WREN 1220 1250 1250 Was Lawrence, KS
Now Topeka, KS
(7) WOQ 1300 (1330) (1330) Off air in 1934
^--of KFH Wichita, had share-time w/ WOQ
(8) KWKC 1370 ---- ---- Only in RaDex

Footnotes:
(*) Most stations changed frequency 3/29/41 as result of Havana agreement.
(1) 1930 owner Topeka Broadcasting Assn. Later owned by Capper Publishing Co. and bought in the 1950s by Stauffer Publishing Co., its present owner. Still shares with KKSU (formerly KSAC, also listed in 1930 RaDex). KKSU has the frequency 12.30 pm-5.30 pm weekdays. Has FM and TV facilities. AM: 5 kW, DA-N. Format farm and country.
(2) Started by the Kansas City Star in 1922, owned by the Star until 1957, when WDAF and WDAF-TV were sold to Taft Broadcasting of Cincinnati after losing antitrust case. Now owned by Great American (the heavily leveraged successor to Taft). Has FM and TV facilities. AM: 5 kW, omnidirectional fulltime, stereo. Format full-service country. Transmitter moved to 79th & Mission Road in Johnson County, Kansas, in 1947.
(3) Earlier Radio Service Bulletin lists as Oak, Nebr. Owned by Scroggin & Co. bank, later owned by St. Joseph News-Press, now owned by Beach-Schmidt Group, a chain based in Hays, Kansas. AM: 5 kW, DA-2. Format mixed news/talk and country.
(4) Started in 1922 by Sweeney Automotive School (across from Union Station). Owned in 1928 by Sweeney and in 1930 by WHB Broadcasting Association. Purchased in 1931 by Cook Paint & Varnish Co. Purchased by Todd Storz chain in the early 1950s, later owned by Shamrock Broadcasting (Roy Disney interests). Now owned by Kanza, Inc., based in Carrollton, Mo. AM: 10 kW-D, 5 kW-N, DA-2. Was stereo under Shamrock ownership. Dominant Top-40 station in 50s, 60s, and early 70s. Now farm and country.

(5) Owned by Midland Broadcasting Co. in 1928 and 1930. Traces ancestry
to amateur station (9XAB) started by Arthur B. Church in 1921,
and claims to be Kansas City's oldest station. Went commercial in 1922 as WPE,
later moved to Independence as KFIX and KLDS (owned by Reorganized Church of Latter-Day
Saints). Arthur Church regained ownership (as Midland) in 1928,
moved it back to KC as KMBC. Bonneville (owned by the Utah Latter-Day Saints--
Mormons) purchased in 1962. Has FM. AM: 5 kW, DA-N. Format news/talk.
Studios and transmitter at 50th & Belinder, Westwood, Kansas. Bought
KCMO-AM/FM last year, forming a duopoly.
(6) Started by Jenny Wren Co. of Lawrence, Kansas. Purchased by Alf Landon
(1936 Republican presidential candidate) and moved to Topeka during 1950s.
The Kansas City Star had proposed a purchase in 1935 but was denied on
grounds of monopoly by the FCC.
Landon interests took the station off the air in 1990. Reactivated in
1993 by Michael Glinter. AM: 5 kW, DA-N.
Still nominally has share-time arrangement with KFKU Lawrence (as it did in
1930), but that has not been used by Kansas University in at least three years.
(7) Started by Western Radio Co. in 1922, purchased by Unity School of
Christianity in 1924. Surrendered license in 1934. Shared time with KFH
Wichita.
(8) Only mention is in 1930 RaDex, listed as owned by Wilson Duncan
Broadcasting Corp. Nearest modern-day 1400 station is in Emporia, KS (KVOE),
listed in 1941/42 as KTSW.

Other Notes:
* Station WLBF went on the air in 1925, but went bankrupt three years later.
The Star cites KCKN (at 1340 in 1980) as its successor. KCKN was started by
the Capper publishing interests in the mid-1930s. It is now KNHN, a
news/talk station.
* Station KCMO, now our only 50,000-watt signal at 810, did not start
until 1936 (at 1450 and then 1480). It moved to 810 and its present
transmitter site in far northern Kansas City (formerly a town called
Nashua) in 1947 or 1948.

N> I would appreciate hearing from anyone who has correct,
N> up-to-the-minute info on IFs if my assertions are wrong.

The older (pre-1960?) car radios used 262, the current ones are on 455 kHZ
IF.

I haven't heard about any change in FM IF frequencies, though.

/* Written 12:24 pm Jun 3, 1993 by andyp@glas.apc.org in gn:media.issues */
/* ---------- "PRIVATE MEDIA IN RUSSIA???" ---------- */
LADIES AND GENTLEMEN,

We're asking you to distribute this information in the Media to support the word freedom in Russia and in former USSR as well as existence free and private radio stations in Russia like our one is. The only radio stations , which can afford themselves to present to their listeners the opportunity without any censorship or editing, to socialize live, with any leading figure in any area of social life, business and politics. The only radio stations , which are unprotected now from the financial tyranny and financial blackmailing from the side of ex-State structures , which are the monopoly owners of the frequency resources and broadcasting facilities in Russia.

There is already more than two years that our radio station ("Resonance") is forced to broadcast illegally. The State structure called "The License Comity," which is ex-Gosteleradio, monster-monopoly of TV and radio broadcasting on the USSR territory, pretended to provide (quote from the License Comity Charter:) "Demonopolisation of Radio and TV broadcasting structures," constantly refusing to determine our radio station status. The thing for , which first and foremost this Comity pretended to be established. The thing, which should be determined and licensed during 3 months from the beginning of the broadcasting of the radio station, following the current legislation and The License Comity Charter. As the "struggler against the monopolizm" they take the only frequency we worked on during half a year and made big audience, and gave this frequency to the radio station , which already had one and pretended to have two more. But. This radio station defended the directors of State sector of economy, which was 80% of the whole economy of ex-USSR. The "struggling against monopolizm?"

From one side this situation of uncertainty keeps away from our radio station any investor who want invest his money to start entering to Russian market. From another side, the private property on the frequencies and broadcasting facilities is officially prohibited and distributed amidst ex-USSR Gosteleradio

and ex-USSR Ministry of Communication half-State mafia, tied with mutual cover-up. This gives the monster monopoly to their hands. This means no limits for rent prices for private broadcasters, no rules to keep the contracts conditions, no guarantee that in any moment they want your transmitter will be switched off (we had numerous case of that). They dictate the conditions of contract to rent the facilities, they dictate prices. Any objection against violation of the contract conditions or signal parameters meets the proposal of their side for us: to break the contract and to try to find the partner in any other place.

In the present conditions of super-monopolizm it sounds like a jeer.

One of our ex-potential companions, the French radio, after learning our budget, told us that for that money they can afford themselves to keep 3 radio stations like our one.

We don't want to built any supposition about this situation, but it's clear, that ex-State structures don't want to loose such the instruments of influence of covered-up pressure on the Media, as the financial one, and legal one, otherwise they didn't force us to broadcast ILLEGALLY, having opportunity to prosecute us for this.

SO THE WORD FREEDOM IS THE SHEER MYTH IN THESE CONDITIONS.
WE CAN RATHER TALK ABOUT THE LITTLE EXTENSION AND MAKING LITTLE
MORE FREE THE CHAIN RETAINING THE ELECTRONIC MEDIA NEAR THE LEGS
OF STATE STRUCTURES.

Sincerely,

Crew at radio "Resonance"
Dpt.Editor-in-Chif Andrei V.Prokhorov

809. Wanted: Old "ON THE AIR" Radio sign...

Newsgroup: rec.radio.broadcasting

My friend is looking for an old "ON THE AIR" light, the kind that are still used in radio and television studios possessing red block letters on a white background.

The OLD signs he's looking for are encased in wood and have 3 "addidas" stripes on the side, in keeping with the streamlined styles of the 1930's.

E-mail a response, please. Name your price.

* ARS' WRKO AM680 is in the process of more changes in its all talk line-up for the 3rd time in less than a year...A nationally well-known talkshow personality, Tom Leykis, departs The TalkStation later this week. Leykis was doing 10am-2pm show on 'RKO since May '93. According to the Sunday Boston Herald, Tom has signed a deal with Westwood One Radio Network to host a syndiacted show based in LA. Leykis never really made on-air impact on his audience and it was quite obvious during summer and fall Arbitrons. He was losing and losing fast(You try to come across as an angry, crude, absolutely not funny, bitter-sounding, Imus/Rush/Stern/-wannabe for 20 hours a week on the only midday local talk-show in town. See how long you last in the market? :-)

Leykis was highly critcized (and rightfully so) by the listeners, local press and various media
outlets in the city during the most tragic episode of Boston's sports history that took place this past summer - death of the Boston Celtic player Reggie Lewis. The day after Lewis' death, Leykis went on the on-air charging talkshow hosts on the Celtics-owned SportsRadio outlet WEEI 590AM with having no journalistic credibility by refusing to question the medical situation involving Reggie's condition. Granted, Tom was simply trying to start up a radio war with 'EEI but he picked absolutely the worst moment to do so...

'RKO management has more things to worry about than Leykis' departure. Its afternoon(2-6pm) 71-year old talkshow czar, Jerry Williams, is out indefinetly with a sever case of pneumonia....

* Curt Gowdy's AOR WCGY 93.7FM hasn't been sold yet but the talks with American Radio Systems(WRKO,WHDH-AM,WBMX-FM) are still going on... That answers couple of questions about 2 other major FM stations in town : Fairbanks' WCLB-105.7(country) and CBS' WODS-103.3FM(oldies) are not for sale(or at least not for the price ARS was offering). ARS will have to settle for a weaker second FM signal in WCGY. ARS already owns Hot AC WBMX-98.5FM....WCGY's current programming('Pure Rock'/ 'Real Rock') is heavy on the guitar hits of the '70s,'80s and '90s. Sometimes their playlist sounds like one of the LifeTime TV offers :-)

* Now that WBZ takeover of 'EEI is dead deal, The Bruins, who haven't been happy with their radio situation for the last few years, are definetely moving from a lousy signal of WEEI(or WMEX when they're pre-empted by the Celtics) and will start their 94/95 season on American Radio Systems's WHDH. According to the local press, ARS is considering of letting go the Bruins' legendary radio voice Bob Wilson as soon as he Bruins' rights are acquired from 'EEI. That would be a dumb and unpopular

move if it happens...

KKHI(1550khz and 95.7Mhz) currenlty broadcasts classical music from the Hotel St. Francis in San Francisco. However, KKHI has been purchased by Group-W. The plan is for the studio facilities to be moved to 855 Battery St. in San Fransico, which is the current location of KPIX-TV (also owned by Group-W). The classical format will be dropped in favor of a news/talk fromat on AM. I don't know the plans for the FM station.

Rumor has it that the classical programming now found on KKHI(which, by the way is said to actually be making money) will be transferred to the financially strapped KTID(FM) in San Rafael(north SF Bay). It's known that Group-W will drop the call letters KKHI in favor of KPIX AM&FM, but it's only rumor that KTID will switch to the KKHI call letters.

Best Regards,
Matthew Bye

[Moderator's Note: Sad to see yet another 'non-standard' radio station bite the dust. I am sure that a lot of classical listeners outside of the reach of the FM will be unhappy... and the station was making money too. The San Rafael station (a class-A) has terrible signal in SF. Oh well, I should not be surprized any more. Bill]

----------------------------------------------------------------
RFE/RL Daily Report
No. 44, 4 March 1994

RADIO BROD ENDS BROADCASTING TO FORMER YUGOSLAVIA. After
eleven months on the air, the Adriatic-based Radio Brod
(Boat) has stopped broadcasting because of financial
problems, Borba reported on 2 March. Programs were produced
by a team of journalists from the entire Yugoslav area whose
goal was to "stop the disinformation" in the media of the
Yugoslav successor states. According to Borba, the radio has
been attacked by the Croatian government-run media several
times for being "Yugonostalgic," whereas Serbian officials
dubbed the journalists "ustasa," or Croatian
ultra-nationalist. Fabian Schmidt, RFE/RL, Inc.

I remember Pat Pattee quite well. I first heard of him when he did overnights on KISN. Later, after KISN's forced removal from the airwaves by the FCC and a few years in between, he went to work for Portland's new oldies station at the time, KAAR-1480. He also did an oldies disco thing at Portland-area night clubs. After KAAR was sold and switched to an urban format, he left and the only thing I've heard of him was from people who had run across him at an oldies disco club. Perhaps someone in Portland proper will have more info on Pat.

Hi!

I was wondering if anyone knew anything at all about a DJ called
'Tall' Paul White -- who I think worked in Birmingham,Ala. , on a
black-oriented radio station, in the 1960s.

I'm afraid that's all I know about him, but if anyone has any
information at all, or any suggestions about how I might go about
trying to find out more, could you please let me know?

I'm not subscribed to this network -- so if anyone had any information,
I'd be grateful if you could e-mail me directly.

Thanks,
Steve.

818. >> Making an aircheck

Newsgroup: rec.radio.broadcasting

From: bautista@icaen.uiowa.edu
Message-ID: <2lk43e$llo@vixen.cso.uiuc.edu>
Source record: 40873

To make a decent aircheck, remember that most Program Directors are very, very busy managers. Thus, you must make your air check _exceptional_, or else they'll just toss the tape in the "Stupid Air Checks -- Jocks: use for commercial dubs" bin.

So, here are my tips:

1: Put your best break first. If your first break totally sucks, then the PD won't listen to the rest of it. On the other hand, if your first break totally rocks, the PD will want to see if you can keep consistency through-out the tape.

We should note that the breaks do not necessarily have to be in chronologi-cal order. Just place your best breaks at the beginning of the tape.

2: Absolutely no mistakes. No grammatical errors. No flubbed-up words. No p-popping. Absolutely pristine as you can possible get.

3: Keep the tape very short, five minutes or less. No PD will listen to a full 45-minutes of breaks. Some PDs may even fast forward through a 3-minute tape. The idea is that you just want to whet the appetite of the PD, so that he/she will be forced to call you for more tapes!

4: Show your professionalism. The breaks should sound like you know how to put together a decent break that holds listeners. Preselling, teasing, consiseness, are just a few of the goals for which you should be striving.

You may want to ask others about the following areas.

Some PDs prefer to hear you do a different format that the one you're already in at the college station. On my air check, I included a straight New Rock shift, then an April Fool's parody of a top-40 station. My PD later said that if he didn't hear the parody, he would'nt have known how I would have sounded talking over intros. On the other hand, some PDs may want to get someone fresh, so that they can train them specifically as they want them. You'll have to find out for yourself.

Also, I would prefer hearing an aircheck from an actual show which aired, as opposed to a prefabricated tape produced in the production studio. Now, I know that it may be difficult to tell the difference between "program" and "air" if your processing is exceptionally clean, or if your air check machine only records the "program" bus. But, I certainly can tell the difference. If you have no choices, then use the only option you have.

There's a couple of pointers. Good luck, and write to me if you need futher help

A.J. Bautista
KRNA-FM, Iowa City
bautista@icaen.uiowa.edu

819. Need tips for air check

In AIRWAVES #536, Keith Jacobsen writes:

KJ>> Help me because I want to make the jump from the ranks of a
KJ>> campus radio station to a commercial station. I am in the
KJ>> process of making an air-check to circulate to the local
KJ>> stations in the Kalamazoo area. I have hosted a morning
KJ>> show for two years and prior to that I did graveyards and an
KJ>> afternoon drive. I would like to get some pointers on how
KJ>> to go about making an air check and if you have any leads
KJ>> that would be great.

Keith (or is it "Jake"?), I'm sure you'll get a lot of advice (here and elsewhere), but the most important thing is -- just go DO IT, and keep knocking on doors. I've been where you are (in roughly the same part of the country, and at the same stage in my career), and there are a lot of stations that probably are dying to give you a job.

If you don't have luck in Kalamazoo, look at Jackson, Lansing, Grand Rapids, etc. If you've got a good car, you'll probably never notice the 50+ miles you'll spend driving to and from work. And at this point, it's more important to have the job than an extra hour of drinking time.

As far as the aircheck goes, make sure it's the tightest, best production you can do, with your strongest stuff first. It really is true: When we managers listen to 'checks, we don't go beyond the first few seconds unless we hear some potential right away.

Also, it helps if you show your versatility on your tape. Include newscasts, field reports, play-by-play -- anything you've done that stretched you professionally and that demonstrates your flexibility.

Good luck!

Radio news week of 3/6/94

WTEM AM 570 says they're confident Don Imus' syndicated show will start bringing in the numbers the sports station expect. Imus' ratings have been surprisingly low here in the Washington, D.C., area. The station plans to promote Imus in the coming months on local TV. Last fall, the only thing promoted by the station was the fact that they broadcast the WASHINGTON REDSKINS football games. The station hopes to capitalize on events like the recent phone conversation with President Clinton.

It's always difficult to build up that morning audience. Even Howard Stern suffered with mediocre ratings for almost 3 years before things turned around. And everyone in this city knew Howard from his many years at 'DC 101 (WWDC FM 101).

R A D I O A N N I V E R S A R I E S !

Congratulations to Ken Beatrice, sports guru at WMAL AM 630, on his 18 year anniversary at the ABC/Capital Cities station. Nobody, absolutely nobody, knows more about sports in this city than Ken Beatrice!

WARW FM 94.7's Walt Starling is celebrating 20 years in the air reporting traffic from his private plane. Walt is THE local traffic authority and makes more than $100k/year at the CBS owned station. He also spent time at WAVA FM 105.1, WASH FM 97.1 and WPGC/WCLY AM 1580 & FM 95.5.

In response to the request for information about the service which supplied Airchecks on a regular basis by subscription, chances are the reference was to The Aircheck Factory.
Others have come and gone but the Aircheck Factory goes on. Run by Tom Konard, you can subscribe to a number of services including Vintage Airchecks, Current Airchecks, or Special Documentary Features.
The address is
The Aircheck Factory
Rt. 1, Box 114
Wild Rose, Wisconsin
54984-9725

BTW, I have no affiliation with The Aircheck Factory, but I do know Tom and have been friends with him for about 20 years, even though we've never met. And as a favour I once narrated one of his docs "Good Morning Canada".

> Jam, Nirvana, Cracker and Tom Petty?

The answer, of course, is yes. :-(Although I like all of the above bands,
their stuff is *way* overplayed here.

(You got all of the calls right.)

Tim Virgin of WZJM-FM (Jammin' 92, formerly WJMO-FM) said that the reason
his "Channel X" program works (mixing hip-hop, r&b and modern rock) is because
Cleveland radio programming stinks. I tend to agree with the part that
Cleveland programming stinks, although I think he's successful because he has
a decent mix of music...

824. Community radio format change (KOPN Columbia)

Newsgroup: rec.radio.broadcasting
Date: 1994-03-10 09:00:01 UTC
From: Mark Roberts <transvox@TYRELL.NET>
Message-ID: <2lmnih$ia6@vixen.cso.uiuc.edu>
Source record: 40879

Background: On January 3, community open-access station KOPN(FM, 89.5), Columbia, Mo. significantly revamped its programming policies. On weekday mornings and afternoons, the station restricts its musical playlist to a core of 100 artists. During the evening, jazz and blues are featured from 7 p.m. to
midnight. The changes displaced numerous specialty programs, and some of the producers of those programs protested.
Since I had excerpted in AIRWAVES a Columbia Daily Tribune article largely deploring the changes, I thought it only fair to follow up on other reaction that was published in the Tribune.

From "Changes bode well for KOPN," by R. Alan Smith, 1/30/94:
"First off, I must say I'm a DJ at KOPN every other Thursday afternoon. With that disclaimer out of the way, you might be asking why would a country fan give a darn about what happens on that leftist hippy station anyway.
"That would be a fair question with a good answer: no other station in town plays the staggeringly diverse mix of C&W music (old time string band, bluegrass, western swing, contemporary songwriters) that KOPN does. The current format alterations can only allow that to flourish, exposing a wider audience during the early and later part of the day to a music mix that includes new roots rock, alternative and traditional country in a way that most listeners don't have access to."
" . . .The list of 100 core artists applies only to the station's new shows "89 in the Afternoon" and "New Morning." Artists are drawn from such disparate genres as country, jazz, reggae and rock to make up the core of the show's format . . . . Furthermore, only four artists of the DJ's choosing from this nefarious list are played each hour, leaving about 11 other songs per hour for each person to create the sound of his or her own show."
"The dreaded '100 Artists' core list includes Jimmie Dale Gilmore, Woody Guthrie, Billie Holiday, Lucinda Williams and Tom Waits. That hardly resembles the 'unexciting, conservative, middle of the road dreck' that [former KOPN DJ Derek] Dickerson so fatalistically warns us about, but more like the most eclectic gathering of music on the dial."

From a Tribune editorial by Henry J. Waters III, "KOPN community radio/What is the station's future?", 2/9/94:
". . .in recent years, the slender thread of KOPN's existence has gotten ever thinner. As competitive commercial and public radio offerings expanded, KOPN found itself in a disappearing niche. Its base of listener and financial support became precariously small, particularly with the end of money from a weekly bingo game that had provided about half of the station's budget. Volunteers and a few paid managers and

consultants decided they had to change or die."
"Her [KOPN general manager P.T. Martin's] approach contains risk and contradiction. By going for more audience share, she does indeed fly in the face of the original KOPN philosophy, which was to be offbeat if nothing else. . . . Martin and her board have added more professional programming and mainstream music, to the dismay of some of the station's most ardent supporters.
"KOPN's consultant says the local problem is not unique and some of it can be solved without confronting the program-content dilemma. More consistent scheduling will help a lot, he says. People are turning off because they never know what to expect when they tune in, he says. However, has that not been part of KOPN's appeal? You see the problem."
" . . .by any measure, KOPN is at its nadir, without a strong operation and with no reserve funds to carry it through a rough time.
"People will help, but they have to be turned on, literally. Making a larger dent in the overcrowded radio market will be tough. The best thing KOPN has going for it is a tradition of scarcity. Like a came, it needs to survive a trip across the desert with little sustenance if it is to find nurture on the other side. Unlike any other broadcast operation in town, it may be able to make it. Now is the time for anyone who cares about KOPN to join the caravan."

From "KOPN on right wave with changes," by KOPN board member Kay Bonetti, 2/13/94:
"The Jan. 3 changes are a continuation of changes KOPN has been making during the past three years, all of them grounded in community radio trends nationwide. They are based on solid research done specifically for the public/community radio networks to determine how people in all market use radio. Moreover, KOPN's current subscriber numbers validate what allegedly questionable 'ratings' say our listener numbers are.
"Most important, since KOPN started changing its format, subscriptions have increased 70 percent! So how is this such a 'gamble'? The biggest gamble of all would be to stay the same, a sure path to oblivion.
"The argument that we are having now at KOPN is the same one we have been having for 20 years. . . .do you simply open up the airwaves to as wide a number of points of view, types of music and people as possible without worrying about program flow and content quality of listener needs and attitudes--on the theory that lots of small audiences add up to one big audience.
"The latter model is the one that has prevailed for most of KOPN's history. It dates back to the 1940s, when we hardly even had television, much less the number of radio stations that are now on the air. Not to mention cable TV, cable audio, affordable home stereo systems, car cassette/CD players and VCRs. It still 'plays' in remote markets like 'Northern Exposure's' Cicely, Alaska -- KBHR -- and in very large markets like Berkeley, Calif., where the number of listeners brings in enough subscribers to pay the bills. But in most markets, it alienates listeners."

"Right now, the people at KOPN who object to change confuse style
with substance. In their view, to change the style that we present our
material in is to change the substance, to 'sell out.' Those of us who
support the changes we are making feel that if 'nobody's listening!'
there simply is no substance . . . ."

I am sad to report the death of New York radio personality Jack Spector.

Jack was one of the original Good Guys on WMCA. When the station changed to a talk format, he hosted a sportstalk show.

He later worked for WHN, WNBC, WCBS-FM and WHLI where he was employed at the time of his death.

At the end of his shows he would say "Look out street here I come."

Very interesting observation, and one that those of us in the radio biz
would just as soon not even think about. Radio - due to its built-in lim-
itations - has never been able to please all of the people all of the time,
and success has been achieved by devising various ways to keep people lis-
tening despite the fact that what they're hearing is not 100% to their lik-
ing. Everything that a modern PD does: contests, promotions, music schedul-
ing - *everything* - is oriented toward this goal.

If the digital phone/computer/network/cable revolution that has begun in the
past few years results - as so many of us think/hope that it will - in the
ability to micro-target audiences of a few tens of thousands spread out world
wide (*profitably*) with programming that *does* satisfy that audience nearly
100% of the time, and if consumers are - through interactive media services -
able to program their own customized versions of audio/video services, then
where does that leave mass-market broadcasters?

When I was growing up, my peers and I would spend every Sunday night glued
to the TV in the hopes of getting a glimpse of our rock & roll idols on Ed
Sullivan. Imagine today's kids - with 24 hour access to MTV - sitting still

for hour after hour of acrobats, spoon-players, and mouse handpuppets in order to see a couple of rock videos. Well, folks, it seems to me that the fragmentation & narrowcasting that we hear on the FM dial today is just the beginning.

Yet I attended one of the worlds biggest radio conventions recently, and the subject of new-tech radio alternatives never even came up. Even DMX - the forrunner of even more specialized services to come - and one that is already in place in most urban areas - wasn't discussed. Everyone seemed to assume that what has worked in the past will always continue to work, and that the only competition they needed to worry about was the FM station across town.

How do I think radio can respond to the changes that are sure to come? I don't know, but I'll bet that a locally programmed, audience-responsive, ideosyncratic, unpredictable, musically adventurous station would have a better shot at hanging onto its audience that one that was programmed strictly by national charts, dependent upon syndicated features & personalities, and "safe" in its presentation.

A bit more on WXXI-AM: Their transmitter is at 560 French Road in
the town of Brighton, just across the street from the Barge (Erie) Canal.
I grew up less than half a mile away...and I can see the towers
(four in a square) from my parents' front lawn. Needless to say, I
never had _any_ trouble picking up 1370...on the TV, on my braces...;-)

It's true that the site is VERY suburban these days. Just to the
east of the transmitter land is the middle school I attended for
a couple of years. The athletic fields back right up to the
towers. (This was, oddly enough, also the situation a mile
north, where my elementary school backed up to WWWG-AM 1460's towers.
And you wonder why I'm so into radio? :-). Adjoining the transmitter
land to the north is a large apartment complex. The school was built
in 1958; the apartments followed a decade later. To the west are
some condos built in the early 80s, and across French Road to
the south are more condos, circa-1970s. It's definitely no longer
the great place for AM sticks that it was when WSAY built there
in the 1940s.

It is, however, nice and wet thanks to the canal. Not only
are WXXI and WWWG in the area, but WHTK-1280's four towers are
about half a mile to the west of WXXI, and WBBF-950's four
towers (in a T-shaped array) are about 1 1/2 miles to the
northwest. There are spots from which you can see all four
of these AM's, plus the TV-FM sticks on Pinnacle Hill.

I think the WXXI management thought it could do more with the
AM pattern back when it bought the station a decade ago. They
certainly have the cash to build a new tower array somewhere else...
they just finished a 5-story studio/office tower downtown
last year. OTOH, there's also co-channel WSPD Toledo

and WFEA Manchester NH to protect, and that makes creating
a new pattern challenging.

-=Scott Fybush - fybush@world.std.com=-
...So, did I get too much RF growing up or what?

829. Re: Public radio on AM

OK...time for a comprehensive list of public radio on AM here:

550 KOAC Corvallis OR (5000/5000)
580 KYUK Bethel AK (5000/5000)
WILL Urbana IL (5000/d)
KKSU Manhattan KS (5000/500 -- operates 3 hours a day share-time)
640 WOI Ames IA (5000/1000)
670 KDLG Dillingham AK (10000/10000)
680 KBRW Barrow AK (10000/5000)
690 KUSD Vermillion SD (1000/20)
720 KOTZ Kotzebue AK (10000/10000)
770 KUOM Minneapolis MN (5000/d -- student-run progressive)
780 KNOM Nome AK (10000/10000)
820 WSWI Evansville IN (250/d -- student-run)
WOSU Columbus OH (5000/820)
WNYC New York NY (10000/1000)
850 WUTK Knoxville TN (50000/d -- student-run)
870 KSKO McGrath AK (10000/10000)
WKAR East Lansing MI (10000/d)
890 KBBI Homer AK (10000/10000)
910 WSUI Iowa City IA (5000/5000)
920 WBAA West Lafayette IN (5000/1000)
930 WLBL Auburndale WI (5000/d)
940 WIPR San Juan PR (10000/10000)
970 WNED Buffalo NY (5000/5000)
WHA Madison WI (5000/d)
1250 KFKU Lawrence KS (500/500 -- share-time license, currently dark)
1330 KNOW Minneapolis MN (5000/5000)
1340 WOUB Athens OH (500/1000 -- partially student-run)
1370 KFJM Grand Forks ND (1000/250)
WXXI Rochester NY (5000/5000)
1380 KIFO Pearl City HI (5000/5000)
1450 KBPS Portland OR (1000/1000)
1480 WGVU Kentwood MI (5000/5000)
1550 KUAT Tucson AZ (50000/d)

You'll note some patterns here. Many Midwestern land-grant schools (Ohio State, Purdue, Michigan State, Iowa, Iowa State, Kansas, Kansas State, South Dakota, Wisconsin, Illinois) have AMs that date back to the 1920s. Many are low-power or daytimers because they were forced off better frequencies by the commercial stations during the free-for-all in the late 20s. KBPS was established in the 1930s, when the Class IV channels were all that was available. WNED (ex-WEBR), WXXI (ex-WRTK, ex-WSAY), WGVU (ex-WMAX), WUTK (ex-WIVK), and KNOW (ex-KSJN, ex-KLOL) were all commercial stations bought by noncommercial broadcasters.

WNYC is the last city-owned noncomm AM. The other one, WRR-AM Dallas, was sold in the 1970s and became KAAM and later KTCK. And then there's Alaska...where the rural public radio stations are high-powered AMs, the better to reach the (VERY) rural wide-open spaces. These stations carry some NPR shows...but also do a lot of community broadcasting, including sending messages to people so far out that it's the only way to get a message to them. And KIFO was commercial KLNI, didn't make it, and was given to Hawaii Public Radio.

-=Scott Fybush - fybush@world.std.com=-
...who grew up 500 yards behind the WXXI-AM towers...

[Moderator's Note: God how I love being able to correct Scott <he he>. WHA in Madison is really about 4300 watts days and about 40 watts at night (aprocimately). Bill]

In article <2l6m8g$2s5@vixen.cso.uiuc.edu>, bsobel@aol.com (BSOBEL) writes...
>There are two AM NPR stations that I am personally aware of.
>WNYC 820am in New York City...not very powerful, especially at night. They run
>mostly news and talk programming throughout the day and repeat at night.
>
>WEBR in Buffalo (not sure of their frequency) is an NPR station that happens to
>be all news (Like WCBS or WINS in New York)

WEBR is now WNED-AM. I have worked as a part-time reporter there since October of 1992. The format used to be all-news like WCBS or WINS, except with a public radio slant. (eg. No coverage of murders, some extended Monitoradio features).

Last August, the call letters and the format changed. We now air Morning Edition, Talk of the Nation, and National Press Club speeches from NPR, in addition to other weekly NPR public affairs programs. We also Monitoradio's Early & Daily Editions, Marketplace, As it Happens, and the BBC overnight, to name a few.

831. Re: Airchecks

First, the address someone had for CA Airchecks is still the correct one,
as is the one for Tom Konard in Wisconsin.

In a related note, I just got done putting together a
list of aircheck compilations and unscoped (unedited) radio audio tapes in my
collection; it took most of the weekends of 1994 to update. (I made attempt
to not list tapes that may have come from Mr. Junak or Mr. Konard, nor the
Man from Mars).

The lists were divided into two major sections: "current" (those tapes
compiled since 4/91 when WPLJ became "mojo radio") and "airchives" listing
older compilations (like road trips) and anything that I never got around to
editing (a/k/a "scoping") and feel they may be better appreciated unscoped
(like the Time Machine oldies programs on WNBC for example, or WABC in its
last days of music).

While the lists run 32 pages and cost 98 cents to send, I'll send a copy
to anyone reading this if you just email or post (if you are daring)
your postal mailing address. It is not in a form that I can upload
easily; besides those who read this in digest form wouldn't appreciate
57K of listings

Also available (request if you want them too) lists of stations
taped on Myrtle Beach Trip 8/93 and NC/SC (Charlotte/Greenville)
trip 11/93 as well as "other unscoped fall 1993-winter 1994"

testnet!paul@pegasus.att.com or testnet%paul@pegasus.att.com or even

834. Radio Brod silent

Newsgroup: rec.radio.broadcasting
Date: 1994-03-11 07:52:22 UTC
From: Jorma M{ntyl{ <tijoma@uta.fi>
Message-ID: <2lp7vm$9uv@vixen.cso.uiuc.edu>
Source record: 40889

Radio Brod, which has been broadcasting from the Adriatic Sea to ex-Yugoslavia, is now silent. This was yesterday announced at the end of a documentary tv programme broadcast by the Finnish commercial tv-company MTV-3.

The broadcasts of Radio Brod were interrupted on March 1st as a result of a decision by the European Union which has been financing this unique radio station in cooperation with several European human rights organzations.

Radio Brod was broadcasting from a ship named "Droit de Parole". They were on the air 24 hours on 720 kHz (50 kW) and 97,8 FM. The transmissions were directed from international waters to ex-Yugoslavia. The aim of the station was to broadcast 'objective news'. The staff consisted of ex-Yugoslavian journalists sacked from radio&-tv-stations and newspapers.

Radio Brod was heard during night-time around Europe. The Finnish tv-documentary did not tell the reason for silence or if the silence is temporary.

Radio Brod is not listed in WRTH-1994. The section "International Waters" seems to be missing from this edition.

Jake, Keep it short, make it your best but not better than your best (don't splice out all the weak parts). Few things are worse than not being able to produce, on air, the quality you exhibited on your demo tape!

Another hint: In my years in small-market commercial radio, invariably the jobs went to the applicants who came by in person to drop off their tapes and resumes. The PD and manager got a chance to talk with them in person, and they got the first call when an opening arose. No matter that some of the mailed-in tapes were excellent! So make some phone calls, make some appointments with program directors. Tell them you're a student looking for your first job, and you'd like them to listen to your tape and examine your resume and give you their suggestions on both. Most program directors will be flattered and happy to meet with you, and when a job opens (assuming you made a good impression) you've got a solid chance at it, and you're a big step ahead of your competition. ---Dan

I just wanted to note, as a matter of interest, the passing away of
Jim Nolan, former international president of NABET (the National Association
of Broadcast Employees and Technicians), former president of Local 16
in NYC (the ABC local), and one of the original gentlemen in the business.

Jim died after a short illness, and was only 64. His leadership, especially
as regards to his constant pushing for members to take responsibility for
improving their technological knowledge, will be sorely missed.

Jim was a great role model for new members of the ABC and NABET family, as well
as a good friend and counselor to many of us.

His passing was noted on World News Tonite, 9 March 1994, one of the few
people to be so honored from inside the newsroom itself.

: Hotel St. Francis in San Francisco. However, KKHI has been purchased
: by Group-W. The plan is for the studio facilities to be moved to
: 855 Battery St. in San Fransico, which is the current location of KPIX-TV
: (also owned by Group-W). The classical format will be dropped in favor
: of a news/talk fromat on AM. I don't know the plans for the FM station.
. . .
: [Moderator's Note: Sad to see yet another 'non-standard' radio
: station bite the dust. I am sure that a lot of classical listeners
: outside of the reach of the FM will be unhappy... and the station was
: making money too. The San Rafael station (a class-A) has terrible
: signal in SF. Oh well, I should not be surprized any more. Bill]

I believe that SF has another classical station operating full-power on FM; specifically, KDFC-FM. At least it was still on the air a couple of years ago, when I was last in SF, and it, too, has a companion AM station KDFC-AM (formerly KIBE-AM) in Palo Alto at 1220 kHz. (My references indicate that KDFC-AM drops to very low power at night, but does remain on the air.)

So SF radio had the rarity of not just one, but TWO AM/FM commercial classical combos in the same market. My guess is that anyone there who can't hear the San Rafael station will tune to KDFC-FM, thereby making it a more profitable station -- that is, if it is still playing classical music.

Does anyone have a list of satellite transponders and audio subcarriers for the major radio networks & syndicated shows (ie: Stern, Don & Mike, Imus, etc..). I know they are all up there, but any information on where I can find them would be appreciated.

Beachboy25@aol.com

842. AM TALK RADIO

Rush Limbaugh seems to be on the ascendant right now. A few years ago
you couldn't tune the AM dial at night without hitting Larry King or
Jim Bohannon.

Can anyone update me with the most popular overnight AM talkshows
running today. By popular I really mean the number of stations
syndicated to a network or taking a show.

I'd be interested in whatever info is available but

Name of Show
Name of Host (any standby hosts?)
Where show originates (town or flagship station)
1-800 toll free number
how many stations carry the show
would be really helpful.

>From here in the UK it is possible hear quite a few US/Canadian AMers
at night so inevitably there's plenty of talk to hear. Mind you
Murphy's Law says that the signal fades at the top and bottom of the
hour so you're left wondering which station you're tuned to!

Info anyone? - thanks a bunch

Scott D Fybush (fybush@world.std.com) wrote:
: OK...time for a comprehensive list of public radio on AM here:
<at 580...>
: KKSU Manhattan KS (5000/500 -- operates 3 hours a day share-time)
Minor correction: it's five hours a day: 12.30 pm to 5.30 pm. Weekdays
only.
: 1250 KFKU Lawrence KS (500/500 -- share-time license, currently dark)
Actually it was 5000/5000, using the same transmitter as WREN Topeka
(formerly Lawrence til Alf Landon moved it). WREN went dark in 1990,
and returned to the air in 1992 (M Street says 1991 but I don't think
that's right). KU has not reclaimed use of KFKU to the best of my
knowledge. WREN's nighttime here is considerably impaired anyway.

I know, I know. M Street says 500. I wonder if this is some backup tx.

(Evil thought: Lawrence is local calling on my car phone. I should call
over there and ask to speak to the manager of KFKU! But I am not a mean
person, just occasionally irreverent....)

Also left off the list is KFUO 850 Clayton (Mo.) -- noncommercial, owned
by the Lutheran Church-Missouri Synod (also owner of *commercial* KFUO-FM,
also facing a license renewal hearing for apparent liability regarding
lack of affirmative action recruitment). KFUO used to have a share-time
with KSD at 550 until KSD pushed KFUO off the channel sometime around 1940.
I remember reading a case on this once in either federal appeals court or
district court in the University of Missouri law library.
Some days KSD would sign off late, and/or sign on early and some days would
not even relinquish the channel when it was supposed to.
The 1941 NARBA lists it at 830, moving to 850, limited-time with KOA
Denver. Still is limited, meaning daytime hours but using Denver's local
sunset instead of St. Louis'. It is not an NPR station.
Power is 5 kW, nondirectional.

Hope this adds to the general education or maybe confusion.....

From: wdp@uiuc.edu
Message-ID: <2lrflm$cru@vixen.cso.uiuc.edu>
Source record: 40899

Greetings:

Just a note to those submitting articles to rec.radio.broadcasting and
AIRWAVES RADIO JOURNAL.

Could everyone please set their editors for 75 to 80 columns of type?
Since most terminals are 80 col's it makes for easier reading on the
group and it makes my job easier as I dont have to go through every
line in the post and change it.

<<EXAMPLE>>

When you set your line wrap to longer than 80 columns, as I am doing in this line, you get
Unsightly and *very* difficult to read articles which make the reader have to fight with
the page
in order to make heades or tails out of it.

<<END EXAMPLE>>

I would also ask, once again, the age old request to *PLEASE* edit the
quoted text down in your posts, to the minimum that is required to
make your point. Quoting a 25 or 50 <or more> line article, just to
make a few line reply, not only wastes bandwidth and the reader's
time, but those reading via slow modems might just skip your article
all together if there is *miles* of quoted text.

I would really appreciate it, and so would our readers.

Thanks for your time.

Bill

I don't listen to the old fart, but I heard (on the Don and Mike show) that Don Imus raved out at the board op during comercial break, not realizing his mic was open.

It was the most fu>ny thing I've heard...Of course, the FCC won't go after him, just Howard Stern. Very sad.

846. One Station's History -- KFRU (Columbia, Mo.)

Newsgroup: rec.radio.broadcasting
Date: 1994-03-12 04:50:10 UTC
From: Mark Roberts <transvox@tyrell.net>
Message-ID: <2lrhm2$fnf@vixen.cso.uiuc.edu>
Source record: 40801

More from the vast Transvoxian Archives (otherwise known as my garage)
about radio station KFRU in Columbia, Mo.

>>>> WARNING: This is a very long article. If you object to
>>>> long posts, feel free to press the appropriate kill key
>>>> on your newsreader. <<<<

Keep in mind as you're reading this that the station has managed to keep
its continuity and identity intact, even though Columbia has grown from a
sleepy college town of about 15,000 people to a small metro area of 65,000+
today.
==========
>From the Columbia (Mo.) Daily Tribune, October 7, 1970: "Happy 45th
anniversary today to you --- KFRU Radio," by KFRU announcer Jim Steele:

Radio Station KFRU, whose birthplace was in Oklahoma in late 1924, will
observe its 45th anniversary as a Columbia station today. It was on Oct. 7,
1925 that Stephens College, the original operator of the station here,
inaugurated regular broadcasting service,
Since then, and under several owners, KFRU has grown to the present
24-hour operation employing approximately 25 persons under the general
managership of Mahlon Aldridge, Jr. He and H.J. Waters, Jr., president of the
Columbia Tribune, have been owners of KFRU since 1948.
The station traces its history to the small northeast Oklahoma town of
Bristow, where oil multimillionaire E.H. Rollstone had started a radio station
in late 1924. Rollstone's purpose in establishing a station, according to the
newspaper accounts at the time, was to repay the state which had been so
financially good to him. To symbolize this gratitude, the call-letters KFRU
were selected which he interpreted to mean "Kind Friends Remember U.S."
Rollstone operated the station through the first half of 1925, buty was soon
in the market for a buyer as apparently the venture had become something of a
financial burden.
Meanwhile, Stephens College, under the administration of the late
President James M. Wood, was attempting to establish radio broadcasting in
Columbia. Wood's efforts culminated in the summer of 1925 when the Stephens
Board of Curators agreed to purchase the station in Bristow. The equipment
was transferred to Columbia in September and was set up in the Stephens
Administration building with two 175-foot towers located on the campus nearby.
Broadcasting officially began on Oct. 7, with a dedicatory program between
8 and 11 p.m. originating from the college auditorium. The late E.W.
Stephens, president of the college's board of curators; Dr. Edgar D. Lee,
president of Christian College, and the late Dr. Stratton D. Brooks, president
of the University of Missouri, took part in the program which otherwise
consisted mainly of music offered by the faculty of the Stephens Conservatory
of Music.

Within a week, a permanent license was received from the Department of Commerce, the agency then responsible for regulating the airways, authorizing KFRU to operate at a power of 500 watts at 600 k.c. The frequency was changed to 630 kilocycles in 1928.

Early programs put on by Stephens and other groups in the community were mostly education, religious, or amateur music efforts. The call-letters KFRU had been retained, with President Wood re-interpreting them to stand for "Kindness Flows 'Roundabout Us."

Until the mid 1930's [1936], KFRU shared time on the same frequency with the old state-operated station, WOS in Jefferson City. Broadcasting hours varied, being mostly in the afternoon and early evening and in the morning on Sunday.

In 1932, faced with the reality of the Depression and the increasing popularity of commercial radio, Stephens decided to sell. However, the college retained the use of certain hours for its own programs in return for allowing the station to remain on college property.

The new owners were St. Louisans Nelso R. Darraugh and Robert W. Bennett. Within a short time, they had leased the commodious building on the northeast corner of Ninth and Elm, a former fraternity house, for use as KFRU's studios and offices. An emergency studio, along with the transmitter and towers remained at Stephens.

The facilities at Ninth and Elm were considered among the most modern in the Midwest, particularly after being remodeled and air conditioned in 1937. Live entertainment was the rule rather than the exception in those days and at one time KFRU had nearly 40 entertainers on the staff. In addition, there were numerous 'remote pickups' during the evening hours, featuring live music from the many dance bands that performed in Columbia restaurants.

At one period during the late 30's, hillbilly entertainers were housed on the third floor of Ninth and Elm and would frequently come down to sing for the early morning shows still clad in their pajamas.

Although Darragh and Nelson had instituted commercial sponsorship, the station was apparently not profitable and consequently was sold in 1935. The new owners, also St. Louis businessmen, were in control for only a short period. In 1936, ownership passed to the Star-Times Publishing Co., operators of a now-defunct St. Louis newspaper. The company retained control until KFRU came under its present ownership in 1948.

On the surface, the acquisition by the Star-Times appeared to be a boom for the station and for Columbia. Money was invested in new equipment, the remodeling took place, the shared-time arrangement was dropped and power was increased from 500 to 1000 watts. However, it soon became apparent that the new owners, who were in the process of putting KXOK in St. Louis on the air, had ulterior motives. KFRU, with its low and therefore desirable frequency, could be heard almost nationwide. In fact, for a time in the mid 30's, all Missouri Highway Patrol cars were kept in contact via KFRU. Thus, not long after KXOK began operation in 1938, the Star-Times made application to the FCC to transfer KFRU's more desirable frequency (630 k.c.) to the favored St. Louis station.

The action was approved and in October 1940, KFRU's frequency was changed to 1370 k.c. and the power reduced to 250 watts, making it strictly a local-coverage operation. With the Treaty of Havana going into effect in

1941, the station's frequency was moved to its present 1400 k.c.
Along with the other changes in the early 40's, a more sophisticated type of programming had evolved, aimed more at the Columbia population rather than a large regional area. The station's programming was measurably improved in January 1941, when KFRU became an affiliate of the NBC Blue network, predecessor of the American Broadcasting Co. network with which the station is now affiliated. A footnote in the history of KFRU also occurred in 1941 when it was learned the station had been awarded the first George Foster Peabody Award for small stations.
The facilities at Ninth and Elm continued to be used, but by 1942 the wartime manpower shortage had forced a cut-back and thereafter most of the day-to-day programming originated from a small studio adjacent to the transmitter in the Stephens Administration Building. The downtown location was retained for offices and special broadcasts until being vacated in 1948. The building underwent a variety of uses in later years until finally being demolished in 1969 to make way for a drive-in restaurant <a Jack-in-the-Box, which was torn down in 1980 and replaced by a Wendy's which is still there>.
With the purchase by Waters and Aldridge, local ownership was re-establish and various improvements were made, both in facilities and programming. News operations were moved in 1949 to the Columbia Tribune office where they continue at present. In 1950, all formal connections with Stephens College were severed with the completion of the present studio and transmitter building, located near the intersection of Business Loop 70 and Business Route 63 South. The 185-foot tower is immediately adjacent.
Aldridge, who previously was news director of KXOK, had been sent to Columbia in 1945 as KFRU's general manager while the station was still under control of the Star-Times. He continued in that position until becomeing a part-owner three years later and is currently observing his 25th year as the station's chief executive. Before joining the Star-Times, Aldridge had been associated with KWOS in his home-town of Jefferson City. He was instrumental in setting up the Missouri Sports Network in the late 1940's, a network which continues to broadcast the M.U. football and basketball games with Aldridge heading the play-by-play.
The recent history of KFRU has largely been that of radio nationwide. The soap operas, big network shows and the live music have gradually given way to the present format of recorded music, news, sports, weather, interviews, call-in shows and various informational programs.
Numerous technical improvements have been made during the 20 years the station has been in its present location. A new transmitter was installed in 1961, accompanied by a power increased from 250 to 1,000 watts. That same year also saw the inauguration of 24 hour 'round the clock' programming, still a rarity in stations outside metropolitan areas. Other changes include the addition of two-way mobile equipment and the move to a streamlined one-man studio operation instead of the previous engineer-announcer combination.
It all started on Oct. 7, 1925.

SINCE THEN: Aldridge sold his interest to H.J. Waters III on December 7, 1983. Waters sold his interest to Dan White and Bill Weaver (the station's general manager) in 1989. Weaver transitioned the station to its present news/talk format. However, costs got out of control, and his lender forced

him to sell. The owners of FM station KARO in Columbia, Al Germond and David Baugher, bought KFRU on August 7, 1992 and moved the studios to the KARO facility during the fall of 1992. The station is still an ABC affiliate (Information network) and continues successfully with its news/talk format.
==========
I have a photocopy of the station's schedule for the week of Oct. 31, 1932. It had just been sold and had started commercial operation. It shared time with WOS and (at night) with WGBF Evansville, Indiana.
I'll just pick Nov. 5 (Saturday). Typical weekday schedule appeared to be 6 am-9 am, 4 pm-5 pm (5.30 pm on Mondays), and 7 pm-9 pm (12 midnight on Wednesdays).
SATURDAY, NOV. 5
6:00 A.M. Taylor Fur Co.--Familiar Melodies
6:30 A.M. Vocal Hits
6:59 A.M. Time and Weather.
7:05 A.M. Dance Rhythms.
7:15 A.M. Ralph Anderson's Melody Mixers.
7:30 A.M. Organ Melodies with Kathleen Fowler.
8:05 A.M. Popular Hits.
8:15 A.M. News of the Day.
8:30 A.M. Dance Band Revue.
8:40 A.M. KFRU Today.
8:45 A.M. Homemaker's Corner--Lillian Lawless.
8:59 A.M. Time and Weather.
2:00 P.M. M. U.-Oklahoma Football Game. <some things never change!>
7:00 P.M. The Central Dairy's Old Time Music.
7:30 P.M. Taylor Fur Co.--"Merry and Gay".
7:45 P.M. Jack Randolph, bass baritone.
8:00 P.M. The Southland Singers.
8:30 P.M. International Oil Co.--The Legionettes.
8:45 P.M. "Visiting St. Louis"--Connie.
9:00 P.M. College Inn Dance Program.
9:30 P.M. KFRU Sunshine Minstrels.

The front of the brochure has a picture of the staff and underneath it:
"DO YOU KNOW THAT KFRU
--Employs 32 people.
--Donates its facilities to civic and charitable organizations.
--Is bearing the expense of six hours each Sunday for church broadcasts.
--Gives educational talks, time, weather reports and other information for your benefit.
--Has a proven primary listening area of over a million people."

The back of the brochure has a picture of R.W. Nickles, Chief Engineer, and underneath:
Write for Free
Booklet

"How to Reduce
Your Heating

Costs."

11:05 Feminine Circle
* indicates shows still on the air (perhaps in slightly altered time slots)
in 1984
+ indicates programs still on the air today
Station hours were 5 am to 2 am. "Country Tunes" was later renamed "Morning
Country Style" and ran 5 am to 7 am. When the station started changing in
1984, our biggest howls of protest came from the removal of "Morning Country
Style" *and* the removal of the daily sign-on and recording of the "Lord's
Prayer" at 5.55 am. We finally had to do it at 5.05 am. I don't know if they
still do it. I'm not a morning person!

The "Quickie Quiz" is one of those things that always gives me a little
thrill. I can remember hearing it as a child growing up in Columbia. They're
using the *same* theme music for it today.
That's one of the wonderful things about KFRU. When I listen to it, I know
that I'm listening to something special, something that hasn't been parachuted
in from another market by some consultants (though KFRU does use a
consultant). While it's a news/talk station, I know that the *flavor* and
feel of the station is something that's duplicated nowhere else.
It takes years to create and grow the special feel of a radio station, and
months to tear it down in the current slash-and-burn environment in which
radio largely dysfunctions.

> music.>

Another upcoming and sad loss in the SF area will likely be KJAZ, 92.7 FM (Alameda), which was put up for sale a couple of weeks ago. KJAZ is one of the only (or THE only ?) commercial station playing traditional jazz (not new age, etc) on a 24 hour basis. It is a true gem whose format will likely change upon sale. I live for this station. That's all I can say. If I had only 1 station available, this would be it. Evidently, the continuing slow losses were too much for the owner (Ron Cowan) and it's on the auction block. For several months, the signal has been piped into a satellite for cable distribution across the country; I don't know whether this programming will continue or be cut as well. Seems like the latter would be obvious. So, along with the new KKHI, we'll have another new "format" coming along trying to grab some mass market share. KABL FM (98.1) just switched from AC to BIG 98, playing only hits of the 70's. Add that to KSRI/KSRY (hits of the 80's and 90's), KFRC + KYA (hist of the 50's-70's) (the latter being sold again recently), the multiple classic/AAA/modern rock/rap stations, country stations, AC stations, Spanish stations, and I don't know what's left to make $$ on. Maybe hits of 1984. Hits of 1957. all the time. ....

Source record: 40803

Lot of stuff to get to:

1.CHRE-FM(105.7 in St.Catharines)changed their positioner from FM 105.7 CHRE to "Light 105.7-Niagara's light rock".(FTR,CHRE transmits at 100 kW,antenna 436 ft. Its format is adult contemp.)

2.Tom Ragan,1/2 of the Tom & Karen team recently let go from WGR,has landed a new job-down the street(and I'll explain in a bit). He's now doing afternoon drive for WUFX-FM(album rock,103.3 the Fox), stepping in for "Horny"Bob Richards. I'm not sure if it's on a part-time or full-time basis.

3.Another ex-WGRer,former reporter Eileen Buckley,now is doing traffic reports for Metro Traffic(part of Metro Networks). It provides traffic reports for WBLK,WJYE,WUFX,WHTT-FM,WWKB,WKSE and WIVB-TV. Some other radio vets working there are:Jim Nowicki, Marti Casper(ex-WGR and WUFX)and Cristy Aiello(ex-ND at WBNY-FM).

4.Wedding bells will ring this summer for Tina McMann(weekender for WBUF-FM,ex-WUFX research director and ex-PD at WBNY)with Shaggy Faust(formerly in the local rock group the SplatCats).

5.Ron Schanne is now doing weekends at WMJQ-FM(hot A/C;Q102). He previously worked at WBUF.

6.Here's the CORRECT 25-54 AM drive rankings for Fall 93(I posted the wrong one earlier-if you can kick me thru cyberspace, please do so. :-))

1.WHTT-FM(Danny Neaverth)-11.9
2.WYRK-10.3
3.WGRF(Larry Norton/Marc Stout)-9.8
4.WGR(Breakfast w/(Tom)Bauerle)-9.1
5.WBEN(Bill Lacy/Kevin Keenan)-8.8
6.WJYE(Joe Chille/Maryalice Demler)-8.3
7.WBLK(Bryan Scott/Kim Fox/Lou St.James)-6.1
8.WKSE(Dr.Maims/Janet Snyder)
WMJQ(Rob Lucas/Nancy Barrow)-both had 4.7
10.WWKB(Howard Stern)-4.6
11.WBUF(Jon Summers)-4.3
12.WUFX(Ted Shred/Mr.Ed)-2.9

BTW,does Stern help Kb the rest of the day? 'Fraid not. From 10am-3pm(during which G.Gordon Liddy airs,for 4 of the 5 hours-11-3),it only gets a 3.3,dropping nearly half. During 3-7pm,it goes down even more,garnering a 2.3-nearly another half(Don & Mike air during this time slot). An article in the Sept.6,1993

issue of Radio Ink looks at the ratings after Stern in more
detail.

I was waiting for someone else to say that.

Besides, I've been talking too much lately. Also refer to "The Theory of
Controlled Unpredictability" which tried to make this point in a different
way.

Idealistic? A radio station that views itself as nothing more than
a jukebox metered by a cash register attached to an antenna is going
to get its till tapped sooner or later.

Regarding Brock's (Barkley564@aol.com) comment in ARJ #538 regarding California Aircheck, yes, they indeed are very much still in business and offer a half dozen or more monthly series of airchecks. Brock's address is correct except USPS has changed the ZIP code to 92164. California Aircheck, P. O. Box 4408, San Diego, CA 92164. Other than an introductory message at the beginning of each cassette, each tape is full of airchecks. They don't put out narrated tapes, at least to my knowledge.

As for Tom Konard and the Aircheck Factory, I suddenly stopped receiving cassettes from him a few years ago and despite several letters to him, never received a response so I can't say whether he's in business any longer or not.

I have recently help to form a student run TV-staion that is broadcasting
over the air, WEXP-TV, Channel 28, Hoboken (across the river from Manhattan).
I wos wondering if anyone out there knows the rules as to what we can and
can not say over the air. I imagine it would be the same as with radio. I
need specifics. Any help would be appreciated. Also if there is anyone
out there in Manhattan, it would be greatly appreciated if you could
E-Mail me with information on how our picture looks. Thank you.

853. Detroit Duopoly,again.

Newsgroup: rec.radio.broadcasting
Date: 1994-03-12 05:18:46 UTC
From: as779@yfn.ysu.edu
Message-ID: <2lrjbm$hbd@vixen.cso.uiuc.edu>
Source record: 40808

Detroit Does Duopoly, again...

The Wednesday, February 9 edition of the Detroit Free Press
reports the convoluted details concerning the sale of
WXYT (AM 1270) and WMXD (FM 92.3), owned by Fritz Broadcasting,
of Southfield,MI.

WXYT goes to Infinity Broadcasting, also owner of Detroit market
WOMC (FM 104.3) for a reported $23 Million. BTW, Infinity promises
not to put Howard Stern back on the air in this market.
WXYT is a "News/Talk" format station, with most on-air hosts
of decidedly rightward lean, complementing R.Limbaugh's presence
on the station. Rumor is that Limbaugh's show may jump to 50KW
WJR following completion of the sale.

"Urban" FM WMXD was purchased by Secret Communications, a
partnership between Broadcast Alchemy of Cincinnati and Detroit's
Booth American. Booth also owns highly-rated Urban Contemporary
WJLB (97.9 FM). The WMXD/WJLB combo gives them a lock on the format
in this market.
The WMXD station deal is reported to have involved $22 Million
cash plus Fritz Broadcasting's acquiring Toledo,OH WTOD(AM) and
WKKO(FM) as well as Saginaw,MI stations WSGW(AM) and WIOG(FM).

---
related trivia:
WXYT AM 1270 is the descendant of WXYZ AM, the original home of
The Lone Ranger, Sgt. Preston, The Green Hornet and other
old radio classics. The WXYZ properties were ABC O&O's until
the ABC/CapCities merger, at which time CapCities chose to retain
clear-channel,top-rated WJR AM 760, and its FM companion, WHYT 96.3
(those were The Good Ol' pre-duopoly Days).
The ABC properties were spun off-
WRIF(101.1 FM) has since been through a number of ownership changes.
WXYZ (1270 AM), sold to former VP/GM Fritz, became WXYT.
The WXYZ call letters live on at WXYZ-TV Ch.7, a Scripps-Howard
property and still an ABC affiliate.

855. Tom LEYKIS

Newsgroup: rec.radio.broadcasting
Date: 1994-03-12 05:18:47 UTC
From: charles.hobbs@support.com
Message-ID: <2lrjbn$hbf@vixen.cso.uiuc.edu>
Source record: 40810

N> * ARS' WRKO AM680 is in the process of more changes in its all
N> talk line-up for the 3rd time in less than a year...A nationally
N> well-known talkshow personality, Tom Leykis, departs The
N> TalkStation

We had Leykis here in LA on KFI-640 between 1988 and 1992. I don't remember his exact ratings. He was very popular, at least initially. . .

He seemed "cleaner" than Stern (no dirty jokes, really), and about as bombastic as Rush, except he was 180-degrees opposite Rush politically. (Actually, Leykis and Rush did several shows together on KFI, and they seemed quite civil to each other).

During the first two years, he did have some funny shows. As time went on, however, he seemed to be trying to be the liberal answer to Rush Limbaugh (and dare I say it? the atheistic answer to Bob Larson)

Leykis left KFI in mid-1992. KFI would give no reasons for his departure, leading some to speculate that KFI was "conservatively-biased" . . .

P.S. I also remember some comments Stern made over the air about Leykis when Stern's show was first broadcast in LA in 1991. Stern said stuff along the lines of "Where was Leykis when I was fighting the FCC? Now that I've gone through all this, has Leykis now grown a pair of [gonads]? Leykis should wash my feet!", etc.

[Moderator's Note: Similar thing here in Chicago. We had a guy named Bob Lassiter. Funny, articulate, often offensive, and (worst of all) a Liberal voice on WLS <gasp>. He was canned without notice on a Friday and WLS is still unwilling to say why. They say he offended people, but if that is reason to be fired, then WLS had better go off the air. Bill]

Hi all you radio crazies out there... I am a NYer from NYC who grew up listening to Z100's Z zoo in the morning with Gary Bryan and Ross Britian. I was upset when they both got the boot and Jon Lander took over the zoo. I know now what happened with Lander, he's great, but I have to wonder and know what happened to Gary and Ross.

If anyone has a heart or the info, let me know about them, and any Z100 news you have, being 300 miles outside of NYC and being home once in a while I miss out on the new ZJ's. And also if you even happen to have any news about Lander and Scott Shannon, pass it to me as well.

Hi, I'm marketing manager of a new local independent radio station (1305 KHz), Irkutsk, Siberia, Russia. Few words: we broadcast mostly music (90 %) and commercials, 24 hours a day, 7 days a week, staff: 20 persons.
Transmitter: 10 kWatt. Have been *on air* for over an year.
Status: limited company. Target: age 15 to 35. Competition: poor /3 to 4 local AM stations/.

Looking for a contact with foreign (small to middle-sized) broadcasters for discussions and maybe some other kind of cooperation. Would appreciate any sort of advices on marketing strategies, setting up shows, *hooking-up* the audience, types of advertising, etc.

Thankful in advance
Vladimir Pogrebinsky /vladmark@advert.irkutsk.su/

858. San Diego County Report

Newsgroup: rec.radio.broadcasting
Date: 1994-03-12 05:18:55 UTC
From: Chris.Carmichael@artecon.com
Message-ID: <2lrjbv$hbj@vixen.cso.uiuc.edu>
Source record: 40813

Greetings from Carlsbad, California:

Here's the latest scoop from the 15th largest market in the U.S.:

Look for all sports, XETRA, AM 690 (Tijuana, Baja California, Mexico) to start a new schedule next week. Steve Hartman and Chet Forte get an extra hour; and will be heard from 9 a.m. to noon. Jim Rome moves to noon to 4 p.m., and Lee Hamilton goes from 4 - 8 p.m.

To increase LA area coverage, XETRA has a LA basin studios, and gives traffic reports from the border to Santa Barbara. The 50kw U station is reportedly heard in Alaska at night; and Bakersfield in the day. Likewise, the sister station, XETRA-FM, 91.1, screams at 100kw, and is heard throughout LA. Both stations have showed in the ratings book.

Employees at LA 50kw KMPC, 710 sports, were told when Cap Cities/ABC takes over, the all-sports format will drop. What will happen to LA based Charlie Tuna is unknown. Since he joined the station four months ago, the ratings have doubled, but XETRA still beats them. (Charlie Tuna was most recently at KCBS-FM before they jumped to the arrow format.)

In the wake of KMPC dropping sports, XETRA-AM officials met with represtatives at UCLA about moving the Bruins games from KMPC to the Mexico-based broadcaster. If it does happen, it won't be much of a dial change, KMPC is 710, and XETRA is 690.

AM 760 KFMB, the local CBS outlet will carry the SD Padres. That gives XETRA the chance to carry CBS radio coverage of the NCAA tournament.

Paul Palmer, vice president and general manager of KFMB-AM has quit after 22-years with the 50kw station. Thursday was his last day. He was instrumental in signing contracts with the San Diego State Aztecs, and the SD Padres baseball club. At one time, Palmer and John Lynch -- president and CEO of Noble Broadcasting [XETRA-AM and XETRA-FM 91.1] were both junior executives at KFMB.

There is some resentment from U.S./San Diego based broadcasters about getting sports and/or English coverage in southern California from south of the border. San Diego has four Mexico based FM stations that cater to north of the boarder; and one television station (XETV, ch 6) that is a Fox affiliate.
{of course, these same people don't say anything about the U.S. based Spanish language stations that cater to Baja California residents.}

I live in Canton. Unfortunately, 106.9 FM has gone "poppy" the past few
years. It seems that's the way formats are going--broader and appealing to
its listeners. Basically stations have todo this to stay alive economically.
Good AOR or even CHR stations are hard to come by. todd.

You can pick out worse things that they overplay, such as Meat Loaf's "Rock
'n Roll Dreams come through". Just because something is on the Singles
Charts doesn't mean that its good, and "Dreams" is inferior and very
similar to "I'd do anything..." which has been overplayed so much that
hearing Meat Loaf's voice causes a gagging reflex in 90% of the population.

Weeeell. Nice as it is to think that, I have a deep and dark lurking feeling that you will always find that the market has a place (and a large place at that) for chart stations - hence their success at the moment, albeit in a less fragmented marketplace than may be seen in the future. And hence the reason we call them "mainstream" stations.

In the U.K. at present there is a big debate going on about the opening up of 105-108 on FM. This would be the first chance for Britain to actually get trully local radio on FM as opposed to another national or regional commercial station. Apart from in the biggest cities, radio listeners over here are currently limited to a dire selection of BBC radio, a couple of independent national stations, and a charty regional station.

Compared to what the average British listener has on offer, you guys should be pretty happy with what you've got.

The call letters could always be separated by frequency or channel number. I think that the rules have been relaxed further (with the "you can append any city you want after your city of license" dereg), but I am unaware of how far one can go.

Yes, but... You can put the following between the Call letters and
city of license.

1. Name if licensee as it appears on the license
and
2. Frequency and/or Channel # of the station.

lancebkost he says:
According to my trusty M Street radio Directory,
That "should" be KKHI-AM, San Francisco.
It is a simulcast of KKHI-FM 95.7. I could be wrong but the AM
is a 50KW directional signal. Where it's directed, I know not
where.. I can pick them up at night sometimes in LA

Alas, KKHI was recently sold and will soon be going to all talk.
Pretty soon all the stations in the Bay Area will be all talk all the time.

866. Re: KJAZ (SF area) up for sale (was: Re: more on KKHI)

: Another upcoming and sad loss in the SF area will likely be KJAZ, 92.7 FM
: (Alameda), which was put up for sale a couple of weeks ago. KJAZ is one of the
: only (or THE only ?) commercial station playing traditional jazz (not new age, etc)
: on a 24 hour basis. It is a true gem

How true.

> whose format will likely change upon sale.

The problem is, the KJAZ signal is terrible. They probably won't be able to
compete very well with *any* format. I expect some company already in
the market to pick up the signal and use it to "park" a format that
in some way protects their franchise. In other words, to put some format
on there as a preemptive move, discouraging other operators from going
with that format.

What I'd like to see (although it ain't likely)
is a "Bay Area Jazz Network," anchored by KJAZ,
and including some of the other weak signal stations in the suburbs. KTID
comes to mind as a natural.

As for the KJAZ cable operation, Cowan clains he will use the infusion
of cash from the sale of the Alameda signal to keep the cable operation
afloat. I hope so. Maybe some operator with a decent signal might pick
up the feed locally...

> I believe that San Francisco has another classical station . . .
> KDFC <

Still on the air, and likely to remain classical. My employers, The Brown Organization, purchased KDFC a few months ago. All indications are that Brown plans to keep the format, and improve the station.

Meanwhile, Mt. Wilson Broadcasters, new (or soon to be) owners of the signally challenged KTID, have been blowing a lot of smoke about "upgrading" KTID so the San Rafael signal will cover the whole Bay Area. I won't go into great detail here, but I will say ... that ain't gonna happen. I think thet do have a pending application for a translator in Sausalito at 100.9, but that is gonna do nothing but interfere with 100.7 in Southern marin, and maybe improve their coverage on the Presidio and in the Marina district. They have some of our print colleagues pretty snookered.

KDFC has historically been the more listened to of the two San Francisco classical outlets, but KKHI has had a higher profile. This is largely because KDFC has been largely automated. The demise of KKHI will certainly be a boon for KDFC, if something of a letdown for classical fans.

I'm not speaking as a representitive of Brown Broadcasting here, but I wouldn't be suprised if KDFC goes live in some dayparts within the next year or so. I do expect KDFC to be much more active in the community, much more visible. This is a company that knows how to promote unique radio stations.
BTW, the Brown organization is on the internet. For a list of some email addresses, and info about the gopher server and WWW server operated by KKSF in San Francisco, send email to info@kksf.tbo.com

To add some items to my post that was in ARJ 541:

1. Jeff Morrison is also with Metro Traffic,using the name Jeff Scott.(Though Alan Pergament put it in print before I did,I noticed it first.) Morrison,who was a sports reporter at WGR-AM (news/talk/sports;NewsRadio 55),also works for Empire Sports Network, doing features for "High School Highlights". He also called U.B. Bulls basketball for WXBX-AM(now WWWS-AM;business/talk;3WS-Your Money 1400).

2. Rich Communications,owners of WGR and WGRF-FM(classic rock, 97 Rock)have bought WWWS and WUFX-FM(album rock,103.3 the Fox)from Metroplex Communications for a reported $4.7 million. Metroplex was in the process of merging with the San Antonio-based Clear Channel Communications. However,I would bet you 2-1 odds that the Fox and 3WS will have new owners again by the end of the year;as I noted earlier,the Boston-based American Radio Systems(owners of WYRK-FM; country)are looking for another station(or stations)in the market. Buffalo is one of the few markets that ARS has stations in that doesn't have a duopoly deal in it.

3. WWKB-AM(talk/sports;The Big 1520)has a new dating show. Called "Radio Date",it runs from 11pm-1am weeknights and is hosted by Mary Craig.(I don't know if it's local or not;I do know that over 20 cities have versions of it.) Metro Community News,a free weekly paper,will have a version of this in their paper,beginning tomorrow (3/13). Richard Maussner,one of the top men at Rama Publishing,is one of the creators of this.(BTW,Rama recently got nailed by the N.Y.State Labor Dept.for letting underage kids deliver telephone directories and had to pay a fine. I used to work for them as a paperboy.)

From: topolski@kaiwan.com
Message-ID: <2ltmpa$7kl@vixen.cso.uiuc.edu>
Source record: 40824

* ARS' WRKO AM680 is in the process of more changes in its all talk line-up for the 3rd time in less than a year...A nationally well-known talkshow personality, Tom Leykis, departs The TalkStation later this week. Leykis was doing 10am-2pm show on 'RKO since May '93. According to the Sunday Boston Herald, Tom has signed a deal with Westwood One Radio Network to host a syndiacted show based in LA. Leykis never really made on-air impact on his audience and it was quite obvious during summer and fall Arbitrons. He was losing and losing fast(You try to come across as an angry, crude, absolutely not funny, bitter-sounding, Imus/Rush/Stern/-wannabe for 20 hours a week on the only midday local talk-show in town. See how long you last in the market? :-)

Having listened to Tom since he was the charter Program Director of the staff of KFYI, Phoenix 910 AM, I am very excited to hear this. I haven't yelled at my radio in a long time. Hopefully Leykis will be drive time, because we here in the Quake Zone need something to listen to while sitting in traffic waiting for our freeways to be repaired.

Anyone have any more info on the Westwood deal? When will it start? What LA station?

Can't wait...

Robb

Internet:

Overview:

This is the weekly news digest for West Coast Live, San Francisco's Live Radio Show to the World (actually just NPR).

Here (hear) is the upcoming schedule as we see it now:

Our producers work overtime booking talent onto the show. Sometimes they're so busy on the phone, they don't have time to keep the rest of us up to date. So join our audience at a live show. You too may be pleasantly surprised.

March 12th:

Trance Mission, worldbeat didgeridoo ensemble.

Chanticleer, acapella men's chorus.

Aquavelvets, surf music extraordinaire.

Ernesto Ravetto, ,monologist.

March 19th:

Dr. John, blues pianist (Yes, that Dr. John).

Paul Theroux, author.

Chis Williamson & Tret Fure, singer & songwriters.

Hot Club of San Francisco, Django Reinhardt inspired sound.

Pulp Playhouse, improvisational theater.

Claire Peaslee, naturalist.

March 26th:

Country group, The Doubters.

Food scientist, Harold McGee.

Monologist, Josh Kornbluth.

The Asian-American-Pacific Ensemble.

April 2nd:

Charence Major, author.

Cynthia Helmel, author.

Keith Terry and Crosspulse, body percussion.

April 9th:

Gamelan Sekar Jaya, Balinese (not Marty) orchestral music.

Author, Adam Hochschild.

Special Offers:

Drawing for Free Tickets!:

This week marks our 10th West Coast Live show. Be the 10th person to email (see rules, below) the moderator at;

Owner-West_Coast_Live@netcom.com

and you will win two (2) free tickets to this week's live show.

Rules:

The contest begins as soon as the moderator sends this notice to the West Coast Live email subscription list.

The winner will be selected based on the time the entry was sent (as opposed to the time the entry was received), no

sooner than 1 hour after the moderator receives the minimum number of entries (10), and no later than 48 hours prior to the live show.

The email must be addressed to;

Owner-West_Coast_Live@netcom.com

The email's header subject must contain the phrase; "Win Ticket Drawing".

One entry per person.

The winner will be notified by email.

If the winner can't attend this week's show, the winner may assign the tickets to a couple of friends.

The moderator's selection is final.

Free Coffee:

Wear an official West Coast Live shirt at the show, and you are entitled to free coffee.

Rules:

Official West Coast Live T-shirts or sweat shirts only.

For a limited time, this offer is extended to shirts from that old radio show, that are upgraded with an official West Coast Live Shirt Upgrade Kit.

This offer is good for free coffee only from the West Coast Live snack bar. If anyone else offers you free coffee for wearing a West Coast Live shirt, let us know.

T-shirt Drawing:

On the last live show of each month, we give away an official West Coast Live T-shirt.

Rules:

To enter this drawing, you must drop a business card into our fish bowl. Any scrap of paper with your name, address, and phone number may be substituted for a business card.

One entry per person. You must be present to enter.

The drawing is held following the last live show of each month. You need not be present to win.

Tip of the Week:

Where to park your bicycle:

If you decide to ride your bicycle to the show, bring your bike to the box office, and we'll help you lock it up back stage.

Downloading Additional Information:

You may download an information document giving background information on the show and the show's Internet service, by sending the following email message to;

LISTSERV@netcom.com

>FM; specifically, KDFC-FM. At least it was still on the air a couple of
>years ago, when I was last in SF, and it, too, has a companion AM station
>KDFC-AM (formerly KIBE-AM) in Palo Alto at 1220 kHz. (My references
>indicate that KDFC-AM drops to very low power at night, but does remain
>on the air.)

KDFC AM/FM does still exist with the same format. You're right about KTID...you can't get it in most parts of SF....and cannot get it down the peninsula and into San Jose where sooo many listeners live. IMHO KDFC is a much better station, although KKHI had some real special programming, with excellent announcers and will be missed. Geee, may the FM will play some Lite rock hits by only the Stars...that's what we need here.

The RFE/RL Daily Report is a digest of the latest developments in Russia, Transcaucasia and Central Asia, and Central and Eastern Europe. It is published Monday through Friday (except German holidays) by the RFE/RL Research Institute (a division of Radio Free Europe/Radio Liberty, Inc.). Copyright 1994 RFE/RL, Inc.

RFE/RL Daily Report
No. 49, 11 March 1994

DEMONSTRATORS PROTEST STAFF REDUCTIONS AT RADIO BUDAPEST.

According to foreign media reports, thousands gathered in front of the Radio Budapest building to protest last week's dismissal of 129 editors and journalists by radio chief Laszlo Csucs. Although the radio, with over 2,000 employees, is heavily overstaffed, opposition parties believe that the firings, which took place two months before national elections, were politically motivated. Premier Peter Boross denies having known the names of people to be fired and told reporters that Csucs alone made the decision about the journalists to be dismissed. MTI reports that the head of the parliament's cultural committee might call on Csucs to report to the committee about the situation at the radio. A counter-demonstration supporting Csucs's decision is planned by right-wing parties for next week. Judith Pataki, RFE/RL, Inc.

[As of 1200 CET]

Compiled by Bess Brown and Sharon Fisher The RFE/RL Daily Report is produced by the RFE/RL Research Institute (a division of Radio Free Europe/Radio Liberty, Inc.) with the assistance of the RFE/RL News and Current Affairs Division (NCA). WORLD FORUM FOR ACOUSTIC ECOLOGY

The WORLD FORUM FOR ACOUSTIC ECOLOGY (WFAE) is an international interdisciplinary coalition of individuals and institutions concerned with the state of the world soundscape as an ecologically balanced entity.

WFAE was formed on Friday, Aug. 13th, 1993 by over a hundred people from many parts of the world and from such differing disciplines as architecture, audio art, communications, education, film sound,geography, music, physics, psychology, radio broadcasting, sociology, and urban planning. It was created on the final day of the Tuning of the World, the First International Conference on Acoustic Ecology at the Banff Centre for the Arts, Alberta, Canada.

As Acoustic Ecology is the study of the relationship between living organisms and their sonic environment (soundscape), it is WFAE's main task to draw attention to unhealthy imbalances in this relationship, to improve the acoustic quality of a place wherever possible, and to protect and maintain acoustically balanced soundscapes where they still exist.

WFAE invites people from any discipline to become members: people who are committed to caring for the quality of the acoustic environment through the perspective of their field; people who, if they are creators of sound, are sensitive to the relationship between their sound production and the acoustic environment; people who may be specialized in one area, but have an open ear for the interdisciplinary.

Within this framework of care for the sonic environment WFAE aims to:
-create a large and imaginative variety of contexts and situations that encourage
1) listening to the soundscape.
2) sharpening of aural senses.
3) deepening listeners' understanding of sounds and their meanings.
-encourage and support research on the scientific, aesthetic, ecological, philisophical, sociological, and cultural aspects of the sonic environment.
-monitor and evaluate actions affecting and altering the quality of the sonic environment.
-study the effects of technological and human intervention on the acoustic environment.

-study the significance of the electro-acoustic media (radio, TV, background and foreground music, etc) and it's ever increasing presence in the soundscape.
-protect existing natural soundscapes.
-protect indigenous soundscapes produced by the practices and lifestyles of aboriginal cultures.
-preserve and create times and places of quiet.
-study attitudes towards silence in different cultures.
-design healthy and acoustically balanced sonic environments.
-publish and distribute information and research on Acoustic Ecology.

WFAE is coordinated by a steering committee in Canada, and has regional groups in USA, Europe, Asia-Pacific, and South Central America.

WFAE publishes and distributes THE SOUNDSCAPE NEWSLETTER, which reaches a rapidly growing number of acoustic ecology supporters.

For more information on WFAE, membership, or subscription to the newsletter please contact :

By Frank Haulgren

Edited by Neil Strauss (Village Voice, Rolling Stone, Spin, WKCR)
and Dave Mandl (boing boing, Sound Choice, WFMU), RADIOTEXTE(e)
is a wonderful collection of essays, articles and odds and ends
about radio. 62 pieces written by the likes of Bertolt Brecht,
Dutch pirate Geert Lovink, Ezra Pound, Julia Loktev, Leon Trot-
sky, Tetsuo Kogawa (father of Japan's mini-FM movement), editors
Strauss and Mandl as well as dozens of others. Their words range
from the angry - like this from Gregory Whitehead:
"Radio as cave of the imagination. In the name of mass consumption,
'con-sumer democracy', the cave of the imagination
was reengineered as Reality Radio, and before long it
was as if this was all we ever knew ... The closing
of the cave accepted as a natural fact. The
ancient and original magic of radio, the tremendous
release of excitement incited by noises floating
through the air was quickly, even brutally,

compressed into good, clean function,"
to the profound:
"What was the origin of Radio? Of course, it is not
new. It existed long before it was invented. It existed
whenever there were invisible voices: in the wind, in
thunder, in the dream...",Canada's R. Murray Schafer.

The pieces that make up RADIOTEXT(e) are divided into 11 sections: Early Sparks, Hagiographies, Alternate Histories, Broadcasts, Perpetrators, Listeners, Control, Cranks, New Approaches, Para-normal Applications and Extraterrestrial Possibilities. And, like any 11 cuts of a great album you can queue up just about anywhere and get satisfaction.

I particularly like Julia Loktev's paean to driving and listening, "Static Motion, or the Confessions of a Compulsive Radio Driver". This should be read standing-up in a convertible on the first day of every summer. Then sit down, turn the key, turn up the volume, place one hand on the wheel and the other on the tuning knob and don't look back!

Dave Mandl's, "How awful is the Radio in your city? Take this Simple Test" will make everyone wince with recognition and laugh outloud.

But, the overall tone of the anthology is set when Neil Strauss writes in his introduction,
"Colonized by the governments and corporations,
popular radio became what it is today: greedy
and boring. The strong arm of the FCC perpetuated
and ensures this misuse of radio."
170 pages later Margaretta D'Arcy, writing about a 1990 convention of women pirates in Dublin, offers up the antidote:
"...this is how we should be thinking for the future: building up networks of small transmitters,
learning how to make transmitters ourselves and
passing the skills on, learning how to run our
own radio and TV stations, where all our skills
can be shared... over the airwaves in the community....
The technology is now available and it is cheap.
But the controls
over it... have to be broken..."
Heady stuff.

My single complaint about the book is that it provides no information about the writers. I'd like to know who D'Arcy is and what she is doing today. That said, though, RADIOTEXT(e) is well worth the read for anyone who gives a damn about radio and shares the clear-eyed vision of the medium offered up by Jackie Apple in, "The Art of Radio":
"Radio is a space without walls, an art alternative
that is the ideal locale for an art that

seeks to present itself as information and
experience as opposed to goods."

############

877. MEDIA FAX LISTS AVAILABLE FOR FTP GOPHER and EMAIL

Newsgroup: rec.radio.broadcasting
Date: 1994-03-13 09:40:13 UTC
From: wdp@uiuc.edu
Message-ID: <2lun1t$h0j@vixen.cso.uiuc.edu>
Source record: 40832
Cross-posted to: rec.radio.broadcasting,rec.radio.info

A poster has sent in three 900 line files consisting of media fax
numbers. They are too big to realistically post to the entire world,
so they are being added directly to the FTP and GOPHER archives for
AIRWAVES RADIO JOURNAL, which as most of you know is the email digest
reflector for rec.radio.broadcasting.

To access the archives via FTP...

ftp radio.aiss.uiuc.edu /misc/rec.radio.b-cast/FAX

They, like the rest of the archive, are in compressed form and must be
transfered using FTP's binary mode. (Type binary at the ftp prompt).

To use gopher, ...

gopher radio.aiss.uiuc.edu 7070

Then follow the prompts. Use ? for help in gopher.

To get them via email, send mail to rrb@radio.aiss.uiuc.edu with ...

Subject: FAXDIR-1 -- -- (for letters A-H)
Subject: FAXDIR-2 -- -- (for letters I-M)
Subject: FAXDIR-3 -- -- (for letters N-Y) <No 'Z' lists>

NOTE: ONE FILE REQUEST PER LETTER PLEASE. If you want them all you
must send three letters. YOU MUST PLACE THE ABOVE IN THE SUBJECT OF
YOUR EMAIL.

You should get them back in return mail.

Also note that I make no claims as to the accuracy of these lists.

William Pfeiffer

If you are really interested in broadcast radio in your own area, you might wish to get involved in the AIRWAVES "RadioWatcher" project.

We are currently asking for individuals who are either active in the industry, or are very much involved in the happenings around their town/city/community and would like to become recognized as a "RadioWatcher" for AIRWAVES.

As a RadioWatcher, you will be responsible for reporting the goings-on in your locale, and will be, in effect, a staff reporter for AIRWAVES. While anyone can write an article for the Journal, RadioWatchers will be considered the de-facto correspondent in a given city.

As a RadioWatcher, you will be asked to keep an eye and ear out for news and schmooze about the broadcasting scene in your market. You are asked to submit at least one report per month (more if you choose) and will be kept on file here at AIRWAVES as an official member of the press.

The purpose of this program is to create a base of volunteer staff reporters who's job it will be to keep a steady flow of good information about various markets coming in to AIRWAVES. It does not mean that the pages of AIRWAVES are closed to any of the other posters in net-land. It is just a way to assure that the readers will have something good to read, when the more casual posters are not available.

Q: What do I need to do?

A: RadioWatchers are basically the same thing as reporters. To remain on the RadioWatcher program, you are expected to be involved with

radio in your market, either by profession, or by a strong personal interest. You will be asked to report on any interesting goings-on in and around your market. Such as format changes, station sales, interesting trends, market ratings, and whatever else seems appropriate. The depths to which you dig for information is up to you.

It is important, though, that you are a true fan of radio, and not merely a fan of one sort of format. Your reports can have personal commentary, but should be based on actual facts (as you know them) rather than how those facts match up with your personal opinions.

In general, we need good, solid reporters who will do the job based upon their love of radio, and desire for more exposure. AIRWAVES is not a profit making entity, and so salaries cannot be offered. If you are a budding journalism student, or a seasoned pro, this may be a chance for you to show your stuff to the world. Airwaves is read across the globe via the Internet, and is available to subscribers of CompuServe, GEnie, AOL and on a host of BBS systems, via email. Your input will not go unnoticed.

So if you are interested, drop me a line and tell me about yourself. I will be in touch by return mail. Those of you who expressed an interest in the past, are encouraged to get back in touch. Those of you who are already RadioWatchers, thank you and keep up the great work. As AIRWAVES expands, your contribution will be even more important.

Source record: 40834

Another weekend scan of Kansas City radio, as I traveled from Gladstone to Lawrence and back to the city.

WDAF(AM) is now promoting its news director, Charles Gray, in its billboards. The billboards say, "Charles Gray. For 43 Years. Same Job. Same Hat. Not the Same Old News" in front of a silhouette of Gray (wearing his trademark hat).

Gray has actually been at WDAF since the mid-1970s but he was a longtime newscaster at KMBC-TV before that.

The country/western station is wisely playing up its news image, and, as I reported a few weeks back after our rush-hour snowstorm, it delivers what it promises. Gray is best known for phrases such as "The victim will live...this time" and "Gunfire has filled another Kansas City hospital bed."

He also never seems to miss a fire.

WDAF is the only Kansas City radio station that staffs its news department on the weekend. None of the three news/talk stations in the market maintains a weekend news staff.

And then there's WDAF's sister station, KYYS(FM).

I tuned across the dial and heard, "It's a Random Access Weekend on KY-102." along with a sound effect of a CD player on fast-forward. But the preceding tune was from Eric Clapton, and so was the next, and the next after that.

Didn't sound random to me, but my expectations of KYYS are somewhat lower than my expectations for service at a state motor vehicle registration office.

Anyway, I stayed tuned, wondering what they were doing. It turns out they were playing three or four tracks from a particular artist's CD, and trying to make it sound as though they were being randomly selected by pressing the fast-forward (or rewind) key between each track. Or so they said.

It just actually sounded like the announcer was inattentive and letting dead air slip in between the tuneage.

(And for a station whose studios are located right at its transmitter site, KYYS has just about the trashiest audio quality: compressed with almost no gating, and distorted and clipped, too. I thought maybe it was multipath in the city, but, no, it sounds just as bad out on the road on Kansas 10.)

KZTO(FM) Ottawa is very much off the air.

The station is at 95.7 and its transmitter is (or maybe *was*) just southeast of Lawrence.

Yet, I was able to snare a remote from KWWR, Mexico, Mo. from the Callaway County Home Show (live and direct from the VFW hall in Fulton!)

while waiting for the slowest stoplight on the planet to change at 23rd Street and Naismith Drive in Lawrence.
Does anyone know what happened to this station?

I didn't listen to much AM radio this time. It seemed almost every AM transmitter was running some version of the Big Eight basketball tournament. Even WNAX Yankton, S.D. (a legacy signal at 570) was carrying it.

I did hear one great phrase from KFAB Omaha (news/talk at 1110, a very good station, too). A horticulturist from the University of Nebraska was conducting a call-in show on plants and related topics, and described his show as "an interactive developmental experience."

o.k. here is the news. RADIO AAHS, the 24 hour a day children's radio network, has disappeared from their analog subcarrier home on the video channel of the Midwest Sportschannel.

I'm wondering if the network still exists. If so, then that would mean the radio delivery method has changed (probably to DATS/SEDATS). I have looked for them in my sky-scanning and haven't found them elsewhere, FYI.

Thanks for any info on the status of the network...

In a recent post, Carl K. Gorney updates the latest Buffalo radio happenings.

5.Ron Schanne is now doing weekends at WMJQ-FM(hot A/C;Q102).
He previously worked at WBUF.

Ron also worked at Oldies 104 before that (I work there on the AM side)m and I got to know him..in fact if I don't call him soon he'll kill me :-). Anyway, Ron was fired from WHTT about a year and a half ago because he was injecting "personality" into his Saturday morning shows there...taking phoners, doing lots of one-liners, etc. Well, all WHTT wants from its FM jocks are to read the liner cards, play the ten in a row, and leave the "
ten in a row, and leave the "personality" to Dan Neaverth weekday mornings. In fact, after Ron was let go (fired in absentia at a staff meeting, by the way), they began playing "highlights" of the previous week's morning shows, running the "Best of the Dan Neaverth" show every Saturday from 7 till 10. Ron ended up at WBUF (which ironically is now owned by Pyramid Broadcasting, which owns WHTT!) for a while, and took the WMJQ job when it came up. He left WBUF on good terms, by the way. He's a good talent, and a good guy who got the shaft at WHTT.

Mark Wozniak

Message-ID: <2m0ua8$9qd@vixen.cso.uiuc.edu>
Source record: 40837

I'm engineer for a small student radio station here in the UK. We can't actually broadcast because of the rules concerning permament small-scale transmission is this country (only type allowable is 'Induction-Loop' Radio, and a typical installation quote is 15,000. Our studio budget was 3000!) so instead the system is wired into strategic points at line-level.

Anyway, I'm also involved in engineering larger scale, short-term projects where freely-radiating transmission is used.

These are called RSL's (Resticted Service Licence) and we typically set up a station to provide advertising and information for an air-fair, etc. The station would normally be on for about a week. These setups are also very low-budget, and due to the rules we only broadcast about 3 Watts ERP. Obviously we can do with as much help as possible in getting the signal out, especially on the crowded MW band.

We always have a compressor on hand to try and improve the audio 'punch' of the signal (and also to help the DJ's who can't quite get their links right!) - the problem is that I (and others involved) always disagree with the chief engineer on how the compression should be set up - ie ratio, attack, decay, etc, and whether or not the DJ should hear the post-compression output or the pre-comp. He himself admitted that he doesn't really know how it should be technically set up - so we do it on-air, by ear. This doesn't work - often the sound is better without compression. But obviously large stations know how to set it up because they can find a compromise between gain control and the effect on the audio. (The UK's Radio One uses THREE stages of compression!)

I would be really grateful if anyone could either tell me their opinion on setting compression up, or recommend a good book, preferable with a view on the whole technical side of radio. No such book appears to exist in the UK.

Also, I'd be interested if anyone, anywhere, is in the same situation as me, trying to engineer a station on a shoestring budget! The desk we use is actaully for stage-sound; it cost 400, and I had to build all the "handling" systems - eg mic mute, red lights, etc myself. The red lights are 12v bus bulbs, with red lighting gel wrapped around them, and the stations audio is distributed by cable, fed from a distrubution amp made from 6 '741 op-amps : not exactly broadcast standard. But it does work... just!

Thanks

Raj

In article <2lrjbl$hbc@vixen.cso.uiuc.edu> you write:
>
>I have recently help to form a student run TV-staion that is broadcasting
>over the air, WEXP-TV, Channel 28, Hoboken (across the river from Manhattan).
>I wos wondering if anyone out there knows the rules as to what we can and
>can not say over the air. I imagine it would be the same as with radio.

What you fail to disclose is whether you are training the "students" to be
professionals or toilet mouthed idiots.

You will not find a single paying employer who will hire any tv talent on the
basis of how far he/she thinks they can take "free speech".

Just tell your students to grow up, act professional, and you don't need to worry a bit
about what language you can use. It should be self evident.

884. Oxford Student Radio

Newsgroup: rec.radio.broadcasting
Date: 1994-03-14 05:56:30 UTC
From: chri0022 <chri0022@black.uucp>
Message-ID: <2m0uae$9qe@vixen.cso.uiuc.edu>
Source record: 40839

Oxford Student Radio is a new venture to launch a student radio station
that would be freely radiating (hopefully on FM) in the Oxford area.

For those who aren't aware, the situation in the UK is that the authorities
have not in the past granted licenses to student radio stations to
broadcast freely. Normally, student radio stations broadcast by way of
an induction loop system which limits the broadcasting to buildings
fitted with the loop.

Such a system would not be feasible in Oxford. Oxford University is split
into colleges, of which there are over thirty. The cost of wiring up thirty
plus buildings would be astronomical. We would also like to include Oxford
Brookes University in our project, and other educational establishments
in the area. Also, even if we did have the money to install induction
loops everywhere, most buildings in Oxford have listed status - and Nat-
ional Heritage make enough fuss about the colleges installing phone lines
in them...

However, we believe that we have a good chance of obtaining a license from
the UK Radio Authority.

We are looking for help and support - especially from people who have
expertise in student radio stations. We would be very interested to hear
of the experiences of our friends abroad.

We would also be interested to hear from anyone who has had experience of
applying for a radio license in the United Kingdom.

Please e-mail be if you have any comments, or would like to help.

Thanks.

Paul Hillyard Corporation (UK) (Brunel.Radio.B1000@brunel.ac.uk) wrote:

: Weeeell. Nice as it is to think that, I have a deep and dark lurking feeling
: that you will always find that the market has a place (and a large place at
: that) for chart stations - hence their success at the moment, albeit in a
: less fragmented marketplace than may be seen in the future. And hence the
: reason we call them "mainstream" stations.

I'm glad you pointed out the fact that the British radio marketplace has much less fragmentation than the American.

The UK is at a different stage in its development than the US because of the longstanding BBC monopoly and, later, the relatively restricted introduction of competition.

The United States never has had a true publically funded network (there is National Public Radio, but it is more in the nature of a cooperative) and, even when network radio was at its zenith, autonomy for local stations was still preserved and enforced by FCC regulations.

Since the demise of network radio, beginning around 1950 and continuing through the early 60s, all radio in the United States is local. (We can exclude satellite-fed formats from this discussion. Most listeners exclude them from their listening.) During the Mark Fowler reign at the FCC, the FCC seemed hellbent on introducing more fragmentation, most notably through Docket 80-90, which reduced the mileage separations for FM stations in much of the US, enabling many more stations to be put on the air.

The broadcasters got what they wanted: freedom from regulation. Any first-year public administration student, however, can tell you that the real purpose of regulation is not to protect the public, but to protect those who are regulated from the vagaries of the free market. Off went regulation and away went the protection.

The broadcasters now are hurting and squirming. Instead of trying something new in markets that now have too many signals to support the same old chart-based programming, they instead have run and gone screaming to Mommy (in this case, the FCC) and Mommy hath given them duopolies and relaxed terms on lease agreements and other goodies to reduce competition. The short-term problem is alleviated but at the long-time cost of further alienation of audiences who can't find what they want. Their expectations of radio are such that they don't bother even turning it on any more.

(As for me, I end up cleaning the tape heads on my car cassette players about once a week.)

The survivors, by and large, have been the stations that really have been local, so I think we would agree that having locally-based radio is a good thing. I think where we might disagree is in how we think it will turn out.

The British situation described below is more typical of what it was like in the United States in the mid- to late-60s, once network radio had truly died out, and before FM came to full flower.

: In the U.K. at present there is a big debate going on about the opening up
: of 105-108 on FM. This would be the first chance for Britain to actually
: get trully local radio on FM as opposed to another national or regional
: commercial station. Apart from in the biggest cities, radio listeners over
: here are currently limited to a dire selection of BBC radio, a couple of
: independent national stations, and a charty regional station.

Maybe we just get the best of the BBC over here, but referring to the BBC as a "dire selection" is something I would respectfully wonder about.

886. WMMZ/Ocala ==> WOGK-FM

Newsgroup: rec.radio.broadcasting
Date: 1994-03-14 05:56:32 UTC
From: a.reninger@genie.geis.com
Message-ID: <2m0uag$9qi@vixen.cso.uiuc.edu>
Source record: 40841

WMMZ/Ocala changed call letters to WOGK-FM Friday at 5:00pm, which I presume stands for Ocala/Gainesville's K, as in "K-Country 93.7 FM." It's not, as I thought it might be, a `young country'-type station. Instead, it's even less-current-based than the other Ocala-country station, WTRS, but the jocks are better on WOGK.

889. Kansas City Radio in 1962

Newsgroup: rec.radio.broadcasting
Date: 1994-03-14 05:56:40 UTC
From: Mark Roberts <transvox@tyrell.net>
Message-ID: <2m0uao$9qn@vixen.cso.uiuc.edu>
Source record: 40844

Yet another finding in the archives: Page 22 of the Kansas City Times
from Saturday, December 15, 1962, containing Sunday radio listings for Kansas
City stations (with the prominent sub-head: "Recorded Music Except as
Listed.")
I won't repeat it all because Sundays were not typical days, but I will
list the stations and their Sunday schedules:
WDAF (610) and WDAF-FM: 7 am to 12 midnight.
WHB (710): 24 hours.
KCMO (810): 6 am to 12 midnight.
KMBC (980): 24 hours. (now KMBZ)
KCKN (1340): 24 hours, but signed off at 11 pm Sundays. (now KNHN)
KUDL (1380): 7 am to 5 pm. (now KCNW)
KBEA (1480) and KBEY-FM: 5 am to 5 pm (AM), 24 hours (FM).
KCCV (1510): 7:30 am to 5 pm. (now KJLA w/ KCCV at 760)
KPRS (1590): 7 am to 5 pm. (now KPRT)

FM stations were listed in a separate box with no schedule:
KCUR-FM.......89.3
KTSR-FM.......90.1 (KKFI, a different station, now at 90.1)
KCMK-FM.......93.3 (now KMXV)
KCMO-FM.......94.9
KXTR-FM.......96.5 (now also owns KBEA)
KCJC-FM.......98.1 (now KUDL)
KMBC-FM.......99.7 (now KLTH, longtime KMBR)
WDAF-FM......102.1 (now KYYS)
KBEY-FM......104.3 (now KBEQ)

Other Sunday programs of note:
On WDAF, Meet the Press featured McGeorge Bundy at 9 pm. Also listed for
5:15 pm was Chet Huntley for 15 minutes.
KCKN had a "Spanish Program" at 8:05 pm, and KUDL had the "Mexican
Nazarene Hour" at 7:45 am.
KUDL had "Pro Football, Cardinals vs. Philadelphia" at 1 pm (this was
before the Chiefs)
On KCMO at 7 pm was the "World Tonight" (the longstanding CBS 15-minute
news roundup), with the "World Tomorrow" (the Armstrong evangelist clan's
broadcast) at 7:30 pm. No mention of a "World Yesterday" (at 6:30 maybe?)
But that might have been a "Leading Question" (at 9:05 pm). Also listed for
11:45 pm was "Entertainment."

The TV listings are just above the radio listings. Current shows in 1962
included The Jetsons, Ed Sullivan (of course!), Car 54, Bonanza, the Real
McCoys, and Candid Camera on Sundays, and Jackie Gleason, Sid Caesar, Joey
Bishop, Lawrence Welk, Gunsmoke, and Have Gun, Will Travel on Saturdays.

Very interesting commentary about KMOX. I grew up in Illinois and can affirm that KMOX was class all the way, and that everyone knew where KMOX was on the dial. I believe the general manager, Bob Hyland, was behind KMOX's style. As to its demise with the addition of Rush, I can tell you that I have witnessed a similar fall here in Raleigh North Carolina, as WPTF (50kw on 680), has gone from a 'station of record' position to far far less. The sales department runs the station and there is nothing they won't put on the air. Their news department has been cut back, etc. During the same time that KMOX was doing well, WPTF (which used to be locally owned by the Durham Life Insurance Company----WPTF=We Protect The Family) was doing well too, and had a lot of RESPECT. Today there are times when the station sounds like a 250watt satellite radio relay. KMOX used to say 'at your service,' and that might still be somewhat true, but for those of us who remember 'when,' service was in CAPS instead of lower case.

Does anyone have a list of know of a list (ftp, usenet, etc..)
that has all of the AM/FM freqencies, calls, etc. on it?? Please
let me know. Thanks

[Moderator's Note: Such a list does not exist as far as I know. It
would be very expensive to maintain. There are good books available,
though, and my favorite is the M-Street guide. It costs about $30 -
$35 is no large paperback format and is pretty accurate. They can be
reached at (212) 473-4668. Ask for Pat Mc Crummen and tell them that
you read about it on AIRWAVES. No, I am not making a commission :-).

Chris Carmichael (Chris.Carmichael@artecon.com) wrote:
: There is some resentment from U.S./San Diego based broadcasters about getting
: sports and/or English coverage in southern California from south of the border.
: San Diego has four Mexico based FM stations that cater to north of the boarder;
: and one television station (XETV, ch 6) that is a Fox affiliate.

Wasn't XETV-6 an ABC affiliate until channel 39 raised a big stink about a Mexican VHF station being favored over a U.S. UHF station, resulting it the ABC affiliation going to ch. 39 (which later became an NBC affiliate)?

What do channels 51 and 69 think about Fox's affiliation with ch. 6? (Channel 6, by the way, had a much poorer over-the-air signal in the University City area when I lived in San Diego in the early 80's than any of the local UHF stations then on the air -- 15, 39, and 51.)

: to get its till tapped sooner or later.

NO NO NO NO! That's exactly my point. Your wonderful description IS EXACTLY how most station owners treat their franchise, and most of 'em are making boatloads of money. Simply stating that this unimaginative commercial attitude won't work is glib, but it simply isn't accurate.

Whether we want to acknoweldge it or not, there are sound economic reasons why treating your radio station as a 'jukebox metered by a cash register attached to an antenna' is the best way to make money with it.

'Locally programmed' is NOT a positive value for the majority of listeners, even if it is to us. Bitch and moan all you want about McDonalds, Denny's, WalMart, Starbucks and all the other national chains in ANY consumer service industry, but they seem to be doing just fine. We're all lamenting the demise of the Mom 'n' Pop EVERYTHING, but wishing them back hasn't worked. Most consumers (and that includes 'listeners') have vapid, timid, middlebrow tastes that value safety and predictability over adventurousness and novelty.

I respect your views and share your disappointment with the fate of radio, but I think you already would have lost your "bet that a locally programmed, audience-responsive, ideosyncratic, unpredictable, musically adventurous station would have a better shot at hanging onto its audience that one that was programmed strictly by national charts, dependent upon syndicated features & personalities, and 'safe' in its presentation." Last time I checked the ratings in any major market, it was the syndicated programming, chart driven stations that were booming and the quirky, offbeat alternatives that were losing. Now don't pick on me with anecdotes. Yes, there are a few stations that are surviving with a more adventurous programming philosophy, but they are the exception (and their long term survival is constantly in question). The ultimate proof? We wouldn't be having this discussion if quirky, locally oriented stations were really better able to win audiences and make money than the evil,

cookie cutter variety, because the latter wouldn't exist.

More on the dictates of Economics - the Canadian version

I live in a small city of 60,000 which has two operations running an AM and FM
station each. Acouple of years ago all four stations started to take a
satelite feed for the grave yard shift (Midnight-6am) to cut costs. This was
the shift that started me as a radio announcer - a hundred bucks a week and all
the records I could eat. I was concerned then that this was going to deny
those needing experience an opportunity to learn. Now one of the local
companies has laid off all their announce staff except for the two (AM/FM)
morning hosts. The rest will be either satelite or automation. Wow, a radio
station with only one jock. Is this a cynical business decision or someone's
idea of survival. The folks at the other stations are going to be competing
against a machine - and their 'management' have told them that they had better
win. So much for radio, nice for the 70 years its been around, but its gone
as we knew it. Think I'll start a pirate <grin>

While watching a show on "New York: The Way It Was" on Channel 13 in New York (it's Pledge week, you know), they showed part of a tape of a recreated broadcast of "Tom Corbett, Space Cadet." This was probably done for an old-time radio convention. One of the participants was Jackson Beck, who was one of the old radio veterans who can still be heard on scores of radio and TV spots to this day (he's somewhere in his 80's). Anyone know where this bit of tape came from?

899. Re: IF's/ SRF-42 AMAX Stereo Walkman

Newsgroup: rec.radio.broadcasting
Date: 1994-03-14 06:06:03 UTC
From: Garbageman <AET7350@ritvax.isc.rit.edu>
Message-ID: <2m0usb$a9k@vixen.cso.uiuc.edu>
Source record: 40754

Somebody asked about IFs in radios a while back. 455KHz is common in
AM radios, but 450KHz seems to be more popular in digitally-tuned radios
because 450 is a multiple of 10, so a 10 KHz reference frequency can be used in
the PLL circuitry. If 455KHz were used in such a radio, then the reference
frequency would have to be 5KHz or lower (i.e. 2.5KHz or 1KHz). This is really
no big deal, but a lower reference frequency means that the local oscillator
frequency must be divided further, and that requires a more complex
programmable divider circuit in the PLL chip.
I think that 262KHz, 450KHz, and 455KHz are all used in car radios
today, even though digitally tuned radios that don't use 450KHz or 455KHz
might use something close to 262KHz that is a multiple of 10 to keep the PLL
circuitry simple. I've seen ceramic filters used with both 450KHz and 455KHz
IFs, but I've never seen ceramic filters for 262KHz. I would imagine that the
advantage of using 262KHz as an intermediate frequency is that properly
designed filters at this frequency could provide better adjacent channel
rejection than 455KHz filters. Then again, using a lower IF would cause more
image problems, but most auto radios use a dual-tuned front end for AM. Using
a 262KHz IF in a home radio with the ferrite rod antenna being the only RF
tuned circuit would not be a good idea! :(I don't know how these three
frequencies became standard, especially 262KHz (I'd expect something that ends
in a 5 or a 0).
I bought a Sony SRF-42, recently, and I'm pretty impressed (for the
most part). This radio proudly wears the AMAX Stereo logo and has a big, red
sticker on the front that says:
///AM STEREO\\\
<<< --------- >>>
\\\FM STEREO///
For those of you that don't know already, AMAX stands for "AM at its maximum
potential," and is a set of guidelines for AM receivers, some of which
(impulse noise blanking circuitry and external antenna connections) do not
apply to battery powered portables, such as the SRF-42. AMAX standards say
that the frequency response of a receiver must be within +1.5dB and -3.0dB
over the frequency range of 50Hz to 7500Hz, referenced to 0dB at 400Hz, when
the appropriate treble pre-emphasis curve is used at the transmitter.
The frequency response seemed good (I can only tell by listening, since
I'm stranded here at RIT, with my trusty audio generator and oscilloscope
hundreds of miles away at home :( ). Besides that, I was happy just to own an
AM stereo Walkman. The sound quality of this radio makes a lot of AM programs
more enjoyable to listen to, even if they are not in stereo (such as the jazz
and blues shows on WXXI 1370, Dr. Dean Edell on WHAM 1180 and Lee Mirabal on
WHHO 1320). This radio doesn't have a pilot signal detector for AM stereo, so
the L-R channel is enabled whenever a signal is properly tuned in and the band
selector switch is set to "AM stereo". Besides its obvious function, setting
the bandswitch to "AM mono" seems to decrease the audio bandwidth, although I

don't know if the IF bandwidth is decreased. As far as I could tell from looking inside the radio, the only AM IF filters are an IF transformer and a large ceramic filter (the circuit board cannot be removed from the back of the case without unsoldering the battery connections, and these parts are on the component side of the board, which is concealed by the back of the case). The foil side of the board teems with surface mounted components.
On the downside, this radio is very hard to tune!!! Gears are used to connect the tuning knob to the variable capacitor, and the teeth don't mesh very well. I didn't have the dial calibration problems that a previous poster mentioned, though. Since C-Quam AM stereo is phase sensitive, a pop will be heard from the headphones if the radio is bumped or if the tuning knob is moved; this pop also makes the radio difficult to tune properly. I really wish that SONY had gone the extra distance and made this radio PLL tuned or, at least, put some AFC circuitry in the AM section. As was mentioned in a previous post, the volume control is not in the best of locations. The "tuned" LED is recessed into the case, so it seems very dim. Another inconvenience I found is that in order to get the AMAX audio performance out of this radio, the bandswitch must be set to "AM stereo." This is a problem when listening to mono stations because it adds noise from the L-R detector to the audio, and some mono stations tend to introduce spurious phase modulation into their signals which can sound very annoying (WYSL 1030, for example, sounds very distorted, especially in the left channel, when listened to in stereo). When the radio is switched into mono, I noticed some rude behavior around 900KHz. The FM performance is not very good, and the FM section seems to be seriously overloaded by the signal from WITR (the RIT student station), whose transmitter is on an adjacent building.
Overall, the radio is not as bad as I may have made it sound. If you want an AM stereo portable, I suggest that you buy it, and I think you'll agree that the fidelity of the SRF-42 is better than whatever AM radio you're listening to now.

Message-ID: <2m3fou$9rp@vixen.cso.uiuc.edu>
Source record: 40756

Should DJ (Jock) listen to PRE or POST processing (Compression)?

Both sides:

Listen PRE so he(she) does not try to fight compressor by running levels higher and higher without hearing any increase in level (as would be case with listening POST compressor).

Listen POST so Jock does not have to worry about exact levels as long as he(she) can hear something. CBS labs (creator of one of the first successful broadcast compressors) recommended putting all monitoring points (VU meters, studio monitors) AFTER the Audimax (compressor) and letting the Audimax find the right level.

As for setting up the compressor, it's half personal taste and half what you are trying to accomplish. If you want musicality, go for slow release times and moderate attack; if you need high average level (loudness), go for relatively fast attack and release. Keep playing until you find what works for you:-)

902. Economics of Radio, (again)

Newsgroup: rec.radio.broadcasting

Somebody, (I can't remember who, sorry) said...

> "bet that a locally
> programmed, audience-responsive, ideosyncratic, unpredictable, musically
> adventurous station would have a better shot at hanging onto its audience
> that one that was programmed strictly by national charts, dependent upon
> syndicated features & personalities, and 'safe' in its presentation."

The proof that this is incorrect lies with BBC Radio 1 FM. It used to be the most popular music station in the country, playing the "safe" format of chart music and using sydicated personalities.

Then along came a man by the name of Matthew Bannister. The format needs to change was his cry. Gone were the age old presenters, to be replaced by young dynamic jocks. Damned was the groovy chart style to be replaced with a more unusual format. Gone were the listners as well. 1.5m in a month. And Bannister has future plans for the station. Poetry shall be part of the programming, more speech will be introduced. I don't need to tell you the predicted result.

On the other hand, Capital FM, (A local ILR serving the London Area), is the most popular station in the city. It's profits are huge, (I'm not exactly sure but I think it's in the region of 50m pounds sterling). At 2am they have a listnership of 1 million people. Need I tell you that they play chart music and adhere to the safe format. I didn't think so.

Safe programming may give the concerned listner reduced choice, but the masses keep saying that this is what they want. It's a shame really. If an alternative to the safe programming style is to emerge, then it has to be from a new station which can then build it's audience up, rather than switching styles and loosing ratings.

Well! <hands on hips> Let's get a few things clear:

* I've heard estimates that at least 50% of the radio stations in the US
are losing money. I've seen the books for a few (considered successful)
operations and have seen how thin the profit margins *really* are. There
must be some reason why lenders are reluctant to make loans to radio
stations these days.

* I can be as glib as I want, for this is recreation for me. Besides,
People Who Want To Change The World make me more than a little
uncomfortable. They have no room for dissent.

: 'Locally programmed' is NOT a positive value for the majority of

Some are, some aren't (e.g., Burger King, Wendy's, K-Mart).

Locally programmed may not be a value until the surprise snowstorm hits,
the earthquake shakes the ground, or a hurricane slams into your city,
severing all the arteries of modern civilization.
I still think people remember who's there for them and who's not and act
accordingly.

: Last time I checked the ratings in any major market, it was the
: syndicated programming, chart driven stations that were booming and the
: quirky, offbeat alternatives that were losing. Now don't pick on me with
: anecdotes.

Please don't pre-wire your postulates. Besides, this is radio,
not mathematical proof of a theorem (would you prefer
Euclidean or inductive?) Ancedotal proof is all you're going to get.

And, besides, you're making the assumption that ratings are an accurate measure of listenership. It is true that they're about all we have. But (speaking as one who has (1) worked for a political survey firm and (2) someone who had to learn the math of probability and statistics at the ripe old age of 32 when I went back to grad school) the inaccuracy is gruesome. It's about as bad as the Literary Digest poll that said Alf Landon would win.

(Didn't bother him. He came back to Topeka and bought WREN.)

: Yes, there are a few stations that are surviving with a more
: adventurous programming philosophy, but they are the exception (and their
: long term survival is constantly in question). The ultimate proof? We
: wouldn't be having this discussion if quirky, locally oriented stations
: were really better able to win audiences and make money than the evil,
: cookie cutter variety, because the latter wouldn't exist.

Again some do, some don't. It's my belief (which would have to be proved anecdotally) that some of the quirky, locally oriented stations that fail are done in by:
-- Bad financial management (costs out of control)
-- Excessive debt service
-- Paying too much for the station
-- Purchase of a signal that can't reach the desired market well
-- Incompetent programming

It's also my belief that some cookie-cutter stations succeed because:
-- They mercilessly drive their sales departments
-- They slash costs at every opportunity
-- They trade on a legacy image established by a previous owner
-- They got the station cheap

And how do you define success? Short-term? Long-term?

Radio today is being run in a manner most comparable to Third World slash-and-burn agriculture. The immediate result is enrichment, but in the long term...what's going to happen when the ground is bare?

In one of the editorials in Popular Communications last summer, I read about a man in Pennsylvania who owned a 250 watt AM station featuring a lot of homebuilt equipment. The editorial didn't mention the man's name, the station's call letters or frequency, or in what town it was located.
The story went a little like this....
The guy that wrote the editorial (I don't know his name) was on a vacation in Pennsylvania, and he was enjoying himself by visiting as many radio facilities (radio stations, microwave relay towers, etc...) as he came across. He ran across the above mentioned station, and he met the owner (who was DJing at the time). He chatted with the station owner for a while (the station owner was very proud of the signal quality of the equipment that he had built). The owner then asked him to listen to the station on the way out of town and call him when he lost the signal. Between records, the station owner/DJ would call "Hello, OM! How's my modulation?!??" (or something like that).
Does anybody out there know what station this is?

Source record: 40764

* Celtics' owned and operated 5Kw WEEI "SportsRadio" 590AM will be finally sold today(3-15-94). The new owner will be Back Bay Broadcasters, a new company formed by Peter Ottmar, owner of Ten Miles Communcations out of Attleboro,Mass. Ten Miles Comm. operates WARA-AM and WWKS-FM in Attleboro and 2 cable systems(in Attleboro and Rehoboth,Mass).
The Boston Globe is alleging that Ottmar is a small-time operator and is acting as a puppet owner for the bigger shark -- American Radio Systems based in the Back Bay(get it?) section of Boston. ARS already owns 2 major AM signals in the city - WRKO 680 AM and WHDH 850 AM. Owning 3 stations on the same band would be in violation of the FCC rules. Apparently, Ottmar will 'sell off' the Bruins(800,000 dollars per year) and Celtics'(1.7 million dollars per year) radio rights to ARS which already broadcasts Red Sox(close 2 million dollars a year) games on WRKO. Both, Bruins and Celtics will be airing on WHDH 850 AM. Whenever there's a Bruins-Celtics same night conflict, the B's will slide over to WRKO.

This new development creates more questions than answers as far as ARS' stations and WEEI are concerned :

The future of 'EEI under the ownership of Ottmar is uncertain. The station might be sold to a religious broadcast group or Ottmar(or more precisely ARS) might shut it down altogether. There's talk that WHDH would become an all-sports outlet with Imus and rest of local sports talkshow hosts moving from 590 to 850. Where would that leave Limbaugh and a new hot talk show that follows Rush on WHDH -- The Howie Carr Show? By the way, Carr, Boston Herald columnist, jokingly predicted on his 3-7pm show yesterday that his bosses(ARS) will have Boston's all 4 major pro sports teams pretty soon. ARS is making an agressive bid to land Patriots who just finished a 3-year deal on WBZ this past season.

* Pyramid's CHR outlet,WXKS-FM in Boston has said goodbye on Friday(3/11) to its longtime GM John Maddison. Maddison took a high-profile job with Dutch-owned Polygram Records in NYC. However, before he officially departed he made a change(corrected a mistake he made in '93) in 'XKS' morning show - Lisa Traxler, a traffic reporter and a sidekick on the #1 morning show("Matty in The Morning") in Boston is out. Judy Pappereli, whom Traxler replaced last year, is back in. Traxler whose previous Boston on-air work included only rock stations (AOR powerhouse WBCN and later the classic rocker WZLX), could never click with the very popular Boston DJ Matt Siegel(also WBCN alum). In her first 2 months on the show, Lisa really butchered traffic reports and never really caught on to Matty's schtick from day one...

* Billy Joel search : Where did all classic rock Billy Joel tunes on Infinity's AOR WBCN 104.1FM, which is celebrating 26 years on the air

today(3/15), disappear to? Well, most definetly to its classic rock sister station WZLX-100.7FM. 'ZLX is playing ~1 Joel tune an hour or at least it seems so. As you recall, WBCN program director Oedipus banned all Joel music on the Rock earlier this year...

You can insert only frequency/channel and/or name of licensee between call letters and location. "68" isn't either of these (680 would be) so ID as quoted isn't technically legal.

A couple of us (me and Harold Hallikan, I think) posted most of the ID rules here some months ago, so they should be in the archives, which Bill can tell you how to access.

[Moderator's Note: To access the AIRWAVES/rrb archives, ftp to deja-vu.aiss.uiuc.edu and cd to /misc/rec.radio.b-cast. OR Gopher to deja-vu.aiss.uiuc.edu 7070 and follow the prompts. Bill]

badt@oswego.Oswego.EDU (Adam Bernard Badt) writes, re. New York's Z100:

>
> Adam,----------> May Mr. Lenard's Lime Green Pinto ride forever.....
>

Hey. I wonder if all the Malrite stations used Mr. Leonard... Z100 and
Cleveland's WMMS both were owned by Malrite (WMMS until just recently) and
for several months during the past year, The Lime Green Pinto was parked here,
in a lot at 40th and Superior, along with the WMMS Buzzard Bus. I know Z100
and WMMS borrowed from each other... and they are both basically the same
format, or at least they were untill WMMS hit its recent identity crisis.

regards,
Steve (God Save Cleveland Radio) Sobol

Todd @ Cedarville College writes:

> I live in Canton. Unfortunately, 106.9 FM has gone "poppy" the past few
> years. It seems that's the way formats are going--broader and appealing to
> its listeners. Basically stations have todo this to stay alive economically.
> Good AOR or even CHR stations are hard to come by. todd.

And Eric at Case Western Reserve U. writes, in reference to lobo@io.org's
complaint about lots of PearlJam/Aerosmith/Nirvana on Cleveland radio:

> You can pick out worse things that they overplay, such as Meat Loaf's "Rock
> 'n Roll Dreams come through". Just because something is on the Singles
> Charts doesn't mean that its good, and "Dreams" is inferior and very
> similar to "I'd do anything..." which has been overplayed so much that
> hearing Meat Loaf's voice causes a gagging reflex in 90% of the population.

First of all, let's get something straight. There is exactly *one*
Album Rock station in northeast Ohio, that being WONE/97.5. WNCX was AOR
for about two months back when it started in '87 and has been classic rock
since then. WRQK/106.9 seems to be kinda AOR, but definitely shows a strong
concentration of the heavier stuff along with lots of modern rock. (So where
exactly does Tom Petty come in? I've never heard him on 106.9.) WMMS, one
of the pioneers of AOR, classifies itself as CHR and it's PD can't decide on
a format for the station anymore... they just copy everyone else. So whatever
is on 'MMS doesn't really make a difference since they don't have an ounce
of originality anyhow.

The point? You will hear lots of grunge on WRQK. I believe it fits right in
with their format. You will hear lots of that kind of stuff on WMMS because
they copy WRQK and WONE and are concentrating on modern rock during the
evenings. You will hear it on WONE because it's part of their programming,
although they don't concentrate as heavily on modern rock.

You shouldn't hear Pearl Jam or Nirvana on WNCX because it's classic rock...

And... Meat Loaf sucks. But unfortunately he is a "legend" (gag, cough)
so he is getting airplay. (Plus he's just come out with his first album
in 15 years, so it's a big deal.)

Message-ID: <2m8gbv$7q9@vixen.cso.uiuc.edu>
Source record: 40768

While spending three weeks on vacation in Trinidad recently, I tuned around the AM band on my 7600. I got only two mainland AM stations, one not fully ID'd and WABC (770). Lynn Samuel's voice will cut through anything. It took a lot of careful orientation of the 7600 to null out the interfering stations. This was in the evening. Also got one english language Puerto Rican station and numerous stations from other carribean nations. I seem to recall getting a couple of un-id'd satellite religious broadcasters, which could have been mainland US, but were probably closer. There was loads of Spanish, mostly apparently Venezuala and Columbia.

There is an FM station in Trinidad identifying itself as WABC!! but it plays music, not talk...

On SW, I discovered you can only get VOA up until 7AM, when the SW feed signs off. I guess they don't care about the Caribbean much any more. (this is daytime reception, and I only was using the built in whip on the 7600)

The best sources of USA news were CNN, available over TTT (Trinidad and Tobago Television - Gov-t owned) and ABC and CBS TV news, each picked up by the two privately owned TV stations there. There is cable there, with a full time feed of CNN, but not where I stayed.

I guess the old saying, "Familiarity breeds contempt" applies?

Remember that most European radio is several decades behind the U.S. in terms of local listening choices in a particular area. It's only been in the past decade or so that entities other than "the government" or other monopolies could even operate stations in most countries.

Nowadays we tend to regard the Top-40 type stations with disdain. From my study of broadcast history, it was a big deal in the early 60's to persuade the BBC and other national monopoly stations to play any "Rock and Roll".

I keep seeing stuff like this, from time to time, referring to radio audiences.

What would you have us all listen to?

I suppose, someone could set up a bank of shuffle-play CD players with several different genres of music, ranging from rap to country to I don't know. . . let's say Chinese martial music or something "foreign" like that.

That would be a "novel, adventurous" format, and probably one that most
-More-
people would not sit through for too long. Why? For the most part, most people's musical tastes are nowhere near that broad.

Message-ID: <2m8gcc$7qp@vixen.cso.uiuc.edu>
Source record: 40772

I was wondering if anyone has or knows where I can get a list of the stations nationwide playing the syndicated top-40 "Open House Party" program on Fridays and Saturdays in the evening. We recently travelled the east coast and heard it in quite a few places, but always had to search. I know that WBZZ/93.7 in Pittsburgh, PA; WOMP/100.5 in Bellaire, OH; WVAQ/101.9 in Morgantown, WV; and WRKY/103.5 in Steubenville, OH run it.

If you have a list or know of a station please E-Mail me at either

jrbst36@vms.cis.pitt.edu OR jrbst36+@pitt.edu

Thanks!

> Batt Johnson (WKTQ) Night jock who later did AM drive at WLTW in
> NYC.

>That's about all I come up with on the spur of the moment. One
>thing that is evident is just how many very talented people worked
>in that market. You might want to see if you can get your hands on
>the weekly surveys that KQV, WIXZ and KDKA used to distribute back
>in the 50s, 60s and 70s. Most of them had pictures of the jocks
>and their airshifts.

>By the way, most people under 40 may not remember that KDKA was a
>top 40 station through most of the 60's! I remember jocks like
>Clark Race, Rege Cordic, Art Pallan and Jim Horne playing the
>Doors, the Stones and other rock groups on the same station that
>would later in the evening have Ed and Wendy King's "Party Line"
>airing, appealing to a much different demographic.

>Thanks for triggering some old memories!

>==
> Bob Nelson: Dallas, Texas, U.S.A.
> bnelson@netcom.com
>==

Many thanks to Bob Nelson for helping me remember and reminisce.
I was shocked to hear that George Hart passed away last year.
George and I worked together at WFFM FM 97 in the early 80's. He
worked middays and I worked overnights at the then Light Rock
station. He was a good guy with a wonderful sense of humor. And
all of us who work, or have worked, in radio know good guys are few
and far between. I'm glad to have know George.

Ironically, I used to live right near WIXZ's studios in McKeesport,
PA., but I never listened to them. My brother was the WIXZ fan, I
was the KQV fan.

Again, thanks to Bob Nelson for his great memory and nice note.

919. Matthew Bannister

Newsgroup: rec.radio.broadcasting
Date: 1994-03-17 02:47:50 UTC
From: G.M.Stone@newcastle.ac.uk
Message-ID: <2m8gcm$7qu@vixen.cso.uiuc.edu>
Source record: 40774

Matthew Bannister has had a difficult job in taking over from Beerling at Radio One and making lots of changes, but as I understand it he has a brief to change the image of Radio One substantially, away from the commercial format. There are already dozens of local pop stations, there are soon to be national ones as well (today is incidentally the closing day for applications for the third national FM licence). All the BBC stations in the face of this competition, especially Radio One and Radio Three (Classic FM is competition) have had to change their image. Bannister's reasoning is that it is futile to compete directly with the commercials (Atlantic 252 style - god save us), and so has tried to create a discerning youth-aimed service, probably 16-25 based. His changes, although they may have lost some of the adult audience and brought figures down, have improved (IMO) the service :

Some of the dead wood had to be cut away (Bates, DLT, Brambles), and intelligent new stuff brought in - Freud, Campbell etc. The new schedule is, I feel, much less tacky than the old R1 (but I would have preferred Goodier to go, Wrighty to stay in the afternoon, and Mayo in the breakfast slot). Music has been steered away from the Top 40 to a broader range, evening shows like the Evening Session and Mark Radcliffe have brought in new talent and different music. Danny Baker is good at weekends, there's probably more I haven't mentioned. There is a better quality of news and documentary programming, as well as a lot of good comedy and even some poetry (poetry is the new rock and roll - well maybe not). On the whole I think that Bannister has done a good job - ratings may be down but the quality is up. Radio One has finally accepted it had an image problem and that it was pointless competing with all the commercial ILR and INR's. That ground is comprehensively covered - before the new Radio One there was nothing for the discerning youth market. Greg Stone, ex Station Manager Ice FM Newcastle (youth student radio), project coordinator Boss FM .

In article <2m3fp7$9s6@vixen.cso.uiuc.edu> you write:
>
>Why - in the spirit of professionalism - can't we stop Imus-bashing and
>Stern-bashing? Why can't we discuss the issues and the gossip and the
>other things that make radio fun, rather than engaging in wars over
>which canned morning show "rulez"?
>
Normally, I don't get involved in this sort of discussion, since 1)
I haven't giggled at bathroom humor since I was in elementary school, and
2) there are far too many children here, who are not interested in being
professionals, they simply want to get on the air so they can say
something rude and crude.

> >The bigger question is (hop on, Mr. Moderator <grin>): WHY DON'T
>STATIONS TAKE A CHANCE ON LOCAL TALENT??? I'd hate like hell to see
>radio devolve to the level of television, with all that spectrum space
>and three shows to watch.
>
>A.J. Janschewitz <<>> Broad Brook, Connecticut <<>> p00445@psilink.com

I will allow that since you are in CT, you don't know what Bill knows
about a certain Brian McCann....
>
>[Moderator's Note: You do know me, don't you <grin>. The big answer
>is that satellites are cheaper, period. Bill]

This child decided to use a local station (WLUP, I understand) to suggest
to listeners that a great way to have fun is to call their friends, ring
once and hang up - then do it again and again.

For those of you who don't read comp.dcom.telecom, the moderator there suggested
that most readers wouldn't want to call WLUP's switchboard repeatedly and
hang up. Nor, did one reader suggest, would anyone want to FAX messages to
WLUP suggesting their air personnel (notice, I did *not* use the word talent)
should grow up, and attaching no more than 10-12 pages of FCC Rules, scripts
of Groucho shows, etc.

I'd submit Brian McCann is a perfect example of why many stations are going to
satellite networks.

Source record: 40776

A couple of personality-related items, both as reported in the Kansas City Star.

Longtime KCMO(AM) talk show host Mike Murphy is reportedly considering letting his contract expire at the end of the year. Present and former talk show hosts at KCMO told the Star that Murphy is dissatisfied with the station's new owner, Bonneville Broadcasting. Former talk show host Dave Dawson speculated that the reason may be money. Dawson said Bonneville asked him to take a pay cut when *his* contract expired; Dawson instead left the station.

KCMO AM/FM were bought by Bonneville last year, forming a duopoly with KMBZ(AM)/KLTH(FM). KMBZ is a news/talk station; KCMO was a news/talk station but increasingly seems to be oriented only to talk shows. In addition, sports talk shows that were on KCMO have been dropped.

KCMO is Kansas City's only 50,000-watt AM signal (daytime, 5 kW night), at 810 kHz.

KPRS(FM) general sales manager Jay Cooper is leaving the station for a similar job at KEZO(FM) in Omaha.

Cooper is best known in Kansas City for his stint on the morning "Dick and Jay Show" on KYYS(FM) (KY-102) from 1975 to 1983. Those years coincided with strong ratings performance by the album-rock station. In the past two years, KYYS' ratings have declined significantly.

Cooper's cohort on KY-102, Dick Wilson, currently is the morning show host for KCMO-FM ("Oldies 95").

Cooper has worked for KPRS, an urban contemporary station, for two and a half years. He starts at KEZO this week. Cooper described KEZO to the Star as "a rock 'n' roll station, kind of like KY-102, but better."

Did you know that Npr can be heard on shortwave as well? Tis true, I heard a program on Voa once called All Things Considered. Now i don't know if the Voice Of America plays all Npr stations, but the All Things Considered is one of there best. Btw, if a public station is on Am, does that city have a chance of having a radio reading service?

Regards, John

Well, I can tell you of two stations hear in Florida that use the Cbs sounder that we all know and love, Winz, 940 in Miami and Wcoa in Pensacola, both use the sounder which comes right on before the theem music, of the Cbs news. One thing that Winz does though that I hate is they read the local news at the top of the hour and play the Cbs news at five minutes past.

Regards, John in Miami.

NEWS

WGAS announced they were closing down last Sunday and will insterad be concentrating on a new FM project which sometimes may be heard on shortwave!

Schedule of R.Marabu via Idea Radio:
Monday to Friday from 11.30 to 12.30 UTC on 7120 and 7380 kHz
Saturday and Sunday from 09.00 to 10.00 and 13.30 to 14.30 UTC on the same frequencies! Power on 7120 is only 50 watts while 7380 used 5kW at the moment!

Can anyone shred light on the station heard on 6262 kHz? Jonny reports it was a German station.

RADIO REVIEW is a new mag from UK, including offshore news and other radio news. Cost is 7 pounds sterling for 4 issues (Europe) or 1.50 pounds for a sample copy. Address: P.O.Box 46, Romford RM1 2QE, England.

RADIO DRILAND is a new German station heard here in Sweden on January 29th on 3918 kHz. Can anyone tell us more about this new station?

RADIO FRANCIS DRAKE will have a transmission via the IRRS relay facilities on the Saturday March 19th on 7125 kHz at 12.00-13.00 UTC. The programme will be repeated on Saturday Match 26th at the same time. Special QSL-cards and QSL-letters have been printed for these broadcasts. Address: Wuppertal.

SUBTERRANEAN SOUNDS returned to 76 metres on Saturday 5th last weekend on 3905 kHz and listeners can expect fairly regular broadcasts on there from now on. A telephone number was announced during the programme and about 10 listeners called in.

ONDA CALIENTE is a new station that can be heard on 7294 kHz USB via Radio Europe. The first programme went on on March 6th with a male and a female DJ. QSLs can be obtained via the Wuppertal maildrop.

RADIO BROD is active again on 720 kHz.

Thanks this time to Rainer, Jonny, Eric, Bruno and Pete for logs and info.

See ya all around next Tuesday.

925. WOWO-1190 sold, possible conflict?

Newsgroup: rec.radio.broadcasting
Date: 1994-03-17 03:17:09 UTC
From: ad582@dayton.wright.edu
Message-ID: <2m8i3l$a4t@vixen.cso.uiuc.edu>
Source record: 40780

Radio Station WOWO AM 1190 and FM 103.1 has been sold to Inner
City Broadcasting, as of this mornings Newspaper. No price has been
disclosed. I can only see one hinderance to WOWO. It is 50,000 Watts
Unlimited, sharing the "clear" designation by the FCC with KBAP (I believe)
out of Dallas. One of the other stations Inner City owns in 1190 WLIB out
of NYC. They are 10,000 Watts, limited by WOWO's dominance. I'm thinking
WOWO's power may be cut, seeing that the owners would want to make the
NYC station more powerful, seeing that NYC is a # 1 market. Any comments?

Sincerely,

Blaine E.Thompson

What would you like to know?

927. Limbaugh and KMOX

Newsgroup: rec.radio.broadcasting
Date: 1994-03-17 03:17:14 UTC
From: Chris Gay <KU4A@LEXVMK.VNET.IBM.COM>
Message-ID: <2m8i3q$a56@vixen.cso.uiuc.edu>
Source record: 40782

Although I am not a broadcasting professional as many in this group are, I've enjoyed reading the discussions of programming choices vs. making money in radio, particularly with regard to KMOX joining the EIB network. While I'm not personally familiar with KMOX or the St. Louis market, I have to admit to continuing to be confused as to why deciding to carry the Limbaugh show is a "long term bad decision" for the station.

> Locally programmed may not be a value until the surprise snowstorm
> hits, the earthquake shakes the ground, or a hurricane slams into your
> city, severing all the arteries of modern civilization.

I can understand the benefit and desirability of locally originated programming. WHAS may be the closest thing we have around here to a situation that is similar to KMOX. WHAS has long been known for its quality programming, especially in time of emergencies. A little under a year ago, WHAS started carrying Limbaugh. During the local advertising slots during the show, WHAS promotes its other programming which (although I don't listen to it) seems to be mostly local type stuff. Also, the Limbaugh show is pre-empted as needed for any emergency. After the Martin Luther King Day snowstorm here, WHAS completely dropped Limbaugh one day, so as not to interrupt its storm related programming. Part of this programming allowed people with emergencies to call in and describe their situation in the hope that another listener might be able to help.

While the KMOX and WHAS situations may, for some reason, be different in ways that I don't understand, it seems to me that it is possible to have your cake and eat it, too. WHAS is carrying a nationally syndicated program which I'm sure sells well, while maintaining the local "Kentuckiana" programming that we have come to know and love. I see no problem with the long term viability of this arrangement.

I've had my eye(s) on some effects boxes, and I was wondering what the differences were between the functions between the Aphex Aural Exciter, the dbx Spectral Enhancer 296, and the BBE Sonic Maximizer 862. What are the fundamental differences and similarities in their function and features? Which would you recommend based on these features and their economy?

Thanks,

Chris Smouse

>that would be interesting to look at! ;)

You can get a service manual from Sony Service Company in Kansas City; I don't have the phone number handy. They are quite helpful on the phone, and take Visa and MasterCard; the service manuals are reasonably priced. While you're ordering be sure to ask for the Accessories catalog; it lists the many adapter plugs, cables, AC adapters and so on that Sony has available.

Radio news week of 3/16/94

Last Monday WPGC FM 95.5 sponsored a "STAY IN SCHOOL" get together at Ballou High School in Southeast Washington, D.C. At the event, singer TEVIN CAMPBELL showed up to give his support in the campaign and chat with the students. School officials purposely did not announce that Tevin was coming to the school to keep outsiders away. The school has experienced some bad publicity lately and WPGC Promotions Director Dawn Scott saw an opportunity to bring something positive to the students.

COMING.....

WXTR FM 104.1 (X-tra 104) has hired a new Program Director. He's Roy Laurence who comes from Indianapolis where he was PD of WKLR FM 93. Mr. Laurence replaces Bob Duckman who spent almost a dozen years at the oldies station. Last month X-tra 104's new owners, Liberty Broadcasting, let Duckman go.

GOINGS.....

Mark Davis has left talk station WWRC AM 980 after four years there. Davis is going to WBAP in Dallas where he rejoins former WWRC Program Director Tyler Cox who's been running the Texas station for the past year.

News radio WTOP AM 1500 has fired sportscaster Michael Harrington. Harrington is accused of making a derogatory remark during a recent newscast. The supposed derogatory remark was in the Monday, March 15, WASHINGTON POST and follows:

"The (Washington) Redskins went out and bought themselves that fine young cannibal who ate them for lunch twice in 1993 while wearing the (Phoenix) Cardinals colors."

That's it. I don't know about you but, that doesn't sound derogatory or controversial to me. Sounds to me like News Director Hal Brown did Harrington a favor. Who'd want to work for someone who thinks the above statement is controversial?

: professionals or toilet mouthed idiots.

The following has almost nothing to do with radio, but it caused quite a scandal in Columbia, Mo. at the time in 1979.

KOMU-TV (channel 8, NBC affiliate) has faculty staffing the station as editors and anchors, but many of the reporters and weekend anchors are students at the University of Missouri, which owns the station.

The local joke was to refer to the Saturday night newscast as "the opening act for Saturday Night Live." Blunders and bloopers abounded. People watched just to see what would go wrong.

(Probably was a great way to fight cable: Columbia had just gotten, wonders of wonders, a *20-channel* system!)

Moreover, Channel 8 had yet to switch over entirely to tape; so there was a reel of the newsfilm that was also involved. Sometimes the reel would break, throwing off all the timing. For newsfilm stories, the voice-overs were done on carts. So, you can see, timing and precision were everything.

Saturday nights were so bad, we used to take bets on who would screw up the most--engineering, production, or news. Winnings were fairly evenly distributed.

Anyway, the student anchor one Saturday night just had one hell of a night. The wrong audio kept getting punched up, scripts were out of order, you name it, and it went wrong.

There was also a reporter in-studio that night for some breaking story. The camera switched to the reporter. The student anchor's mike was still on.

Not realizing that, he said, "What the FUCK is going on?"

It made the papers the next day. The student anchor was red-faced, to say the least. Moreover, such a comment was extremely out of character for him. (He was a friend of mine and you couldn't ask for anyone better. It hurt to see this happen to him.)

Fortunately, this story has a happy ending. He was suspended for a couple of weeks, then went back on, graudated, and, last I heard, is news director for a TV station in Alabama or Mississippi.

: Just tell your students to grow up, act professional, and you don't need to worry a bit about what language you can use. It should be self evident.

Time for a Transvoxian comment: it seems radio has preceded TV by about ten years or so when it comes to the dumbing-down of programming. No doubt it won't be long before radio morning-show type antics get translated somehow onto the TV airwaves. Maybe these guys are preparing for the future? One would hope not, but entropy *is* everywhere.

4.4. April 9th:
5. Special Offers:
5.1. Drawing for Free Tickets!:
5.2. Free Coffee:
5.3. T-shirt Drawing:
6. Tip of the Week:
6.1. Where to sleep over:
7. Downloading Additional Information:
8. How to Reach Us:

Overview:

This is the weekly news digest for West Coast Live, San Francisco's Live Radio Show to the World (actually just NPR).

Welcome new affiliates:

Beginning April 2nd, we're welcoming 6 new affiliate stations. Download the latest INFO bulletin f the latest details.

Here is the upcoming schedule as we see it now:

Our producers work overtime booking talent onto the show. Sometimes they're so busy on the phone, they don't have time to keep the rest of us up to date. So join our audience at a live show. You too may be pleasantly surprised.

March 19th:

Dr. John, pianist.

Paul Theroux, author.

Chis Williamson & Tret Fure, singer & songwriters.

Hot Club of San Francisco, Django Reinhardt inspired sound.

Pulp Playhouse, improvisational theater.

Claire Peaslee, naturalist.

March 26th:

Country group, The Doubters.

Food scientist, Harold McGee.

Monologist, Josh Kornbluth.

The Asian-American-Pacific Ensemble.

April 2nd:

Anne Lamott, author.

Charence Major, author.

Cynthia Helmel, author.

Keith Terry and Crosspulse, body percussion.

April 9th:

Gamelan Sekar Jaya, Balinese (not Marty) orchestral music.

Author, Adam Hochschild.

Special Offers:

Drawing for Free Tickets!:

This week marks our 11th West Coast Live show. Be the 11th person to email (see rules, below) the moderator at;

Owner-West_Coast_Live@netcom.com

and you will win two (2) free tickets to this week's live show.

Rules:

The contest begins as soon as the moderator sends this notice to the West Coast Live email subscription list.

The winner will be selected based on the time the entry was sent (as opposed to the time the entry was received), no sooner than 1 hour after the moderator receives the minimum number of entries (11), and no later than 48 hours prior to

the live show.

The email must be addressed to;

Owner-West_Coast_Live@netcom.com

The email's header subject must contain the phrase; "Win Ticket Drawing".

One entry per person.

The winner will be notified by email.

If the winner can't attend this week's show, the winner may assign the tickets to a couple of friends.

The moderator's selection is final.

Free Coffee:

Wear an official West Coast Live shirt at the show, and you are entitled to free coffee.

Rules:

Official West Coast Live T-shirts or sweat shirts only.

For a limited time, this offer is extended to shirts from that old radio show, that are upgraded with an official West Coast Live Shirt Upgrade Kit.

This offer is good for free coffee only from the West Coast Live snack bar. If anyone else offers you free coffee for wearing a West Coast Live shirt, let us know.

T-shirt Drawing:

On the last live show of each month, we give away an official West Coast Live T-shirt.

Rules:

To enter this drawing, you must drop a business card into our fish bowl. Any scrap of paper with your name, address, and phone number may be substituted for a business card.

One entry per person. You must be present to enter.

The drawing is held following the last live show of each month. You need not be present to win.

Tip of the Week:

Where to sleep over:

Let's say you need a place to crash for the weekend, but you're not a personal friend of David Brass; Fort Mason is

the home of the San Francisco AYH Hostel at Fort Mason (415) 771-7277. This hostel, located just a few hundred yards from the Cowell Theater is world renown as one of the best deals in San Francisco. If they're booked up, the Golden Gate AYH Hostel at Fort Barry is just across the bridge in the Main Headlands (415) 331-2777.

Downloading Additional Information:

You may download an information document giving background information on the show and the show's Internet service, by sending the following email message to;

LISTSERV@netcom.com

As of 3-10-94, WCCO Radio no longer has Phil Hendrie as a talk show host. Phil was one of those politically correct intellectual nerds who was always beating his drum and tooting his horn, satirically trying to convince his audience that he had all the answers to society's troubles. While some thought that he was funny, witty, wise, and so on, many listeners (including myself) thought that he was insulting, intolerant, disrespectful, and at times, unethical. I for one won't shed any tears for him, since he will probably B.S. someone that he can raise their ratings dramatically with him on their staff. Rumor has it that he is now working in the Miami, Florida area. You have my sympathies.

John

938. Ron Britian (sp) Subterranean Circus

Newsgroup: rec.radio.broadcasting

From: northcot@med.unc.edu
Message-ID: <2m9e4l$gsk@vixen.cso.uiuc.edu>
Source record: 40793

As a teenager in the 60's, one of my fondest memories are of Sunday evenings, sitting in my room in North Carolina, listening to the usually clear signal from Chicago, WCFL, and Ron Britian's Subterranean Circus. I heard all the best of what we then called "underground" music for the first time here; it was responsible for my first (pre-release!!) exposure to "Abbey Road", "Led Zep II", I heard all the San Fran, LA, rock from all over the world, all the stuff you didn't hear on Top 40 but could read about in Circus magazine (yes, it used to be about underground before it was all metal) and Rolling Stone. My question is, does anyone have background information about Ron, his story so to speak, and what he is doing now, if he is in fact still around?? I never knew a thing about him and occasionally wonder - a friend of mine at the time when he went off the air said he was yanked for coming in high - I would love to hear the real story about his revolutionary (for me down south at least) program.

Bob

Is Radio Roks still there? I used to listen to their satellite feed out of
Oslo (Norway). They have disappeared and I wonder are they still broadcasting
from Oslo or did they move back to Moscow?

940. D/FW Radio Watchers Wanted

Newsgroup: rec.radio.broadcasting
Date: 1994-03-17 11:15:40 UTC
From: stevie@netcom.com
Message-ID: <2m9e4s$gsm@vixen.cso.uiuc.edu>
Source record: 40795

I'm still looking for radio watchers in the Dallas/Ft. Worth area. I will be publishing a new magazine (distributed free) beginning (hopefully) in June called Radio Guide (no relation to the tech journal of the same name). It will feature interviews with air personalities, program listings and Radio Watcher reports, among other things (such as ads).

I don't seem to be able to monitor all D/FW stations by myself, so I need your help. Send me E-Mail telling what station(s) you listen to regularly and would like to report on. If chosen as a radio watcher, you will receive a byline and, one of these days, payment for your services. (Don't quit your day job, yet!)

I will require info such as what contests your stations are running, interesting promotions, interesting guests (for talk/news/sports stations), personnel changes, etc. Don't worry, it won't be as hard as it sounds. You'll just try to keep me as informed as possible without working too hard at it.

When we get going, I'll compile the most interesting info and post here regularly so all can enjoy.

Thanks,

Steve Walker

941. San Diego County Report

Newsgroup: rec.radio.broadcasting
Date: 1994-03-18 04:58:01 UTC
From: Chris.Carmichael@artecon.com
Message-ID: <2mbccp$m17@vixen.cso.uiuc.edu>
Source record: 40796

Here's what is happening in the 15th largest radio market:

Guitarist John Hiatt is slated to visit the studios of KKOS-FM 95.9, Carlsbad, on March 31. KKOS is sponsoring him at the Belly-Up in Salerno Beach. Recently, Al Stewart played an impromptu concert on the radio; and so have the Dead River Angles. The eclectic station is only limited to the 3.5kw it puts out.

More news comes out from KFMB AM/FM since Paul Palmer, former general manager was fired. As reported last week, Palmer left the station after 22-years. In the latest books, both KFMB AM/FM have been on a spiral down; plus the AM outlet is paying $1 million a year to broadcast the SD Padres team. This, couple with the talent budget is a slow drain on revenues. The talent budget is exceptionally high, according to the SD Tribune, because of the morning team of Ted Leitner, Hudson & Bauer, Stacy Taylor and Mark Larson. One staffer said, "This kind of thing [the firing of the GM] goes on in radio, but not at KFMB. The staff have been walking on egg shells."

KOGO-AM 600, 5kw, U, is expected to shift from music to a talk-radio format by April. New call letters have been submitted to the FCC [but were not avail].

XEXX-AM 1420, Tijuana, Baja California, Mexico, will cover the SD Padres, in espanol again this year. XEBG-AM, 1550 is also in the market to broadcast games of other Southern California professional baseball teams. This will complement their all Spanish-sports station.

A majority of cable systems in north San Diego county have dropped their FM carrier service. As a result, cable FM from Palamor Community College, Mira Mesa Community College have now outlet beyond the campus. Dimension cable promises to carry them on the digital cable radio. But that was four months ago, and no word is out when the projected air date is.

KSDS (FM), 88.3, is raising money to by a new transmitter for better coverage. The station is expected to vie for 25kw.

KFSD (FM), 94.1, 100kw, San Diego's only commercial classical outlet has picked up the Beethoven Network from 12 midnight to 6 a.m. local. Economics again, and three staffers were let go.

>cookie cutter variety, because the latter wouldn't exist.
>--
You're missing a key element of the point I was trying to make: I am speculating about the *future* - when broadcast radio is competing with a vast array of cable/digital/DBS/whatever audio distribution services. I'm not about to try to defend the idea that *in today's marketplace* quality programming is an inherent advantage.

However, success of the quirky, quality-conscious variety is not unheard of either. The station I work for (locally programmed, quite unique, financially stable & #1 with our target audience in a very competitive market) proves that every day.

transvox@tyrell.net (Mark Roberts) writes:
N> Locally programmed may not be a value until the surprise snowstorm
N> hits, the earthquake shakes the ground, or a hurricane slams into
N> your city, severing all the arteries of modern civilization. I still
N> think people remember who's there for them and who's not and act
N> accordingly.

Here in LA, during the Northridge Earthquake (Jan 17), both all-news stations (KFWB and KNX) went to "special coverage" of the earthquake, emergency services, etc. What is interesting is that their FM operations (KTWV and KNX-FM, respectively), which usually play music all the time, simulcast with the AM stations.

Other stations, like KFI, pre-empted network programs for local earthquake coverage.

N> Radio today is being run in a manner most comparable to Third World
N> slash-and-burn agriculture. The immediate result is enrichment, but
N> in the long term...what's going to happen when the ground is bare?

I'm not sure just what "bare ground" in radio would be.
To hear some folks talk, we've hit that point long ago . . .

948. Press Release from Allan Weiner

Newsgroup: rec.radio.broadcasting
Date: 1994-03-18 04:58:15 UTC
From: Steve Coletti <bigsteve@dorsai.dorsai.org>
Message-ID: <2mbcd7$m1m@vixen.cso.uiuc.edu>
Source record: 40703

I received the following release from Allan Weiner concerning the seizure of the FURY radio ship. I am reproducing it here without comment. If you would like to reply to Mr. Weiner, please do so by Snail Mail at the address below.

- -

Ship of Dreams

It was a ship full of dreams. Dreams of broadcasting on international shortwave. Dreams of sending hopeful messages from many people transmitted over the air.

The Voyager Broadcast project was the hope and dream of many. Financed by a man of God, Brother Stair of the Overcomer Ministry, the station was to be an outlet for religious programming and the right of free speech.

The Voyager ship was a converted fishing trawler 140 feet long by 30 feet wide. She was planned to be fitted out with four shortwave transmitters, and was in the process of repair and restoration in Charleston harbor South Carolina.

The ship was to set sail in early February for southern waters where she was to broadcast from a safe anchorage in Belize territory. (The Country of Belize is located on the Yucatan peninsula in central america about 600 miles south of the United States.) It was not to be so. On January 19, 1994 at 8:30 AM EST, The Federal Communications Commission aided by U.S. Federal marshals and the U.S. Coast Guard, sized the M.V. FURY and almost immediately began to debowel her of all her radio equipment.

One day later it was all gone. Transmitters, tubes, parts, test equipment, personal stereos, transformers, cable, insulators, tape recorders, CD's, antennas, towers, cassette machines, all the stuff that make up a radio station--gone! No arrests, no hearings, nothing! The reason? The FCC claims to have identified transmissions from 12:10 AM EST to 3:21 AM EST on January 14, 1994 which they claim were pinpointed to the location of the ship. I was on board the vessel at the time an I observed no such transmissions between those times and none were technically possible with the existing equipment.

I built the radio station on board the FURY for the Overcomer Ministry. As the engineer, I advised the owners of the ship to secure all legal registry and ships radio licenses. This was done; I insured everything was to be done by the book. The FURY

was issued a ship registration and radio station license that would make it entirely legal to broadcast once the vessel arrived in Belize territory.

At Charleston harbor no broadcasts came out of the FURY while I was on duty. In fact only two of her four transmitters were partially restored. Of these two only one could be applied primary filiment power. None of the transmitters were ready to broadcast--period! Furthermore there was no available source of transmitter power.

Both transmitter generators were down for final installation and repairs. The main generator was inoperative due to a fuel leak and the backup generator had a burned out regulator.

So the question remains, why was an entirely legal radio station destroyed without a hearing and due process? What is going on here? Does the FCC possess such fear that they will disregard all assemblage of personal rights, international law, and due process?

As a radio engineer it pains me to see such wanton destruction of personal property for no reason. The Overcomer Ministry had invested large sums of money and time to make this floating radio ship of GOD and freedom a reality. All to be destroyed because someone in Washington D.C. apparently doesn't like Brother Stair or me.

Dear reader, I think now is the time to take a "hard look" at the Federal Communications Commission and their policies of total disregard of law and due process; especially the so called seizure laws in which they legally "steal" personal property.

Is this a nation of laws or government brytes? I thought a fair hearing and trial is guaranteed all.

The ship owners plan to seek restitution from the government. Many questions remain.

A radio station, a printing press of the air, has been smashed. Please protest this illegal action by the FCC to your Congressperson. Only Congress can stop the madness.

Mark's posting mentioned how timing, etc would be screwed up
at the Columbia MO TV station.

Things aren't necessarily better in bigger markets.

With New York, the #1 TV Market (right?), you still see things as
described below, especially on the 11 o'clock news, especially
on weekends:

-The newsreader starts with a story and the wrong film appears
on the screen.

-During sports they show the highlights, but the sportscaster isn't
exactly sure which clips he'll get and the description is
choppy.

or

the wrong highlights come up first

or

Sometimes the news anchor has to do the sports and sounds
like they have never had to describe sports action at any time in
there work history ("and the Mets scored 3 points in the top of
the ninth to win it at Shea...")(can you find 2 things wrong with
that statement?, maybe three since it involves the words Mets and Win)

or

the sportscaster goes to talk about the next story and nothing else comes on,
leaving him to say "Are we going to get St. John's or not? No?
Maybe later."

I would expect things to be run a lot more smoothly in New York
than they are. I wouldn't be surprised if Sal Marciano on
WNBC-4, for example (because I wrote him a sympathetic letter
praising his not losing his cool on the air when a most incompetent
staff screwed up his weekend sports), said the same thing
off mic that the person in Columbia MO accidentally said on mic.

One other stupid thing while part of the topic is TV sports.

On an audio reel to reel machine, the two reels both rotate in
a counter clockwise direction. Isn't it the same for video , that
the reels travel in identical directions?

So why is it on the George Michael sports machine do the reels
rotate towards each other? My guess is they are just props,

and they figured the general public wouldn't notice. After all,
he has another prop with all these buttons but he always hits
the same one and the same reels start turning in the background.
i.e. the Machine isn't what really is playing back the tapes.

I think George Michael considers every market he is on to be
equally populated. That's why New Yorkers see more auto racing
and rodeo on GMSM than any other sportscast.
Let's see we're on in 200 markets, 100 of them have rodeos nearby,
so we'll run highlights, so what if the population of the markets
I'm on in is 1/20 the total population of those 200 markets...

I'd better stop before I think of more...

[Moderator's Note: I get a lot of heat for approving these
off-charter posts [about TV]. I do it because theya re generally good
articles. But I will have to call a halt to this thread, since they
are off-charter and since it makes it hard to tell other off-charter
posters to stay on topic. I hope you understand. Bill]

RE: Don and Mike

I 've been living in Washington DC for 18 years and have
been listening to D & M since they were first joined together as
a Morning Zoo. I thought they were great then and think they are even
better now!!
I think the best part of their show is the first hour
when Don tells what horrible things happened over night or over the
weekend. I NEVER miss a show on Monday after vacation. It's always great
for some hilarious stories. Because Mike doesn't reveal to much about his
personal life, I don't usually expect much from him so a good Mike
story is like icing on the cake. My favorite Don story is the time
he nearly drowned off Jamaica and Mike kept laughing at him as he told
the story.
Hopefully, soon, you'll get D & M in another time slot!!

I saw the public appearance in Baltimore/Cockeysville
where the guy who won the trip to Ireland ate the Marshmellows out of
another guy's BUTT!!!!! I laughed my head off. My voice was hoarse!!!

In reply to:

Dave (twelve Screws) Rowlinson (IRJ 546)
Paul Hillyard (IRJ 544)
Charles Hobbs (IRJ 547)
GM Stone (IRJ 547)

There has been some debate about the merits and such of the BBC and in particular Radio 1 FM, I would like to through my two penneth worth in;

It is obvious to me that Radio 1 stirs up a passion in the average UK radio listener, for a number of years it was the only "pop" music station in the UK and until last year the only national. (I am aware that Virgin 1215 is rock orientated but it appeals to a similar audience in this case.)

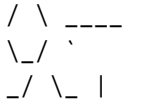
The reasons for this I believe are complex but I think the fact that most people grow up with 1FM and that often the first experience of the media is 1FM may play a large part. This is, in my opinion, why there is such an argument as to the future of Radio 1.

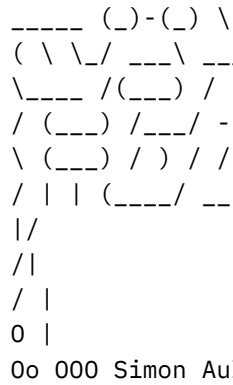
I don't agree that the BBC is of a poor quality, it is a fine organisation which is broadcasting some of the finest programmes in the word, (one should hear Spanish Radio!). The point is that the BBC does not rely on advertising for its income and so can be experimental in its format. It can and should cater to minority tastes (rating losses should be a boast?) as it is a public service not an advertising service.

The old style 1FM catered to a similar audience to Capital in London and no doubt many other ILR's. (For those who are familiar the closest I can remember to Capital is Cool 105.9 in Fla.) This has changed with the promotion of Matthew Bannister, the new look Radio 1 (if a radio station can have a look) is a young persons Radio 4 or World Service. It requires more thought which is probably why it would not make it in the commercial sector. The wit and comment of both Simon Mayo and Nikki Campbell are both very dry and often appear informed, it is no longer background listening.

So perhaps 1FM has lost 1.5 million listeners in a month, but it still is the most popular radio station in all regions except London. The economics of a radio station which has a new format appear to be good, I hope that the changes continue and we are given a wider listening choice.

- but that's just my opinion.





Simon Aulton

Chris Gay (KU4A@LEXVMK.VNET.IBM.COM) wrote:

: Although I am not a broadcasting professional as many in this group are,
: I've enjoyed reading the discussions of programming choices vs. making
: money in radio, particularly with regard to KMOX joining the EIB
: network. While I'm not personally familiar with KMOX or the St. Louis
: market, I have to admit to continuing to be confused as to why deciding
: to carry the Limbaugh show is a "long term bad decision" for the
: station.

First, let me say that I have not lived in St. Louis for nearly 25 years, and, although I did work at a couple of commercial radio stations during a couple of summers in college (one was KRCH-FM in St. Louis, in fact, where I am reasonably certain that at least a dozen people once heard me reading the hourly news) I visit there occasionally -- and my parents still live there. So there are others on the net who probably know more than I do about St. Louis radio right now, and who could correct errors in this news article. I invite them to do so.

In answer to your question, Limbaugh was, in fact, on another AM station in St. Louis. I don't know this for sure, but KMOX may well have been crushing him in the ratings before it started carrying him. The reason I think so is that KMOX historically is the leading station in the market, and has had ratings in the 30's. Indeed, if memory serves me, in my 1990 M-Street directory, KMOX was still drawing close to (but not quite) a 20 percent share of the market by both radio ratings service, while only one AM station drew numbers as high as 2 1/2 percent, and only one of the two services rated the other station that high. (I think only one other AM drew as high as 1 share of the audience, by either service, and the next highest station -- an FM -- drew little more than half the ratings of KMOX.)

>From this, one might infer that KMOX's putting Limbaugh on the air, after decades of following a successful policy of studied neutrality in their talk show, may be entirely a financial decision to lower the costs of running the station. They *may* be expecting Limbaugh to *lower* their ratings, but if he is cheap enough to carry, KMOX may make more money with fewer listeners -- and less local public service during an important daypart.

Secondly, I saw a story about KMOX in a well-respected national magazine not too long ago. They said that, for the first time that anyone could remember, KMOX was actually beaten in the ratings in an important young demographic group by an FM station. But they said that the FM jocks who were responsible for this did it by hurling racial slurs at black callers and by having patently offensive contests where they invited people to

call in to identify which, of a group of named celebrities, was Jewish. (Is this really true?)

According to the story, KMOX then hired their own local "shock jock" (someone with whom I am not familiar), who offended other popular talk show hosts at the station, and may have influenced one who was particularly popular to retire rather than put up with what was going on at the station. I understand that they eventually got rid of the "shock jock" and that the retired talk show host now may fill in as a replacement on occasion. Perhaps someone within earshot of KMOX during the day can confirm all this for me.

Aside from the economic considerations above, it "smells" to me as though putting Limbaugh on KMOX may be an attempt to recapture some of the audience that was lost to the FM jocks a while back, and to do it in a way that will not cause friction between the on-air local hosts (although I suppose it does raise the threat that they could be replaced with a syndicated show), and in a way that effectively denies to local callers a way to flood the talk show lines with nasty calls directed at the station. (You should have heard the ruckus raised on the air by callers back in the late '60's when KMOX tried to replace their news-oriented late afternoon talk show with a lighter, more comedic one! *That* show didn't last very long in that time slot.)

If listeners sense -- whether correctly or incorrectly -- that Limbaugh was put on by KMOX for these reasons, is it any wonder that people think Limbaugh is bad for the long-term health of either the station, or St. Louis radio? If I still lived in St. Louis and sensed this, I would probably start putting cassettes in my clock radio rather than wake up to KMOX.

Of course, that's my opinion, and a lot of it is based upon speculation and hearsay. I would love to hear from any St. Louis listeners or any radio professionals who can either confirm what I have to say or tell me that I'm completely out to lunch.

955. new radio station coming in Ocean City MD?

Newsgroup: rec.radio.broadcasting
Date: 1994-03-18 05:11:59 UTC

Message-ID: <2mbd6v$mrk@vixen.cso.uiuc.edu>
Source record: 40710

According to the 1993 Cable & Broadcasting Yearbook (or whatever it
is that that huge thing in my public library is called) a new
Ocean City, Maryland station is being planned for the 106.9
position on the FM dial. Recently I have heard some info indicating
that this could turn out to be a modern rock station.
Does anyone have any more info on this? It is very important to
me since radio in the Salisbury MD area is a wasteland, and
a modern rock station would definitely improve the situation.
E-mail to dh28s45@ocnet.cscns.com before March 19 or dhull@drew.drew.edu
after March 19. Thanks.

Cross-posted to: rec.radio.broadcasting,rec.radio.noncomm,alt.radio.networks.npr

Just for the heck of it (and because I'm making my semi-annual Boston
to Rochester drive next weekend...), here's a list of all the public
radio in New York State:

BUFFALO AREA:

Western New York Public Broadcasting Council:
WNED-970 AM NPR news, talk, and jazz
WNED-94.5 FM all classical (simulcast on WNJA 89.7 Jamestown)

University of Buffalo:
WBFO-88.7 FM NPR news and jazz, plus additional NPR cultural programming
(simulcast on WOLN 91.3 Olean and soon on WUBJ 88.1 Jamestown)

ROCHESTER AREA:

WXXI Public Broadcasting Council:
WXXI-1370 AM NPR news, talk, and jazz
WXXI-91.5 FM all classical

Hobart and William Smith College:
WEOS-89.7 FM NPR news, plus a variety of music. This station is in Geneva,
and while it does not serve Rochester itself, it can be heard in
the northern Finger Lakes and along I-90 between Rochester and Syracuse.

SYRACUSE/UTICA/WATERTOWN:

Station Syracuse Utica Watertown
WAER WAER-88.3 ---- ----
WRVO WRVO-89.9 WRVN-91.9 WRVJ-91.7
WCNY WCNY-91.3 WUNY-89.5 WJNY-90.9

Syracuse University:
WAER-88.3 FM "FM88", jazz plus some NPR news.

SUNY at Oswego:
WRVO-89.9 Oswego (and see above for relays) NPR news and talk, plus some
jazz and classical.

Public Broadcasting Council of Central NY:
WCNY-91.3 (and relays) all classical

BINGHAMTON AND THE SOUTHERN TIER:

Southern Tier Educational TV Association:
WSKG-89.3 FM full-service public radio, including NPR news and classical.

(Rebroadcast on WSQG-90.9 Ithaca, WSQC-91.7 Oneonta, soon on 91.1 in Corning-Elmira)
WSQX-90.1 FM Binghamton coming soon to be a secondary NPR service for Binghamton.

NORTHERN NEW YORK:

St. Lawrence University:
WSLU-89.5 FM Canton full-service public radio including NPR news and classical. (Rebroadcast on WSLO 90.9 Malone, WSLL 90.5 Saranac Lake, WSLJ 88.5 Watertown, WXLH 91.3 Blue Mountain Lake, WXLU 88.3 Peru, WXLG 89.9 North Creek, plus translators on 88.5 in Felts Mills, 91.7 in Lake Placid, and 91.7 in Tupper Lake.)

EASTERN NEW YORK:

WAMC, Inc.:
WAMC-90.3 FM Albany primarily NPR news and talk, with some classical and some APR programming. (Rebroadcast on WAMK-90.9 Kingston, WCAN-93.3 Canajoharie, WANC-103.9 Ticonderoga, WOSR-91.7 Middletown, WAMQ-105.1 Great Barrington MA, plus translators on 93.1 in Rensselaer-Troy and 88.9 Oneonta.)

WMHT Educational Telecommunications:
WMHT-89.1 FM Schenectady all classical (Rebroadcast part of the day on WRHV-88.7 Poughkeepsie.)

CATSKILLS:

WJFF-90.5 FM Jeffersonville diverse NPR and other programming

NEW YORK CITY:

City of New York:
WNYC-820 AM NPR news and talk, local talk, some music nights and weekends.
WNYC-93.9 FM mainly classical

Newark Public Radio:
WBGO-88.3 FM mainly jazz, with some NPR cultural programming.

Fordham University:
WFUV-90.7 FM diverse musical programming.

This list is intended as a guideline to the public radio signals available in New York...programming can and will vary!

958. Sandy G off WKXW

Newsgroup: rec.radio.broadcasting
Date: 1994-03-18 05:12:02 UTC
From: davemackey@BIX.com
Message-ID: <2mbd72$mrp@vixen.cso.uiuc.edu>
Source record: 40713

Veteran New Jersey radio personality Sanford Goldberg (air name "Sandy G") turned in his resignation last week at WKXW, Trenton (New Jersey 101.5). The resignation is a result of his demotion to standby announcer after losing his Saturday night oldies time slot, purportedly over comments he made on the air about his listenership.

Apparently, Goldberg heard at a staff meeting with the station's consultant that some of the music played on oldies shows was "unsuitable" and designed for "the ten invalids and shut-ins at home on Saturday night." Goldberg was not singled out by name, but clearly felt the comments were directed toward him because he was the only oldies announcer at the m eeting. On his March 26 broadcast, Sandy G allegedly repeated the "invalids and shut-ins" comment on air.

Though Sandy G defended his choice of words, WKXW operations manager Jay Sorensen (a former jock at WNBC) concluded that Goldberg had made a mockery of the station and the consultant's meeting, and demoted him to standby announcer. This was according to Goldberg; the station declined comment, except to state that Goldberg is no longer employed by Press Broadcasting as of March 7, 1994.

Goldberg, who is 63, also cited his age as causing problems between him and station management. Before working at WKXW, Goldberg also worked at WJLK Asbury Park when it was owned by Press Broadcasting, as well as WHTG.

Ah,the snow...ah,the news.

1. This may not have gotten much press in the U.S.,but two of Canada's major media groups,Rogers Communications and MacLean-Hunter have announced plans to merge into 1 conglomerate. It would give them control over many cable systems,the country's lone newsweekly-MacLean's-and radio & TV stations coast to coast(among them-Hamilton's CHCH-TV(ch.11,indep.)). However,the Canadian Radiotelevision and Telecommunications Commission(CRTC;yes,that's how it's spelled)has a rule that says a company cannot own any more than two stations in one market(at least it's better than the FCC,which lets you own up to 4-2 AM & 2 FM). This is creating a problem in a number of markets in western Canada and Ontario-Toronto among them. Rogers owns CFTR-AM(news;680 News)and CHFI-FM(A/C;FM 98), while MacL-H owns CKYC-AM(country;Country 59)and CFNY-FM(modern rock; The Leading Edge). Which company is going to blink first? I'd say-this is a wild guess-that Rogers is going to dump theirs.(Just a guess on my part. In any event,stay tuned...)

2. Staying north of the border for a minute,Charlie O'Brien has joined CJEZ-FM(classic hits/Jays/Leafs;Z-97.3)as its afternoon driver. He was PD at CKLW-AM/FM in Windsor,Ont.

(FYI,CKLW-AM is at 800 AM;50 kW round the clock,and has a directional antenna;its format is talk. The FM is at 93.9,runs at 100 kW and has-at last report-a classic soul format.)

3. Back to the U.S.-Hank Nevins,who I reported was named the OM at WGY-FM in Schenectady,is still in that position,but he has also added AM drive duties at the station,which has changed to WRVE(the River)with an adult rock format.(BTW,the News' Alan Pergament reported on this Wed.-and he couldn't even get that right. He said that he was at both WGY & WRVE as its OM-no;he said that he was the AM's new host-no,Perg,Don Weeks is.) 'RVE has a new air staff-I'll get to this later.

4. WBLK-FM(urban contemp.)has-apparently-switched positioners. They are now calling themselves 93.7 WBLK,dropping Power 94.

5. WIVB-TV GM Tony Kiernan has confirmed that he has talked to WGR sports talker Art Wander about working in some capacity for News 4. Question:WHY? Aren't there any other sports reporters with brains that would be better? Wait,I've got it! News 4's thinking of him because of his great work tasting food! :-) (That was in reference to a recent sweeps series.)

6. Speaking of WIVB,Bob Koop-who hosts 5:30 Live-is stepping
in for Dave May,whose talk show airs from 9-11am on WBEN(news/talk/
sports;NewsTalk 930). He's on for 2 more days-next Mon. & Tues.

That's all for now,I think...

I host morning on AOR 93.7 KLBJ in Austin, Texas. As a staff we are constantly arguing about the state of AOR. The problem with WMMS as all Aor's today is the fragmentation of other formats. We are in Market #51 yet we have what can be considered 5 Rock stations. KGSR is an adult rock (Lyle Lovett etc.) KPEZ is a pure classic rock. KUTZ is Z-Rock, KEYI plays pop-rock. The problem is fragmentation and programers are really sticking to what tests well for the demo they are shooting for. Unfortunately if your shooting for males 25-34 your looking at playing alot of Aerosmith, Zepplin, Van Halen and as far as the new stuff Nirvana and Pearl Jam, hopefully your at the other end and have choices to find your niche.,....

William A. Goldsmith (wgsmith@netcom.com) wrote:
: You're missing a key element of the point I was trying to make: I am spec-
: ulating about the *future* - when broadcast radio is competing with a vast
: array of cable/digital/DBS/whatever audio distribution services. I'm not
: about to try to defend the idea that *in today's marketplace* quality pro-
: gramming is an inherent advantage.

: However, success of the quirky, quality-conscious variety is not unheard
: of either. The station I work for (locally programmed, quite unique, fin-
: ancially stable & #1 with our target audience in a very competitive mar-
: ket) proves that every day.

But, O, we were not supposed to use *anecdotal* proof!

Alas, Monsieur Goldsmith has a clear vision of the future when radio isn't "broad"casting any more. In fact, that day is probably already here. The problem is, the narrowcasting that goes on is to but a few segments of the population, ignoring a whole lot of other people in the process. And that's my point--there's more money to be made in targeted overlooked audiences than the defenders of the status quo ante are willing to admit, for whatever reasons.

I'll just try to fill in some of the blanks here and not comment much otherwise, since I would just be repeating myself. Anyway,
Alan Cassel (alcassel@netcom.com) wrote:

: In answer to your question, Limbaugh was, in fact, on another AM station
: in St. Louis. I don't know this for sure, but KMOX may well have been
: crushing him in the ratings before it started carrying him. The reason I

Limbaugh was on WIBV (1260) out of Belleville, IL. I think he was getting around a 3.0 middays, about the ONLY ratings WIBV had.

: think so is that KMOX historically is the leading station in the market,
: and has had ratings in the 30's. Indeed, if memory serves me, in my 1990

Not for a long, long time, though. More recently, it's been running in the low to mid teens, with a heavy demographic slant to the audience that OUR local shock jock Randy Miller once called, "55 to death."

: >From this, one might infer that KMOX's putting Limbaugh on the air, after
: decades of following a successful policy of studied neutrality in their
: talk show, may be entirely a financial decision to lower the costs of
: running the station. They *may* be expecting Limbaugh to *lower* their
: ratings, but if he is cheap enough to carry, KMOX may make more money
: with fewer listeners -- and less local public service during an important
: daypart.

I don't doubt that money has something to do with. But, also, KMOX may be trying to pull a younger demographic...you know, people like the College Republican crowd.

: Secondly, I saw a story about KMOX in a well-respected national magazine
: not too long ago. They said that, for the first time that anyone could
: remember, KMOX was actually beaten in the ratings in an important young
: demographic group by an FM station. But they said that the FM jocks who
: were responsible for this did it by hurling racial slurs at black callers
: and by having patently offensive contests where they invited people to
: call in to identify which, of a group of named celebrities, was Jewish.
: (Is this really true?)

I don't know about the latter item, but it sounds like something Steve Shannon and D.C.Chymes would have done on WKBQ(FM) when it was at 106.5. Zimmer Broadcasting bought it from Evergreen and swapped formats with its weaker signal at 104.1...and, after a suitable cooling-off period, has rehired Steve and D.C.

They were fired after they used a canine-oriented term to refer to a black caller. On the air.

The damn problem with them is that, when they behave themselves, they are very, very funny and talented. They don't have to do garbage like that. I don't know whether it's their own bad judgment or immaturity or that of their management...or both. It's kind of like Stephen Spielberg suddenly deciding he needs to make some porno flicks.

: According to the story, KMOX then hired their own local "shock jock"
: (someone with whom I am not familiar), who offended other popular talk
: show hosts at the station, and may have influenced one who was
: particularly popular to retire rather than put up with what was going on
: at the station. I understand that they eventually got rid of the "shock
: jock" and that the retired talk show host now may fill in as a
: replacement on occasion. Perhaps someone within earshot of KMOX during
: the day can confirm all this for me.

The jock in question is J.C. Corcoran, who is not as outre' as Steve and D.C. In fact, he is more along the lines of our Randy Miller, somewhat risque but heavily topical and quite informed about local affairs.

He started at KSHE then jumped ship for KSD-FM. Meantime he landed a parttime stint as entertainment reporter for KSDK television. About the time KSD-FM chose not to renew his contract, Channel 5 dumped him, too.

<sorry to drag teevee into this.>

Anyway, he made do with Channel 4 (KMOV) for a while. Then landed at the 'MOX. It may have been one of the first decisions the new, post-Hyland, sales-ladder-climbing CBS management made. Ostensibly this was to bring in the younger audience so familiar with J.C. during his time on album- and classic-rock stations.

Anne Keefe was distressed. Anne had been at KMOX since the New Madrid Earthquake, it seemed, but actually she had only been there since 1970. (That tells you what the 'MOX is like when you say she had ONLY been there since 1970.) She was quite outspoken about that *and* other changes the new CBS crew were putting into place. So she placed a pox on the 'MOX and bailed out. I didn't know she was back on, but it's entirely possible.

: If listeners sense -- whether correctly or incorrectly -- that Limbaugh
: was put on by KMOX for these reasons, is it any wonder that people think
: Limbaugh is bad for the long-term health of either the station, or St.
: Louis radio? If I still lived in St. Louis and sensed this, I would
: probably start putting cassettes in my clock radio rather than wake up to
: KMOX.

My speculation. One, it's money. Two, it's an attempt to seem 'with it.' Three, it keeps a popular program OFF somebody else's stations. s

Trouble is, KMOX lost the younger demos a long time ago (there have been a couple of books where KSHE nearly beat it). Getting them back will be tough because people my age (36) and younger have been trained not to expect news from radio. Even when we need it.

965. Modulation Wars (RW article)

Newsgroup: rec.radio.broadcasting
Date: 1994-03-19 05:20:50 UTC
From: barry@coyote.datalog.com
Message-ID: <2me23i$s4@vixen.cso.uiuc.edu>
Source record: 40729

We've seen a lot of comment of quality radio, and processing, over the months. Here's something I wrote last year right after the NAB show.

"The Eclectic Engineer " - June 1993

I HAVE A DREAM .....

by Barry Mishkind

TUCSON, Ariz.] Looking back, I guess it must have been that super double fudge chocolate dessert creation we were served at dinner during the NAB show. We'd been up late, talking about the processing equipment shown on the floor.

At first, I was certain the phone had gone off (at 3 AM yet!) and on the other end my friend and fellow engineer Joe was saying it was essential I come to his transmitter site immediately.

Well, OK, Joe's a good egg. He's helped me out many times during emergencies, so I felt I'd better roll and get there as soon as possible.

Surprisingly the parking lot was full of vehicles. What could be wrong, I wondered? Did the transmitter's high voltage transformer explode? Was the antenna matching unit struck by lightning? What DID bring out all these chief engineers at 3 AM?

All seemed calm near the tower base, so I figured it obviously had to be a major failure in the control room. Probably it was the old console with the flakey power supply. It'd be a disaster if it wasn't fixed by morning drive.

But, inside the station, there was no panic there, either! Every local chief engineer was there, sitting in the conference room, drinking coffee or cola, and chatting about things engineering.

THE REAL REASON

Finally, Joe called for our attention. He'd been thinking about the discussion we'd had at the last radio engineers luncheon on the trends in audio processing. The recent generation of digital audio processors seemed to result in ever greater "smash" and reduced dynamic range. Joe felt it was time to do something about the modulation wars which turned virtually every station in the market to broadcast square waves between 2.3 kHz and 2.8 kHz in a vain attempt to be the loudest signal on the band.

"Enough is enough!", he said. "As a group of professionals, we have to do something before the average time spent listening drops below three minutes." Harold spoke up in agreement, saying that there had recently been a whole series of auto accidents apparently caused by people distracted from road

conditions while they tried to find a listenable station.

Mark felt the same way. His PD demanded so much processing that the alley behind his station was now cluttered by the tops of waves which had been clipped in their new MegaDigiMod audio processor.

One by one each engineer agreed the modulation wars weren't doing anyone any good, and the aural signature of our collective craftsmenship was really no source of pride. Still, none felt they could turn their processing down. Each said the PD would immediately start screaming they were now only half as loud as the competition. Wasn't there anything that could reverse the trend to more and more smash?

As everyone shared their feelings, frustration grew toward dealing with a group of people whose idea of good audio centered on modulation monitors indicating a constant 99% Anything less, according to these programming gurus, was a wasted opportunity to grab more listeners as they tuned past the station.

The plan is set

Joe then went on to describe his plan: We'd all go directly to our respective stations, and at exactly 4:45 AM back off precisely 3 dB of clipping and 10 dB of compression from our audio chains. Finally, we'd recalibrate our modulation monitors so that they would look exactly the same to the programmers. Then we'd lock up, go home, and relax in the knowledge that everyone would be putting out a cleaner signal.

It all was to be done in the middle of the night, so that none of our program directors would get wind of our plan.

Chick thought we'd might even get some calls asking what we'd done to improve the sound of our stations. PDs from all over the country would call, trying to find out how we managed to be both clean AND loud, so they could do it in their markets. Who knows, maybe an award would come from the NAB proclaiming we'd done a major service to the industry and certainly we'd be in demand to consult the major chains.

With glory in our eyes, we all went and did it. And not one program director noticed the difference in modulation levels. Sure enough, my boss called me into his office, and told me how much more his friends and clients liked our "new" clean sound. When he asked me how I'd done it, I tried to sound like it was a new modification I'd installed. "Well, we did do a few things with the audio chain to clean up some problems."

And then .....

Back to reality

"Buzzzzzzz!" went the alarm clock to start another day. It was odd how good I felt. Driving in, I thought I heard less distortion and breakup than normal. Maybe the plan IS working. Maybe, if we could take just a few more dB of smash out, it would clean up totally. I started making notes of several ideas as they came to mind.

Arriving at the office, I found a message to call Joe. "Hi, guy", his cheerful voice came on the line. "I've got some good news." "Great! Let me in on it," I replied. "OK," Joe said, "Just thought you'd like to know that overnight we installed the new Multi-MegaDigiMod processor with the variable post squash tri-clipper circuit. We're now at least .25 dB hotter than you are! Just try and catch up to us!!"

Well, I HAD a dream ....

Barry Mishkind, aka RW's "Eclectic Engineer," hides out in Tucson, AZ. He can be reached at 2033 S. Augusta Place (85710). Electronic addresses: coyote.datalog.com" on Internet (also via Compuserve).

Bill -

I am thoroughly enjoying Airwaves. Thank you for the time and effort you obviously put into this publication. I was wondering, as I am not a radio professional, are there any other publications, possibly in print (magagazines, etc.) that would also be available (either at a newstand or by subscription) that might be of interest to me? I am particularly interested in Talk Radio and DXing issues and ideas. I am also very interested in backround stories on the radio personalities. If you know of anything, I would be very interested.

Again, thanks for Airwaves. I look forward to reading it each day.

Thanks,

Jack Schnapper

Tom went to KFYI in Phoenix from Florida. In 1985 and 1986, he was turning a no-where station into serious competition in the news/talk market there (KTAR had a monopoly). Then, in 1986, Evan Mecham was elected governor in Arizona. Evan was quite the controversial governor, who ended up being impeached a year later -- literally thanks to Leykis. However, many of Evan's brethern complained to the GM of the station and Leykis was suspended. The fans revolted, boycotted KFYI advertisers, and the station actually got a restraining order forbidding the listeners from picketing the advertisers. Leykis got reinstated, did about two weeks of milquetoast talk (he was under a gag order from the GM), then, in the middle of a Friday show, put on the Eagles "Taking it to the Limit" and walked out, never to return.

He did strike some deal with KFYI in order to take the KFI Los Angeles job in the winter of 87-88. Tom did great in Los Angeles and the ratings soared. However, for reasons still known only to KFI admin, they didn't try to renew Tom's contract at the end of 1992. Tom had been doing guest stints across the country and one rumor is that KFI knew Tom would be going for a big raise, at a time when California businesses were looking for bargain rates for advertising. Tom was replaced by ex-LAPD Chief Daryl Gates until they brought in these two loud-mouths John Colbelt and Ken Champleau (guess on the spelling). KFI has gone downhill since Tom left.

Tom was on CNBC last Sunday night on "Talk Live." One of his guests was Bob Barker -- a guy (I guess) Tom really adores because he gave this really sickening sweet suck-the-syrup-straight-from-the-bottle interview. It was very unTom.

There were a lot of Mass. callers saying goodbye and wishing Tom well on his Westwood One adventure.

Also, Sam Rubin, the Hollywood reporter on KTLA Los Angeles (Independent) reported Tom's Westwood One deal this morning -- and said that no Los Angeles stations have signed on to the deal as of yet.

This is NOT at all a good thing, at least from my vantage point as an
East Coast WOWO listener (hey, my girlfriend's from Fort Wayne -- what
do you want?). WLIB has historically been extremely limited by
WOWO. WLIB has to sign off every night at Fort Wayne sunset (typically
about half an hour after NYC sunset, meaning I can hear the last half
hour of WLIB up here in Boston. No doubt an Inner City-owned WOWO would
grant WLIB the waiver that previous owners Price Communications and
Group W denied...the waiver that would allow WLIB to cause interference
to WOWO by staying on the air at night. Meaning more noise and less
WOWO on 1190 up here. Very very very very bad indeed...

And BTW, the two other powerful 1190s are KEX Portland OR and KGBS (ex-KLIF)
Dallas TX. W(not K)BAP is clear channel on 820 out of Fort Worth.

-=Scott Fybush - fybush@world.std.com=-
I have seen the world-famous WOWO Fire Escape, and lived to tell of it...

: WOWO's power may be cut, seeing that the owners would want to make the
: NYC station more powerful, seeing that NYC is a # 1 market. Any comments?

To flesh out with some background:

WOWO had a I-B designation, having only to protect KEX Portland (which was also I-B). I don't know what the present-day equivalents are (the FCC changed the classifications within the last couple of years).

WOWO and KEX are both listed in the Havana agreement of 1940 as being I-B stations at 1190. (Both moved from 1160.)

The Dallas station at 1190 was, for a long time, KLIF (started by Gordon McLendon). It was a class II. The KLIF call letters are now on the former WFAA at 570 in Dallas. Susquehanna "moved" KLIF and its talk format from 1190 in 1991, and sold off 1190. (The 570 signal is a monstrously good signal in most of Texas and Oklahoma.) Current 1190 call letters are KGBS, listed in my M Street as news/talk, 50 kW day, 5 kW night, DA-2.

Speaking of M Street and of WLIB: Listing there is for 1190, daytime only, with an application for 5000 watts at night on 1200 (i.e., different frequencies day and night?) licensed to Yonkers.

BUT this would have the potential for conflicting with a longstanding CP for WGNY Newburgh (about 40-50 miles from Yonkers) to move to 1200 from 1220 with 10 kW days, 2.5 kW nights, DA-2. The potential for conflict, of course, could be lessened by the particular patterns involved and (during the daytime) by the very poor soil conductivity in the Northeast.

Still, your speculation is interesting. It wouldn't be the first time a big-city broadcaster bought someone out in the heartland in order to make its facilities better.

(It happened in 1940 with KFRU in Columbia, Mo. and KMOX in St. Louis, as I recently posted. Of course, the regulatory climate is far different today, but with the direction in which the FCC is going, who knows what can go through these days?)

I believe, in fact, WLIB had (or maybe still has) a limited-time license with WOWO, meaning it could stay on until Fort Wayne's local sunset.

It would be hard to imagine any other reason why Inner City would be interested in Fort Wayne. Whether they could pull off such a move is another question.

1190 is not a very "clear" channel in this part of the world, and hasn't been for quite a while. KFEZ in Kansas City has had nighttime authority on 1190 for at least 20 years, for example.

From: jlewis@progress.com
Message-ID: <2me84i$841@vixen.cso.uiuc.edu>
Source record: 40714

I'm looking for any information on a radio show from the
mid to late seventies called "Chicken Man". It was a comedy sketch
about a "super hero" name "Chicken Man". It use to air
on WLAV-FM 96.9 in Grand Rapids, Michigan.

I am specifically wondering if there are tapes of the show
available as well as general information like who was behind
the show, how long was it on, etc...

Thanks.

are>making a name for themselves, by the way, Mr. Imus hit a new low last
Monday>when he cursed out his board op on the air, way to go baby!
>Regards, John in Miami Home of The Don And Mike Show, on Wiod.

Hi John,

I wrote before but I can't see the note. So here I go again.

I live here in the DC Area. I've been hearing the guys
since they were first together as a Morning Zoo on WAVA. They are always
fun but my favorite part of the show is the first hour when Don
tells the story of his tragic weekend or, even better, his tragic vacation.
I NEVER miss a monday after a vacation. When they were on in the morning,
I used to always get up on time because I never wanted to miss the first
half hour of the show because of the stories Don would tell about his
life then. Especially when he and Frieda were separated.

It's nice to talk to a fellow psychotic stalker of the
Don and Mike Show. Hope you folks get the show live pretty soon!!!!

WILL

973. Imus List

>
>Just for the heck of it (and because I'm making my semi-annual Boston
>to Rochester drive next weekend...), here's a list of all the public
>radio in New York State:
>
>BUFFALO AREA:
>
>Western New York Public Broadcasting Council:
>WNED-970 AM NPR news, talk, and jazz
>WNED-94.5 FM all classical (simulcast on WNJA 89.7 Jamestown)
>------
>University of Buffalo:
>WBFO-88.7 FM NPR news and jazz, plus additional NPR cultural programming
> (simulcast on WOLN 91.3 Olean and soon on WUBJ 88.1 Jamestown)
>
>
Just an update, when WEBR changed names to WNED they cancelled all jazz.
As for NPR News on both stations, as you have listed, WNED-AM only carries Morning Edition and Talk of the Nation. WBFO-FM is listed as full-service NPR News because it airs Morning Edition, Talk of the Nation, All Things Considered, Fresh Air, Weekend Edition, Weekend All Things Considered, plus cultural programs like Afropop, BluesStage, Thistle & Shamrock and Wade in the Water. Also, WBFO is a charter member of NPR, carrying ATC since 1970 and adding others at their inception. WNED is not a member station, and buys only the two programs mentioned above.
If you need more information about WBFO, people in Western New York can look at the usenet newsgroup WNY.WBFO. If you're outside the area, you can join the WBFO mailing list at listserv@ubvm.cc.buffalo.edu and ask to subscribe to WBFO-L. We post all NPR program highlights plus information on locally produces shows. The other newsgroup we post this information to is alt.radio.netwroks.npr.
Please write or call (716)829-2555 for more info on WBFO.
Lydia Kulbida
P.S. We're looking for new members this week :)!

Originator: rrb@deja-vu.aiss.uiuc.edu

>I'm engineer for a small student radio station here in the UK. We can't
>actually broadcast because of the rules concerning permament small-scale
>transmission is this country (only type allowable is 'Induction-Loop' Radio,
>and a typical installation quote is ^\15,000. Our studio budget was ^\3000!)
>so instead the system is wired into strategic points at line-level.

Well look no further, same rules apply in the U.S. :) The only difference is the
name.....We call the 'induction-loop' idea you mention 'Carrier Current'.

>We always have a compressor on hand to try and improve the audio 'punch'
>of the signal (and also to help the DJ's who can't quite get their links
>right!) - the problem is that I (and others involved) always disagree with
>the chief engineer on how the compression should be set up - ie ratio,
>attack, decay, etc, and whether or not the DJ should hear the post-
>compression output or the pre-comp.

smile There is just no 'right' setting :) it depends on your personal
taste ...One thing for sure, broadband compression alone is more
likely to act as an AGC (automatic gain control) device rather than a
noticeable 'punch' generator. It will definitely increase the apparent
loudness but dont expect miracles from it: you ll need multi-band compression
in addition to broadband clipping so this way each portion of your audio
spectrum is compressed equally in you audio chain.

Also keep in mind that compression is a very controversial topic.
Some engineers are in favor of multiband compression, others are in
favor of broadband compression, others hate both.

There is no doubt a compressed signal lacks dynamic range, therefore it's
unnatural. If you asked me how to make your station audio appear louder,
I d say 'just turn it up' :) of course, we all know that there is a legal
limit we have to go by....that's where modulation wars come in ...

>obviously large stations know how to set it up because they can find a
>compromise between gain control and the effect on the audio. (The UK's Radio
>One uses THREE stages of compression!)

They also have noise reduction units + gating. I you try heavy compression
on a noisy/scratchy record you ll cause listener fatigue (from the 'breathing'
effect). The noise will rise so high during quiet
passages of the record, and that will sound real auwful.

>I would be really grateful if anyone could either tell me their opinion on
>setting compression up, or recommend a good book, preferable with a view on
>the whole technical side of radio. No such book appears to exist in the UK.

Go by ear.
Depending on format, a compression ratio of 1:4 is commonly used...
Release/attack then become the knob to play with... Dont overdo it
with extremely fast releases or harmonic distortion will be heard.

You may find plenty of good books about sound processing, etc in 'AUDIO
PRODUCTION' and 'AUDIO RECORDING' sections (as opposed to 'RADIO' sections)

978. Digest of St. Louis Radio Items

Newsgroup: rec.radio.broadcasting
Date: 1994-03-19 07:04:07 UTC
From: Mark Roberts <transvox@tyrell.net>
Message-ID: <2me857$8cs@vixen.cso.uiuc.edu>
Source record: 40722
Body handling: HTML body converted to readable text

Radio news from St. Louis, as paraphrased from the St. Louis Journalism Review #164 (March 1994, 8380 Olive Blvd., St. Louis, MO 63132. I like this publication so much I have every copy ever published.) and augmented with some background from my knowledge of St. Louis:

==========

Longtime station owner Richard Miller celebrated his retirement from radio March 6.

Miller sold KRJY (96.3, formerly KADI) to Heritage Media, the owner of WRTH(AM) and WIL(FM), for nearly six million dollars. Miller, an attorney, began in radio when he bought AM station KXLW (1320, later KKOJ, now KSIV) in 1960.

During the 1960s and early 1970s, KXLW was known for raucous rhythm-and-blues programming oriented toward Black listeners in St. Louis. KSIV is much tamer now; it is a religious station in the Kansas City-based Bott Broadcasting chain.

Heritage plans to move the studios of its other stations from downtown St. Louis to the KADI transmitter and studio site in West St. Louis County.

During his retirement celebration, Miller reminisced about the progressive rock wars of the late 60s and 70s between KSHE(FM) and KADI(FM). KADI eventually switched to a satellite-fed oldies format, and more recently has been locally programmed as "Juke Box 96."

During the 1970s, Miller also owned Kansas City station KWKI(FM, 93.3), programming it with a progressive rock format similar to the St. Louis station, but using the KSHE slogan "Real Rock Radio." He sold it to the Jimmy Swaggart chain in 1979. The station is now KMXV.

==========

Former Laugh-In host Gary Owens will be inducted into the National Broadcasters Hall of Fame this year. Owens was a DJ on WIL(AM) during its heyday as a rock and roll station in St. Louis during the late 1950s.

==========

KSD midday talk show host Mark Klose, about whose show I posted an article a couple of months ago, is moving again.

Adult-alternative station WFXB (101.1) has hired Klose as its afternoon drive-time personality.

Klose began his career at KSHE (94.7) in the mid-70s when it was *the* big progressive rock station in St. Louis. He later worked for KMOX and KSD-FM.

==========

Former KSHE program director Rick Balis has been hired by EZ

Communications' KSD-FM as program director. He rejoins former KSHE personalities "Radio Rich" Dalton and Drew Johnson. The classic-rock station reportedly has stagnated because of lack of attention from its former owner, Gannett. Gannett exited all Missouri markets last year when it sold KUSA (now KSD(AM)) and KSD-FM in St. Louis and KCMO(AM) and KCMO-FM in Kansas City within a month of each other.

==========

Four office-cleaning companies in St. Louis are upset by radio ads purchased by a local of the Service Employees International Union. The ads accuse the companies of "exploiting workers" by paying them "low wages with no benefits," and ask workers to join the union.

The president of one of the firms named in the ads, Frank Joubert, called the ads "slanderous." He told the SJR he has contacted the FCC and the Federal Trade Commission about filing complaints, but has not actually filed any yet.

The president of the union local said the union represents 8,000 janitorial employees in the St. Louis area.

979. alt.fan.greaseman FAQ

Newsgroup: rec.radio.broadcasting
Date: 1994-03-21 10:54:06 UTC
From: jcastro@mason1.gmu.edu
Message-ID: <greaseman-faq_764247107@rtfm.mit.edu>
Source record: 40734
Cross-posted to: alt.fan.greaseman,rec.radio.broadcasting,alt.answers,news.answers

Archive-name: greaseman-faq

The Greaseman is a radio personality on the Infinity Broadcasting network. He broadcasts from Los Angeles to New York City, Washington, Atlanta, Philadelphia, and San Jose. He is known for his bits and song parodies. He also has his own vocabulary which he uses to avoid trouble with the FCC. Before, he broadcast out of DC on DC/101 where he competed and beat Howard Stern on a consistant basis. The Greaseman is on by himself most of the time, though sometimes you hear his producer, Bill Scanlan cackling in the background.

Q: What is the Greaseman's real name?

A: Doug Tracht. He prefers to keep his radio life and his personal life separate. His radio name is Nino Greasemaneli.

Q: Why does Howard Stern hate the Greaseman so much?

A: Howard worked for DC/101 until he got fired. When the Greaseman was hired to take Howie's place he not only held on to Howie's audience but increased it. Then when Howard syndicated in DC he competed with the Grease until the Grease moved to Infinity where they now are co-workers for the Broadcasting Giant. Now, mentions of the Greaseman on the Howard Stern show appears to be just an act in part of Stern.

Q: Which one was the Grease in the Village People?

A: He was not really in the Village People. But in the bit, he was the construction worker.

Q: What is this Bingo that the Grease dislikes so much?

A: The Greaseman's college nick name... Ask him about it.

Q: How can I get in touch with him?

A: Call him between 1730 and 2200 EST at 1-800-544-9294 and 1-213-850-0986 (FAX) and BTW do not address him as "dude".

Q: What bits does the Greaseman do?

A: Fudgeman- Fudgeman and his chicken assistant throbin
save the world from deviant behavior
Back in time with an uzi-
the Grease uses the equipment in the radio
studio to return to key moments in history

with his uzi
Carlos the International Terrorist-
Episodes of running into the famed and heavily
armed terrorist, Carlos
Medical Man- Stories about when Nino was the pompous
Dr. Greasemaneli
Bet the Bomb Bays-
Try to stump the Grease, but if you don't, you best
drop them pants....
Sgt. Fury- the Grease relives his time in Viet
Deliverance 101-
a class in which the Grease analyzes the movie
Deliverance.
Clinton- a look at how life would be if the Grease and
Clint Eastwood got a knock on the head and decided
to live alternative lifestyles
Law Man- the Grease tells about life as a law man

Hobo-doo-ga-ga Handbook-

Methods to which recieve ingus.
Damien- The Grease has occasion to run into the "dark master"
while he is trying to perform his duties.

Q: What is the alarm that is sometimes heard in the background when the
Greaseman talks?

A: The Geeze alarm. This goes off when the greaseman starts geezing.

Q: What other gigs did Grease do on the radio?

A: Like any other up-and-coming DJ, Grease worked at other stations in
other markets to develop his unique style. They include:

Washington DC (WRC-AM 980) 1974 - 1976
Jacksonville, Florida (WAPE) 1976 - 1981
Washington DC (WWDC-FM 101.1) 1981-1993

Q: Did he always leave on good terms?

In almost all cases, yes. The one notable exception was WRC, when
management decided his morning personality wasn't quite right, and gave
him a choice between dropping the "Greaseman" character and leaving.
Grease chose the latter. If you ask about it today, he will joke about
the time he was collecting unemployment insurance in DC and would "stay
up to watch the moon rise and CURSE THE NIGHT!" although I'm sure at the
time it was somewhat unsettling.

Although he left Florida voluntarily to take the better offer at DC-101,
he did offend some bible-belt types during his stay. The Florida gig
was important to developing the Grease as a "god-fearing, truck-driving
redneck," though. The Florida station has since gone to religious music
("From Grease to Grace" was their motto for a while). Their loss.

Q: Are there any good biographies or other comprehensive stories about
the Greaseman?

A: Grease is a very private person, and spent a number of years in DC
before finally consenting to an in-depth story about him in the
Washington Post Magazine Fall 1987. It's a good resource to summarize
his past gigs and overall life story. Also the Washingtonian Magazine
did an article on him in the January of 1993 in commemeration of his
departure from DC.

Grease also appeared on the Larry King Show (early to mid-80's) to talk
about morning radio in general. The only down side was that he was
teamed with a "Morning Zoo" DJ as a co-interviewee, a format that has
become annoyingly ubiquitous on the radio landscape. Transcripts may be
available (don't know how to get them, sorry). This is the old
Mutual show that ran all night (Grease probably got up early to do it :-),
and not the current CNN TV talk show.

Q: Are there any albums or compilations of Grease bits?

A: There was a 4-part "Best of Grease" compilation, available on cassettes. These became unavailable shortly before he left DC-101. They are now prized collectors items and can only be obtained from private owners. Part of Grease's popularity on a national basis before he went into syndication (and hence part of the motivation for this newsgroup) was the creation and exchange of bootleg tapes among an extended network of fans. Some of his best work has never been republished (although you can occasionally talk him into doing them again on his current show).

Q: Did Grease ever serve in the military?

A: Like John Wayne, Grease has a deep and abiding respect for everyone who serves in uniform, but never served himself. During the Vietnam war, he was attending Ithaca College in New York, and his draft number never came up.

Q: But Grease did serve as a policeman?

A: Yes, he did. While working at his gig in Florida, he worked as a reserve police officer on the night shift. Morning staffers would be jolted out of their bleary-eyed state by the sight of Grease doing his show in full uniform with a 44 Magnum strapped to his belt.

Q: Is Greaseman a bigot/homophobe?

A: Certainly not. Like the program "In Living Color" or even rec.humor.funny, Grease parodies what's funny in everyone, and winds up defusing hatred as a result. Grease respects all of his fans, and wishes well even those who don't like him.

Q: But there was that "Martin Luther King, Jr." incident in DC?

A: Yes, sometimes there's a fine line between parody and cruelty, and Grease crossed the line only once during his otherwise unmarred broadcasting career spanning over 2 decades.

Sometime in the late 80's, he was noting the passing of Martin Luther King Jr.'s birthday (which had then only recently become a national holiday). Grease said something about "killing 4 more and getting rest of the week off." Grease was suspended, and apologized for the incident on an "Editorial Rebuttal" on WRC-TV in DC.

Haven't the rest of you made mistakes or are you all perfect?

Q: What does AMF mean?

A: Adios my friend.

Q: What is the "Bit without an Ending?"

A: When Grease was working in Florida, he would be prevented from getting a good day's sleep after his morning gig by thoughtless model-airplane enthusiasts who would buzz their models outside his window.

Grease came up with a revenge skit with a model plane of his own that would shoot the others out of the sky. The plane became posessed by Damien and started chasing after him. Grease then got too deep into this bit without a way out (and tried to incorporate this into the bit). After fumbling with the sound-effects, and trying a foray South of the Border, and then calling in Big-Dick Brannigan, he finally gave up groping for a punch line. Grease can usually be counted on to do some of the most impressive ad-libbing and improvisation on the radio today, but at that time his talents failed him. The bit originally aired in the Fall of 1982 from WWDC FM Washington, DC/101.

It's considered a classic, and is on Vol. 1 of the "Best of Grease" tapes. He owns the rights to all his bits, and may rerun it on his current show from time to time.

Q: What stations carry the Greaseman?

A:

City	Station	Time
Washington DC	106.7 WJFK	1900-2300
Baltimore MD	1300 WJFK	1900-2300
New York NY	92.3 WXRK	1800-2200
Philadelphia PA	94.1 WYSP	1800-2200
Los Angeles CA	95.5 KLOS	2200-0200
San Jose CA	98.5 KOME	1500-1900
Atlanta GA	92.9 WZGC	0600-1000

This was one of my favourite shows on AFN in the early '80s.

I wonder what kind of stations (format) in the US did broadcast it and at
what time. AFN had it at about 7:00 am.

* The announcemetnt of WEEI AM 590 sale from the Boston Celtics Broadcasting Lmtd. to Back Bay Broadcasters took place on Wednesday(3/16).

Here's what's known :

The Buyer : Back Bay Broadcasters -- a company formed by Peter Ottmar, owner of Ten Miles Communications which owns radio stations WWKX-FM and WARA-AM serving SouthEastern Mass and Rhode Island. New limitted parnetrs of BBB are Ottmar's brothers, David and James, and WEEI's new GM, Ross Elder who himself owns 3 New England radio stations(WTYD-AM, WNLC-FM in New London,CT and WCLZ-AM in Portland,Maine).

The Seller : Boston Celtics Broadcasting Limitted paid $6.8 million to Helen Broadcasting(owners of national Papa Gino's pizza chain) for WEEI in September 1989. The station's losses under the 4.5 years Celtics' ownership averaged $50,000 a week.

The Sale Price : $3.8 million. Back Bay Broadcasters are apparently financing the purchase of the SportsRadio 590 thru a loan from Chemical Bank and not thru American Radio Systems(owners of WRKO,WHDH and WBMX-FM) as was alleged by certain local media outlets(more on that later in this post..)

Eventhough, it seems like the Celtics are losing $3 million on the radio sale, they'll make a huge profit on the sale of their successful Fox-affiliated UHF TV station(WFXT-TV25) to Rupert Murdoch later this summer. The Celtics paid $10 million for the ch.25 in 1989 and will reportedly sell it for $60 million.

Programming Changes : No immediate on-air changes are planned in the all-sports talk programming. Don Imus(5:30-10), Dale Arnold(10-1), Crais Mustard(1-3), Eddie 'The Anchor' Andelman(3-7), and Ted Sarandis(7-11 when there's no night game action) will be heard for now. However, the Celtics' broadcast are moving to WHDH 850 starting this fall for the next 5 seasons. Peter Ottmar sold the game rights to ARS. The Bruins' games will be moving from WEEI to WHDH next season as well but no official word has been made.

Accusations and Allegations :

Apparently, Ottmar is a close friend of ARS' president and CEO Steve Dodge. That connection fueled speculation from 2 ARS' competitors that ARS(which already owns 2 AM signals in the Boston market) is somehow involved in WEEI transaction but on the surface the deal looks very clean.

Major accusers :

1. Pyramid's CEO Richie Balsbaugh(not your classiest broadcast
operator by any stretch of imagination :-) charged that ARS was
acting unethically in the WEEI deal. Pyramid, as you'd recall,
was supposed to merge with ARS(then Atlantic Radio Ventures) in the
spring of '93 but the megamerger fell apart when cash-strapped
Balsbaugh didn't come up with needed capital to make the deal work.
When Atlantic megred with 2 other companies last fall to form ARS,
it probably didn't make Balsbaugh's day.

2. Westinghouse's WBZ management, which was negotiations with the Celtics
for 3 long months, indicated in the press that ARS might be a true buyer
and wants come after ARS and Back Bay Broadcasters. The almost-done
deal(around $2million) fell apart in January when the Celtics
demanded more dough for their troubled sports station.
WBZ management is probably still somewhat disappointed but they
shouldn't be mad with the actions of the penny-pinching Celtics.
Instead, they should vent their anger at the person most responsible for
the non-deal -- Don Imus,himself, who in 7 months brought in
excellent ratings and raised WEEI's value by a million or two...:-)

* ARS is moving its 3 stations(WRKO 680AM, WHDH 850 AM, and WBMX 98.5FM)
this weekend to its brand new facilites at 116 Huntington Avenue in the
Back Bay section of Boston. WRKO and WBMX are leaving their old digs
behind Fenway Park and WHDH is finally departing from the studios of
WHDH-TV(same calls, different owners) in Government Center.

* Infinity's WBCN-104.1FM is having serious trouble of getting a new
contract signed with United Electrical Workers Local 262. The cuurent
contract expires tonight,March 17 at 11:59pm. If there's no deal by
7:30am on March 18th, the union is threatening a strike and 26-year
old dinosaur of Boston radio, The Rock, may go silent....

* The announcemetnt of WEEI AM 590 sale from the Boston Celtics Broadcasting
Lmtd. to Back Bay Broadcasters took place on Wednesday(3/16).

Here's what's known :

WRKO and WBMX are leaving their old digs behind Fenway Park and WHDH is finally departing from the studios of WHDH-TV(same calls, different owners) in Government Center.

* WBCN-FM is also reportedly trying to outbid ARS and Westinghouse for the NFL's Patriots radio rights for the next 3-4 seasons. This is a new revenue strategy(Sunday is the slowest day in radio) by

Infinity -- landing male-oriented programming on
its FM stations targeted primarily at a mostly male audience. Infinity
already has local radio NFL rights on its FM stations in Dallas and Philly.

Time for a Transvoxian comment: it seems radio has preceded TV by about
ten years or so when it comes to the dumbing-down of programming. No doubt
it won't be long before radio morning-show type antics get translated
somehow onto the TV airwaves. Maybe these guys are preparing for the
future? One would hope not, but entropy *is* everywhere.

The morning show at WZZQ-FM/Terre Haute, our local rock station, is a
typical music-plus-silliness thing starring Scott Dean and Debbie Hunter.
Welp, two years ago, they went and got themselves a late-night TV gig as
well. Friday nights after Conan on the NBC affiliate here, you can watch
_Nightmare_Alley_, which is a bad-movie-plus-silliness thing. So, instead
of music, it's segments of the bad-movie-of-the-week.

Gets better ratings than Letterman.

N> Alas, Monsieur Goldsmith has a clear vision of the future when radio
N> isn't "broad"casting any more. In fact, that day is probably already
N> here. The problem is, the narrowcasting that goes on is to but a few
N> segments of the population, ignoring a whole lot of other people in
N> the process.

So, who's getting ignored?

As far as different ethnic groups, at least in Los Angeles, most are well represented.

We have a couple of brokered-time stations, for more specialized interests. . .

984. Seattle's Classic KING-FM&AM

Newsgroup: rec.radio.broadcasting
Date: 1994-03-22 13:12:10 UTC
From: briang@halcyon.halcyon.com
Message-ID: <2mmqra$dau@vixen.cso.uiuc.edu>
Source record: 40739

The owners of classical-music KING-FM will give the radio station to Seattle's music community.

Sisters Priscilla Bullitt Collins and Harriet Stimson Bullitt made the announcement Friday, fulfilling a pledge they made in 1992 when they purchased the station's assets from King Broadcasting, a radio-and-TV company in which they owned a controlling interest.

In addition, the sisters are putting talk-radio KING-AM up for sale.

KING-FM will be run by a new nonprofit corporation with a board representing the Seattle Opera, Seattle Symphony, Corporate Council for the Arts and the Bullitt family.

Profits from the station will be used ``to benefit local classical music organizations,'' the sisters said in a letter announcing the gift. They also said they would establish an endowment to support the effort ``even in hard times.''

The proposed gift is subject to approval by the Federal Communications Commission and the Internal Revenue Service.

King Broadcasting began in 1946 when the sisters' mother, Dorothy Bullitt, bought a small Seattle AM station.

After the sisters acquired the radio stations from King Broadcasting, in which they held a 70 percent share, King Broadcasting's six television stations were sold in 1992 to the Providence (R.I.) Journal Co. Those included KING-TV of Seattle, an NBC affiliate.

The sisters made the sale saying they wanted to put more money and effort into the environmental-preservation efforts of their family's Bullitt Foundation.

At the time the sisters acquired the two radio stations, analysts pegged their value at $9 million to $10 million.

Message-ID: <2mmqrb$dav@vixen.cso.uiuc.edu>
Source record: 40740

The station I work for, WEXL AM, is faced with proofing
our NAB curve by the end of June, as most AMers are I
think...

Since this is a first, and we are poor, does anyone have
any ideas? Has anyone done this already?

My understanding is there are 3 options:

Buy a dedicated test rig for about $3500.
Buy a Spectrum Analyzer for about $10000.
Hire an outside engineer to do the test for about $500.

Since it is a one time test, the station is leaning
toward the last option, however I am not convinced.

Suppose this engineer finds something wrong, we fiddle,
he tests, $$, we fiddle, he tests$$...

I could really use some guidance from those who have
gone before..

joel

You answered your own question regarding WHTZ, which had been a Malrite
station since its inception.
One of the trades printed the complete list of Shamrock holdings
a while back. I throw em away when done with them, so if anyone has a
Broadcasting & Cable Yearbook or some other recent reference source,
they can answer more accurately.

N> owners would want to make the NYC station more powerful, seeing that
N> NYC is a # 1 market. Any comments?

WOWO-1190 (Ft Wayne, IN) is the dominant station on this frequency. There are several other stations, including WLIB-New York on 1190; most (including WLIB) are daytimers, a few run very low power (1.4 kW or less) at night.

Now that Inner City has bought WOWO, there is a possibility that its power may be reduced so that WLIB could become the dominant station (or at least co-equal). I haven't heard that there were any plans to do this, and it wouid be subject to FCC approval at any rate.

My suggestion: Since Inner City would own the two most powerful stations on that frequency, they should take advantage of this and provide simulcast programming during the night hours, with synchronized transmitters (not difficult).

The two transmitters combined could cover the entire Northeastern United States, not only between New York and Indiana, but into Boston, Chicago, and even into parts of the Southern states.

I'm not familiar with WLIB/Inner City programming, I believe it's black oriented, but that's all I know about it. (is it mostly music or talk?) Obviously, operating the two stations in tandem at night would provide enhanced, extended coverage to a very wide area.

(I'll post this to soc.culture.african.american also, and see what interest there might be . . .)

P.S. There is no KBAP on 1190 that I know of. There is a WBAP in Fort Worth on 820.

993. Radio Watch/Buffalo-Toronto(3/22/94)

Lot of stuff to get to in this go-round:

1. As promised,here's the air staff at WRVE-FM(99.5 in Schenectady;adult rock;The River):

Mornings-Hank Nevins(was PD at WMJQ-FM in Buffalo)
Mid-days-John Carucci(comes from WRCK in Utica)
PM drive-Linda Parsons(prev.at WIBA-FM in Madison,Wisc.)
Nights--Dave Scott(moved from middays)

Bill Williams,who had been doing nights,is now in the River's traffic department.

2. While we're on the subject of air staff switches,WUFX-FM (103.3;album rock;103.3 the Fox)has shuffled their staff as well.

6-10am:Ted Shred & Tom Ragan(I'm almost tempted to call them T n' T-after Mr.T's series of a few years ago)
10am-2pm:"Iron" Mike Bennson
2-7pm:Meltdown
7pm-mid:Mr.Ed(Banas)-switching from the morning show

3. Also,at WMJQ-FM(102.5;hot A/C;Q102)Dave Gillen drops 1 hour of his show(which ran from 2-8)to do 2-7pm,with Chris Douglas stepping in at 7pm(he does Q After Dark-lighter music than Q usually plays. BTW,if you've ever heard Douglas,he has one of the best voices in the area-it's impossibly deep.)

4. WKLX-FM(98.9,oldies,Oldies 98.9)has a new PD. It's Denny Alexander,who moves from WWKL-FM in Harrisburg,Penn.-also an oldies outlet. He takes over for Al Brock,who exits.

5. Staying in Rochester:A bit of a brouhaha has erupted over WHAM-AM newscaster Bill Lowe,who is on the board of a group trying to lure the annual air show in Geneseo,N.Y.(outside Rochester)to Batavia. Mostly,the battle has been waged in the letters pages of the city's morning paper,the Democrat & Chronicle. An aside-WGR had to deal with the appearence of impropriety last year when newscaster John Zach (which,BTW,is part of his last name)ran for the supervisor's post in Elma,N.Y.-well outside of Buffalo. Zach had to leave the station in order to avoid the station any headaches regarding equal time political rules toward his opponent.

6. While I'm on WGR,they're up to their old tricks again. They recently claimed that they were the only station to cover the welcome home ceremony at Fort Drum(NE of Watertown,N.Y.)-attended by Pres. Clinton and Canisius' NIT game against Villanova.(Patti Candela handled

the Ft.Drum story,while Jeff Morrison did the Canisius story). However,where was WGR when Buffalo police commisioner Gil Kerlikowske unveiled his plans to consolidate the Queen City's police districts? NOWHERE! And,where were they the week before when Canisius was in the MAAC tourney? NOWHERE! The police precinct story was,I feel, was of more worth than U.S.soldiers returning home(in terms of how many people it affected). BTW,who's Jeff Morrison working for-WGR, Metro Traffic,Empire Sports Network or a combination of them? I thought he left WGR(ostenibly,it was beacuse I heard-and I can't verify this-that Jeff had inherited a large sum of money).

7. Finally,Andy Barrie(mid-morning talker at CFRB-1010 AM;news/ talk;The Source)will be one of the panelists on CFTO's special Our Province,Our Future-a Q & A session with Ontario premier Bob Rae- this Saturday at 7pm.

Chicken Man's alter ego is Dick Orkin.

He also is a very talented maker of radio commercials, and consults and gives programs on this very topic. I had the opportunity to meet him last year in Cedar Rapids, Iowa, at a meeting of the Cedar Rapids Radio Marketing Group.

I'm a technician at KRNA in Iowa City, and was setting up a sound system for him, a he was impressed that I knew who he was (I'm _only_ 25). I had heard his stuff as a kid growing up near Des Moines.

Nice guy... knows his specialty VERY well. I'm sorry I didn't have a chance to hear the whole program. The sales manager here at KRNA has his address, where I'm sure you could find out about tapes and such. I'll ask him and post it when I can.

Ryan Nelson (posting on AJ Bautista's account)

Mark Roberts (transvox@tyrell.net) wrote:

: that's my point--there's more money to be made in targeted overlooked
: audiences than the defenders of the status quo ante are willing to admit,
: for whatever reasons.

Yup. That was my initial point. Targeting is the key to success in
marketing; broadcast radio is not very targeted; this limitation is built
in to the physical medium itself; and therefore those of us with tastes
that are not being well-served by radio should save our energy -- instead
of complaining about our perceptions of the quality of broadcast radio,
let's turn our attention to more promising media.

Gosh, we all finally seem to being agreeing with each other....

csp@w3eax.umd.edu (Chris Spil N3FWR) says:
> Well look no further, same rules apply in the U.S. :) The only difference
> is the name.....We call the 'induction-loop' idea you mention 'Carrier
> Current'.

Golly, gee!!, not back when at the turn of the half-century when I was at the U of MD. When we put WMUC on the air, we tried "carrier current" - feeding the RF into the electrical power distribution system through a suitable and expensive capacitor. It worked in our test, but then the campus electrical system was entirely redone during the summer vacation and WMUC couldn't be heard ANYWHERE important on campus or elsewhere - too much attenuation in going through the newly-installed transformers, etc.

A year later, "induction loops" were installed around some of the dormitory buildings, which DID provide service. I think that eventually (nearly) complete coverage has been achieved this way.

If I remember correctly, the FCC rules limit the signal strength to a rather low value OFF-CAMPUS, but anything goes within the confines of the campus. The U of Maryland has a large suburban campus, close to a mile square.

From: wgsmith@netcom.com
Message-ID: <2modvf$c7p@vixen.cso.uiuc.edu>
Source record: 40603

Great article!

Further thoughts on modulation density:

1. With digitally-tuned, preset equipped receivers (increasingly the norm) there is no advantage whatsoever to being louder than the competition. TV folks have known for years that over-processed over-loud audio is more likely to drive away casual tuners-by than to attract them.

2. Listeners ears these days are accustomed to high-dynamic-range sources such as CDs cassettes, and videotapes, rather than to vinyl LPs and singles, which were frequently proccessed with compression during the mastering process (45s in particular).

3. For years, independent testing has shown that listeners (women, in particular) prefer lightly proccessed radio audio and (at least unconcious-ly) seek it out when presented with a choice.

4. There is tons of anecdodal evidence to support the theory that high quality audio attracts listeners, rather than causing them to ignore the higher-quality station in favor of something louder. In my market there are 2 nearly-identical Top 40/dance outlets. The less-proccessed of the 2 has nearly 4 times the audience. In San Jose, there are two AOR stations. One of them has for years been very lightly proccessed, the other has always been clipped & squashed within an inch of its life. Guess who is rated 3 to 1 over the other?

In most major markets there has been a trend towards more intellegent use of proccessing gear over the past 5 years or so. People are still listening. With the advent of competition from so many sources: DMX, car CD changers, and all of the other digital systems on the horizon, it would seem that we ought to be squeezing every possible scrap of quality out of our air chain rather than every possible scrap of loudness.

1001. SONY SRF-42

Newsgroup: rec.radio.broadcasting
Date: 1994-03-23 03:44:55 UTC
From: rrb@deja-vu.aiss.uiuc.edu
Message-ID: <2modvn$c7t@vixen.cso.uiuc.edu>
Source record: 40606

} csp@w3eax.umd.edu (Chris Spil N3FWR) enthralled us with the following:

} Also (although I know it 'd have added to the cost) it would ve been real
} cool to see a switch for narrow/wide bandwidth (taking advantage of AMAX)
} The listener can set the radio receiver in the 'wide' mode
} whenever the reception is solid so as to obtain the maximum
} frequency response, although can switch to 'narrow' mode in case of
} interference, especially at night.

I have a Sony SRF-A100 (a micro-boombox style radio w/a pair og
speakers and a diagonal tuning dial) and it does have a wide/narrow
swithc. It makes all the difference in the world. I love it. It
also has a Kahn/Motorola switch.

Am sensitivity is excellent, selectivity in the narrow mode is also
quite good (I received a 1000 watt daytimer, at sunrise, from North
Carolina at 880. Since I live in CHicago and have 50,000 watt WLS on
890 that was a superb catch, I think.).

Sound quality in the wide mode is excellent as well and stereo
seraration, while not superb, was more than adequate. It is
all-in-all a very nice radio. Small and compact.

FM reception is really bad, though. It overloads easily (the radio's
Wide/Narrow switch is also a local/distant switch when tuned to FM).
The stereo generator on FM is noisy too. Seems that the SRF-A100 is
the opposite of the average radio. Most radios neglect AM and
concentrate on FM. The srf-A100 seems to have done the opposite.
Note, there is not a stereo-mono swithc for the FM :-(.

} By the way is there an AM stero indicator on the walkman? (or just a 'tune'
} led). I

My SRF-A100 has ony a tune LED. It does help to find centr channel,
but nothing more.

} Well, anybody who has further experience with AM Stereo (not just technical
} but also from the user/listener's point of view) do share it with us.

I like it, but it is really outmoded now. Soon will come DAB which
promises to blow everything away.

Bill

1002. Press Release from Allan

Newsgroup: rec.radio.broadcasting
Date: 1994-03-23 03:44:56 UTC
From: Doug Schiffer <doug.schiffer@pplace.com>
Message-ID: <2modvo$c7u@vixen.cso.uiuc.edu>
Source record: 40607

SC> I received the following release from Allan Weiner concerning the seizu
SC> of the FURY radio ship. I am reproducing it here without comment. If
SC> would like to reply to Mr. Weiner, please do so by Snail Mail at the
SC> address below.

Pray tell, what motivated you to act as a frontman for this
organization?

SC> Ship of Dreams
SC>
SC> It was a ship full of dreams. Dreams of broadcasting on
SC> international shortwave. Dreams of sending hopeful messages from
SC> many people transmitted over the air.

As a regular listener to shortwave, I've noticed a steady increase in
what I call "Christo-fascist" broadcasting. By "Christo-fascist" I do
not mean to imply that all Christians are fascists. Far from it. But
there is a highly vocal minority that pollutes the loving message of
Jesus with a heavy handed dosage of hatred and money grubbing appeals.
"Brother" Stair is a prime example of this kind of stuff. There are now
so many of these charlatans that I'm having trouble recieving a lot of
the shortwave stations I'm interested in.

SC> The Voyager Broadcast project was the hope and dream of many.
SC> Financed by a man of God, Brother Stair of the Overcomer

"Brother" Stair may believe himself to be a man of God, but I can't
believe God would want to spew forth the hatred filled messages I've heard
coming from his station.

SC> Ministry, the station was to be an outlet for religious
SC> programming and the right of free speech.

"religious" programming 100% exempt from taxation. Send a contribution
and fund a Fascist for Christ today!

SC> The Voyager ship was a converted fishing trawler 140 feet long by
SC> 30 feet wide. She was planned to be fitted out with four
SC> shortwave transmitters, and was in the process of repair and
SC> restoration in Charleston harbor South Carolina.
SC>
SC> The ship was to set sail in early February for southern waters
SC> where she was to broadcast from a safe anchorage in Belize
SC> territory. (The Country of Belize is located on the Yucatan
SC> peninsula in central america about 600 miles south of the United
SC> States.) It was not to be so. On January 19, 1994 at 8:30 AM
SC> EST, The Federal Communications Commission aided by U.S. Federal

SC> marshals and the U.S. Coast Guard, sized the M.V. FURY and almost
SC> immediately began to debowel her of all her radio equipment.

You have to ask yourself WHY would he see fit to broadcast from a ship?
Such a location has many logistical problems. The only reason I can
think of is that he wanted to violate federal and international laws
regarding power levels, frequencies and so forth.

I see "Brother" Stairs as just another radio pirate, who in this case
wants to hide behind the banner of "freedom of religion". He may have
even deliberately brought on the wrath of the FCC, to use as evidence
that he's being "persecuted", and thereby get more gullible dupes to
send in a donation.

I would not put it past "Brother" Stair to send out a lie-filled
message, in order to get funds, and attempt to convince the public that
he is being persecuted by the "Evil" government of the USA.

>this is a wild guess-that Rogers is going to dump theirs.(Just a
>guess on my part. In any event,stay tuned...)

Shaw Cable, a smaller cable company may be making a move to purchase CFNY once the Rogers/Maclean Hunter deal goes through. As for 590, ugh! Who knows, that station's been a mess for years.

> 2. Staying north of the border for a minute,Charlie O'Brien
>has joined CJEZ-FM(classic hits/Jays/Leafs;Z-97.3)as its afternoon
>driver. He was PD at CKLW-AM/FM in Windsor,Ont.

CJEZ only carries the Leafs, not the Jays. The Jays are carried exclusively by CJCL (The Fan, 1430) For a while, they only carried the hockey games that the Fan couldn't carry since the Fan's first priority was baseball. You may have mentioned this before, but pending CRTC approval, CJEZ will be sold to Telemedia (they own The Fan). Redmond Broadcasting and Telemedia have been rapping about it for years, but CJEZ's recent power upgrade turns them into a class B station, which was probably a closing factor in the deal.

Thanks for letting me ramble,

Monica Becker,
Toronto.

Maybe a clarification is in order concerning your comment the CRTC only allows one ownership group to own two stations in a Canadian market.

In Windsor, ON (across the river from Detroit)...CKWW-AM (580), CKLW-AM (800), CIMX-FM (88.7) and CKLW-FM (93.9) are all owned by the same owner, CHUM Group, Ltd. What's odd about this is these are the only commercial radio statiWindsor...of course, there's two CBC stations and a university station. Did CHUM Groups get special permission from the CRTC...if that's the case, could it happen again?

This was one of my favourite shows on AFN in the early '80s.

I wonder what kind of stations (format) in the US did broadcast it and at what time. AFN had it at about 7:00 am.

Hm. WMHD-FM/Terre Haute, a college-owned noncom at 90.5 I once worked for, used to run it, back in '85/'86. I think we aired it three times a day, as one of our "top of the hour shorts" (ID, then into the TOTH, as we used to say). The show came on reel; we dubbed it to cassette since (1) we had no cart machines and (2) the average jock couldn't handle the reel machine in the studio.

Message-ID: <2mqo08$3vv@vixen.cso.uiuc.edu>
Source record: 40614

Chickenman originally aired in the mid 60's. I remember hearing it on my hometown station, WJET (AM), Erie, PA, which was the dominant station in town at the time (they were Top-40). Chickenman aired 2 or 3 times during morning drive, and was wildly popular. In the mid 70's, the series was re-syndicated (I heard it again on the station which was THEN dominant in Erie, WCCK (FM) -- the station was Top-40...oops, CHR).

The voice of Chickenman was Dick Orkin, formerly of the Dick Orkin/Bert Bertis team which produced many successful radio commercials (Time Magazine, K-Mart, Golden Skillet Chicken, etc.). Shouldn't be too hard to find Orkin.

A tip of the hat to "the greatest crimefighter the world has ever known!"

Source record: 40615

> I wonder what kind of stations (format) in the US did broadcast it and
> at what time.

I remember Chicken Man in the late 60s/early 70s on WCOL-AM in Columbus OH when they were still "Top 40". They didn't play it at any particular time, but rather worked it in a few times a day during the course of their regular DJ shows. I'm be interested in hearing if the show is still in production, and if so, where one might be able to hear it.

I also saw the post about Dr. Demento and wonder if his syndicated radio show is still alive.

Randy Miller (rsmiller@netaxs.com) wrote:

: If you thought the above was bad, you should have been in St. Louis when
: KMOX fired Harry Carey, the long time Cardinals (and now Chicago Cubs)
: announcer. The Chicago Tribune ran an excerpt of Harry's autobiography a
: few years ago in their Sunday Magazine, which described the situation at
: the station (which, at the time, I think was owned by Augie Busch) at the
: time of Harry's dismissal.

I *was* in St. Louis at the time. I actually remember when the St. Louis Baseball Cardinals announcing team was Harry Carey, Jack Buck, and Joe Garagiola. I was even a featured guest on Jack Buck's (non-sports related) nighttime show on KMOX from Stan Musial and Biggie's Restaurant around that era.

As far as I know, KMOX was never owned by August A Busch, Jr. Also, I don't believe KMOX fired Harry Carey, but rather Anheuser-Busch did. (The Baseball Cardinals announcers were employees of the Cardinals, I think, and the Cardinals were -- and still are -- owned by Anheuser-Busch.) If memory serves me correctly, Harry Caray remained at KMOX through the fall and/or winter season as an announcer for another sports team -- probably football, but I don't recall whether it was for the Football Cardinals (then in St. Louis) or a college team. For a time after Mr. Caray moved to Chicago, the Cubs games were carried in St. Louis on WGNU-AM (920), probably because people in St. Louis wanted to hear more of Haray Caray rather than to follow the Cubs, I would think.

I also believe, if memory serves, that Harry Caray's son Skip Caray was doing the play-by-play for the St. Louis Hawks basketball team, and that he followed them to Atlanta when the Hawks moved here. Skip Caray is still in Atlanta, of course; I don't follow the Hawks, however, so I don't know whether he still does play-by-play for them, but I wouldn't be surprised if he did.

Overview: **********

This is the weekly news digest for West Coast Live, San Francisco's Live Radio Show to the World (actually just NPR).

Welcome new affiliates: **********

Beginning this week, we're welcoming 6 new affiliate stations. Download the latest INFO bulletin for the latest details.

Welcome (soon to be) newlyweds: ********

It's spring time here on the west coast. If it wasn't for the spring equinox and the change to our clocks, nobody would notice. To celebrate April Fools Day, West Coast Live volunteers Keith Wiater and Jeanine Williams have volunteered to get married. It must be something in the

air.

The upcoming schedule: **********

Our producers work overtime booking talent onto the show. Sometimes they're so busy on the phone, they don't have time to keep the rest of us up to date. So join our audience at a live show. You too may be pleasantly surprised.

March 26th: **********

Country group, The Doubters.

Monologist, Josh Kornbluth.

Food scientist, Harold McGee.

Marc Abrahams, creator of "Journal of Irreproducible Results"

Dun Huang, Chinese music ensemble, music of the Silk Road.

April 2nd: **********

Bela Fleck and the Flecktones, Banjo jazz.

Charence Major, author, "From Juba to Jive: A Dictionary of African-American Slang".

Cynthia Heimel, author, "Get Your Tongue out of my Mouth, I'm Kissing You Good-bye".

Anne Lamott, author-in-residence.

Keith Terry and Crosspulse, body percussion.

April 9th: **********

Gamelan Sekar Jaya, Balinese (not Marty) orchestral music.

Author, Adam Hochschild, "The Unquiet Ghost".

Claire Peaslee, naturalist.

April 16h: **********

Tax-balm show - guests TBA.

April 23rd: **********

Naked Barbie Dolls, really hip musical group.

April 30th: **********

Kronos Quartet, world renowned contemporary sting quartet.

Weslia Whitfield and Mike Greensill, world renowned
cabaret extraordinaires.

David Tanenbaum, singer/songwriter.

Special Offers: **********

Drawing for Free Tickets!: *****

This week marks our 12th West Coast Live show. Be the 12th
person to email (see rules, below) the moderator at;

Owner-West_Coast_Live@netcom.com

and you will win two (2) free tickets to this week's live
show.

Rules: **********

The contest begins as soon as the moderator sends this
notice to the West Coast Live email subscription list.

The winner will be selected based on the time the entry was
sent (as opposed to the time the entry was received), no
sooner than 1 hour after the moderator receives the minimum
number of entries, and no later than 48 hours prior to the
live show.

The email must be addressed to;

Owner-West_Coast_Live@netcom.com

The email's header subject must contain the phrase; "Win
Ticket Drawing".

One entry per person.

The winner will be notified by email.

If the winner can't attend this week's show, the winner may
assign the tickets to a couple of friends.

The moderator's selection is final.

Free Coffee: **********

Wear an official West Coast Live shirt at the show, and you
are entitled to free coffee.

Rules: **********

Official West Coast Live T-shirts or sweat shirts only.

For a limited time, this offer is extended to shirts from
that old radio show, that are upgraded with an official West
Coast Live Shirt Upgrade Kit.

This offer is good for free coffee only from the West Coast Live snack bar. If anyone else offers you free coffee for wearing a West Coast Live shirt, let us know.

T-shirt Drawing: **********

On the last live show of each month, we give away an official West Coast Live T-shirt.

Rules: **********

To enter this drawing, you must drop a business card into our fish bowl. Any scrap of paper with your name, address, and phone number may be substituted for a business card.

One entry per person. You must be present to enter.

The drawing is held following the last live show of each month. You need not be present to win.

Tip of the Week: **********

Beakman is in town: **********

TV's Beakman, sort of a mix of Mr. Wizard and Pee Wee Hermann, is at the Exploratorium this Saturday. After West Coast Live, walk on over there and do some science, and say hi to Lester. The Exploritorium is about a mile west of Fort Mason in the Palace of Fine Arts. You can reach them at (415) 561-0360.

Downloading Additional Information: ****

You may download an information document giving background information on the show and the show's Internet service, by sending the following email message to;

LISTSERV@netcom.com

1013. AM TALK RADIO

Newsgroup: rec.radio.broadcasting
Date: 1994-03-24 01:04:47 UTC
From: whitt_s <whitt_s@bt-web.bt.co.uk>
Message-ID: <2mqovf$5cr@vixen.cso.uiuc.edu>
Source record: 40618

Rush Limbaugh seems to be on the ascendant right now. A few years ago
you couldn't tune the AM dial at night without hitting Larry King or
Jim Bohannon.

Can anyone update me with the most popular overnight AM talkshows
running today. By popular I really mean the number of stations
syndicated to a network or taking a show.

I'd be interested in whatever info is available but

Name of Show
Name of Host (any standby hosts?)
Where show originates (town or flagship station)
1-800 toll free number
how many stations carry the show
would be really helpful.

>From here in the UK it is possible hear quite a few US/Canadian AMers
at night so inevitably there's plenty of talk to hear. Mind you
Murphy's Law says that the signal fades at the top and bottom of the
hour so you're left wondering which station you're tuned to!

Info anyone? - thanks a bunch

****
Unfortunately the LED on the SRF-42 is only for tuning purposes only.
Gives no indication of AM stereo receptions. In terms of sensitivity and
selectivity sounds like the SRF-A100 has my SRF-A1 walkman beat. Sure
would like to know if any store still might have the SRF-A100 in their
stock. The SRF-42 certainly has shown what kind of audio quality potential
AM stereo can deliver. I am curious what Sony, or any other manufactuer,
has planed as far as AMAX/AM stereo rxcvrs. I am also interested in how
Sony felt about the customer demand for the SRF-42. If the public response
has been good then I could see Sony, or any other manufactuer, introducing
more feature filled radio products that offer AM stereo. I have been
collecting peoples comments on the SRF-42 and I am sure Sony could draw
some conclusions from what was said about the SRF-42.

>As far as different ethnic groups, at least in Los Angeles, most are well
>represented.

What does ethnicity have to do with it? How about people who enjoy the music of some of the (as far as the critics are concerned) outstanding artists of our time - artists who just happen to fall outside the accepted format definitions of the moment. Where does one hear Tori Amos on LA radio? Jimmie Dale Gilmore? Frank Zappa, fercristsakes??? Some low-wattage college station? Who plays Bruce Cockburn? Sam Phillips? Stephen Bruton?

Every one of these folks has been fawned over by various nationally-known critics, enjoys substantial sales (most of 'em anyway), and packs 'em in at live gigs (well, not Zappa...) - And not one gets played on commercial radio in LA. As long as we in the radio biz fail to address the large, unserved, overlooked audience for *quality* music - regardless of genre - we'll deserve whatever fate we get when alternative delivery systems step in to fill the gap.

Whew. I'm gettin' steamed up here!

From: 63wickert@cua.edu
Message-ID: <2mqq3l$6th@vixen.cso.uiuc.edu>
Source record: 40624

QUestion for anyone with an M Street Directory.
I picked up WKMZ on 97.5 in the NW suburbs of Washington DC. Is this
an area station or a DX pickup? I could not get it in NE D.C. the
previous week.
We would like to move our cable station to this frequency from 91.3 (and
anyone in DC can probably see why) and need to know if it is an area station
or a tropospheric aberration. We do not get this station on campus.
Please post or send reply to cua_wcua@cua.edu because this is not my
account.
****

1021. Another Perspective on Radio

Newsgroup: rec.radio.broadcasting
Date: 1994-03-24 01:24:08 UTC
From: Mark Roberts <transvox@tyrell.net>
Message-ID: <2mqq3o$6u1@vixen.cso.uiuc.edu>
Source record: 40626

Here's another perspective on radio and what it's like these days (compared to what it USED to be), from Larry Hoffman, in the St. Louis Journalism Review #164 (March 1994, St. Louis Journalism Review, 8380 Olive Blvd., St. Louis, MO 63132):

"...in the heyday of WLS, the jocks were responsible for their shows' content, developing bits and working the phones in rapid fashion with little reliance on help from others, such as producers or writers. The shows by these jocks were so good that several businesses around the country sell taped airchecks from those golden days.

"In contrast, today's radio 'personalities' apparently are not that accomplished. A recent issue of RADIO AND RECORDS, the major industry trade paper, carried 10 ads aimed at jocks who require help in putting their daily programs together. This 'help' ranges from joke services to daily FAXs of material to be blended into the regular act. ... In other words, the 'humor' you hear on a local station probably is also being used elsewhere."

: As of 3-10-94, WCCO Radio no longer has Phil Hendrie as a talk show host.
: Phil was one of those politically correct intellectual nerds who was always
: beating his drum and tooting his horn, satirically trying to convince his
: audience that he had all the answers to society's troubles. While some
: thought that he was funny, witty, wise, and so on, many listeners (including
: myself) thought that he was insulting, intolerant, disrespectful, and at times,
: unethical. I for one won't shed any tears for him, since he will probably
: B.S. someone that he can raise their ratings dramatically with him on their
: staff. Rumor has it that he is now working in the Miami, Florida area.
: You have my sympathies.

: John

Phil Hendrie's presence on WCCO-AM ended on Sunday March 13 at 2 AM.

It took some time, but after weeks of listening, I found his shows to
very entertaining.

I don't know the reason for his departure, but to me he seemed too hip for
WCCO-AM, a radio station trying to catch up to the 90's.

I believe he is going to WIOD in Miami.

joe hanson.

1024. San Diego Report

Newsgroup: rec.radio.broadcasting
Date: 1994-03-24 01:24:17 UTC
From: Chris.Carmichael@artecon.com
Message-ID: <2mqq41$6ui@vixen.cso.uiuc.edu>
Source record: 40629

Hello from Carlsbad, California:

KKLQ's 106.5, 7.4kw, morning duo of Jeff Elliott and Jerry St. James (Jef and Jer in the morn') may be:

leaving for KFMB-FM 100.7
staying at KKLQ/Q-106
creating waves for listeners . . .

Several San Diego county papers have reported that the $500,000 a-year team is considering walking out of their four year contract with Q-106. The San Diego Tribune reported that the duos lawyers were looking for exit clauses; while the Oceanside-based Blade-Citizen claimed that an internal memo to salesmen (and ladies) said they were not leaving the station.

It's rumored (in the press) that when Jef and Jer go on vacation on April 11, they'll be on B-100. Industry insiders say that it is actually worth it for KFMB to cover potential lawsuit damages. The once mighty B-100 has been sliding in ratings, and the 22-year general manager was fired two weeks ago (as reported last week).

KOGO, AM 600 5kw, U, (the sister of KKLQ) made the jump from carrying Q-106s music to talk format on March 21. Michael Reagan is heard at night.

KKOS-FM 95.9, 3.3kw, unveiled a new promotion. The bright `electric' yellow signs have been spotted around the north county area, with "KKOS Different."
On Friday, the Coffee Crew is out giving away ceramic mugs of hot java, a copy of the "Blade-Citizen" and free tickets. They will be giving away front row seats to Pink Floyd -- the front row seats! The winner will get to take them home with them.

KNX, 1070, 50kw, U, [Los Angeles] listeners in San Diego are growing tired of hearing six minute traffic reports for the LA basin. The SD Tribune reported that the CBS O&O station is getting many calls from San Diego on their toll-free line about the constant barrage of traffic reports every six minutes.

Yes, Shamrock also took over WMMS-FM and WHK-AM here, and, I assume, also
WOIO-TV (all were owned by Malrite). Now I'm not sure about the TV station but
I know they turned around after a month and sold WMMS/WHK to OmniAmerica, which
now has one of the three duopolies in this market (WMMS/WHK/WMJI).

Organization: NONE
Lines: 90
Distribution: world
Originator: rrb@deja-vu.aiss.uiuc.edu

> I bought a Sony SRF-42, recently, and I'm pretty impressed (for the
>most part). This radio proudly wears the AMAX Stereo logo and has a big, red
>sticker on the front that says:
>> ///AM STEREO\\\
><<< --------- >>>
> \\\FM STEREO///

I 'm not sure if its the 'same' or similar radio that I had bought back in the
mid 80's; it was a SONY SRF-xx walkman that was for both AM Stereo and FM
Stereo. Later on I found out it was discontinued because the interest for
AM-Stereo kinda died after a big peak (back then).
That SONY walkman had _both_ AM Stereo systems in existence back then:

* Motorola's C-QUAM
* Khan/Hazeltine's

> The frequency response seemed good (I can only tell by listening, since
>I'm stranded here at RIT, with my trusty audio generator and oscilloscope
>hundreds of miles away at home :( ). Besides that, I was happy just to own an
>AM stereo Walkman.

Listening to AM Stereo was very close to listening to FM stereo quality-wise,
daytime. However, the biggest problem I encountered was the additional
noise which resulted from listening to even slightly distant stations.

>This radio doesn't have a pilot signal detector for AM stereo, so
>the L-R channel is enabled whenever a signal is properly tuned in and the band
>selector switch is set to "AM stereo".

Yep.

> Besides its obvious function, setting
>the bandswitch to "AM mono" seems to decrease the audio bandwidth, although I
>don't know if the IF bandwidth is decreased.

Justl like with most walkman-type radios, the audio bandwidth is
reduced (on purpose) as soon as the radio is either automatically switched to
'mono' (because the signal strength is not adequate) or manually switched.

The logic behind this is ... if the listener decides to switch the radio reciever to 'mono', that's because s/he wants to reduce the noise... therefore, why not additionally help reducing the noise by attenuating the high end of the audio (where noise is most noticeable).

Which is unfair because ... what if the listener _willfully_ wants to hear a strong Stereo station in 'mono' ...? But then again, we have to remember that radios are designed with the 'average' listener in mind... :)

>Since C-Quam AM stereo is phase sensitive, a pop will be
>heard from the headphones if the radio is bumped or if the tuning knob is
>moved; this pop also makes the radio difficult to tune properly. I really wish
>that SONY had gone the extra distance and made this radio PLL tuned or, at
>least, put some AFC circuitry in the AM section.

I trully wish the FCC had gone with the Kahn/Hazeltine AM stereo system; besides the pops you mentioned, the Kahn encoded signal is less prone to atmospheric fading during night propagation (sky wave).
Oh well, politics...you know

>Another inconvenience I
>found is that in order to get the AMAX audio performance out of this radio, the
>bandswitch must be set to "AM stereo." This is a problem when listening to
>mono stations because it adds noise from the L-R detector to the audio, and
>some mono stations tend to introduce spurious phase modulation into their
>signals which can sound very annoying

Definetely; same with the Sony AM stereo walkman I mentioned.
Also (although I know it 'd have added to the cost) it would ve been real cool to see a switch for narrow/wide bandwidth (taking advantage of AMAX)
The listener can set the radio receiver in the 'wide' mode whenever the reception is solid so as to obtain the maximum frequency response, although can switch to 'narrow' mode in case of interference, especially at night.

By the way is there an AM stero indicator on the walkman? (or just a 'tune' led). I d personally find the AM Stereo LED much more useful than a 'tune' indicator. (it would serve in both finding out whether or not the tuned station is broadcasting in stereo and aid you in going into the center of the signal so that the stereo signal is received correctly.

>BTW... Does anyone know where I could get a schematic to the SRF-42? I'll bet
>that would be interesting to look at! ;)

Im not sure about this one but back in the mid 80's you had to get the schematics directly from the factory...(SONY tech center reps were of no help)

Well, anybody who has further experience with AM Stereo (not just technical but also from the user/listener's point of view) do share it with us.

1027. Radiotext(e)

Newsgroup: rec.radio.broadcasting
Date: 1994-03-24 01:24:25 UTC
From: Mark Roberts <transvox@tyrell.net>
Message-ID: <2mqq49$6uv@vixen.cso.uiuc.edu>
Source record: 40632

Purchased today in Westport:

A bizarre trade paperback named "Radiotext(e)." It is apparently #16 in a series called Semiotext(e), published by the Philosophy department at Columbia University (New York City).

There are more than 60 essays, arranged in the following categories:
Early Sparks Listeners
Hagiographies Control
Alternative Histories Cranks
Broadcasts New Approaches
Perpetrators Paranormal Applications
Extraterrestrial Possibilities

This is a thought provoking little book. Paid $12 for mine. s

Many of the essays make many of the same points AIRWAVES participants make: radio doesn't have to be stale and greedy, it should be thought about in new ways, and radio had better get ready for the ever-increasing fractionalization of audiences and the advent of narrowcasting.

There's also plenty of ammunition therein for "micro radio" advocates, along with a description of similar movements in Japan and the Netherlands (and maybe other places; I've merely scanned the book so far.)

If you can find it, buy it. If you can't find it, order it (ISBN 0-936756-94-2).

If for nothing else, you MUST have Dave Mandl's "How Awful Is the Radio in YOUR City? Take This Simple Test." You start out with 500 points, add or subtract scores based on what you describe, and then compare it to the following scale:
"-500 or lower : Even worse than I thought
"-200 - -499 : About average
"-1 - -199 : Not bad at all
"0 or greater : Check your math"

In article <2mmqrq$db8@vixen.cso.uiuc.edu>, charles.hobbs@support.com writes...
>
>
>WOWO-1190 (Ft Wayne, IN) is the dominant station on this frequency. There
>are several other stations, including WLIB-New York on 1190; most
>(including WLIB) are daytimers, a few run very low power (1.4 kW or less)
>at night.
>
I hope to see it stay this way. I'm planning to write to the FCC regarding
this license transfer and let them know I am totally against any
change in WOWO's power or clear channel status (including allowing anyone
to create interference at night, particularly WLIB).

>My suggestion: Since Inner City would own the two most powerful stations
>on that frequency, they should take advantage of this and provide
>simulcast programming during the night hours, with synchronized
>transmitters (not difficult).
>The two transmitters combined could cover the entire Northeastern United
>States, not only between New York and Indiana, but into Boston, Chicago,
>and even into parts of the Southern states.
>
WOWO has no problem doing this by itself. They also have an awesome
quality stereo signal. With my SONY XR-A33 which has AM stereo and
AM wide, I can easily fool almost anyone into thinking they are listening
FM when in fact 1190AM is tuned in.

>I'm not familiar with WLIB/Inner City programming, I believe it's black
>oriented, but that's all I know about it. (is it mostly music or talk?)
>Obviously, operating the two stations in tandem at night would provide
>enhanced, extended coverage to a very wide area.
>
I hope they leave the programming alone. Just what we need, another
satellite fed talk station. Up till now now they've done all local
stuff and I hope to see it stay that way. I also hope to see them stick
with the current format.

I know nothing about WLIB and have nothing against them personally
or their format. I do get annoyed, though, when someone buys a successful
operation with the intent (or so it appears) to damage it. WOWO is successful.
I've seen a blurb or two in some magazines (Radio Ink?) and
it is highly rated in its home market. If you ever listen at night,
you'll hear callers from all over the east half of the country requesting
songs. I've even heard others from my area (Buffalo NY) calling. It appears
the only reason they were sold is that Price Communications is getting out
of the business (they recently sold their Buffalo stations).

Scott T.

1029. TEXAS List 3/18/94 - Part 1 of 3 (Symbols, 540-1440)

Newsgroup: rec.radio.broadcasting
Date: 1994-03-25 21:28:41 UTC
From: "chip (c.d.) kelley" <chipk@bnr.ca>
Message-ID: <2mvl29$ei0@vixen.cso.uiuc.edu>
Source record: 40634

I haven't posted this in while. Among the most recent changes: KIKK-FM Houston dumps Moby in the morning; Shreveport LA gets its 3rd FM country as KITT enters into a duopoly with KVKI; Waco does the reverse and returns to two FM country stations as KJNE becomes KBRQ (well, you can still get KSNN, KSCS, KPLX, KYNG, KYCX, KPLE, KHHT and the two remaining Waco stations, so there isn't too much loss of country music); children's radio format reduces from two to one station in Texas (KYYD Abilene changes); KQXC Wichita Falls signs on the air; and more...

List covers all Texas stations plus selected nearby bordering stations from Louisiana, Arkansas, Oklahoma (I added some I originally forgot - KFXI Marlow and KDDQ Comanche), New Mexico, and Mexico (although I won't swear to how accurate the Mexican stations are since it's hard to get them to say their call letters or find info on them).

If you notice any errors, let me know and I'll correct them.

1032. Christian-run stations (looking for)

Newsgroup: rec.radio.broadcasting
Date: 1994-03-28 02:04:33 UTC
From: Mark@mpharris.demon.co.uk
Message-ID: <2n5dvh$bl4@vixen.cso.uiuc.edu>

Cross-posted to: rec.radio.broadcasting,rec.music.christian

Orpington Radio Cracker is due to start broadcasting on November of this year (in FM mono.) It's a community station, run by Christians rather than an evangelical station.

If any of you people are involved with Christian-run stations, please drop me an eMail, since there are various issues I'd like your opinions on. For those of you who find it meaningful, your prayers would be appreciated too.

Finally, what would be _GREAT_ would be for all of you to send "best wishes" cards to our new DJs... we're a youth project, and for many of the people, this will be their first involvement in radio (or the Church, for that matter.) Please send such to:

Orpington Radio Cracker,
40, Mosyer Drive,
Orpington,
Kent,
BR5 4PW
ENGLAND

Best wishes to all... thanks in advance...

William A. Goldsmith (wgsmith@netcom.com) wrote:

: What does ethnicity have to do with it? How about people who enjoy the
: music of some of the (as far as the critics are concerned) outstanding
: artists of our time - artists who just happen to fall outside the accepted
: format definitions of the moment. Where does one hear Tori Amos on LA
: radio? Jimmie Dale Gilmore? Frank Zappa, fercristsakes??? Some low-wattage
: college station? Who plays Bruce Cockburn? Sam Phillips? Stephen Bruton?

: Every one of these folks has been fawned over by various nationally-known
: critics, enjoys substantial sales (most of 'em anyway), and packs 'em in
: at live gigs (well, not Zappa...) - And not one gets played on commercial
: radio in LA. As long as we in the radio biz fail to address the large,
: unserved, overlooked audience for *quality* music - regardless of genre -
: we'll deserve whatever fate we get when alternative delivery systems step
: in to fill the gap.

: Whew. I'm gettin' steamed up here!

If you want to go nuclear, come to Kansas City.

Actually, thanks to KLZR in Lawrence, the situation isn't *quite* as bad as
it used to be. But improvement is more than certainly possible.

I think the deserved fate has already partially arrived, at least in these
parts. Kansas City (and even worse, Topeka) have reputations in the
business as being very difficult markets in which to make a reasonable
profit.

Between constipated playlists and incompetent execution, radio stations
(with a few exceptions) are driving off the kinds of audiences advertisers
want. Does that seem suicidal or what?

charles.hobbs@support.com wrote:

: So, who's getting ignored?

: As far as different ethnic groups, at least in Los Angeles, most are well
: represented.

: We have a couple of brokered-time stations, for more specialized
: interests. . .

Good for you. We don't have any. In fact, I don't know of any within 500 or so miles of here (Chicago probably would be the closest).

We do have KKFI, which has some ethnically oriented programs (two hours a day in Spanish, for instance) but whose broadcasting is marred by political infighting, general irrelevancy to the community, and a certain amount of instability in its broadcast schedule.

My ethnic group (German-American) basically gets represented by a polka show on Sunday afternoons from a 250-watt daytimer near Omaha. And then there's the Leo Greco show that's been on WMT Cedar Rapids since the good Lord invented dirt. That's on Sunday mornings.

And, of course, that's assuming that polka music is all German music, which is not correct from both directions (other Mitteleuropa ethnic groups have it, too, and, in Texas, it forms the base for nortena/ranchera music, additionally, there are other kinds of German music).

* * * * !!! OUR FINAL NEW WORLD JAZZ PERFORMANCE !!! * * * *

First, the Committee to Bring Back JAZZY 100 would like to thank all of you who have taken time to come out to hear some of our most talented and well-loved jazz artists over the past several months. We would also like to thank those who have come out to support the effort to Bring Back JAZZY 100 and Bob Linden's JAZZY Music Scene. We would hope that you will all keep in touch with us as we will be putting on a number of JAZZY music events in the Washington D.C. area in the weeks and months to come.

We would now like to invite you to the *last* performance of our New World Jazz Concert Series. So, please come out and join us for ...

==========
COMMITTEE TO BRING BACK
==========
J A Z Z Y 100

>[Moderator gets out trusty M-Street... WKMZ Martinsburg West Virginia.
>97.5 12,500 watts 1008 feet. Format CHR.]

WKMZ is indeed located in Martinsburg, WV; although you can barely pick it
up in the DC metro area -- and thus it shouldnt pose a threat to your proposed
cable frequency -- it can get 'strong' at times under favorable propagation
conditions (such as ducting, and especially temperature inversions (i.e. when
we have weird sucessions of hot and cold days, etc.)).

WKMZ's geographic location (just like 92.5 WINC's) is undoubtedly a big asset:
way up there at Skyline Drive.

On the other hand, just to show you that normal reception of 'KMZ is really
weak in DC, you may _also_ receive WPST, Trenton, NJ (now _THAT's_ a DX!)
as well as 3WD (WWWD, Charlottsville, VA) at 97.5 under truly favorable
conditions.

WKMZ officially makes a strong apperance on your FM dial as you approach
495 and I-66 (Fairfax, Vienna, etc.)

From: arcana@netcom.com
Message-ID: <2n5dvs$blo@vixen.cso.uiuc.edu>
Source record: 40643

I'm wondering if there's anyone out there who's had experience in trying to get a radio station to play local bands (like a "local band hour" or something similar)? Is there a good way to approach a radio station about this? From a program directors view, why would he/she be interested in playing local bands??

Any help in this area would be much appreciated! :-)

-Jeremy

I work a swing shift with a long commute and have been listening to Ray's shows on and off for years. He has very liberal attitudes and opinions. I agree with some things he says and disagree with a lot more. It is interesting listening and he will sometimes bring a different perspective on a problem that I would never have thought of.
I like listening to him on KGO some nights of the week, and then switching to Rush's show which is on at rerun from 12:00 to 2:00am to get a look at the other side of the pendulum. It gives a good overview to both sides of current issues.
Ray's has many supporters that call in, but there are also many callers that argue with him. This is usually a lost cause; Ray is very good at expressing his opinions and denouncing those opposed to them.

1044. Radio Watchers -- Kansas City (KPRS)

Newsgroup: rec.radio.broadcasting
Date: 1994-03-29 03:24:55 UTC
From: Mark Roberts <transvox@tyrell.net>
Message-ID: <2n8727$qv1@vixen.cso.uiuc.edu>
Source record: 40649

Excerpts from "In quest to stem violence, a disk jockey takes on rap," front-page story in the Kansas City Star, 3/28/94:

Tony G, a deejay with KPRS-FM...was slamming the hits during his evening show recently when his radio career took a dramatic turn.

Doing his normal routine, he was counting down the audience's favorite songs, a format he calls "The Hot Eight at 8."

The suspense built as he inched toward the No. 1 song. The audience was ready to hear Snoop Doggy Dogg's "Gin and Juice."

But instead of playing the rap tune, which features the lyrics, "Rolling down the street smoking indo, sipping on gin and juice..."

Tony G sprang something else on his young audience ... "I just told them I wasn't going to play it on the air that day or any other day," Tony G said recently.

Tony G is Tony Gregg, 33, a 1978 graduate of Van Horn High School who says he cares deeply about his community.

"The song could be construed as promoting drinking and driving," Gregg said. "With my show geared toward (teens), I've got to take a stand against that stuff."

"Indo" in drug slang often refers to marijuana.

*** *** *** ***

So he's banning songs on his 7 p.m. to midnight show that glorify violence, are obscene or hateful to women or advocate anything illegal. The rest of the station's deejays have followed Tony G's lead.

"This is not about censorship," said Michael Carter, president of KPRS Broadcasting. "This is about being sensible."

Selectively pulling negative rap music off the airwaves is just one move KPRS has made in recent weeks as it expands its role to help reduce violence.

The moves began in January after Carter read the Kansas City set a record for homicides last year, 153.

In response, he produced a series of tough-talking public service annoucements.

"The issue of crime in Kansas City has hit an all-time high," Carter says in the announcements. "And it is time the media take a stand on this rapidly growing problem.

"Now I'm not going to give you a two-minute speech about what we could do -- could have done or anything else that you've heard before.

"My message is simply this: Put the dman guns down, and stop the senseless waste of life. Now, if you don't like my message, I frankly don't give a dman. But you will hear this message until it sinks in ... "

The announcement airs periodically every day.

"I just got frustrated," Carter said. "And I decided that I should use our radio station to help. We can't stand back and watch this thing grow into the wild, wild West."
Carter has other plans. He wants to start a gun turn-in effort with the cooperation of the police department in April. Instead of the gun buy-back programs, his project will encourage people to turn in their weapons voluntarily.
*** *** ***
Listeners have been supportive. Tony G has been inundated with letters. Few are against the ban.
"Parents have been calling," Gregg said, "Kids have been calling."
...A mother of three sons ages 13, 14, and 18 wrote that gansta rap was "black exploitation at its worst."
"As a result, black boys barely old enough to talk are calling black females (derogatory names," she wrote. "And believe me, ...the target audience for this debauchery is our black youth."
Even the Missouri Governor's Task Force on the Causes & Prevention of Urban Violence wrote a letter congratulating the station.
*** *** ***
Not everyone is pleased.
KPRS' ban on negative rap is another example of society's blaming its problems on gangsta rap, said Danny Alexander, the former president of the Greater Kansas City Coalition Against Censorship. Silencing the music only silences the voices of many black people who, otherwise, would have no voice. That, Alexander said, isn't being done by accident.
"Controlling rap music is an attempt to control those voices," he said....
*** *** ***
"We're all taking different positions," Carter said. "But I know what I'm doing. And I'm not doing this for ratings. I'm doing this for results."

Background:
KPRS (103.3) is one of the nation's oldest minority-owned radio stations, and the top rated non-country station in Kansas City.

Depending upon where you are, there might already be a show like the one
you're looking for. I know that in Phila., WMMR-FM (93.3) features "Steet Beat"
every Sunday @ 11:00 PM and it is basically just what you want (I think), an
hour long local music program.

The way to get radio stations to play a local band is to have the band
make a hit record. (OK, so you knew the smart ass answer already. Sorry.)

We've worked with a couple of local bands from time to time on
promotions. They were guests now and then on our morning show, and
one of the bands had a pretty good CD, so we played cuts from it when
they were on.

Worked great -- lead singer quit and the band broke up a couple of years ago.

Y'wanna hear about the scary biker woman who plays drums and was ready to
hurt me painfully if we didn't help her put a band together so she could
work for world peace?

Had another local band that was supposed to be hot stuff, on tour and
all, getting big ink and TV coverage. I went out and bought their CD (no
promotional copies here) and listened to it, start to finish. GAWD what
an assemblage of self-righteous caterwauling! You gotta remember, any
local band we might play has to compete with Led Zeppelin, the Who and
that one tune... you know the one... that T-Rex thing.

If we were in Austin or Athens or Seattle or some place where live music
is happening, that'd be one thing. The only local artist from Salt Lake
to ever win a Grammy is the Mormon Tabernacle Choir.

1047. Boston AC Notes(Was : NYC AC Notes)

> about 4 times an hour)
^^

I think WMXV 105.1 in NYC and WBMX 98.5 FM in Boston are using the same ad agency for their TV/print ads. If it wasn't for the frequency and the calls, I couldn't tell the difference between seeing a TV spot for 'MXV on a NY station(on cable) and a local TV spot for 'BMX -- same actors in the ads, same MIX logo and colors, same slogan, same video clips of artists played on a station...

Here's the AC situation on the FM dial in Boston(stations listed according to populairity) :

WMJX - 106.7FM, Boston -- "MAGIC 106.7 Continuous Soft Rock" --
A hardcore AC sound; their midday,afternoon,evening,night DJs put you to sleep before the music does.(last year they dumped long-time morning guy John Kosian and brought in former WBZ personality good guy Tom Bergeron to liven things up a little; chatty Tom is doing the best he can at a music-oriented station) No instrumentals(only Kenny G here and there) on the playlist.
A six-hour jazz brunch on Sunday morning.

WBMX 98.5 FM, Boston -- "MIX 98.5"; in the last 3 years with this format they had steady increases in every ratings period; very uptempo sound; practically no AC ballads(only at night); happy/friendly on-air staff.

WSSH 99.5 FM,Boston - "WISH 99.5 - Easy Favorites of Yesterday and Today";
The only FM station on the dial where Barry Manilow's records haven't been lost on purpose. Neil Diamond, Barbara Streisand, George Michael rule the CD player here. Elevator music with vocals. They added a weeknight jazz/new age show(10pm-2am) after the only commercial jazz station(WCDJ) in the market adopted a new format(country) and new calls(WBCS) last May. They have a long-standing tradition of playing an instrumental version of the national anthem every Saturday and Sunday at 12noon.

WLYT 92.5 FM, Boston/Haverhill - "Lite 92.5 - New England's Radio Station";

The station is not in the primary market and doesn't have the ideal signal to be considered a player in the AC battle but of all 3 outlets mentioned above,

92.5 has an excellent mix(there's that word, again!) of faster lite rock
#1 pop-chart hits from '70s-'80s pop-rock makers (Eurythmics,
Simple Minds, Steely Dan, Doobie Brothers, Steve Miller,Genesis etc)

On the AM dial only 2 come to mind and you'll need a decent receiver in order
to obtain any kind of reasonable listening quality :

WJIB 740 AM -- You're stuck in this elevator,baby : continuous beaitiful
music on this low-power station.

WXKS - 1430 AM "Music of Your Life" - A mix of Big Band/Beautiful Music/ultra-Soft AC.

-Mark

Hi! In response to your posting to rmc, I thought I'd mail you and give you my best wishes for Orpington Cracker. I was involved as a Technical Op. with Ballymena Radio Cracker last year (as far as I know, we had the biggest total of Cracker stations 2 years running - 17000 in 1992, and 22000 last year!!!) I don't think we'll be back this Christmas though, do to the missive from Oasis Headquarters that they won't support Cracker stations this year - bit of a bummer, but maybe we'll be back in a few years' time!

Anyway, all the best with RC - if you need any more info, get in touch (mail, phone or e-mail). And, if you happen to need a technician cum DJ......(awww no, I've got a job next year - oh well, maybe some day we'll get a Christian radio station in NI...).

Believe it or not, Chickenman lives in many of our hearts. It aired not only on WLAV in Grand Rapids, but also on WGRD (later) in that city. I am most recently the PD of the latter, on my way next week to start mornings on WASH-FM in Washington, D.C. I heard the show originally on WHUT/Anderson, IN (my hometown) and rescued a stack of reel-to-reels of the show from a massive tape cleanup while Assistant PD of WNCI/Columbus circa 1985. So, yes, some shows still live - I couldn't bear to see such art end up in the dumpster. I also know that Dick Orkin's Radio Ranch is producing new Chickenman episodes as I type. I was considering running the new Chickenman on WGRD before my departure.

I know no one is going to change your mind on that, but as someone who knows Craig and Norm Miller, trust me...they were there. At least they were at the Tower down the street...I know. I stood in line in front of them jabbering with both about how quickly the record companies stopped servicing them after they switched to the Arrow format.

And buying a whole library is not in the cards, as they're using Denon CD cart players, and they need individual CD's for each cut they play. A library of even 100 CD's would only allow them 100 cuts.

clark%etd.moe.decnet@mdcgwy.mdc.com wrote:

: Actually, when arguing with a black female caller about some racial subject,
: one of them said "you're acting like a nigger, you're acting like a nigger."
: As you can imagine, there was an uproar which led to their firing. They
: went on hiatus, took a racial sensitivity course and subsequently were rehired.

You're probably right about the epithet. I have such an aversion to that
word that I probably blanked it out.

However, Steve and D.C. very definitely were canned. They surfaced in
Denver, an uproar ensued, and they were gone within weeks. They resurfaced
at WKBQ at the new 104.1 dial position after Zimmer swapped its frequency
with that of WKKX.

Just to make sure my memory was correct, I checked back copies of the M
STREET JOURNAL, which reported on Steve and D.C.'s rehiring in its 1/5/94
issue.

BTW, the owner of Boonville's KWRT, Dick Billings, has filed a rulemaking
to add a class A allocation to Jefferson City. This will curtail WKBQ's
signal to the west (it's barely receivable in Columbia now--the old WJBM-FM
from Jerseyville at 104.1 could be picked up in mid-Missouri all the time).
The speculation in Columbia is that Billings will network the 104.1
frequency (once it's allocated, which appears airtight) if he gets it with
the station he's about to open at 93.9 (presently a class A but apparently
upgradable to C3).

Volume 4 Number 11-1 10-14 March 1994

THE GOVERNMENT

Broadcasting Bill Approved

TALLINN, March 10. The Government approved the draft law on broadcasting and passed it to he parliament for consideration. The Draft Law establishes radio, television and teletext as forms of broadcasting. Under the draft, one Estonian language television channel, one Estonian language teletext channel, two Estonian language radio channels and one Russian language radio channel will be financed from the state budget.

The draft bans tobacco advertising and advertisements that promote the consumption of alcohol. It forbids the use of newscasters and political commentators in advertising. It also establishes the principle of political balance under which the national broadcasting channels must give all political parties equal air time.

>from friends in radio, it is a difficult business. Pointers, suggestions,
>and stories will be greatly appreciated !!

I got a 4-year degree in Broadcasting from Purdue (1969), and learned the basics in my dorm carrier current station. My formal classes were pretty much worthless for modern broadcasting--lots of radio drama and classical composer pronunciations. Got my first job doing weekends at WAMA/Selma AL while I was in the Air Force.

To escape the small market-small pay job you have to have three things going for you: TALENT, HARD WORK, and LUCK. (Though it has been rightly said that "The harder I work, the luckier I get.") Radio--at least the on-air part, which is what most people think they want at first--is simply show bizz. Something like 96% of professional actors are unemployed at any given time. Same in radio--too many talented people and too few good jobs. And more and more entry-level, small-market jobs are disappearing as marginal radio stations in the little towns turn to satellite feeds and fire their DJ staffs.

As for becoming a music director, you really will have to put some time in as an on-air jock before you can hope to move up (though more often than you'd think, newcomers move up very fast if the PD or MD leaves without proper notice--which is not an infrequent occurance).

I was wondering if anyone out there admires Ken Nordine's accomplishments
with his Word Jazz program. I'm trying to find out where I could find
more information on his career. Can anyone help?
Also, I'm just starting out at my college radio station and would
appreciate any advice on my future career that anyone has to offer.

Thanks
David Zachritz

I have been listening to Scotty Ferrell on Sports Entertainment Network in Sacramento for about 6 months. (He is on 4-6 am out of Las Vegas). Does anyone know where he is now! He is no longer on in the morning?

Also, John London use to be on the morning zoo KMEL 106.1. I have not listened for a while and now he is gone.

If you could please shed some light on the subject it would be great !

Source record: 40662

I am the new chief engineer of a college FM/AM radio station. We are entirely student-run. What I'm trying to get across to them is the fact the there is to be NO sewaring or profanity at all on the air. The general manger and I seem to be in agreement with the fact that saying any of the "seven bad words" will result in immediate dismissal from the broadcasting from station. However, when it comes to saying "the hell with it" (and variations of it) and implying obcentites, we differ. I say none at all, the GM says she's not sure. I'm wondering what policies regarding profanity, obscenity, and swearing other stations use. I think that by showing them what policies other stations have, we will be able to come to an agreement.

Thanks in advance for your help. Please feel free to respond by e-mail to mreames@vt.edu.

The changes that we talked about in our last post keep occurring in Market #62. In the past month, 50K FM WWSH switched calls to WZMT(The Mountain) and dropped its automated soft AC programming for a live classic rock approach. The previous format languished in the ratings, dropping to almost a one share in Fall '93 book. The change is expected to draw listeners away from Allentown's WZZO(Z-95)which gets a two share in the market by default. Before the switch, listeners in southern Luzerne county(Hazleton and the area south of Wilkes Barre) did not have a local AOR or CR station to listen to. Heritage AOR WEZX (Rock 107) has only a 3K signal and doesn't reach the area south of Wilkes Barre well. Rock 107's strength is concentrated in Scranton and the rest of Lackawanna county and northern Luzerne county. One station that could be affected by WZMT is WKRZ. WKRZ benefits from having one of the few signals that covers the Hazleton area. WZMT may draw some of KRZ's Hazleton numbers, especially their 18-34 males who up until now have had little to choose from. WZZO is a heritage AOR licensed to the Allentown market. In the last book, they scored a two share that could be attributed to the lack of a rock oriented station in the southern end of the market. We don't expect this station to take much away from Rock 107, as WZMT's signal appears to be as weak to the north as Rock 107's is to the south. WZMT's Program Director is Kevin Fitzgerald, a veteran of the Wilkes Barre/Scranton and the Binghamton, NY market. He's worked at the former WTLQ and did middays at Binghamton's AOR WKGB.

While the market just gained a classic rock station, it has just recently lost one as well. 3K FM WKQV(95.7) dumped its satellite classic rock format and again picked up the Sports Entertainment Network (S.E.N.). KQV (then WINH-The Winner) used S.E.N. for part of 1993 before dumping it and the old call letters. The frequency has had three different sets of calls over the course of a year or so. Confused yet, well you're not the only one. The station has Don Imus for wake up duties. They've been airing Imus(satellite from WFAN/NYC) for about six months. The owners hope that the sports minded listeners in the market will go for the sports talk format. The station lacks any rights to broadcast any major college or professional sporting events as WILK, WARM, WICK and WEJL have got that part of the game covered. The station will have to try to air as much high school and small college sports as possible. It remains to be see if this station will eventually show promise, a little consistency shown by them could go a long way.

Some more ratings news comes your way as we have learned some of the first monthly trends of the Winter '94 Arbitron book. More disturbing news for market leading CHR WKRZ. The monthly finds them off 12.6-11.2. This is the lowest 12+ numbers the station has seen this decade. The decline started with a fall book that showed a drop from 14.9-12.6. As recently as the Spring of '93, WKRZ was tied for the number one 12+

share(CHR) in the country. Most of the recent losses for KRZ have come in their upper demos. For the first time in many years, WKRZ is no longer #1 25-54. Suspuehanna's AC WMGS is now the market leader in this demo. The consensus among market observers is that KRZ's older listeners are growing up and away from the CHR. KRZ has tried to hang on to the upper demos with strong marketing and a relatively conservative and oldies dominated playlist. KRZ has to be one of the few CHR's that still features an oldies show on saturday night. Susquehanna CHR WBHT continues its slow and steady growth in the first trend with a 3.3-3.4 showing. WBHT continues to strengthen its teen and 12-24 numbers at the expense of WKRZ and WSKS.

There has been some movement in market personalities in the last couple of months. WKRZ brings in KKRZ(Portland, OR) night guy Rich E. Cunningham to fill their open 7p-mid position. THe station moved Music Director and former night rocker Jerry Padden to the 9am-Noon slot and PD Ken Medek to the Noon-3p position. Medek originally worked 10am-2pm. Early impressions of Cunningham have been favorable. Cunningham has a good track record having previously worked at New York City's Z-100. CHR WSKS(formerly WTLQ) has seen its share of changes over its first four months of existence. The station's original morning team of Jeff Knight an Uncle Bob Pagani have exited. Knight has popped up at WSBG in Stroudsburg and also does weekends at WBHT. They we're replaced by former WYOS (Oldies 92) Morning Man and PD Captain Jack. Captain Jack's tenure at WSKS lasted barely 6 weeks as he exited Friday March 18th. Little is known about his replacement who goes by the air name Bubba.

One other minor change to note, Gold WSGD changed its handle from Solid Gold 94 to the moniker Cool 94.3. No change in call letters or format was made.

We'll continue to follow the WZMT story and look forward to updating you on the latest monthlies in our next report.

1062. The Arrow hits Sacramento

Newsgroup: rec.radio.broadcasting
Date: 1994-03-29 03:46:34 UTC
From: "Lance Ballance"
Message-ID: <2n88aq$spp@vixen.cso.uiuc.edu>
Source record: 40667

The "Arrow" format continues to collect steam.
The latest switcher? KXOA-FM Sacramento. 107.9 FM.
For many years they were "K-108 FM" and were the
heritage AC station in Sacramento. Not too long ago,
they became "Extra 107.9" without a major change
musically. Now they are playing "Rock And Roll Oldies
from the 60's, 70's, and 80's" It's understandable to see
them change since Sacramento had 3 AC stations, and
since they kept getting hammered in recent books. I found
out about the change during my airshift on KOST today
while speaking with Bryan Simmons, another displaced
Sacramentan, and also by reading old E-Mail from Bud
Kress (Who should be a Sacramento RadioWatcher.)
Lets hope that they never change the call letters on KXOA.
Those are heritage calls in Sacratomato, and shouldn't go
the way of KROY, KZAP, etc. I'll vent my frustrations about
the ARROW format at some other time.

'Til next time...

Mark wrote:

} Here's another perspective on radio and what it's like these days
} (compared to what it USED to be), from Larry Hoffman, in the St. Louis
} Journalism Review #164 (March 1994, St. Louis Journalism Review, 8380
} Olive Blvd., St. Louis, MO 63132):
} "...in the heyday of WLS, the jocks were responsible for their
} shows' content, developing bits and working the phones in rapid fashion
} with little reliance on help from others, such as producers or writers.
} The shows by these jocks were so good that several businesses around
} the country sell taped airchecks from those golden days.
} "In contrast, today's radio 'personalities' apparently are not that
} accomplished. A recent issue of RADIO AND RECORDS, the major industry
} trade paper, carried 10 ads aimed at jocks who require help in putting
} their daily programs together. This 'help' ranges from joke services
} to daily FAXs of material to be blended into the regular act. ... In
} other words, the 'humor' you hear on a local station probably is also
} being used elsewhere."

As a founding member of the American Comedy Network, the first of the major national services to market in this fashion, I must come to the defense of the air personalities who use ACN and other services to spice their shows: if the stuff is good, it's no different than ripping off David Letterman's Top 10 concept (done in *every* market), programming Dr. Demento (done in *every* market) or the King Biscuit Flower Hour (ditto) or playing the nation's most popular music (likewise). Comedy services are not necessarily used as a crutch (although God, and Wynn Richards, knows hom many small market jocks have sent out arichecks filled with ACN material as their own), but rather as additional material to be massaged and reproduced if necessary to give a local spin on the subject matter. And few morning teams can support the infrastucture necessary to turn out the quality of some of the song parodies and fake commercials offered by ACN (for whom I still do The Laugher, Telephone Tabloids and the occasional sports puker voice) and Fun Factory from ProMedia (for whom I do David Letterman's announcer Bill Wendell and the Guests of Our Show fake promos).

I must also point out that the comedy writers (like Alan Ray of TeleJoke) who provide daily fax services are no different than the writers of newspaper columns whose work is syndicated nationwide. There is no insidious plot to keep this market exclusivity from the American people; rather, it is yet another tool that is used, hopefully intelligently, by some successful morning air talent to put on a great show day after day.

Having said that, let me say how much I appreciate Mark's missives on the Midwest. Thanks.

I used to listen to him in the early eighties as an insomniac college student. He was very well informed and entertaining. Most of the people who called with contrary views were eaten alive.

During one memorable broadcast, he had me practically rolling on the floor the way he had put one caller to shame. Later, a truck driver called to say that he'd laughed so hard he had to pull over. Ray also used to attack the ads on KGO. He's mellowed a bit since then.

International Freedom of Expression eXchange Clearing House

Date: 28 March 1994

GUATEMALA: Broadcaster Mario Tulio Roca shot and injured

Originator: Centro centroamericano para la proteccion del
periodista y la libertad de la expresion (CEPEX, San Jose)

Radio and television broadcaster Mario Tulio Roca was injured on
24 March 1994 when a group of men shot him four times in a
Guatemala City suburb.

A police report indicates that Mario Tulio Roca was driving in
his car when a group of men fired at him from another car. Other
sources suggest that the incident was an armed robbery and that
Mario Tulio Roca was shot when he resisted and then fled.

Mario Tulio Roca is a well-known local personality who appears on
the Am and FM radio stations of the "Corporacion" company, as
well as its "Channel 25" on television.

His family reports that he is recovering in a private medical
clinic and that doctors have said that his condition is unstable.
Other reports suggest that he may lose an eye from one of the
bullet wounds.

RECOMMENDED ACTION:
Please write Guatemalan authorities expressing concern at the
attack on broadcaster Mario Tulio Roca; and asking for a full
investigation into the incident and assurances that those
responsible will be brought to justice.

GUATEMALA: El locutor Mario Tulio Roca herido de bala

Originador: Centro Centroamericano para la Proteccion del
Periodista y la Libertad de Expresion (CEPEX, San Jose)

El locutor de radio y television Mario Tulio Roca fue herido el
24 de marzo de 1994 cuando un grupo de hombres le dispararon
cuatro veces en un suburbio de Ciudad de Guatemala.

Un informe policial indica que Mario Tulio Roca iba conduciendo
su carro cuando un grupo de hombres armados le disparron desde
otro carro. Otras fuentes sugieren que el incidente fue un robo
armado y que el locutor recibio los disparos cuando se resistio y
entonces huyo.

Mario Tulio Roca es una personalidad muy conocida quien aparece
diariamente en la compania la "Corporacion" una empresa de radio
en AM y FM y tambien en el "Canal 25" de television.

Sus familiares informaron que el locutor fue internado en una
clinica privada y que los doctores han dicho que su condicion es
de caracter reservado. Otros informes sugieren que podria perder
un ojo porque una de las balas la recibio en el rostro.

ACCION RECOMENDADA:
Por favor escribir a las autoridades de Guatemala expresando
preocupacion por el ataque contra el locutor Marco Tulio Roca y

solicitando que se lleve a cabo una investigacion completa sobre
este incidente y que los responsables sean llevados ante la
justicia.

-------------------------------------------------------------

GUINEA: Independent radio station "Radio Frequence Gandale" closed

Originator: Reporters sans frontieres (RSF, Montpellier)

"Radio Frequence Gandale", Guinea's first independent radio
station, was closed on 9 March 1994 by police. The radio station
had been engaged, for two days previous, in technical tests when
police raided the offices and interrupted their work. Employees of
the station had to leave the building after the police threatened
to destroy the equipment.

The director of "Radio Frequence Gandale", Boubacar Diallo
Sankarella, had obtained all the necessary permits to operate the
radio. The ministry of communications had approved the technical
tests. No reason was given for the closure of the radio station.

RECOMMENDED ACTION:
Please write Guinean authorities protesting the closure "Radio
Frequence Gandale"; and asking that it be allowed to resume its
technical tests and eventually to broadcast without fear of
harassment.

International Freedom of Expression eXchange Clearing House

Date: 11 mars 1994

GUINEE: Fermeture de la radio privee "Radio Frequence Gandale"

Initiateur: Reporters sans frontieres (RSF, Montpellier)

La radio privee "Radio Frequence Gandale" a ete ferme le 9 mars 1994 par les gendarmes guineens. La premiere radio privee guineene procedait, depuis deux jours, a des essais techniques quand les membres des forces de l'ordre ont pris possession des locaux et interrompu les activites de la station. Le personnel de la radio a du l'evacuer, les gendarmes menacant de detruire les installations. Le directeur de "Radio Frequence Gandale", Boubacar Diallo Sankarella, avait pourtant engage toutes les demarches administratives pour legaliser la radio. Il semble que le ministere de la Communication ait meme accorde a Boubacar Diallo Sankarella l'autorisation de proceder a des essais techniques. Aucun motif officiel n'a ete donne pour expliquer cette fermeture.

ACTION RECOMMANDEE:
Veuillez ecrire aux autorites guineens pour protester contre la fermeture de la station de radio privee "Radio Frequence Gandale"; et demandant qu'on puisse continuer a des essais pour, ensuite, diffuser ses emissions sans etre inquieter par les autorites.

First, let me start by saying that I am using my wife's access. I am program director at a Z-ROCK affiliate in Columbus, Ohio, -and- the host of the local show which airs for two hours on Saturday Night (7-9pm). Surprisingly enough, Central Ohio has a pretty active music scene and some impressive talent, Which makes it an easier sell.
We air a local show for a number of reasons (I am not the original host nor am I responsible for it hitting the air). As a satellite affiliate it gives us a chance to project a local presence while being tied to something bigger (ask network tv affiliates). Keep in mind that all radio stations have to make money. If you want a local show, sell it! This is an excellant opportunity to work hand in hand with nightclubs, restaurants, and numerous other sponsors! If you can sell the show and make money (and you can make some good money), than a station would be foolish to turn it down. The -buzz- is good too! Businesses like the PR that comes with supporting a local program. If you present it right it can be a real positive for a station and a money maker. Not something that gets stuck on the air on a Sunday at midnight under the heading of public service.

Quite often people who love radio for the music, forget that radio is a business. Ask Dr. Demento how he ever got the music he plays on the air? No doubt, someone was willing to pay for it! (Ooh, that sounds so capitalistic!)

Hi Folks!!!

I'm gonna pass this one back to the ARJ 'cause there maybe a point or two of interest to your readers. The author, Ty Ford, writes for the "Radio World" news magazine and quite often provides reviews of new equipment. I met him at meetings of the Baltimore Chapter of the Society of Broadcast Engineers and have forwarded to him several postings of the ARJ.

Interesting stuff. I've got a place in DesPlaines Il (Polyline) that sells empty
CD cases in lots of 200 for.264 each for that guy in Europe that's looking for them.

Inother news, "Bob Here" who used to be on WHFS, is back on the air at 103.1 out
of Annapolis. He's doing what he likes to do...lots of Greatful Dead. Since
103.1 has been pretty much a heavy metal station for the last few years, he

sticks out a bit. Don' t know where that one's going.

NAB was a frenzy. Digital Audio Workstations were coming out of the ground lik

> the shortwave stations I'm interested in.

Welcome to the club. Like it or not, the programming you may actually
enjoy on certain domestic SW stations cannot be broadcast without the
stations' earning their profits from the time buyers of questionable
religious motivation.

> SC> The Voyager Broadcast project was the hope and dream of many.
> SC> Financed by a man of God, Brother Stair of the Overcomer
>
> "Brother" Stair may believe himself to be a man of God, but I can't
> believe God would want to spew forth the hatred filled messages I've heard
> coming from his station.

Brother Stair does not own a station, he buys time on a bunch of them,
including WRNO, WWCR and a large numer of local AM staitons across the
country.

> "religious" programming 100% exempt from taxation. Send a contribution
> and fund a Fascist for Christ today!

But so is your local church, Billy Graham and Jerry Farwell. Where do you,
or the IRS, draw the line.

> You have to ask yourself WHY would he see fit to broadcast from a ship?
> Such a location has many logistical problems. The only reason I can
> think of is that he wanted to violate federal and international laws
> regarding power levels, frequencies and so forth.

Economics. It's better to own your own staton, then pay someone else to
carry your program. It's cheaper to build your station on a ship than rent
or buy land. And is another country gives you a better deal on leasing the
other transmitter, you can move it.

> I see "Brother" Stairs as just another radio pirate, who in this case
> wants to hide behind the banner of "freedom of religion". He may have
> even deliberately brought on the wrath of the FCC, to use as evidence
> that he's being "persecuted", and thereby get more gullible dupes to
> send in a donation.

"Pirate" does not and cannot apply. He is a broker time buyer, and perhaps
a pirate wannabe. If you use your definition that a time buyer who's
political view you don't like is a pirate then you can call Rush a pirate
too. His show may go out as a barter, but there are certain stations he
WANTS to be on, (like WRNO), so he has to sweeten the pot, so to speak.

> I would not put it past "Brother" Stair to send out a lie-filled
> message, in order to get funds, and attempt to convince the public that
> he is being persecuted by the "Evil" government of the USA.

He probably would, but only after he gets the equipment back from the FCC.
The thing you don't seem to realize is that he really believes what he says.
He's right on the money about half the time, and off the wall the other
50%.

Remember, I am not defending Bro Stair, Allan is. I am only stating fact
as it is; as it will be, or would have been, well then that's a different
story and my opinion could change.

WOWO is a great station I hope the new owners don't mess it up. When Westinghouse sold it to Price I was worried that they would screw it up. And they did for a while but then they came around. I remember the contract of sale was rumered to have a clause the Bob Severs the morning man had to stay for a year after the sale date. Bob and his on air partner for meny years, Jay Gould, at one time had a better than 50 share of the market(before FM was popular). For the old timers around Jay was a song writer in the old days of the big band. I only remember him as the Farm Service Director of WOWO. I am not that old!!! I am wondering if Westinghouse or Goup W sold all the stations in the stable, KDKA, WBZ, etc.

I have listened to WOWO on US 24 in Roanoke Ind. and you are right it does sound better in AM than in FM. My wife's lives in Huntington Ind. Just down US 24 from the transmitter. My radio in my Pick-up tunes the stations almost identical all I have to do is flip the AM FM switch and not even turn the dial.

WOWO the big sound in the midwest. OR 50,000 watt station of the big business of farming.

1082. Boston Radio Watcher - 03-29-94

Newsgroup: rec.radio.broadcasting
Date: 1994-03-31 02:26:52 UTC
From: nhmas@gauss.med.harvard.edu
Message-ID: <2ndcdc$o8v@vixen.cso.uiuc.edu>
Source record: 40687

* Pyramid's CHR outlet WXKS-107.9FM introduced its new GM yesterday. He's Matt Mills, 52. Mills arrives from Cleveland radio land. Most recently he was GM and president of WNCX-FM and WERE-AM, both owned by Metroplex Broadcasting.

Mills' first order of business in Boston will be Pyramid's takeover of Ardman's urban dance outlet WJMN-94.5FM which should take place sometime in late April/early May when FCC is expected to give its blessing on the $22 million deal. This will be Boston's 4th FM duopoly.

Mills replaces John Madison,44, who left WXKS in February after being its GM for the last 10 years. Madison is now with Polygram Distribution Group in NYC. Madison left just in time to avoid a very difficult duopoly situation facing Pyramid Broadcasting in the Boston market.

Mills indicated that he wants to keep 'JMN from eating into 'XKS Top 40 audience. I don't think Mills has to worry about 'JMN stealing listenrs from KISS. The trouble for Pyramid is that they simply overpaid for 94.5 - they threw $22 million for a station with an unattractive audience('JMN salestaff has been grumbling for months about inability to bring more advertising dollars to a station with most of its listeners between 12-18 yrs old). I think duopoly has really inflated the prices for some of these stations - WJMN is a perfect example. Mills will now have to come up with a way to make Pyramid's investment pay off. It clearly can't be done with the present format.

Ardman, 'JMN's previous owners, could afford the urban dance experiment because they bought the station some 7 years ago(before the recession hit) for half what they're selling it for to Pyramid and made their money back long time ago. In the last couple of years, Ardman management was more interested in pissing off Pyramid management and having fun with it than in building a solid FM audience on 94.5. They(Ardman) would come up with differnt gimmicks and change station images(Zoo 94.5, Z94.5,Jam'n 94.5) and keep racking some good ratings in Gen X(18-29) demos for a short while until the station didn't sound new anymore and listeners went back to the same spot on the dial where they came from.

CHUrban format has proved one thing in Boston -- it can stay relatively popular but it just can't be sold. The new guy in town got some work to do now...

* WBCN-FM's owners, Infinity, and the station's union(includes on-air staff, engineers, productions, sales) signed the new labor agreement on Friday(3/25), a week after the old pact expired. The major sticking points came from the sales' dept. WBCN is one of the few stations in the country that has a unionized sales staff.

-Mark

1083. Radio Watchers -- Kansas City (KMXV)

Newsgroup: rec.radio.broadcasting
Date: 1994-03-31 02:26:53 UTC
From: Mark Roberts <transvox@tyrell.net>
Message-ID: <2ndcdd$o90@vixen.cso.uiuc.edu>
Source record: 40688

Is it a format change? Or just a different slogan? What's going on at KMXV (Mix 93.3)?

Today (Mar. 30) the station dropped its old slogan ("Mix 93.3 Means Variety") and began using this slogan:

"The new sound of Mix 93.3--Today's Best Music."

The playlist sounds more hit-oriented than before, but the Michael Bolton crap still sneaks in every once in a while.

At 6:50 tonight, the station played UB40's "Red, Red Wine." Not exactly cutting-edge any more. Still, it's not Whitney Houston, either.

After seven o'clock, the station played "Linger" by the Cranberries (which was considered a modern-rock tune six months ago). A tune from Blind Melon was promoted as well.

Shortly thereafter, the station played phone calls (purported to be) from listeners saying, "I really like your new format," (that's an exact quote) and other such things.

(For REAL authenticity, why not have someone call up and say, "I just LOVE your heavily consulted rotation!")

If KMXV really HAS become a CHR station or at least an energetic Hot AC, it will be competing against rimshot signal KISF ("Kiss 107.3").

However, in recent weeks, Kiss 107.3 has itself shifted its playlist to more rap- and R&B-oriented selections. Presumably, the station is targeting some of the younger demos who may be listening now to urban contemporary KPRS ("Hot 103 Jamz").

That's a risky proposition: KPRS has a very loyal audience in Kansas City's Black community, thanks to heavy involvement and identification with its listeners.

A few modern-rock-oriented tunes have also crept onto the KISF playlist; however, that field is still left largely to Lawrence's KLZR ("105-9, The Lazer"), which has a small but loyal audience in Kansas City despite a signal that is difficult to receive due to cross-modulation and multipath from hilly terrain.

On the north side of Kansas City, there may be mild competition from St. Joseph's KKJO (K-Joe 105), which puts in a respectable signal in that part of the metro area. However, KKJO never appears in Kansas City's ratings.

One wonders, though, if KMXV has changed its "image" enough to make an impact. It's still using the slogan "Mix 93.3."

KMXV is owned by Apollo Radio, which also owns mainline adult-contemporary KUDL (98.1).

Maybe it's like that old Saturday Night Live sketch:

"It's a dessert topping."

"It's a floor wax."

"Noooo...it's BOTH!"

1084. Denver AOR Battle/Syndicated Radio Shows

Newsgroup: rec.radio.broadcasting
Date: 1994-03-31 02:26:55 UTC
From: randeemann@aol.com
Message-ID: <2ndcdf$o92@vixen.cso.uiuc.edu>
Source record: 40689

The well planned market takeover strategy continues in Denver as Jacor is ready to swallow up the long time ratings leader, KBPI. It was almost 4 years ago that Jacor bowed KRFX The Fox. A classic rock station that soared to the top of the ratings. They attacked heritage AOR KAZY and eventually bought it. They changed the format to go head to head with the heavy KBPI...also a heritage station. Now they are buying KBPI and moving it's frequency to the KAZY frequency. Many suspect the old KBPI frequency will go country. I must give Jacor a hand. They entered a market with 3 AOR's and now they own all spectrums of the demographics.
****

This is not a shameless plug. I have two syndicated radio programs free to your station on a barter basis. You've read about Classic Dance Traxxx in Billboard. Now it can be yours! It's a two hour show with the classic dance hits from the 70's,80's and 90's set in a live atmosphere and personalized to you market and the sound of your station. Also I have a one hour program called "All Funked Up". It's the only syndicated funk show in the U.S.! Both shows come hosted or un-hosted. Demo's are available by E-Mailing me (RandeeMann@aol.com).

Being the CE my opinion is that you are responsible for interpreting FCC regulations. The station manager, however, is generally responsible for policy. Once the two of you reach an agreement it no longer really matters what the rest of the world is doing. Technically it's your station and you have the right to allow anyone on the air you choose for whatever reason you want.

Interesting stuff, I'll try to respond to some of your points.

a. I mentioned ethnicity because that's *usually* what's brought up when people discuss radio formats neglecting certain types of programming However, you seem more interested in particular musicians, so . . .

b. Of all those musicians you've mentioned, I'm only familiar with three: Tori Amos, Bruce Cockburn and Frank Zappa:

Bruce Cockburn had a moderate success on AOR stations in 1985 with "If I Had A Rocket Launcher" . . .

Tori Amos *might* get played on KROQ or some similar "modern rock" station, perhaps not. Two local newspapers described her performances as soliliquies about her childhood, etc., interspersed with a few piano chords.

Frank Zappa's material is not normally played on the radio because so much of it is off-color. A few of his tamer pieces have played on Doctor Demento and other "alternative" programs.

c. Demand. Even though these artists have their followings, their audiences are still small compared to more "mainstream" performers. Which brings me to. . .

d. Critics. Sure, these artists get good reviews from critics. So? Nine times out of ten, the music critics who write in newspapers, etc., are more interested in promoting their own taste in music, than reviewing anything objectively. Everything they like is "quality, progressive, redeeming" music, everything they don't is "mediocre". And, if the artist

has some political agenda that the critic agrees with, then that artist is the Second Coming, regardless of musicianship. Therefore, I don't put too much stock in what the "critics" say.

e. Getting this stuff played on the radio. If a particular song sounds close enough to an existing commercial radio format, it will have a better chance of being intergrated into commercial radio (rather than being segregated into college radio, or other outlets). Zappa, for example, might have a chance of being played on a station which plays Pink Floyd, etc., rather than on a CHR or Top-40 operation.

(I don't know where Tori Amos would fit in. Probably Pacifica. . .)

Finally, since all of us have our own musical tastes, isn't it somewhat presumptuous to talk about "quality" music, anyway? Why would Tori Amos, banging on the piano and whining about sexual politics or whatever, be more "quality" than Whitney Houston crooning some bad country-western song?

1087. AM/FM RADIO GUIDE

Newsgroup: rec.radio.broadcasting

Does anyone know of an up-to-date guide or listing of AM/FM stations in the U.S., containing call letters, frequency, location, power, and perhaps even format? The National Radio Guide and Radio on Wheels (an incomplete listing) are both several years out of date.

john tryneski
jtry@press.uchicago.edu

[Moderator's Note: For my money it is M-Street Guide. $33.00 and it has all you asked for and more. Call them at (212) 473-4668 ask for Pat Mc Crummen. Great book, and reasonably priced. Bill]

Be willing to work for a small station and lousy hours until you've got some experience to move up the ladder. Weekend overnights is a great place to start!

Once you've worked on your on-air sound, you can shift your focus to honing some skills as a music director. That includes reading all you can on music research, understanding the local market and learning one of the leading music scheduling packages, MusicScan or Selector. Try to weasel your way into a station that will give you a chance to learn these things after you have developed your on-air persona.

Good luck!

Hi. I am a graduating senior, so I am just getting started in
radio,too. But here's what I have done so far:
1. Two-year communication degree
2. Four-year communication degree :) with a lot of radio
classes and TV classes
3. I went to a small local station and got a job as a board-op.
4. I worked at my college station and used the facilities to
learn EVERYTHING I COULD!!!!!! (4 first, then 3)
5. I took whatever radio job I could get--see #3
6. I am being very patient, with eyes and ears open
7. I am keeping in touch with people I know "in the business"
8. I am applying for related jobs--sometimes if one separtment
doesn't need you, they could refer your resume to another department.
THis is where those "other skills" come in handy!! :)

Don't know if this will help you, but it seems to be working for me so
far. Good luck--

Shannon

1090. KPRS in Kansas City

Mark,
I found your commentary on Tony G at KPRS interesting, I would appreciate
it if you kept us informed on how the show works out for them, perhaps
other station could follow their lead.
Larry Plato

Best estimates are just that.

>to get a radio station to play local bands (like a "local band hour" or
>something similar)? Is there a good way to approach a radio station about
>this? From a program directors view, why would he/she be interested in
>playing local bands??
Jeremy--have you tried a COLLEGE station?? I work at one, and we are
usually very willing to play local guys. In fact, one of the local
bands that we were playing got a contract with a record company. Not
that it was our station that did it, but ti certainly didn't hurt.
Record companies have been known to look at CMJ once in a while, and
bands like Soundgarden and REM got their start on college stations. If
you want to know more, email me at slamber1@mason1.gmu.edu :)

1093. URGENT: HELP SAVE WOWO RADIO!

Newsgroup: rec.radio.broadcasting
Date: 1994-03-31 05:14:13 UTC
From: fybush@world.std.com
Message-ID: <2ndm75$9hp@vixen.cso.uiuc.edu>
Source record: 40698

My sources in Fort Wayne (OK, OK, my girlfriend's family!) have been keeping me well-supplied with clippings from the Fort Wayne News-Sentinel (N-S).

If these "rumors" about WOWO and WLIB are only rumors, then the N-S must have egg on its face. This is serious business. Everyone the N-S talked to in the Fort Wayne broadcast community believes Inner City is after WOWO just for the signal -- and they're right. Why else would a company whose stations are all aimed at urban audiences buy a station whose signal reaches predominantly a rural area?

Back to the N-S: A front page article from March 23 notes that WOWO has twice given WLIB permission to run at night: once after the Rodney King trial to keep the calm in Harlem (dammit, I was in New York that night and never listened!!!), and once to run Jamaican election returns in 1989 (the FCC denied that request). The N-S quotes Tony Richards, GM of crosstown WQHK AM-FM/WMEE-FM:

"There's no question WOWO has the same effect on Fort Wayne that football has on Green Bay. It puts Fort Wayne on the map."
